GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013
Date Made Active in Reports: 01/28/2014
Number of Days to Update: 78

Source: EPA
Telephone: N/A
Last EDR Contact: 04/08/2014
Next Scheduled EDR Contact: 07/21/2014
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013
Date Made Active in Reports: 01/28/2014

Next Scheduled EDR Contact: 07/21/2014
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Data Release Frequency: No Update Planned

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/11/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

INDIAN VCP R7: Voluntary Cleanup Priority Lisitng
A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008	Source: EPA, Region 7
Date Data Arrived at EDR: 04/22/2008	Telephone: 913-551-7365
Date Made Active in Reports: 05/19/2008	Last EDR Contact: 04/20/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

State and tribal Brownfields sites

BROWNFIELDS: Municipal Brownfields Redevelopment Grant Program Project Descriptions
The Illinois Municipal Brownfields Redevelopment Grant Program (MBRGP) offers grants worth a maximum of $240,000 each to municipalities to assist in site investigation activities, development of cleanup objectives, and performance of cleanup activities. Brownfields are abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active potential for redevelopment.

Date of Government Version: 01/27/2014	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 01/28/2014	Telephone: 217-785-3486
Date Made Active in Reports: 03/06/2014	Last EDR Contact: 04/28/2014
Number of Days to Update: 37	Next Scheduled EDR Contact: 08/11/2014
	Data Release Frequency: Varies

BROWNFIELDS: Redevelopment Assessment Database
The Office of Site Evaluations Redevelopment Assessment database identifies the status of all properties within the State in which the Illinois EPA's Office of Site Evaluation has conducted a municipal Brownfield Redevelopment Assessment.

Date of Government Version: 01/27/2014	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 01/28/2014	Telephone: 217-524-1658
Date Made Active in Reports: 03/06/2014	Last EDR Contact: 04/30/2014
Number of Days to Update: 37	Next Scheduled EDR Contact: 08/11/2014
	Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/20/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/20/2014	Telephone: 202-566-2777

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/10/2013	Telephone: 202-307-1000

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/18/2014	Telephone: 202-564-6023
Date Made Active in Reports: 04/24/2014	Last EDR Contact: 04/28/2014
Number of Days to Update: 37	Next Scheduled EDR Contact: 08/11/2014
	Data Release Frequency: Varies

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2013	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 01/03/2014	Telephone: 202-366-4555
Date Made Active in Reports: 02/24/2014	Last EDR Contact: 04/01/2014
Number of Days to Update: 52	Next Scheduled EDR Contact: 07/14/2014
	Data Release Frequency: Annually

SPILLS: State spills

A listing of incidents reported to the Office of Emergency Response.

Date of Government Version: 06/28/2013	Source: Illinois EPA
Date Data Arrived at EDR: 07/03/2013	Telephone: 217-782-3637
Date Made Active in Reports: 08/29/2013	Last EDR Contact: 04/09/2014
Number of Days to Update: 57	Next Scheduled EDR Contact: 07/28/2014
	Data Release Frequency: Varies

SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 07/18/2012	Source: FirstSearch

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/11/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/13/2014	Telephone: 312-886-6186

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted.
Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

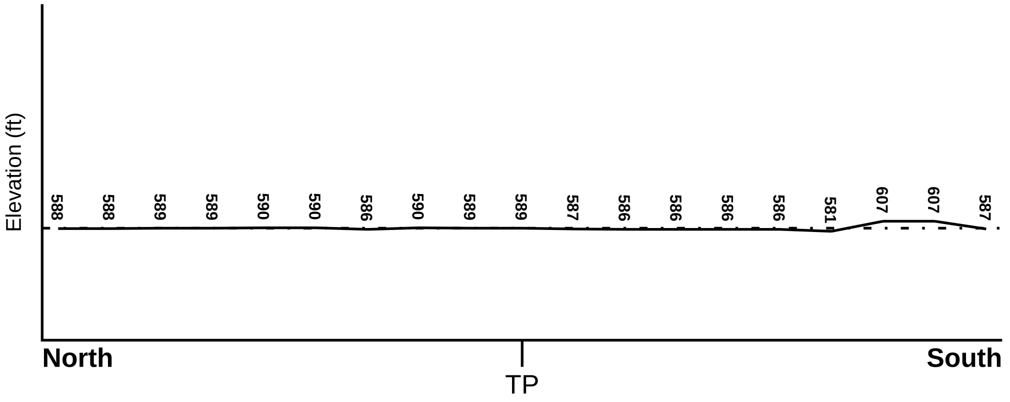
TOPOGRAPHIC INFORMATION

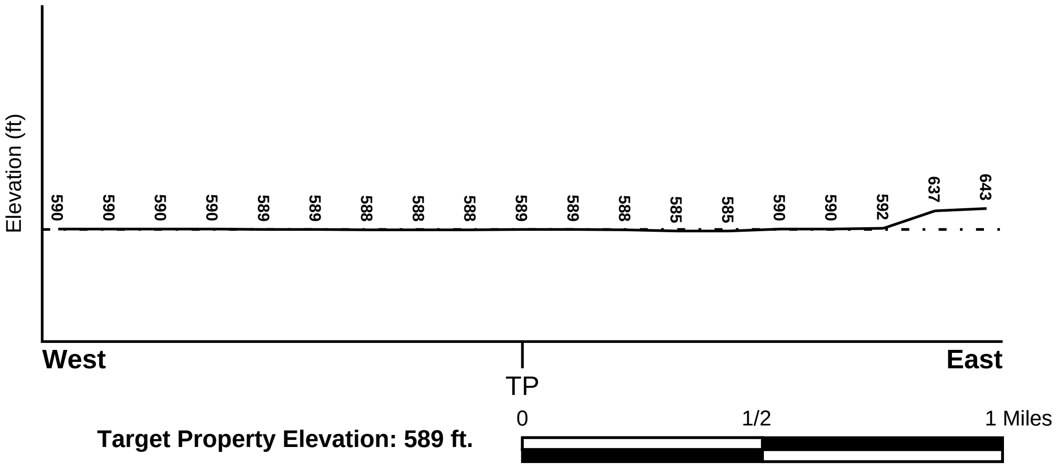
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 589 ft.

Source: Topography has been determined from the USGS 7.5’ Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
COOK, IL	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 17031C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LAKE CALUMET	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile South
Site Name:	Land & Lakes #2
Site EPA ID Number:	ILD981531882
Surficial Aquifer Flow Dir.:	N TOWARD THE LITTLE CALUMET RIVER.
Measured Depth to Water:	not available.
Hydraulic Connection:	While a hydraulic connection between the near-surface lacustrine and glacial drift deposits aquifer and the underlying Silurian Dolomite bedrock aquifer is unlikely, a downward vertical ground water flow is present.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
D46	1/2 - 1 Mile South	N
49	1/2 - 1 Mile WNW	W

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Silurian
Series:	Middle Silurian (Niagoaran)
Code:	S2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBANLAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Bedrock Max:	> 0 inches

Soil Layer Information							
	Boundary			**Classification**			
Layer	**Upper**	**Lower**	**Soil Texture Class**	**AASHTO Group**	**Unified Soil**	**Permeability Rate (in/hr)**	**Soil Reaction (pH)**
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:	silt loam fine sandy loam loam fine sand
Surficial Soil Types:	silt loam fine sandy loam loam fine sand
Shallow Soil Types:	sandy loam
Deeper Soil Types:	silt loam sand loamy sand loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5’ Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5’ Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5’ Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

RADON

State Database: IL Radon
Source: Department of Nuclear Safety
Telephone: 217-785-9958
County Radon Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR’s Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Qualifications of the Environmental Professionals

Paul D. Waite, P.E.

Senior Project Manager

Mr. Waite provides direct client services and technical guidance to clients and Carnow Conibear staff in the performance of environmental site investigations, site remediation projects, and site remediation design.

EXPERIENCE

Mr. Waite has 20 years of environmental project management experience, as both an environmental consultant and a government regulator. He has conducted over 300 Phase I and Phase II Environmental Site Assessments on residential, commercial, and industrial properties throughout the United States. He has contributed to active remediation systems for soil and groundwater contamination. His clients have included major oil companies, insurance providers, lending institutions, and governmental agencies.

EDUCATION

BS, Civil Engineering
Southern Illinois University, Carbondale, IL

PROFESSIONAL CERTIFICATIONS

Licensed Professional Engineer – Illinois, Florida
40-Hour OSHA HAZWOPER
8-Hour OSHA Site Supervisor Training

PROJECT EXPERIENCE

Broward County Florida Government
As a Project Manager for the Broward County Florida Environmental Assessment and Remediation Section, Mr. Waite enforced State and County regulations concerning soil and groundwater contamination from Leaking Underground Storage Tanks, petroleum spills, chlorinated solvents, arsenic, pesticides, PCBs, and other contaminants. Reviewed Remedial Action Plans, Site Assessment Reports, Dewatering Plans, and No Further Action Proposals. Inspected and oversaw operations of active remediation systems. Managed sites with Brownfield Site Rehabilitation Agreements and reviewed Due Diligence Assessments.

Brownfield Site Remediation and Redevelopment
Mr. Waite was the regulatory project manager for a 4.25-acre parcel that was redeveloped for future use as a public library and commercial complex in Pompano Beach, Florida. Contamination issues included Leaking Underground Storage Tanks and arsenic. Following remediation, regulatory closure was granted for the site with institutional controls. The local municipality entered into a Brownfield Site Redevelopment Agreement and was able to recoup approximately $600,000 in remediation tax credits.

Golf Course Assessment and Redevelopment
Mr. Waite was the regulatory project manager for a 120-acre golf course in Davie, Florida. Petroleum, arsenic, and pesticide contamination was detected at the site. The property was purchased and redeveloped by the Florida Department of Transportation to incorporate stormwater management areas. Regulatory closure was granted for the site with engineering and institutional controls. The local municipality purchased the property and operates it as a public golf course.

Former Arsenal Assessment and Inspection
Prepared environmental summary reports of U.S. Army environmental activities at a former arsenal property near Joliet, Illinois. Reviewed and summarized documents from the 1940’s through the 1990’s. Performed environmental site assessment activities and asbestos inspections at the facility. Contamination issues included organic chemicals associated with the manufacture of explosives, Leaking Underground Storage Tanks, chlorinated solvents, and unexploded ordnance (UXO).

County Courthouse Asbestos Inspection
Performed an asbestos inspection of a County courthouse building in Central Illinois. Prepared asbestos abatement specifications and participated in pre-bid and pre-construction process.

Small Business Administration Site Assessments
Performed Phase I and Phase II Environmental Site Assessments in Colorado, Florida, and Georgia in accordance with the Small Business Administration protocols in response to potential loan foreclosures.

Underground Storage Tank Monitoring and Upgrades
Managed the quarterly groundwater sampling and regulatory reporting at over 45 Leaking Underground Storage Tank sites for a major oil distributer client in Northern California. Over time, expanded the oversight program to over 200 sites. Also performed and managed the soil and groundwater sampling required during the 1998 Underground Storage Tank upgrade activities.

Nohemi Melero
Environmental Specialist

Nohemi Melero performs performs and oversees environmental engineering, site remediation, and environmental site investigation projects. She performs Phase I Environmental Site Assessments, hazardous materials surveys, and oversees UST removals and groundwater investigations.

EXPERIENCEN

years experience in environmental consulting services.

EDUCATION

BS, Environmental Science
Roosevelt University, Chicago, Illinois

PROFESSIONAL LICENSES/REGISTRATION

Hazardous Waste Operations and Emergency Response 29 CFR 1910.120 - Trained
Confined Space Training - OSHA 29 CFR 1910.146 - Trained

PROJECT EXPERIENCE

Various Private Clients
Perform numerous Phase I Environmental Site Assessments to assist clients in purchasing decisions of various properties. Perform site inspections, review background information, title searches, reviews of Freedom of Information Act (FOIA) requests, zoning, Sanborn, aerial, wetland, flood zone, regulatory databases, and USGS maps regarding site history, geology, hydrology, and potential contaminant migration pathways. Evaluate potential sources of environmental concerns and provide recommendations.

General Services Administration (GSA)
Perform expanded-scope Phase I Environmental Site Assessments for federal buildings investigations. In addition to standard ASTM Phase I ESA requirements, the assessments followed the NEPA protocol and incorporated air, water, land, sound, and other environmental impacts and included a recommendation if necessary.

Chicago Housing Authority/City of Chicago Department of Environment
Remediation Oversight
Performed oversight activities for former Henry Horner Homes housing project. Oversaw site remediation activities including the removal of impacted soil and the construction of engineered barriers.

Public Building Commission of Chicago
Performed Phase I and II Environmental Site Assessments for the PBCC in the development of sites for libraries. Assessed sites contaminated by previous use, USTs and ASTs.

South West Area Middle School
Performed oversight of site remediation including the removal of impacted soil and installation of engineered barriers.

Layser and Freiwald
Conducted residential well sampling and assisted in soil sampling for a large ongoing lawsuit regarding groundwater and soil contamination to a residential area. Sampled 20 residential sites for groundwater and 5 agricultural areas for soil contamination. Screened groundwater samples for temperature and turbidity.

AIG
Reviewed numerous Phase I and II ESAs and various documents and summarized the recognized environmental conditions, concerns, and conclusions.

City of Gary/Department of Environmental Affairs
Assisted in the preparation of a Quality Assurance Project Plan for the former International Bridge Corporation site as part of the City of Gary's Brownfield Redevelopment program.

Forest Preserve District of DuPage County
Oak Meadows Golf Course
Performed oversight of UST removal activities including the removal of impacted soils. Took confirmatory soil samples to verify extent of contamination. Completed an UST Summary Report for the site.

Homeowners and Rental Properties, Illinois
Conducted radon testing in numerous residences and rental properties related to proactive air quality testing.

Chicago 2016
Conducted a hazardous materials investigation of various Michael Reese Hospital buildings. Investigated turn-of-the century buildings for the presence of hazardous materials such as PCBs, mercury, drums, etc.

Chicago Department of Health
Conducted respirator fit testing on several CDH employees. Oversaw proper fit using Bitrex solution.

1.0 Executive Summary

Carnow, Conibear & Assoc., Ltd. (Carnow Conibear) conducted this Phase II Environmental Site Assessment (ESA) for the Chicago Housing Authority (CHA) to investigate environmental concerns at Blocks 11, 12, and 13 of the Altgeld Gardens public housing project located at the northeast corner of South Greenwood Avenue and East 133rd Street in Chicago, Illinois (subject site). The objective of the investigation was to determine potential subsurface impacts to the subject site from Recognized Environmental Condition (REC) identified in a Phase I ESA completed in March 2017 which included potential impacts from former onsite incinerators.

The scope of work for this Phase II ESA included the advancement of soil borings, collection of samples, and quantitative analysis of the samples. Soil boring locations and analytical parameters were selected to investigate the identified REC.

On February 27, 2017, Carnow Conibear supervised the advancement of 15 soil borings to a depth of 8 feet below ground surface (bgs). Results of the Phase II investigation indicated a general soil profile of fill material underlain by brown and gray silty clay to the termination depth of the borings (8 feet bgs).

A total of five samples were analyzed for polynuclear aromatic hydrocarbons (PNAs), Resource Conservation & Recovery Act (RCRA) metals, synthetic precipitation leaching procedure (SPLP) metals, and/or pH. Analytical results were compared to the Illinois Environmental Protection Agency (IEPA) Tier 1 Soil Remediation Objectives (SROs) promulgated in 35 Illinois Administrative Code (IAC) 742, also known as *Tiered Approach to Corrective Action Objectives* (TACO), for the residential, construction worker, and Class I and Class II groundwater exposure scenarios.

Based upon the results of the investigation, no further investigation is warranted at the subject site in regard to the identified REC.

The Executive Summary is intended to provide a brief summary of the findings of the subject site investigation. The entire report must be read in order to fully understand the findings and potential environmental concerns associated with the site; therefore, the Executive Summary should not be substituted in lieu of reading the entire report.

2.0 Introduction

The Chicago Housing Authority (CHA) retained Carnow, Conibear & Assoc., Ltd. (Carnow Conibear) to perform a Phase II Environmental Site Assessment (ESA) of the property associated with Blocks 11, 12, and 13 of the Altgeld Gardens housing project located at the northeast corner of South Greenwood Avenue and East 133rd Street in Chicago, Illinois (subject site). The purpose of this Phase II ESA was to investigate the potential impacts from the recognized Environmental Condition (REC) identified in a previous Phase I ESA.

2.1 Site Background

Carnow Conibear performed a Phase I ESA for the subject site in March 2017. Historical sources indicated that the subject site had been agricultural land in 1938. By 1945, the subject site was developed with 26 residential buildings, sidewalks, and landscape areas. The property has remained relatively unchanged until the time of the Phase I ESA.

The assessment revealed the following REC in connection with the subject site:

- The presence of five incinerators on the subject site. The incinerators were used to burn garbage from the 1940's until their use was terminated in the 1970's. The burning of garbage in the incinerators over that period could contribute contamination from ash, spills, or leaching to the immediate vicinity, and therefore the incinerators are considered a Recognized Environmental Condition to the subject site.

2.2 Scope of Work

The objective of this Phase II ESA was to investigate potential impacts from the incinerators by advancing soil borings near the incinerators on the subject site. Soil samples will be collected and analyzed for the constituents that would typically be generated as the result of incinerator use.

The scope of work for this project consisted of the following tasks:

- Advance 15 soil borings near the incinerators;
- Perform field screening of soil for VOCs using a photoionization detector (PID);
- Collect soil samples from each borehole for laboratory analysis;
- Submit samples to an independent laboratory for quantitative analysis;
- Review and interpret the analytical results of the samples as compared to the Tier 1 Remediation Objectives (ROs); and
- Prepare a report to document the investigation.

3.0 Site Characterization

3.1 Physical Setting

According to the United States Geological Survey (USGS) Topographic Map Lake Calumet, Illinois, dated 1997, the subject site is located in Section 35, Township 37 North, Range 14 East of the Third Principal Meridian in Cook County, Illinois. The subject site is a portion of the Altgeld Gardens housing development owned by the CHA. The subject site totals approximately 17.3 acres in area and consists of three blocks of the development including 26 vacant two-story multi-unit residential buildings which are currently under construction/renovation. **Exhibit I** depicts the site's location on the USGS Topographic Map.

3.1.1 Site Topography

The topography of the subject site and adjacent properties is relatively level, with no significant natural relief features. According to the USGS 7.5-minute topographic quadrangle for Lake Calumet, Illinois (dated 1997) accessed by EDR, the elevation in the vicinity of the subject site is approximately 589 feet above mean sea level.

3.1.2 Site Geology & Hydrogeology

Surficial geology at the site is mapped in the Wadsworth Formation of the Wedron Group. This unit is a succession of calcareous gray, fine-textured till consisting mainly of clay, silt, and fine sand. Although most of the till beds in this formation appear relatively homogeneous and massive, some contain silt laminae and sand lenses. Dominant pebble rock types are dolomite and shale (Hansel & Johnson, 1996, and Stiff, 2000).

According to the Illinois Geological Survey Division, Circular 532, *Potential for Contamination of Shallow Aquifers in Illinois* - the "Berg Circular" (Berg, Kempton, and Cartwright, 1984):

- Plate 1, the site is located in a map area classified as "B1" and "E". The "B1" classification denotes the presence of sand and gravel at the surface in layers less than 20 feet thick, which are underlain by till or impermeable bedrock. Although the sand and gravel may be used for local well points, these deposits generally do not yield large quantities of water. The potential for contamination of surface water and groundwater in B1 areas is high. A hydraulic conductivity of about 1×10^{-3} cm/sec (high) makes these materials an excellent medium for transport of contaminants. Because water may flow along contacts between materials with different textures (e.g. through sand and gravel over dense bedrock) and discharge on slopes, there is also a potential for ground-to-surface water contamination in B1 areas. The "E" classification denotes deposits of uniform, relatively impermeable silty or clayey till or other fine-grained materials that are more than 50 feet thick, with no identified sand and gravel layers. The potential for contamination in E areas is low because of low hydraulic conductivity in the till, 1×10^{-9} to 1×10^{-7} cm/sec, and good attenuation capacities of the materials.

- Plate 2, the site is located in a map area classified as "C1" and "D2". C1 denotes that sand and gravel less than 20 feet thick are observed at the surface and underlain by till or impermeable bedrock. D2 denotes uniform, relatively impermeable silty or clayey till or other fine-grained materials extending from the surface to more than 20 feet deep with no interbedded sand and gravel.

Two primary aquifers are present in the Chicago metropolitan region. These aquifers are the shallow dolomite aquifer (which includes the bedrock strata directly underlying the unconsolidated glacial sediments) and the deep Cambrian-Ordovician Aquifer (which predominately consists of sandstone) and is isolated from the shallow dolomite aquifer by up to 250 feet of shale. Discontinuous glacial aquifers are also present in the Chicago region in the form of lacustrine sands (Dolton Member of the Equality Formation) and outwash sand and gravel (Henry and Wedron Formations) (Willman, 1971).

There are no potable water supply wells located on the subject site and the City of Chicago has a groundwater ordinance with the IEPA prohibiting the installation and use of potable water wells. (**Appendix C**).

3.1.3 Surface Water, Wetlands, & Flooding

There are no wetlands on the subject site. No standing bodies of water or wetland vegetation was observed during the recent site inspection.

The Federal Emergency Management Agency (FEMA) lists the subject site in an area determined to be outside the 0.2% annual chance floodplain. [National Flood Insurance Program, Map numbers 17031C0661J, 17031C0662J, 17031C0663J, and 17031C0664J, August 19, 2008]

4.0 Site investigation

4.1 Subsurface Investigation

Carnow Conibear retained Enviro-Dynamics of Hebron, Indiana to advance soil borings on February 27, 2017. Weather during the investigation consisted of mostly sunny skies and temperatures around 45 degrees Fahrenheit. Soil boring locations are depicted on **Exhibit II**; boring logs are presented in **Appendix A**.

4.1.1 Soil Investigation

The soil borings, numbered BLK 11-101 through BLK 11-106; BLK 12-101 through BLK 12-103; and BLK 13-101 through BLK 13-106 were advanced utilizing a truck-mounted Geoprobe® system direct-push drilling equipment. The Geoprobe® system utilizes disposable acetate liners within stainless steel sampling tubes, which were decontaminated prior to each use with an Alconox® and water solution, and then rinsed with distilled water. Disposable liners within the sampling tube were discarded after a single use. Soil samples were collected by hydraulically advancing the sampling tube (with acetate liner) into the subsurface. Soil samples were continuously collected to the terminus of the boring or until an obstruction was encountered. Void space was backfilled to grade with bentonite chips. No native groundwater was encountered during the subsurface drilling. Carnow Conibear's field representative supervised the drilling operation and collected, inspected, and logged all samples.

Soils were inspected for visible signs of contamination and were classified in terms of texture, color, and consistency in accordance with the Unified Soil Classification System (USCS). Headspace portions of each soil sample were field screened with a photo ionization detector (PID), which provides a qualitative measurement of volatile organic compounds (VOCs) in the soil. PID screening consisted of collecting an undisturbed representative portion of soil from each two foot sample interval and placing in sealable plastic sandwich bag. Once the bag was sealed, the soils within the bag were disturbed and allowed to warm for a period of approximately three to five minutes as headspace developed. The tip of the PID probe was inserted into the bag and the reading recorded. The PID was calibrated prior to its initial usage.

The general soil profile encountered at the subject site featured approximately three inches to 4.5 feet of fill material underlain by brown and gray silty clay to the termination depth of the borings (8 feet bgs). Native soil encountered at the subject site generally matches the soil types in the published geological information.

For each boring, two samples were collected, one from the surface and from subsurface. Based upon the REC, the surface samples nearest the source were selected and submitted for analysis. Other surface and subsurface samples were placed on "hold" at the laboratory pending the results of the initial sample analysis. Surface samples collected from the six borings near the incinerators were analyzed for Polynuclear Aromatic Compounds (PNAs), Resource Conservation and Recovery Act (RCRA) metals, and pH. The following table summarizes soil sample locations, depths, and analysis from the soil investigation.

Table A: Soil Sample Locations & Analysis

Boring	REC	Sample Depth	Analysis
BLK 11-101	Incinerator at 1113-1135 E. 130th Place	1-3'	PNAs, RCRA metals, pH
BLK 11-104	Incinerator at 13055-13007 S. Greenwood Ave	1-3'	PNAs, RCRA metals, pH
BLK 12-101	Incinerator at 1109-1131 E. 132nd Street	1-3'	PNAs, RCRA metals, pH
BLK 13-101	Incinerator at 1101-1123 E. 131st Street	1-3'	PNAs, RCRA metals, pH, SPLP Chromium, SPLP Selenium
BLK 13-104	Incinerator at 1136-1158 E. 132nd Street	1-3'	PNAs, RCRA metals, pH

PNAs = Polynuclear Aromatic Compounds RCRA = Resource Conservation and Recovery Act

4.2 Sampling Procedures & Analytical Methods

The following US Environmental Protection Agency (EPA) methods were used to analyze the samples:

- Polynuclear Aromatic Hydrocarbons (PNAs): EPA Method 8270C;
- Resource Conservation and Recovery Act (RCRA) Metals: EPA Methods 6020/7471A;
- pH: EPA Method 9045C; and
- SPLP: EPA Methods 1312/6020.

The samples were transferred to a nine-ounce glass jar with a Teflon® lid and stored in a cooler with ice. A portion of each 2 foot sample depth interval was placed into a resealable plastic bag for headspace screening with the PID as described in Section 4.1.1. All containers were precleaned to EPA standards and sealed with Teflon® lined plastic screw-on lids.

Each sample was labeled by a unique identification number as it was collected during the investigation activities. The sample identification numbers consisted of the block number, boring number, and sample depth (e.g., BLK 11-101 (1-3) indicates a sample collected at block 11 boring location BLK 11-101 from 1 to 3 feet bgs). Each container was labeled at the time of the sampling with the following information using indelible ink:

- Project/site name;
- Date of collection;
- Sample location and depth;
- Sample times;
- Name of sample collector.

All soil samples were maintained in the cooler with ice for transport to the laboratory. A chain of custody form was prepared for the samples. The chain of custody form was signed and dated by Carnow Conibear's sampler and representative delivering the samples, as well as the laboratory representative who received the samples.

4.3 Analytical Results

Carnow Conibear compared the laboratory analytical results with the IEPA Tier 1 Soil Remediation Objectives (SROs) promulgated in 35 Illinois Administrative Code (IAC) 742, also known as *Tiered Approach to Corrective Action Objectives* (TACO). TACO presents three risk-based tiers for remediation objectives based on applicable exposure scenarios. The TACO approach can be used to develop cleanup objectives for soil, soil gas and/or groundwater. Pursuant to 35 IAC 742, Tier 1 SROs were modified by background concentrations of PNAs established for the City of Chicago and inorganic constituents in Metropolitan Statistical Areas (MSAs). Based on the use of the site as residential property, residential and construction worker SROs were used for comparison. Class I and Class II groundwater scenarios were considered, as native groundwater at the Site has not been fully characterized.

4.3.1 Soil Analytical Results

Results of the analyses are presented in **Tables I-IV**. The complete analytical laboratory report is presented in **Appendix B**. Sample results from the investigation are summarized as follows:

- No PNAs were detected above the applicable Tier 1 SROs.
- Chromium was identified in exceedance of the applicable pH-Specific Tier 1 SROs for the soil component of Class I and II groundwater ingestion exposure routes in boring BLK 13-101(1-3) between 1 and 3 feet bgs.
- Selenium was identified in exceedance of the applicable pH-Specific Tier 1 SROs for the soil component of Class I and II groundwater ingestion exposure routes in borings BLK 11-104(1-3), BLK 13-101(1-3), and BLK 13-104(1-3) between 1 and 3 feet bgs.

4.3.2 Soil Component of Groundwater Ingestion Exposure Route Evaluation

To further evaluate the soil component of groundwater ingestion exposure route, SPLP analysis was performed on sample BLK 13-101(1-3), which exceeded both chromium and selenium pH-Specific Tier 1 SROs.

Results of the SPLP analyses were below all applicable Tier 1 SROs for both Class I and Class II groundwater scenarios for chromium and selenium, indicating that these constituents are not a concern for the soil component of groundwater ingestion exposure route.

5.0 Conclusions & Recommendations

Carnow, Conibear conducted this Phase II ESA to investigate environmental concerns at Blocks 11, 12, and 13 of the Altgeld Gardens public housing project located at the northeast corner of Greenwood Avenue & 133rd Street in Chicago, Illinois (subject site). The objective of the investigation was to determine potential impacts to the subject site from the REC identified in a Phase I ESA. The REC included former onsite incinerator use at five locations

The results of the Phase II ESA investigation indicated a general soil profile of crushed concrete or topsoil underlain by brown and gray silty clay with lenses of organics to the termination depth of the borings (8 feet bgs).

Boring locations were selected to address the REC identified in the Phase I ESA. A total of five soil samples from 15 soil borings were selected for analysis. One surface soil sample was analyzed from the boring closest to the incinerators. Analytical results were compared to the IEPA Tier 1 SROs promulgated in 35 IAC 742, also known as TACO, for the residential, construction worker, and Class I and II groundwater scenarios.

Results of the investigation did not identify PNAs in exceedance of applicable Tier 1 SROs. Chromium and/or selenium were identified in three boring locations above applicable Tier 1 SROs for Class II and II pH-specific soil component of groundwater ingestion exposure route. However resulting SPLP concentrations for chromium and selenium were below corresponding Tier 1 GROs for Class I and Class II groundwater, indicating that these constituents are not a concern for the soil component of the groundwater ingestion exposure route.

Based upon the results of the investigation, no further investigation is warranted at the subject site in regard to the identified REC.

Carnow Conibear makes no warranty, express or implied, that the findings and interpretations in this report are a complete representation of the environmental hazards and liabilities associated with the site. Carnow Conibear's findings are based upon the scope of work requested by the client and should not be interpreted as a complete presentation of the site conditions. There may be unrecorded information or documentation from previous owners or tenants that is unattainable and may be proprietary, legally protected, or unavailable through government regulatory services.

Analytical Report for STAT Work Order: 17020791 Revision 2

RE: E160040026-21, Altgeld Garden Blocks 11, 12, & 13, S. Greenwood Ave

Dear Nohemi Melero:

STAT Analysis received 30 samples for the referenced project on 2/27/2017 2:06:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Martin Kucan

Martin Kucan
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone. This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Total State/Local Penalty Assessed: $0
Total SEP Cost: $0
Total Compliance Action Cost: $0
Total Cost Recovery: $310,000

Case Summary

NAT'L PRIORITIES LIST WHEN THE NEW HAZARD RANKING SYSTEM IS ISSUED, THIS ACTION ALSO SEEKS A DECLARATORY JUDGMENT ON LIA BILITY FOR ANY FUTURE COST EXPENDED AT THE SITE. EMERGENCY REMOVAL COMPLETED IN JULY 1986. EXPANDED SITE INVESTIGATION COMPLETED FALL 1987. PRP SEARCH STILL BEING CONDUCTED. THE PURPOSE IS THE FILING OF A CIVIL ACTION TO RECOVER GOVERNMENT RESPONSE COSTS UNDER SECT 107 OF CERCLA, 42 USC SECT 9601 ET SEQ., AS AMENDED BY THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986, PUB. L. NO. 99-499, 100 STAT. 1613 (1986) (SARA). NATURE OF THE CASE: THIS PROPOSED COST RECOVERY CASE CONCERNS THE U.S. SCRAP SITE LOCATED ON THE SOUTH SITE OF CHGO., IL. THE SITE OPERA TED AS AN INDUSTRIAL CHEMICAL WASTE RECEIVER BETWEEN 1965 AND 1975. DURING THIS PERIOD, THE OPERATOR TOOK LIQUID AND DRY WASTES FROM OVER 200 AREA GENERATORS AND DISPOSED OF THEM IN LAGOONS, OLD GRAIN SILOS, PITS, AS WELL AS ONTO THE GROUND OF THE SITE. OPERATIONS AT THE SITE CEASED IN 1975, WHEN THE SITE OPERATOR ENCOUNTERED FINANCIAL DIFFICULTIES. FROM 1973 TO 1975 HE DISPOSED OF WASTES AT BOTH THE U.S. SCRAP SITE AND A RELATED SITE, NINTH AVE. DUMP IN GARY, IN. EXCEPT FOR SCORING THE SITE UNDER THE HAZARD RANKING SYS- TEM IN 1982, THE U.S. SCRAP SITE FIRST CAME TO THE ATTENTION OF THE USEPA ON AUGUST 16, 1985, WHEN THE IEPA REQUESTED AS- SISTANCE IN EXTINGUISHING A LANDFILL FIRE ON THE SITE. THE USEPA INITIATED AN EMERGENCY RESPONSE ACTION, WHICH INVOLVED EXTINGUISHING THE FIRE AND EXCAVATING AND REMOVING HEAVILY CONTAMINATED SOIL AND DRUMMED WASTES FROM A RAILROAD EMBANK- MENT ON THE SITE. EMERGENCY RESPONSE ACTIVITIES WERE CONCLU DED ON JULY 25, 1986. BECAUSE THE EMERGENCY RESPONSE ACTION ADDRESSED ONLY A FRACTION OF THE WASTES BURIED ON THE SITE, A SPECIAL STUDY/ EXPANDED SITE INSPECTION WAS INITIATED ON THE SITE IN NOVEM- BER 1986, FOR THE PURPOSE OF DETERMINING THE NATURE AND EX- TENT OF CONTAMINATION. THE FINAL REPORT FOR THIS STUDY IS` EXPECTED IN THE SUMMER OF 1989. CAUSE OF ACTION: USEPA SEEKS THE RECOVERY OF APPROXIMATELY $1.512 MILLION EXPENDED AT THE SITE PURSUANT TO SECT 107 OF CERCLA, 42 USC SECT 9607 (WITH AN OFFSET OF $625,000 COLLECTED FROM ALLIS CHALMERS, ONE OF THE GENERATORS, AS A RESULT OF A BANKRUPTCY SETTLEMENT). THE RECOMMENDED DEFENDANTS INCLUDE ONLY TWENTY EIGHT GENERATORS OF HAZARDOUS SUBSTANCES TAKEN TO THE SITE. THESE TWENTY-EIGHT HAVE BEEN CARVED OUT BECAUSE RESOURCE LI- MITATIONS PROHIBIT SUING ALL 201 POTENTIAL DEFENDANTS. THESE TWENTY-EIGHT HAVE SIGNIFICANT EVIDENCE LINKING THEM TO THE SITE AND ARE NOT COMMITTED TO COMPLYING WITH THE UNILATERAL ADMINISTRATIVE ORDER ISSUED IN CONNECTION WITH THE RELATED NINTH AVE. DUMP SITE. THE STATUTE OF LIMITATIONS FOR THE EMERGENCY RESPONSE ACTION (APPROXIMATELY $1 MILLION) IS JULY 25, 1989. PROPOSED REMEDY: THE REMEDY SOUGHT IN THIS ACTION IS THE REIMBURSEMENT OF ALL RESPONSE COSTS EXPENDED BY THE USEPA IN CONNECTION WITH THE EMERGENCY RESPONSE ACTION AND SPECIAL STUDY/EXPANDED SITE INSPECTION. BECAUSE THE SITE MAY BE RESCORED FOR THE

Appendix G - Qualifications

BRITTEN V. ROBINSON-ADAMS

STAFF PROFESSIONAL/ENVIRONMENTAL SCIENTIST I

Mr. Robinson-Adams has multiple years of experience in the geologic, mining, environment fields, primarily in the oil and gas industry. His areas of knowledge include the following: sedimentology, mineralogy, environmental assessment, well logging, geophysics, geologic mapping, rock and sediment sampling analysis.

Education
B.S., Geology, Eastern Illinois University, 2009

Certificates
OSHA 40-Hour HAZWOPER Industry Training
CPR

Key Projects

Ecology and Environment, Inc. – IDOT PTB 185-025 Hazardous Waste Surveys (Preliminary Site Investigations), Statewide (October 2019 – Present), Environmental Scientist. Mr. Robinson-Adams is providing soil sampling services for the Hazardous Waste Surveys including Preliminary Site Investigations (PSIs) conducted along Illinois roads for the Illinois Department of Transportation (IDOT). The PSIs include soil and groundwater sampling and evaluation and cost planning for soil excavation and disposal.The purpose of this work is to evaluate and determine the condition for disposal of subsurface soils expected to be excavated during IDOT upgrade work. *Mr. Dean Tiebout, Program Manager, Ecology and Environment, Inc., 33 W. Monroe St., Suite 1410, Chicago, IL 60603. (312) 578-9243. DTiebout@ene.com*

CTA Phase #1 Report, Chicago, IL (February 2018 – March 2018) Mr. Robinson-Adams collected data from EDR, OFSM, IEPA, USEPA, Chicago Zoning, and etc. This data gather was entered into the report. With the collection of data, I determined if the subject property and adjacent properties had potential to harm the environment with waste, chemicals, air pollution, or petroleum products.

NEPA SARFS & RPR, Chicago, IL. (June 2018 – July 2018) Mr. Robinson-Adams completed reports for City of Chicago. These reports consist of Chicago zoning maps, CHRS database maps, HARGIS historical maps, FEMA waterway maps, and FOIA 2FM data.

Property Screens CHA, Chicago, IL. (February 2018 – July 2018) Mr. Robinson-Adams completed reports for CHA. These reports include OSFM, 2FM, IEPA, USAEPA, and historical aerials research data. The data gather is use for identifying RECs near subject properties.

Landrum and Brown, O'Hare Airport Facility Development, Chicago, IL. (January 2018 – January 2018), Environmental Scientist. Mr. Robinson-Adams conducted a Phase I Environmental Site Assessment report and an Environment Assessment (EA) Checklist for a planned property development for a property in Chicago managed by O'Hare Airport. The objective of the assessments was to identify recognized environmental conditions (REC's) associated with the site and satisfy the environmental assessment requirements of the City of Chicago. The EA was conducted for compliance with the National Environmental Policy Act (NEPA).

Oakwood Redevelopment Phase I, Chicago, IL (April 2019) Mr. Robinson-Adams conducted a Phase I Environmental Site Assessment report and an Environment Assessment (EA) checklist for a planned property development for a property in Chicago managed by HUD. The objective of the assessments was to identify recognized environmental conditions (REC's) associated with the site and satisfy the environmental assessment requirements of the City of Chicago and Urban Development. The EA was conducted for compliance with the National Environmental Policy Act (NEPA).

Jackson Park (PSC) Intern Soil Removal, Chicago, IL. (April 2019) Mr. Robinson-Adams managed soil removal for Intern's street liner/pipe redevelopment.

New Lenox (PSC) Hydro-Vac Soil Removal, New Lenox, IL. (March 2019) Mr. Robinson-Adams managed soil removal for Comed electric pole replacement project.

Chicago (People Gas) Soil Sampling, Chicgao, IL. (February 2019) Mr. Robinson-Adams collected soil samples for PH and TCL testing. The samples will be delivered to Stat Analysis and analyzed.

Maywood (PSC) Soil Sampling, Maywood, IL. (January 2019) Mr. Robinson-Adams collected soil from roll-off trailer. The sample will be delivered to Stat Analysis and analyzed for hazards.

Dixon (PSC) Soil Sampling, Dixon, IL. (January 2019) Mr. Robinson-Adams collected soil from roll-off trailer. The sample will be delivered to Stat Analysis and analyzed for hazards.

Rockfalls Storage Audit, Rockfalls, IL. (January 2019) Mr. Robinson-Adams completed a site review and audit on Comed storage property located in Rockfalls, IL. Photos, written report, and job brief meeting with foreman was recorded.

Zion Substation Soil Removal Management, Zion, IL. (January 2019) Mr. Robinson-Adams worked on behalf of Comed to oversee soil and debris removal from Comed Zion substation location. The soil and debris were taken to landfill with proper manifest complete by EDI. Mr. Robinson-Adams was approved for security clearance for access to the substation as part of the project.

Comed Rockfalls Project, Rockfalls, IL. (November 2018 – December 2018) Mr. Robinson-Adams worked on behalf of Comed to oversee soil and debris removal in Rockfalls, IL. The soil and debris were taken to landfill with proper manifest complete by EDI. Comed workers remove older wooden electric poles and replace them with steel structures.

Rockfalls Storage Audit, Rockfalls, IL. (November 2018) Mr. Robinson-Adams completed a site review and audit on Comed storage property located in Rockfalls, IL. Photos, written report, and job brief meeting with foreman was recorded.

Calumet Storage Audit, Chicago, IL. (November 2018) Mr. Robinson-Adams completed a site review and audit on Comed storage property located in Chicago, IL. Photos, written report, and brief meeting with foreman was recorded.

Higgins Substation Soil Removal Management, Chicago, IL. (August 2018 – December 2018) Mr. Robinson-Adams worked on behalf of the Comed to oversee soil and debris removal in Chicago, IL. The soil and debris were taken to landfill with proper manifest complete by EDI.

Weber Road, Romeville, IL. (July 2018 – July 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger for Comed project. The soil samples were delivered to Stats Laboratory for further scientific data

VA Perimeter Security Fence Project, North Chicago, IL. (July 2018 – July 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger for US Navy new fence line. The soil samples were delivered to Stats Laboratory for further scientific data.

Riteway Huggins Soil Removal Management Chicago, IL. (July 2018 – July 2018) Mr. Robinson-Adams worked on behalf of the Comed to oversee soil and debris removal in Chicago, IL. The soil and debris were taken to landfill with proper manifest complete by EDI. Mr. Robinson-Adams was approved for security clearance for access to the substation as part of the project.

Taylor Substation Soil Removal Management Chicago, IL. (July 2018 – July 2018) Mr. Robinson-Adams worked on behalf of the Comed to oversee soil and debris removal in Chicago, IL. The soil and debris were taken to landfill with proper manifest complete by EDI. Mr. Robinson-Adams was approved for security clearance for access to the substation as part of the project.

Ridgeland Substation Soil Removal Management Stickey, IL. (July 2018 – July 2018) Mr. Robinson-Adams worked on behalf of the Comed to oversee soil and debris removal in Stickey, IL. The soil and debris were taken to landfill with proper manifest complete by EDI. Mr. Robinson-Adams was approved for security clearance for access to the substation as part of the project.

Calumet Substation Fence Project, Chicago, IL. (April 2018 – April 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger near substation's fence line. The soil samples were delivered to Stat Laboratory for further scientific data. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates on site.

Comed Southside Geoprobe Street Boring, Chicago, IL. (March 2018 – March 2018)
Mr. Robinson-Adams help locate boring sites in the field. These boring sites must stay clear from utilities, gas lines, water lines and etc. Boring soil samples were characterized, tested with PID, and further tested at Stat Laboratory. Also, water tables depths were determined onsite.

Franklin Park Substation Fence Project, Franklin Park, IL. (April 2018 – April 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger near substation's fence line. The soil samples were delivered to Stat Laboratory for further scientific data. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates on site.

Itasca Substation Fence Project, Chicago, IL. (March 2018 – March 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger near substation's fence line. The soil samples were delivered to Stat Laboratory for further scientific data. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates on site.

Calumet Substation Fence Project, Chicago, IL. (March 2018 – March 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger near substation's fence line. The soil samples were delivered to Stat Laboratory for further scientific data. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates on site.hic

Davis Creek Substation Fence Project, Chicago, IL. (February 2018 – February 2018) Mr. Robinson-Adams conducted soil sampling with a hand auger near substation's fence line. The soil samples were delivered to Stat Laboratory for further scientific data. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates. Mr. Robinson-Adams also preformed PID test and gather GPS coordinates on site.

Itasca Substation, Comed Road and Manhole Development, Itasca, IL. (January 2018 – January 2018), Environmental Scientist. Mr. Robinson-Adams worked on behalf of the Comed to oversee soil and debris removal in Itasca, IL. The soil and debris were taken to landfill with proper manifest complete by EDI. Mr. Robinson-Adams was approved for security clearance for access to the substation as part of the project.

God's House for Nations Property, Grace Little, (January 2018 – January 2018), Chicago, IL., Environmental Scientist. Mr. Robinson-Adams conducted a Phase I Environmental Site Assessment report and an Environment Assessment (EA) checklist for a planned property development for a property in Chicago managed by God's House for Nations Property. The objective of the assessments was to identify recognized environmental conditions (REC's) associated with the site and satisfy the environmental assessment requirements of the City of Chicago and Urban Development. The EA was conducted for compliance with the National Environmental Policy Act (NEPA).

Jones Lang LaSalle, BMO Harris Bank N.A., Phase II ESA, Hinsdale, IL., (January 2018 – January 2018), Environmental Scientist. Mr. Robinson-Adams conducted a Phase II ESA report for the Jones Lang LaSalle. The purpose was to examine soil and groundwater of the subject property. Duties included creating soil boring logs, analyzing soil sample data, performing risk modeling, performing groundwater pollution modeling, and completing ESA reports for the BMO Harris Bank owner.

Oil and Gas Well Drilling, Alaska, Texas, and California, (2011-2017), Logging Geologist. Mr. Robinson-Adams worked as a Logging Geologist on over 60 wells, encompassing six basins across 3 states, for the drilling of oil, gas, and scientific well drilling. He provided detailed reports for multinational oil and gas corporations. He collected, and cataloged samples from well drilling. Mr. Robinson-Adams analyzed rock samples using various tests including microscopy, fluorometry, oil cut, oil and mineral fluorescence, gas chromatography, and interpret geophysics tools.

Ore Mining, Alaska, (2011-2011), Mining Geologist, Mr. Robinson-Adams worked as a Mining Geologist for Metallogeny and contracted to Kinross Gold Mine. The job description was to analyzed rock chip sample for gold and collect sample for Essay Lab.

JASON JANSSEN, CHMM

QA/QC MANAGER

Mr. Janssen has over 15 years of professional experience with extensive knowledge of environmental consulting, remediation, and construction. Mr. Janssen's experience includes project management, environmental site assessments, inspections, permitting, sampling, environmental compliance, site remediation, NEPA environmental assessments, and regulatory compliance. Work has included developing and leading a comprehensive update and expansion of health and safety policy and programs, as well as expanding employment of GIS geo-databases and systems utilizing the Esri ArcGIS software suite to provide accurate, timely, and thorough analysis of environmental issues. Key work has also included the development and implementation of Ambient Air Monitoring Programs designed to protect the public's health and safety during remediation efforts at former Manufactured Gas Plant sites, as well as being project team leader directly supervising staff and overseeing the program implementation.

Education
BS, Environmental Science & Natural Resources, Purdue University, West Lafayette, Indiana

Licenses
Certified Hazardous Materials Manger (CHMM), 2014

Certifications
40-hour OSHA Hazardous Waste Operations and Emergency Response (HAZWOPER) Training

Annual 8-hour OSHA HAZWOPER Refresher Training

Affiliations/Membership
Alliance of Hazardous Materials Professionals

Society of American Military Engineers

Key Projects

City of Chicago Department of Aviation (CDA), O'Hare International Airport Modernization Program (OMP), Chicago, Illinois. Mr. Janssen completed a Phase I ESA for the CDA for the new Runway 10R-28L, which was built as part of the OMP. Mr. Janssen was responsible for the execution and the composition of the report to identify Recognized Environmental Conditions (RECs) that would impact proposed Federal Aviation Administration (FAA) facilities and lease limits. As part of this work, Mr. Janssen created a geodatabase of the nearly 600 fuel spills reported at O'Hare airport between 2003 and 2009, and utilized the resulting information to analyze for the potential of fuel spills to impact the proposed FAA facilities. This work was conducted as part of preparatory efforts for future work and the completion of lease agreements between the City of Chicago and the FAA. As part of this work, Mr. Janssen reviewed previous investigations, reports, sampling results, and other information provided by the client that amounted to over 5,800 individual documents.

The Community Builders, Historic Art Deco Coca-Cola Bottling Plant, Fort Wayne, Indiana. Mr. Janssen conducted and prepared several reports (Phase I, Phase II, and NEPA Environmental Assessment) for a residential redevelopment of an active manufacturing facility and vacant properties in Fort Wayne, IN. The redevelopment featured housing and a community center, centered around a repurposed former Coca-Cola Bottling Plant recognized as a unique historical structure. The EA followed the Department of Housing and Urban Development's grant program and NEPA's review requirements, which included creating an environmental review record, identifying environmental hazards, and consulting with state and national agencies. The Phase I ESA was conducted in accordance with ASTM Standards. Activities included a detailed visual inspection of the subject property and adjacent properties, a review of available data on site history and conditions, and a review of available local, state, and federal records. The Phase II ESA was conducted to investigate recognized environmental conditions identified during the Phase I ESA, and included subsurface soil and groundwater sample collection.

Walmart, Brownfield Redevelopment, Chicago, Illinois. Mr. Janssen completed a Phase I ESA, and composed a Soil Management Plan (SMP), for a walmart retail development that was part of a 167-acre hazardous waste brownfield site enrolled in the Illinois Environmental Protection Agency (IEPA) Site Remediation Program (SRP). Mr. Janssen was responsible for the execution and the composition of the Phase I ESA to identify Recognized Environmental Conditions (RECs) that impact the planned retail facility. As part of the assessment, Mr. Janssen reviewed the extensive investigative history of the larger brownfield site, as well as evaluated completed and ongoing remedial efforts. The SMP prepared by Mr. Janssen presented the means and methods to be utilized for proper management, removal, and disposal of the property's characteristically hazardous soils in accordance with United States Environmental Protection Agency (USEPA) regulations and Illinois EPA requirements during site development and any post development activities which would disturb site soils.

City of Chicago Department of Fleet and Facilities Management (2FM), PA Railroad Area Project, Chicago, Illinois. Mr. Janssen provided client contact, project management, scope of work and budget development for the project which included conducting Phase I and Phase II Environmental Site Assessments (ESAs) at multiple parcels in accordance with ASTM standards. Work was conducted to support a City of Chicago imitative to expand opportunities for community gardens and agriculture within underutilized urban areas with a goal of providing greater local food security and improved access to healthy food in underserved neighborhoods.

The Community Builders, 40-Site Portfolio, Cincinnati, Ohio. Due to successful performance on past projects, Mr. Janssen was tasked with providing expanded services for The Community Builders to the Ohio region and providing environmental support for residential acquisition and redevelopment of a 40-site portfolio in the Cincinnati region. As part of this work, Mr. Janssen developed the scope of work and budget for the project, reviewed numerous Phase I ESAs, prepared or reviewed several Phase II ESAs, and become experienced with Ohio Voluntary Action Program (VAP) regulations and requirements.

City of Chicago Department of Aviation, Midway International Airport, Chicago, Illinois. Mr. Janssen provided client contact, scope of work and budget preparation, field efforts, and reporting activities associated with the completion of Phase I and Phase II Environmental Site Assessments (ESAs) for a property transfer of two underground storage tanks at Midway International Airport. The Phase I and Phase II ESAs were conducted in accordance with ASTM Standard E1527-05 and IEPA Site Remediation Program requirements respectively. Activities included a detailed visual inspection of the subject property and adjacent properties, a review of available data on site history and conditions, and a review of available local, state, and federal records. The Phase II ESA was conducted to investigate reported existing contamination and potential surface spills identified during the Phase I ESA, and included a collection of subsurface soil and groundwater samples. Mr. Janssen developed the scope of work and budget for the project, performed field activities, and prepared reports.

J.L. Woode Ltd, Hawthorne House Apartments, Chicago, Illinois. In 2017 through early 2018, Mr. Janssen was tasked with resuming efforts to obtain a No Further Remediation (NFR) Letter and achieve regulatory closure for a legacy Leaking Underground Storage Tank (LUST) incident at the Hawthorne House residential high-rise apartment building. Mr. Janssen provided project management, client contact, and state reporting activities associated with the resolution this legacy LUST incident. The Hawthorne House LUST incident dated to 1999 when several underground storage tanks (USTs) were abandoned in-place at the property due to their proximity to the high-rise building. In preparing the tanks for abandonment, a release of heating oil and gasoline was discovered and reported to the State of Illinois. Between 1999 and 2010, several rounds of remedial actions were conducted at the property (this included three rounds of in-situ chemical injections and two rounds of physical source removal) under the Illinois Environmental Protection Agency (IEPA's) LUST program. These earlier efforts were unsuccessful in achieving regulatory closure through the IEPA's LUST program. In 2017, J.L. Woode Ltd. resumed efforts to obtain a NFR Letter. Through limited additional investigation, working closely with the IEPA, and transferring the LUST incident to the IEPA's Site Remediation Program (SRP), Mr. Janssen was able to obtain a NFR Letter for J.L. Woode Ltd. Closure was obtained in part through the development and subsequent approval by the IEPA's CORE committee of a Tier 3 Evaluation. The Tier 3 evaluation successfully demonstrated that the heating oil and gasoline contamination which remains at the property was unlikely to create an unacceptable risk to human health or the environment as they undergo natural attenuation.

Kimco, 87th Street Shopping Center, Chicago, Illinois. Mr. Janssen is providing client contact, project management, remediation, and state reporting activities associated with the completion of a comprehensive investigation and remediation of the five-parcel 87th Street Center. The 87th Street Center is an active 17-acre commercial property that is undergoing redevelopment, and that was historically the site of an automotive manufacturing facility. To address legacy impacts to soil and groundwater from the historic manufacturing operations, and obtain regulatory recognition of the remedial efforts, each parcel of the center was enrolled into the Illinois EPA Site Remediation Program in order to obtain No Further Remediation (NFR) Letters. Work to date has included a compressive evaluation of soil and groundwater contamination at the center, development of tailored remediation plans for each parcel, and reporting to the Illinois EPA.

Ridge Development, Downers Grove Supportive Living Facility, Downers Grove, Illinois. Mr. Janssen provided client contact, project management, remediation, and state reporting activities associated with the completion of a comprehensive investigation and remediation of the recently constructed six-acre Downers Grove Supportive Living Facility. During the due diligence period for Ridge Development, impacts from degreasing solvents and petroleum products were identified in shallow soil and groundwater at the property from the operation of a former construction company's maintenance and storage yard at the site. Prior to development, a comprehensive investigation was conducted, and a tailored remedial design was developed and incorporated into the development plans. To obtain regulatory recognition of the remedial efforts and meet Housing and Urban Development (HUD) financing Requirements, the property was enrolled into the Illinois EPA Site Remediation Program and a comprehensive No Further Remediation (NFR) Letter was obtained.

City of Chicago Department of Fleet and Facilities Management (2FM), Eden Place Nature Center, Chicago, Illinois. Mr. Janssen provided client contact, project management, and state reporting activities associated with the completion of comprehensive investigations, and remediation, of Eden Place. Eden Place is an urban nature preserve and environmental education center located at 4339 South Stewart Avenue in the City of Chicago. Prior to Eden Place's founding, City records indicate that the property was utilized as illegal dump site for hazardous materials and that in or after 1997, a three-year clean-up effort was undertaken to remove the illegally dumped materials. Mr. Janssen was tasked by 2FM to investigate the City owned properties that comprise the northern portion of Eden Place for remnant impacts, enroll the property into the Illinois EPA Site Remediation Program (SRP) to address identified impacts, and obtain a No Further Remediation (NFR) Letter from the Illinois EPA. Work conducted by Mr. Janssen included completion of a Phase I and Phase II Environmental Site Assessment (ESA), enrollment of the property into the SRP, development of a remediation plan, oversight of a City Contractor implementing the remediation plan, and reporting to the IEPA. Efforts resulted in a comprehensive NFR Letter being issued.

U.S. Environmental Protection Agency (USEPA) Remedial Action Contract, South Minneapolis Residential Soil Contamination (SMRSC) Site, Minneapolis, MN. Mr. Janssen was an Inspector for the $20 Million Superfund project at the SMRSC Site, which is approximately a 1,130-acre arsenic impacted site located southeast of downtown Minneapolis primarily composed of residential properties. Mr. Janssen provided technical oversight and inspection of the remedial and restoration actions by CH2M HILL contractors. Mr. Janssen's duties included supervising field staff, supervising and inspecting contractors', and subcontractors' work, progress, and health and safety. Other responsibilities included meeting with individual residential property owners prior to, during, and after the remedial action and restoration work activities, confirmation sampling, and documenting remedial and restoration actions at each property.

U.S. Environmental Protection Agency (USEPA) Remedial Action Contract, Zionsville Superfund Site Remediation, Zionsville, Indiana. Mr. Janssen provided project oversight for the USEPA of a Potentially Responsible Party (PRP) lead remediation effort installing and operating a Soil Vapor Extraction and Permeable Reactive Barrier Gate System at the USEPA Superfund site. The Soil Vapor Extraction and Permeable Reactive Barrier Gate System was designed to protect the city of Indianapolis' municipal water supply from volatile organic contaminant migration. Mr. Janssen's responsibilities included inspection and oversight of contractors, oversight of system construction, verification of system parameters and operation, and project progress reporting to the USEPA.

U.S. Environmental Protection Agency (USEPA), Outboard Marine Corp. Superfund Site Remediation, Waukegan, Illinois. Mr. Janssen provided technical oversight for the installation of a groundwater extraction, treatment, and reinjection system for a USEPA Superfund site in Waukegan, IL for the purpose of remediating contaminated groundwater and controlling contaminant migration to Lake Michigan. Mr. Janssen's responsibilities included supervision of contractors, oversight of system construction, verification of system parameters and operation, and project progress reporting.

Ameren Services, Former Decatur Manufactured Gas Plant Remediation, Decatur, Illinois. Mr. Janssen was the Project Team Leader for an Ambient Air Monitoring Program, developed and designed by Mr. Janssen, to protect the public's health and safety during remediation efforts to remove MGP related contamination at an active electric substation located within, and servicing, downtown Decatur, Illinois. The Ambient Air Monitoring Program included continuous monitoring of the local air quality, twenty-four hours a day, seven days a week, utilizing high volume air samplers and real-time instrumentation for various chemicals of concern. Mr. Janssen's duties include: developing the scope of work and budget for the project, managing field staff and laboratory contractors; directing, coordinating, and conducting sampling efforts, and acting as a liaison between the remediation contractor, Ameren, and office staff.

Ameren Services, Former Shelbyville Manufactured Gas Plant (MGP), Shelbyville, Illinois. Mr. Janssen was the Project Team Leader for an Ambient Air Monitoring Program developed and designed by Mr. Janssen to protect the public's health and safety during a comprehensive remediation effort to remove MGP related contamination at an active manufacturing facility that was partially built over the former MGP and is adjacent to residential properties, one of them being a child daycare. The Ambient Air Monitoring Program included continuous monitoring of the local air quality, twenty-four hours a day, seven days a week, utilizing high volume air samplers and real-time instrumentation for various chemicals of concern. Mr. Janssen's duties included: managing field staff and laboratory contractors; directing, coordinating, and conducting sampling efforts, and acting as a liaison between the remediation contractor, the manufacturing facility's representative, Ameren, and office staff.

U.S. Environmental Protection Agency (USEPA), Multiple Manufactured Gas Plants (MGPs) Remediation, Chicago, Illinois. Mr. Janssen was Project Leader for a multi-year, $62 Million Superfund project at three former manufactured gas plants (MGPs) in Chicago, IL. Mr. Janssen provided oversight to the Potentially Responsible Party's (PRP) directed remediation efforts for the USEPA. Mr. Janssen's responsibilities included oversight and inspection of site activities for compliance, soil and water sampling, meeting with contractors, the PRP, and EPA, preparing site progress reports, and tracking site-specific EPA budgets.

Peoples Gas Light and Coke Company, Chicago River Investigation, Chicago, Illinois. Mr. Janssen was part of a team responsible for an investigation of possible contamination under the Chicago River at locations adjacent to former manufactured gas plants (MGP). Mr. Janssen's duties involved the continuous monitoring of water quality impacts during Geoprobe direct push, and hollow stem auger drilling investigations of river bottom sediment and subsurface soils.

Peoples Gas Light and Coke Company, 96th Street Station, Site Remediation, Chicago, Illinois. Mr. Janssen was responsible for the ambient air-monitoring program at 96th Street Station, a former manufactured gas plant (MGP) remediation project. Responsibilities included set up, operation, and solving operational problems for an automated real-time air monitoring system, as well as conducting 24-hour air monitoring and calibrating all field air monitoring equipment. Additional field duties for this project included conducting worker health and safety air monitoring, ambient air data reporting, and soil sampling. Mr. Janssen was also responsible for the composition of the Ambient Air Monitoring Report, as well as assisting in the writing of the Site Investigation and Remedial Action Completion Report.

City Colleges of Chicago, Chemical Safety and Hygiene Plan, Chicago, Illinois. Mr. Janssen assisted in preparing a Chemical Safety and Hygiene Plan (CHP) that meets the requirements of the "Laboratory Standard" of the Occupational Health and Safety Act (OSHA), 29 CFR 1910, Subpart Z for the City Colleges of Chicago. As part of this work, Mr. Janssen, along with other staff, conducted an extensive inventory of hazardous chemicals at the seven college campuses and ten satellite locations within the City of Chicago. Work resulted in development of a harmonized disposal program across all 17 locations for regulated materials and a CHP for the entire City College system, which addressed the products utilized by the curriculums/services at each college.

Sears Holdings Corporation, Environmental Support and Environmental Permitting, Hoffman Estates, Illinois. Mr. Janssen was involved with permitting support for the retailer nationwide. Efforts included applying for and renewal of numerous and diverse permits for individual retail locations nationwide, including permits for: hazardous material storage, transportation, and disposal, wastewater discharges and air emissions. Efforts also included development and renewal of Hazardous Materials Business Plans (HMBP's) required annually by the state of California at each retail location.

Chicago Department of Environment (CDOE), Critical Facility Assessments, Multiple Sites, Chicago, Illinois. Mr. Janssen conducted critical facility assessments and inspections at 27 locations throughout the City of Chicago for facilities that contain extremely hazardous substances, as defined by the Emergency Planning and Community Right-To-Know Act (EPCRA). This work was funded by the Department of Homeland Security. Facilities included local hospitals, manufacturing facilities, businesses, and critical infrastructure centers. Mr. Janssen's work included conducting site assessments of chemical storage practices, emergency and spill response equipment, data collection and evaluation to identify worst-case scenarios, and the preparation of emergency response guides for each facility. Mr. Janssen's work also included utilizing the ArcGIS and CAMEO program suites to model, analyze, and map potential atmospheric dispersions of hazardous chemicals during hypothetical incidents at each facility.

U. S. Environmental Protection Agency (USEPA) Region 5, Hazardous Waste School Audits and Collections Genesse County, MI. Mr. Janssen assisted the USEPA Region 5 to manage hazardous material reduction efforts at Genesee County, MI schools in an effort to reduce the volume of hazardous materials stored onsite and in use at county schools. Mr. Janssen performed site audits at the schools in conjunction with USEPA officials to identify hazardous materials for disposal and assist school and USEPA officials with implementation of best management practices. Mr. Janssen was also responsible for the oversight of the subcontractor performing the subsequent collection of hazardous materials identified for disposal.

Chicago Department of Water Management, Central Park Pumping Station, Chicago, Illinois. Mr. Janssen provided client contact, document review, project management, and review and approval all accounting functions for the development of design specifications, limited construction administration and oversight, for the renovation of the Central Park Pump Station (CPPS) at 1015 South Central Park Avenue. Mr. Janssen developed design specifications and provided construction administration and oversight for removal of Asbestos Containing Materials (ACM), Lead Based Paint (LBP), mercury-containing devices, and PCB-containing devices as part of restorations to CPPS. Starting in 2006 and through 2009, initial surveys and plans for the restoration of CPPS were prepared, including preparation of 100% design documents for bid. In 2009, due to funding issues, the restoration project was put on indefinite hold. Starting in 2012, the project was re-funded with a reduced scope, based on future plans to electrify the facility. Work from 2012-2014 has included returning to the facility to evaluate the presence and condition of materials identified in 2006, preparing updated design specifications for the final design documents, and reviewing contractor submittals.

City of Chicago Department of Aviation (CDA), O'Hare International Airport Modernization Program (OMP), Chicago, Illinois. Mr. Janssen provided client contact and project management for Asbestos Containing Materials (ACM) and Lead Based Paint (LBP) surveys and abatement oversight services as part of renovations to the public bathrooms at O'Hare airport. Work included ACM and LBP surveys of areas affected by renovations, development of abatement specifications for inclusion in bid documents, reporting and oversight of contractor abatement activities. Mr. Janssen was the client's point of contact, directed and coordinated field activities, reviewed prepared reports, and reviewed and approved all accounting functions including client invoices.

Department of the Navy, Base-wide Steam Lines Survey and Sampling, Great Lakes Naval Station, Great Lakes, Illinois. Mr. Janssen lead and managed two environmental field survey and sampling teams to meet an aggressive, client required deadline of 35-days from contract award to draft report for an environmental survey of the steam line system at the Great Lakes Naval Station targeted for demolition. Work included assessment, documentation, and sampling of over 30,000 linear feet of above and belowground steam piping, focusing on asbestos, lead paint, and other hazardous materials. The survey was conducted to identify materials for abatement prior to demolition and provide a cost estimate for planning purposes. Prior to the commencement of fieldwork, Mr. Janssen composed the Health and Safety Plan, inclusive of a Confined Space Entry and Permit Program, and provided confined space safety training certification to staff. Upon completion of fieldwork, Mr. Janssen assisted with report composition, utilized the ArcGIS software suite, and analyzed and mapped asbestos and lead survey results.

SYDNEY MILLER

ENVIRONMENTAL SCIENTIST I

Ms. Miller has multiple years of experience in the environmental field, specifically with environmental consulting. Her areas of knowledge include the following: various environmental assessments, including experience with Phase I and Phase II Environmental Site Assessments (ESAs) and Preliminary Site Assessments; historical usage review; and building inspections. Ms. Miller applies quality assurance measures in research, planning and reporting.

Education

B.S., Integrative Biology & Anthropology, University of Illinois at Urbana-Champaign, 2015

Certificates/Accreditations

OSHA 40-Hour HAZWOPER Training
DOT Hazmat Basic General Awareness Training
EPA Accredited Asbestos Building Inspector

Key Projects

ENVIRONMENTAL PROJECTS

Parsons Transportation Group, Inc., Chicago, Illinois (October 2019-present), Environmental Scientist. Ms. Miller conducted an environmental site investigation including several locations for proposed signal bridges or bridge replacement work along elevated railroad tracks and at the street level for CREATE Project WA1. In addition, Ms. Miller prepared a Special Waste Assessment (SWA) report following the site investigation in accordance with the Federal Highway Administration (FHWA) and the Federal Railroad Administration (FRA) *CREATE Railroad Property Special Waste Procedures*. Duties included accurately reporting observations from the site investigation, summarizing environmental database findings on or near the property, and reviewing prior provided records. The purpose was to identify environmental conditions or potential contamination associated with property and/or surrounding sites; and to subsequently provide a recommendation for additional environmental work, including a Preliminary Site Assessment (PSA).

City of Chicago Department of Fleet and Facility Management (2FM), National Environmental Policy Act (NEPA) Property Screens, (January 2019-present), Environmental Scientist. Ms. Miller provides support for the completion of property screens required to successfully comply with NEPA guidelines for properties which the Department of Buildings has sent demolition requests. EDI's responsibilities included creating environmental review records, identifying environmental hazards, and corresponding with the state and city preservation agency. *Mr. Patrick Dunn, Planner, CDM Smith, 125 S. Wacker Drive, Suite 600, Chicago, IL 60606, (312)-780-7726*

Commonwealth Edison, Environmental Support, (2018-present), Environmental Scientist. Since 2018, Ms. Miller has been actively performing environmental oversight and soil manifesting support for various projects with ComEd. Duties include supervising the removal of spoils from various excavations and providing manifest support for proper disposal. In addition, Ms. Miller provides report writing support following field work.

SET Environmental, Inc., Peoples Gas and Lighting (PGL) Gas Main Installation and Retirement, Chicago, Illinois (2018-present), Environmental Scientist. Ms. Miller currently reviews environmental databases for recognized environmental conditions on or adjacent to the project sites to identify potential impacted properties. Subsequently, Ms. Miller prepares summaries of the database and field survey findings in a Preliminary Environmental Site Assessment (PESA) report. In addition, Ms. Miller assists in coordinating field activities and completing the Source Site Certification by Owner or Operator LPC-662 Form documentation for PGL. *Ms. Vicky Cradduck, Project Manager, SET Environmental Inc. (847)533-5150.*

City of Chicago Department of Fleet and Facility Management (2FM) Data Review Project, Chicago, Illinois (March 2019), Environmental Scientist. Ms. Miller provided support for a large data review project for the City of Chicago, including reviewing physical copies of prior environmental reports, cataloguing the reports digitally, and updating the City of Chicago data portals with the additional reports. Duties included a detailed reviewing process, accurately cataloguing the reports, and attention to detail. The purpose of the project was to update the City of Chicago records with the hardcopies of previously prepared environmental reports.

Chicago Housing Authority (CHA), Chicago, Illinois (2018-present), Environmental Scientist. Ms. Miller provides support for report writing and field work associated with multiple, ongoing subsurface investigations and remedial actions on behalf of the CHA. Specifically, Ms. Miller provides draft reports, analyzes data and supports field work by assisting in collecting samples associated with property redevelopment and modernization at several of the City of Chicago former and current public housing facilities. Duties include extensive review of documentation regarding cleanup efforts and review of the historical usage of the subject property and surrounding sites. *Ms. Lynn Crivello, Environmental Development Manager, Chicago Housing Authority, 60 East Van Buren, Chicago, IL 60605, (312) 913-5868*

Confidential Investment Group Client – Yorkville Self Storage, Inc., Phase I Environmental Site Assessment (ESA), (June 2018), Environmental Scientist. Ms. Miller conducted and prepared a Phase I ESA report for a confidential investment group client for a site located in Yorkville. Duties included review of the historical usage by utilizing historical topographic maps, historical city telephone directories and historical aerial photographs, review of available documentation from the Illinois Environmental Protection Agency (IEPA) and/or Office of the Illinois State Fire Marshal (OSFM), and a site inspection of the property and surrounding sites. The purpose was to identify environmental conditions and/or potential contamination associated with historical uses of the property and/or surrounding sites; and to subsequently provide a recommendation for additional environmental work, if necessary.

Confidential Client, Phase I Environmental Site Assessment (ESA), (November 2017), Environmental Scientist. Ms. Miller conducted and prepared a Phase I ESA report for a confidential client for a site located on the Superfund Enterprise Management System (SEMS) environmental database. This site was located within the Pilsen Area Soil Site Operable Unit 1 (OU1) for lead soil contamination associated with the prolonged industrial history in the area. The United States Environmental Protection Agency (USEPA) has been overseeing cleanup efforts of surface soil in the area for several years. Duties included extensive review of USEPA documentation regarding cleanup efforts, review of the historical usage and a site inspection of the subject property and surrounding sites. The purpose was to identify environmental conditions and/or potential contamination hazards for the subject property and surrounding sites; and to subsequently provide a recommendation for additional environmental work, if necessary.

Confidential Client, Phase I Environmental Site Assessment (ESA), (September 2017), Environmental Scientist. Ms. Miller conducted and prepared a Phase I ESA report for a confidential client for a site that previously managed halogenated solvents associated with a former dry cleaner on the property. This site was identified on the Resource Conservation and Recovery Act (RCRA) environmental database and the IEPA Site Remediation Program (SRP) environmental database as having undergone site cleanup and remediation. Duties included review of available documentation from the IEPA regarding soil and/or groundwater remediation efforts conducted on the site, review of the historical usage, and a site inspection of the property and surrounding sites. In addition, the inspection of the property included observations of site engineered barriers to ensure the site was following the conditions of the No Further Remediation (NFR) letter issued by the IEPA to maintain contamination in place. The purpose was to identify environmental conditions and/or residual potential contamination hazards on the property and/or surrounding sites.

AKILAH TOWNSEND

ENVIRONMENTAL SCIENTIST II

Ms. Townsend is a graduate of University of Illinois. Recent key work has included Phase I and Phase II report writing, NEPA environmental reviews and NEPA property screens. Ms. Akilah Townsend is familiar with USEPA, IEPA, and OSHA regulations. Her areas of knowledge also include native species and conservation, and she has received training in surveying plant abundances, sampling animal populations and water quality analysis.

Education
B.S., Natural Resources and Environmental Science, Environmental Policy, University of Illinois at Urbana-Champaign, 2015

Licenses
Illinois Herbicide License

Certificates
Training in the use of the Corps Wetland Delineation Manual
HAZWOPER Certification

Volunteer Work
Science Fair Judge at Young Women's Leadership Charter School of Chicago, 2017

Key Projects

Orland Park Wetland Delineation Report, Orland Park, IL (September 2019). Ms. Townsend conducted a wetland delineation report for a proposed transmission line located within Orland Park, Illinois. By analyzing soil characteristics, evidence of hydrology and evidence of wetland vegetation, Ms. Townsend identified, and GPS mapped several wetland boundaries and completed the report for a USACE permit submittal.

Crestwood Drainage West, Crestwood, IL (August 2019). Ms. Townsend conducted a wetland delineation report for a drainage ditch construction project located within Crestwood, Illinois. By analyzing soil characteristics, evidence of hydrology and evidence of wetland vegetation, Ms. Townsend identified, and GPS mapped several wetland boundaries and created a wetland delineation report for a USACE permit submittal.

ComEd, 3807 South Michigan Avenue, Phase I and Phase II ESA (July 2018-present) Ms. Townsend conducted a Phase I investigation for a vacant site considered for purchase by ComEd. Environmental documents were reviewed to identify RECs that could impact construction and schedule. During the Phase II ESA, Ms. Townsend conducted soil and groundwater sampling to further investigate any RECs. A GPS monitor was utilized to record sampling locations. Ms. Townsend completed a report for the client that included site maps, data tables, a photo log, boring logs, and analytical data from the laboratory.

ComEd, QTS Data Center Laydown Yard, Phase I and Phase II ESA (July 2018-August 2018) Ms. Townsend conducted a Phase I investigation for a vacant site considered for purchase by ComEd. Environmental documents were reviewed to identify RECs that could impact construction and schedule. During the Phase II ESA, Ms. Townsend conducted soil and groundwater sampling to further investigate any RECs. A GPS monitor was utilized to record sampling locations. Ms. Townsend completed a report for the client that included site maps, data tables, a photo log, boring logs, and analytical data from the laboratory

Illinois Tollway Authority, I-294 Corridor, NEPA Assessment and ESIS, Environmental Scientist. Ms. Townsend conducted NEPA assessments required to identify natural resources including biological resources, wetlands, hydrological resources, and agricultural resources for the planning of tollway maintenance in accordance with the Illinois State Toll Highway Authority Environmental Studies Manual.

Illinois Tollway Authority, M-2, M-4 and M-8, NEPA Desktop Screens, Environmental Scientist. Ms. Townsend conducted desktop NEPA screens required to identify natural resources including biological resources, wetlands, hydrological resources, and agricultural resources for the planning of tollway facilities in accordance with the Illinois State Toll Highway Authority Environmental Studies Manual.

Department of Fleet and Facility Management (2FM), National Environmental Policy Act (NEPA) Reviews, (October 2016-present), Environmental Scientist. Ms. Townsend completes property screens required to successfully comply with NEPA guidelines for properties which the Department of Buildings has sent demolition requests. EDI's responsibilities included creating environmental review records, identifying environmental hazards, and corresponding with the state and city preservation agency.

Ecology and Environment, Inc. - IDOT Beach Park Phase II Environmental Site Assessment, (2016),

Environmental Scientist. Ms. Townsend participated in a Phase II ESA on a segment of Illinois Route 131 in Beach Park, Illinois to assess potential RECs previously found in through Phase I ESAs. The Phase II activities consisted of performing thirty six soil borings at the site to identify any contamination within ten site parcels along Illinois Route 131. Field screenings were performed on soil retrieved from borings and soil samples were collected and analyzed for various constituents relevant to the RECs identified at the site. *Dean Tiebout, Ecology and Environment, 33 West Monroe Street, Chicago, Illinois, 60603.*

ComEd, Meade Construction, 39th and Cottage Utilities Replacement, (November 2016 – January 2017) Ms. Townsend's role in this project was overseeing the removal of soil and transportation of soil to the landfill. Ms. Townsend's duties included signing and distributing waste manifests to truck drivers, and filling out daily reports which noted what was done during the day and how much soil was excavated.

Chicago Housing Authority (CHA), 4022 N. Elston Avenue, and Phase II ESA (January 2017-present) Ms. Townsend conducted a Phase II investigation for a former library being considered for purchase by the CHA. Environmental documents were reviewed to identify RECs that could impact construction and schedule. During the Phase II ESA, Ms. Townsend conducted soil and groundwater sampling to further investigate any RECs. A GPS monitor was utilized to record sampling locations. Ms. Townsend completed a report for the client that included site maps, data tables, a photo log, boring logs, and analytical data from the laboratory. Furthermore, Ms. Townsend completed groundwater modeling to estimate contamination impacts in the surrounding area. *Lynn Crivello, Chicago Housing Authority, 60 East Van Buren Street, Chicago, Illinois, 60605.*

Chicago Housing Authority (CHA), 6800 N. Western Avenue, and Phase II ESA (January 2017-present) Ms. Townsend conducted a Phase II investigation for a former library being considered for purchase by the CHA. Environmental documents were reviewed to identify RECs that could impact construction and schedule. During the Phase II ESA, Ms. Townsend conducted soil and groundwater sampling to further investigate any RECs. A GPS monitor was utilized to record sampling locations. Ms. Townsend completed a report for the client that included site maps, data tables, a photo log, boring logs, and analytical data from the laboratory. Furthermore, Ms. Townsend completed groundwater modeling to estimate contamination impacts in the surrounding area.

Chicago Housing Authority SOS Children's Village Phase I Environmental Site Assessment Report, (2017), Environmental Scientist. Ms. Townsend analyzed environmental information and constructed a Phase I Report for a parcel of vacant land located in Chicago, Illinois. The subject property is planned to become a multi-use facility, so historical environmental research was conducted through database searches, Freedom of Information Act (FOIA) requests, map analyses and site investigations. *Lynn Crivello, Chicago Housing Authority, 60 East Van Buren Street, Chicago, Illinois, 60605.*

NATURAL RESOURCES PROJECTS

Friends of the Forest Preserve, Beaubien Forest Preserve, Chicago, IL (2016) Conservation Leader led a team of 32 in the coordination and execution of restoration practices in the Beaubien Forest Preserve, within the 279 acres of Beaubien forest preserve's mix of woodland, prairie, savannah and wetland habitats, the invasive species removed ranged from buckthorn, Hawthorne trees, spotted knapweed, sweet clover, and garlic mustard, native species were seeded, watered and planted, then fenced off from deer; woody species which were cut were applied with herbicide, *Zach Taylor, Friends of the Forest Preserve, Chicago, Illinois 60605, 312-356-9990.*

Blacks in Green, Community Organization, Chicago, IL (2015-2016), Intern met with community members and leaders to establish alliances to collaborate and expand BIG's outreach and goals of building local living economies as greenhouse gas reduction strategies, developed reports on success and challenges of program work, Stewarded garden and orchard in maintenance while working in teams ranging from three to fifteen people *Naomi Davis, Blacks in Green, 6019 S. St Lawrence, Chicago, IL 60603, 773-678-9541.*

University of Illinois, Integrated Biology Lab, Champaign, IL (2015). US Army Corps of Engineers
Chicago District
231 South La Salle Street, Suite 1500
Chicago, IL 60604

Re: Approved Jurisdictional Determination Request and Kensington Marsh Coordination
CTA Red Line Extension Project
Chicago, Cook County, Illinois

Dear Mr. Smalley:

The Chicago Transit Authority (CTA) is preparing a Final Environmental Impact Statement (EIS) for the Red Line Extension (RLE) Project and this package is intended to serve as a request for an Approved Jurisdictional Determination (AJD). The AJD would be utilized for permitting commitments to be documented in the Final EIS. Additionally, CTA would like to request a Letter of No Objection for placement of a stormwater drainage outlet into Kensington Marsh. The Metropolitan Water Reclamation District of Greater Chicago (MWRD) has ownership of Kensington Marsh, and requires this statement of no objection for further coordination and approval of placement of a stormwater drainage outlet into Kensington Marsh.

Project Description

CTA, as project sponsor to the Federal Transit Administration (FTA), proposes to extend the Red Line from the existing 95th/Dan Ryan terminal to 130th Street. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. The Preferred Alignment would run south along I-94 from the 95th/Dan Ryan terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) on an elevated structure for nearly ½ mile until reaching and crossing over to the west side of the Union Pacific Railroad (UPRR) corridor in the vicinity of Eggleston Avenue. The alignment would turn south to follow the UPRR corridor on the elevated structure along the west side of the UPRR to 108th Place. At 108th Place the elevated structure would cross over to the east side of the UPRR corridor. The Preferred Alignment would continue along the east side of the UPRR corridor south and southeast to near

119th Street, where it would cross over the Canadian National/Metra Electric District tracks. South of this point, the Preferred Alignment would descend to grade while continuing southeast parallel to the Northern Indiana Commuter Transportation District/Chicago South Shore & South Bend Railroad corridor, using a portion of the Norfolk Southern Railway right-of-way. The alignment would continue south, going under 130th Street through a new opening in the 130th Street embankment to the terminus (end) of the RLE Project south of 130th Street. The project also includes a new yard and shop. The 120th Street yard and shop would provide a larger, modern railcar storage and repair facility for CTA at the south end of the RLE Project and would replace the function of the existing 98th Street Yard and Shop as a maintenance facility. This project is one part of the Red Ahead Program to extend and enhance the entire Red Line.

Approved Jurisdictional Determination Request

CTA requests an AJD for wetland and water resources and potential resources located in the RLE Project potential action area. **Enclosure A** includes the standard "Request for a Jurisdictional Determination" form. CTA is submitting this request subsequent to a pre-application meeting held on March 4, 2021, with representatives of USACE, MWRD, and CTA. A site meeting to review resources discussed in this document occurred on May 11, 2021, with representatives of the USACE and CTA.

This AJD request includes 20 resource locations, including Kensington Marsh (wetland 20). Locations are identified on **Figures 1** to **3**, provided in **Enclosure B**. These figures include the area for the AJD request. **Figures 4** to **6** identify the property ownership in the AJD area. The RLE Project previously received an AJD under the USACE Project Number LRC-2016-00408. A copy of this AJD is provided as **Enclosure C**. Wetlands 1 to 15 were identified in the previous AJD as being either isolated waters or exempt from regulation. Documentation of these wetlands was previously provided in a 2015 wetland delineation report by Hey & Associates. This wetland report is provided in **Enclosure D**.

USACE and CTA noted four (4) other potential wetland areas during the May 2021 project site review. These potential wetland areas have been noted on the submitted AJD request figures as wetlands 16 to 19, plus Kensington Marsh (wetland 20). These potential wetlands have been mapped utilizing aerial imagery. No additional delineation has been completed because these potential wetland areas are not expected to be considered waters of the U.S. The areas noted are low drainage areas exhibiting some surface ponding at the time of the visit (potential wetlands 16 - 18) or areas that appeared to be dominated by hydrophytic vegetation (potential wetland 19). The potential wetland areas are described as follows:

- Potential wetlands 16 and 17 are located in a drainage swale between a Beaubien Woods Forest Preserve access road and existing railroad track north of 132nd Street. No overland connectivity was observed for drainage from this area.
- Potential wetland 18 is located in a low area west of a Beaubien Woods Forest Preserve access road, north of 132nd Street. No overland connectivity was observed for drainage from this area.
- Potential wetland 19 consists of a strip of land observed to contain common reed (*Phragmites australis*) located to the south of the American Recycling facility to the

north/east of the facility access road. This potential wetland area is similar in location and connectivity to wetlands 6, 7, and 15.

Kensington Marsh (Wetland 20) is also included in this request. Kensington Marsh consists of constructed wetlands surrounding constructed open water. The dominant wetland vegetation is common reed. The wetland drains into a MWRD inlet at the southeast corner of the property. Kensington Marsh is discussed further below.

CTA requests an AJD of the resources described above and depicted in **Enclosure B**.

Kensington Marsh Letter of No Objection

MWRD constructed Kensington Marsh as part of a mitigation project for wetland impacts from development of their facilities located to the south of the marsh. The permit is associated with Application Number 5108502, effective June 10, 1985. MWRD supplied a copy of this permit to CTA, provided in **Enclosure E**. USACE and CTA observed that the constructed wetland area appears to be operating as designed, despite the dominance of a common reed monoculture.

After reviewing a variety of drainage options for the 120th Street yard and shop required to support the RLE operation, CTA has determined that the only reasonable and feasible drainage option for this location is to outlet a storm drainage pipe to Kensington Marsh. During the preliminary engineering phases, neither MWRD nor USACE has objected to stormwater drainage to Kensington Marsh from the 120th Street yard and shop area. MWRD requires a letter of no objection from the USACE to move forward with further coordination on this item.

The conceptual placement for the stormwater drainage outlet is in the northern third of Kensington Marsh. A preliminary drainage map is provided in **Enclosure F**. The drainage map also identifies detention ponds that will be utilized for the retention and treatment of stormwater runoff. Any stormwater from the 120th Street yard and shop area will be filtered through the detention ponds prior to entering Kensington Marsh. In order to maintain allowable flow rates into Kensington Marsh, nine (9) proposed detention ponds are included (eight above ground and one underground) in the proposed railroad yard project limits. The marsh is considered “open water,” which allows for a higher allowable release rate in comparison to discharging to an underground drainage pipe system. Prior to entering each respective detention pond, runoff would be collected by underdrains wrapped in a permeable filter fabric and located between selected railroad tracks. The underdrains are located in the sub-ballast section. These underdrains connect into pipes that outlet into respective detention ponds. The combination of the ballast, sub-ballast, and underdrains with filter fabric comprise the Volume Control Best Management Practices (VCBMP’s) by minimizing suspended solids entry into the detention ponds. The VCBMP receives credit for the required water quality pre-treatment. Pre-treatment devices such as BaySaver units will be used to filter the parking lot and roof drainage before it enters a detention pond. To mitigate flow rates, the ponds utilize an outlet control structure, which includes orifices, a gate, and discharge pipe. Ultimately, the runoff exits a pond via the discharge pipe and enters the marsh. The access road to the railyard includes catch basins with a deep sump. The deep sump is used to collect sediment. The pipe leaving the catch basins connects into the pipe network that enters the marsh (i.e., the road drainage does not enter the detention ponds). Volumes and peak flows have been calculated for a variety storm year events and durations, provided in **Enclosure G**.

Placement of the drainage outlet will disturb a small area of the Kensington Marsh wetland. CTA has not finalized grading limits during this preliminary analysis phase, but will not permanently fill more than 0.1 acre of wetland in the marsh. The area of fill is likely to be lower than this maximum quantity. Additionally, CTA will document the site conditions prior to construction and restore any area disturbed for construction to pre-construction conditions. No construction staging area will be placed in Kensington Marsh. All construction and restoration efforts will be coordinated with MWRD.

CTA requests USACE to provide a letter stating no objection to the use of Kensington Marsh for stormwater drainage.

We appreciate your review of these materials at your earliest convenience to complete an AJD and provide a letter stating no objection to use of Kensington Marsh for stormwater drainage. If you have any questions or require further information, please contact me at mfratinardo@transitchicago.com or Mr. Kelsey Kropp at krkropp@transystems.com or 816-490-1319. If preferred, we can set up a virtual meeting to discuss any clarifications or questions you have regarding this request.

Regards,

Marlise Fratinardo
Senior Project Manager, Planning
Chicago Transit Authority

U.S. ARMY CORPS OF ENGINEERS, CHICAGO DISTRICT

REQUEST FOR A JURISDICTIONAL DETERMINATION

For use of this form, see ER 405-1-12; the proponent agency is CELRC-TS-R.

PRIVACY ACT STATEMENT

AUTHORITIES: The Department of the Army permit program is authorized by Section 10 of the Rivers and Harbors Act (*RHA*) of 1899, 33 CFR Section 404 of the Clean Water Act, and Section 103 of the Marine Protection, Research, and Sanctuaries Act.
PRINCIPAL PURPOSE: These laws require permits authorizing activities in or affecting navigable waters of the United States, the discharge of dredged or fill material into water of the United States, and the transportation of dredged material for the purpose of dumping it into ocean waters.
ROUTINE USE*(s)*: Information provided on this form will be used in determining Department of the Army jurisdictional boundaries. Information in this application is made a matter of public record.
DISCLOSURE OF THE INFORMATION REQUESTED IS VOLUNTARY: however, the data requested are necessary in order to establish Federal regulatory jurisdiction. If the necessary information is not provided, the jurisdictional determination cannot be completed.

This form can be used when you want to determine if areas on your property fall under regulatory requirements of the U.S. Army Corps of Engineers (*USACE*). Please supply the following information and supporting documents described below. This form can be filled out online and then printed. It must be **SIGNED BY THE PROPERTY OWNER** to be considered a formal request. Submitting this request authorizes the US Army Corps of Engineers to field inspect the property site, if necessary, to help in the determination process. The printed form and supporting documents should be mailed to:

U.S. ARMY CORPS OF ENGINEERS, CHICAGO DISTRICT
REGULATORY BRANCH
231 SOUTH LASALLE STREET, SUITE 1500
CHICAGO, ILLINOIS 60604
FAX NUMBER: 312.353.4110
E-MAIL: ChicagoRequests@usace.army.mil

Additionally, you may either call our branch telephone at 312.846.5530 or view our website at http://www.lrc.usace.army.mil/Portals/36/docs/Regulatory/newapps.pdf to determine which number and project manager has been assigned to your request. Project Manager contact information can be found here: http://www.lrc.usace.army.mil/Missions/Regulatory/ContactInfo.aspx . Please contact us if you need any assistance with filling out this form.

SECTION I - LOCATION AND INFORMATION ABOUT PROPERTY TO BE SUBJECT TO A JURISDICTIONAL DETERMINATION

1. PROPERTY ADDRESS / LOCATION
CTA RLE Extension

2. CITY (*Name*) OR UNINCORPORATED Chicago		3. STATE Illinois		4. ZIP CODE 60627/60628
5. COUNTY Cook		6. TOWNSHIP NAME Lake Calumet		
7. QUARTER	8. SECTION 22, 26, 27, &35	9. TOWNSHIP 37N	10. RANGE 14E	11. PRINCIPAL MERIDIAN (*PM*)
12a. LATITUDE IN DECIMAL DEGREES °NORTH 41.667993		b. LONGITUDE IN DECIMAL DEGREES °WEST -87.602630		
13. SIZE OF PROPERTY IN ACRES 175 Acres		14. TAX PERSONAL IDENTIFICATION NUMBER (*PIN*)		

15. PRIOR OR RELATED USACE PROJECT NUMBER
LRC-2016-00408

16. IS THE PROPERTY SUBJECT TO A CONSERVATION EASEMENT OR DEED RESTRICTION ? ☐ YES ☒ NO IF YES, PLEASE EXPLAIN AND SUBMIT DETAILS OF THE PROJECT AREA.
See attached discussion

17. WAS THE PROPERTY A SITE FOR MITIGATION PURSUANT TO A PROJECT PREVIOUSLY PERMITTED BY USACE? ☒ YES ☐ NO IF YES, PLEASE EXPLAIN AND SUBMIT DETAILS OF THE PROJECT AREA.
See attached discussion

18. IS THE PROPERTY NEIGHBORING / ADJACENT TO / BORDERING A PROJECT PREVIOUSLY PERMITTED BY USACE? ☒ YES ☐ NO
IF YES, PLEASE EXPLAIN AND SUBMIT THE NAME OF THE PROJECT, THE PERMITTEE'S NAME AND / OR ADDRESS, AND CORPS PERMIT NUMBER, IF AVAILABLE.

See attached discussion

SECTION II - PROPERTY OWNER CONTACT INFORMATION

1. PROPERTY OWNER NAME *(Last, First MI) (must be an individual)*
Fratinardo, Marlise (Ms.)(Project Representative)/ Ellen Avery (Ms.)(Property Owner Representative) - See Enclosure B

2. PROPERTY OWNER COMPANY *(if applicable)*
Chicago Transit Authority (CTA)/Metropolitan Water Reclamation District of Greater Chicago (MWRD) - See Enclosure B

3. MAILING ADDRESS *(Post Office Box, Street, City, State and Zip Code)*
567 West Lake Street
Chicago, Illinois 60661-1489

4. DAYTIME TELEPHONE NUMBER 312-681-4124	5. FAX NUMBER	6. E-MAIL ADDRESS mfratinardo@transitchicago.com

SECTION III - REQUESTOR NON-PROPERTY OWNER CONTACT INFORMATION

IF THE PERSON REQUESTING THE JURISDICTIONAL DETERMINATION IS NOT THE PROPERTY OWNER, PLEASE ALSO SUPPLY THE REQUESTOR'S CONTACT INFORMATION HERE.

1. REQUESTOR'S NAME *(Last, First MI)*
Fratinardo, Marlise (Ms.)

2. REQUESTOR'S COMPANY *(if applicable)*
Chicago Transit Authority (CTA)

3. MAILING ADDRESS *(Post Office Box, Street, City, State and Zip Code)*
567 West Lake Street
Chicago, Illinois 60661-1489

4. DAYTIME TELEPHONE NUMBER 312-681-4124	5. FAX NUMBER	6. E-MAIL ADDRESS mfratinardo@transitchicago.com

SECTION IV - OTHER DATA AND SIGNATURE CERTIFICATION

1. OTHER DATA / INFORMATION THAT MAY ASSIST WITH DETERMINATION
Please see the attached narrative document. This form is listed as Enclosure A. Enclosures additional to this document include:
Enclosure B – AJD Resource Figures
Enclosure C – Project AJD for LRC-2016-00408
Enclosure D – Hey & Associates 2015 Wetland Delineation Report
Enclosure E – Kensington Marsh Permit 5108502
Enclosure F – Preliminary Drainage Plan
Enclosure G – Kensington Marsh Storm Event Volume and Peak Flow Data

Please provide a map and / or copy of the plat of survey identifying the physical boundaries of the property.

Additionally, if you have any of the following information, please include it with your request: wetland delineation, relevant maps, drain tile survey, topographic survey, and site photographs.

If you are considering doing work on the property, please identify on the required site map, plat of survey, or in a separate drawing: the footprint, location, and type of potential work. It will assist us in the determination process and reduce unnecessary delays of processing subsequent permits, if required.

I hereby certify that the information contained in the Request for a Jurisdictional Determination is accurate and complete:

2a. PROPERTY OWNER *(Last, First MI)*	b. DATE *(YYYYMMDD)*	c. PROPERTY OWNER'S SIGNATURE

REPLY TO
ATTENTION OF:

October 3, 2016

Technical Services Division
Regulatory Branch
LRC-2016-408

SUBJECT: Request for a Jurisdictional Determination for the CTA Red Line Extension Project Along and East of Cottage Grove Avenue between 119th Street and 130th Street in the Lake Michigan Watershed of the City of Chicago, Cook County, Illinois (41.66428, -87.59925)

Tandon Sanoli
Chicago Transit Authority
567 West Lake Street
Chicago, Illinois 60661

Dear Mr. Sanoli:

This is in response to your request that the U.S. Army Corps of Engineers complete a jurisdictional determination for the above-referenced site submitted on your behalf by Hey and Associates, Inc. The subject project has been assigned number LRC-2016-408. Please reference this number in all future correspondence concerning this project.

Following a review of the information you submitted, this office has determined that there are no waterways, wetlands or other areas considered "waters of the United States" under Corps of Engineers jurisdiction on the site. This site was subject to a previous jurisdictional determination under Chicago District project number LRC-2016-330 which found all of the wetlands and waters identified in your submittal to be either isolated waters or exempt from regulation. A copy of that approved jurisdictional determination is included for your records and is considered by the Chicago District to be valid until five years from the date of its original issuance on June 29, 2016 (see attached letter and basis forms).

It is your responsibility to obtain any required state, county, or local approvals for impacts to wetland areas not under the Department of the Army jurisdiction. For projects located in unincorporated and unauthorized municipalities in Cook County, please contact the Metropolitan Water Reclamation District of Greater Chicago at (312) 751-3247. For projects in incorporated areas of Cook County, contact the authorized municipality for information related to the Watershed Management Ordinance.

Pursuant to Section 404 of the Clean Water Act, the U.S. Army Corps of Engineers regulates the discharge of dredged or fill material into waters of the United States, including wetlands. A Department of the Army permit is required for any proposed work involving the discharge of dredged or fill material within the jurisdiction of this office. To initiate the permit process, please submit a joint permit application form along with detailed plans of the proposed work. Information concerning our program, including the application form and an application checklist, can be found at and downloaded from our website: http://www.lrc.usace.army.mil/Missions/Regulatory.aspx

If you have any questions, please contact Michael Murphy of my staff by telephone at 312-846-5538 or email at Michael.J.Murphy@usace.army.mil.

Sincerely,
CHERNICH.KATHLEEN.G.

June 29, 2016

Technical Services Division
Regulatory Branch
LRC-2016-00330

SUBJECT: Request for a Jurisdictional Determination on the ComEd GRID Z4333 Property North of 130th Street along Cottage Grove Avenue in Chicago, Cook County, Illinois (ComEd ESD #2016-100) (CBBEL Project No. 040532.00804)

Sara Race
Commonwealth Edison
Three Lincoln Center, 3rd Floor
Oakbrook Terrace, Illinois 60181-4260

Dear Ms. Race:

This is in response to your request that the U.S. Army Corps of Engineers complete a jurisdictional determination for the above-referenced site submitted on your behalf by Christopher B. Burke Engineering, Ltd. (CBBEL). The subject project has been assigned number LRC-2016-00330. Please reference this number in all future correspondence concerning this project.

Following a review of the information you submitted, this office has determined that there are no waterways, wetlands or other areas considered "waters of the United States" under Corps of Engineers jurisdiction at the site.

Wetlands #1 & #2 have been determined to be isolated and therefore not subject to Federal regulation. Ditches #1 and #2 are water features Exempt from Federal regulation. Please be informed that this office does not concur with the boundaries of waters not under the jurisdiction of this office.

For a detailed description of our determination please refer to the enclosed decision document. This determination covers only your project as depicted in Request for Jurisdictional Determination Report dated May 10, 2016, prepared by CBBEL.

This determination is valid for a period of five (5) years from the date of the letter, unless new information warrants revision of the determination before the expiration date or a District Commander has identified, after public notice and comment, that specific geographic areas with rapidly changing environmental conditions merit re-verification on a more frequent basis.

This letter is considered an approved jurisdictional determination for your subject site. If you object to this determination, you may appeal, according to 33 CFR Part 331. Enclosed you will find a Notification of Appeal Process (NAP) fact sheet and a Request for Appeal (RFA) form. If you request to appeal the above determination, you must submit a completed RFA form to the Great Lakes/Ohio River Division Office at the following address:

Jacob Siegrist
Appeal Review Officer
Great Lakes and Ohio River Division
CELRD-PD-REG
550 Main Street, Room 10032
Cincinnati, Ohio 45202-3222
Phone: (513) 684-2699 Fax: (513) 684-2460

In order to be accepted, your RFA must be complete, meet the criteria for appeal and be received by the Division Office within sixty (60) days of the date of the NAP. If you concur with the determination in this letter, submittal of the RFA form to the Division office is not necessary.

This determination has been conducted to identify the limits of the Corps Clean Water Act jurisdiction for the particular site identified in this request. This determination may not be valid for the wetland conservation provisions of the Food Security Act of 1985, as amended. If you or your tenant are USDA program participants, or anticipate participation in USDA programs, you should request a certified wetland determination from the local office of the Natural Resources Conservation Service prior to starting work.

It is your responsibility to obtain any required state, county, or local approvals for impacts to wetland areas not under the Department of the Army jurisdiction. For projects located in unincorporated and unauthorized municipalities in Cook County, please contact the Metropolitan Water Reclamation District of Greater Chicago at (312) 751-3247. For projects in incorporated areas of Cook County, contact the authorized municipality for information related to the Watershed Management Ordinance.

Pursuant to Section 404 of the Clean Water Act, the U.S. Army Corps of Engineers regulates the discharge of dredged or fill material into waters of the United States, including wetlands. A Department of the Army permit is required for any proposed work involving the discharge of dredged or fill material within the jurisdiction of this office. To initiate the permit process, please submit a joint permit application form along with detailed plans of the proposed work. Information concerning our program, including the application form and an application checklist, can be found at and downloaded from our website:
http://www.lrc.usace.army.mil/Missions/Regulatory.aspx

If you have any questions, please contact Mr. Mike Machalek of my staff by telephone at 312-846-5534 or email at Mike.J.Machalek@usace.army.mil.

NOTIFICATION OF ADMINISTRATIVE APPEAL OPTIONS AND PROCESS AND REQUEST FOR APPEAL

Applicant: Sara Race, Commonwealth Edison	File Number: LRC-2016-00330	Date: June 29, 2016

Attached is:		See Section below
	INITIAL PROFFERED PERMIT (Standard Permit or Letter of Permission)	A
	PROFFERED PERMIT (Standard Permit or Letter of Permission)	B
	PERMIT DENIAL	C
X	APPROVED JURISDICTIONAL DETERMINATION	D
	PRELIMINARY JURISDICTIONAL DETERMINATION	E

SECTION I - The following identifies your rights and options regarding an administrative appeal of the above decision. Additional information may be found at http://www.usace.army.mil/CECW/Pages/reg_materials.aspx or Corps regulations at 33 CFR Part 331.

A. INITIAL PROFFERED PERMIT: You may accept or object to the permit.

- ACCEPT: If you received a Standard Permit or a Letter of Permission (LOP), you may sign the permit document and return it to the district commander for final authorization. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- OBJECT: If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district commander. Your objections must be received by the district commander within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district commander will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district commander will send you a proffered permit for your reconsideration, as indicated in Section B below.

B. PROFFERED PERMIT: You may accept or appeal the permit

- ACCEPT: If you received a Standard Permit or a Letter of Permission (LOP), you may sign the permit document and return it to the district commander for final authorization. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- APPEAL: If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division commander. This form must be received by the division commander within 60 days of the date of this notice.

C. PERMIT DENIAL: You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division commander. This form must be received by the division commander within 60 days of the date of this notice.

D. APPROVED JURISDICTIONAL DETERMINATION: You may accept or appeal the approved JD or provide new information.

- ACCEPT: You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of this notice, means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.
- APPEAL: If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division commander. This form must be received by the division commander within 60 days of the date of this notice.

E. PRELIMINARY JURISDICTIONAL DETERMINATION: You do not need to respond to the Corps regarding the preliminary JD. The Preliminary JD is not appealable. If you wish, you may request an approved JD (which may be appealed), by contacting the Corps district for further instruction. Also you may provide new information for further consideration by the Corps to reevaluate the JD.

SECTION II - REQUEST FOR APPEAL or OBJECTIONS TO AN INITIAL PROFFERED PERMIT

REASONS FOR APPEAL OR OBJECTIONS: (Describe your reasons for appealing the decision or your objections to an initial proffered permit in clear concise statements. You may attach additional information to this form to clarify where your reasons or objections are addressed in the administrative record.)

ADDITIONAL INFORMATION: The appeal is limited to a review of the administrative record, the Corps memorandum for the record of the appeal conference or meeting, and any supplemental information that the review officer has determined is needed to clarify the administrative record. Neither the appellant nor the Corps may add new information or analyses to the record. However, you may provide additional information to clarify the location of information that is already in the administrative record.

POINT OF CONTACT FOR QUESTIONS OR INFORMATION:

If you have questions regarding this decision and/or the appeal process you may contact:

Regulatory Branch
Chicago District Corps of Engineers
231 South LaSalle Street, Suite 1500
Chicago, IL 60604-1437
Phone: (312) 846-5530
Fax: (312) 353-4110

If you only have questions regarding the appeal process you may also contact:

Jacob Siegrist
Appeal Review Officer
Great Lakes and Ohio River Division
CELRD-PD-REG
550 Main Street, Room 10032
Cincinnati, Ohio 45202-3222
Phone: (513) 684-2699 Fax: (513) 684-2460

RIGHT OF ENTRY: Your signature below grants the right of entry to Corps of Commanders personnel, and any government consultants, to conduct investigations of the project site during the course of the appeal process. You will be provided a 15-day notice of any site investigation, and will have the opportunity to participate in all site investigations.

________________________________ Signature of appellant or agent.	Date:	Telephone number:

APPROVED JURISDICTIONAL DETERMINATION FORM
U.S. Army Corps of Engineers

This form should be completed by following the instructions provided in Section IV of the JD Form Instructional Guidebook.

SECTION I: BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD): June 29, 2016

B. DISTRICT OFFICE, FILE NAME, AND NUMBER: Chicago District, ComEd, LRC-2016-330

C. PROJECT LOCATION AND BACKGROUND INFORMATION: NW of I-94 and 130th Street
State: Illinois County/parish/borough: **Cook** City: Chicago
Center coordinates of site (lat/long in degree decimal format): Lat. 41.667957°N, Long. -87.601762° W.
Universal Transverse Mercator: Zone 16
Name of nearest waterbody: Calumet River
Name of nearest Traditional Navigable Water (TNW) into which the aquatic resource flows: **Calumet River**
Name of watershed or Hydrologic Unit Code (HUC): **Little Calumet-Galien (04040001)**
☒ Check if map/diagram of review area and/or potential jurisdictional areas is/are available upon request.
☐ Check if other sites (e.g., offsite mitigation sites, disposal sites, etc…) are associated with this action and are recorded on a different JD form.

D. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):
☒ Office (Desk) Determination. Date: June 6, 2016
☒ Field Determination. Date(s): May 27, 2016

SECTION II: SUMMARY OF FINDINGS

A. RHA SECTION 10 DETERMINATION OF JURISDICTION.

There **Are no** "*navigable waters of the U.S.*" within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area. [*Required*]

B. CWA SECTION 404 DETERMINATION OF JURISDICTION.

There **Are no** "*waters of the U.S.*" within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area. [*Required*]

2. Non-regulated waters/wetlands (check if applicable):[1]
☒ Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain: **Wetlands 1 & 2 are shallow Phragmites dominated wetland in a flat landscape, connected to roadside ditches that don't drain anywhere**.

SECTION III: CWA ANALYSIS

E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS, INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS (CHECK ALL THAT APPLY):[2]
☐ which are or could be used by interstate or foreign travelers for recreational or other purposes.
☐ from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.
☐ which are or could be used for industrial purposes by industries in interstate commerce.
☐ Interstate isolated waters. Explain: .
☐ Other factors. Explain: .

Identify water body and summarize rationale supporting determination: .

Provide estimates for jurisdictional waters in the review area (check all that apply):
☐ Tributary waters: linear feet width (ft).
☐ Other non-wetland waters: acres.
Identify type(s) of waters: **.**
☐ Wetlands: acres.

---

[1] Supporting documentation is presented in Section III.F.

[2] **Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA *Memorandum Regarding CWA Act Jurisdiction Following Rapanos.***

F. NON-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY):

☐ If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements.

☒ Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce.

  ☒ Prior to the Jan 2001 Supreme Court decision in "*SWANCC*," the review area would have been regulated based solely on the "Migratory Bird Rule" (MBR).

☐ Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Explain: **.**

☐ Other: (explain, if not covered above): **.**

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (i.e., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment (check all that apply):

☐ Non-wetland waters (i.e., rivers, streams): linear feet width (ft).

☐ Lakes/ponds: acres.

☐ Other non-wetland waters: acres. List type of aquatic resource: .

☒ Wetlands: 1.6 acres.

Provide acreage estimates for non-jurisdictional waters in the review area that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction (check all that apply):

☐ Non-wetland waters (i.e., rivers, streams): linear feet, width (ft).

☐ Lakes/ponds: acres.

☐ Other non-wetland waters: acres. List type of aquatic resource: .

☐ Wetlands: acres.

SECTION IV: DATA SOURCES.

A. SUPPORTING DATA. Data reviewed for JD (check all that apply - checked items shall be included in case file and, where checked and requested, appropriately reference sources below):

☒ Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: CBBEL May 10, 2016 Request for Jurisdictional Determination Report.

☐ Data sheets prepared/submitted by or on behalf of the applicant/consultant.

  ☐ Office concurs with data sheets/delineation report.

  ☐ Office does not concur with data sheets/delineation report.

☐ Data sheets prepared by the Corps: .

☐ Corps navigable waters' study: .

☒ U.S. Geological Survey Hydrologic Atlas:Lake Calumet HA 205, 1966, .

  ☐ USGS NHD data.

☒ Area(s) are geographically isolated. Wetlands are shallow isolated depressions in the lake plain region of Lake Michigan.

☒ Area(s) do not have a hydrologic nexus. Water does not drain off-site into any flowing water of the U.S.

☒ Area(s) do not have an ecological nexus. .

☒ Area(s) do not have evidence of a subsurface flow connection to a jurisdictional water. .

☒ Area(s) do not have evidence of surface overland sheet flow. .

☒ Area(s) are not located within the flood plain. .

APPROVED JURISDICTIONAL DETERMINATION FORM
U.S. Army Corps of Engineers

This form should be completed by following the instructions provided in Section IV of the JD Form Instructional Guidebook.

SECTION I: BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD): June 29, 2016

B. DISTRICT OFFICE, FILE NAME, AND NUMBER: Chicago District, ComEd, LRC-2016-330

C. PROJECT LOCATION AND BACKGROUND INFORMATION: NW of I-94 and 130th Street
State: Illinois County/parish/borough: **Cook** City: Chicago
Center coordinates of site (lat/long in degree decimal format): Lat. 41.66796°N, Long. -87.60176° W.
Universal Transverse Mercator: Zone 16
Name of nearest waterbody: Calumet River
Name of nearest Traditional Navigable Water (TNW) into which the aquatic resource flows: **Calumet River**
Name of watershed or Hydrologic Unit Code (HUC): **Little Calumet-Galien (04040001)**
☒ Check if map/diagram of review area and/or potential jurisdictional areas is/are available upon request.
☐ Check if other sites (e.g., offsite mitigation sites, disposal sites, etc…) are associated with this action and are recorded on a different JD form.

D. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):
☒ Office (Desk) Determination. Date: June 6, 2016
☒ Field Determination. Date(s): May 27, 2016

SECTION II: SUMMARY OF FINDINGS

A. RHA SECTION 10 DETERMINATION OF JURISDICTION.

There **Are no** "*navigable waters of the U.S.*" within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area. [*Required*]

B. CWA SECTION 404 DETERMINATION OF JURISDICTION.

There **Are no** "*waters of the U.S.*" within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area. [*Required*]

2. **Non-regulated waters/wetlands (check if applicable):**[1]
☒ Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain: **Two shallow roadside ditches are exempt**.

SECTION III: CWA ANALYSIS

F. NON-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY):
☐ If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements.
☐ Other: (explain, if not covered above): **.**

SECTION IV: DATA SOURCES.

A. SUPPORTING DATA. Data reviewed for JD (check all that apply - checked items shall be included in case file and, where checked and requested, appropriately reference sources below):
☒ Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: CBBEL May 10, 2016 Request for Jurisdictional Determination Report.
☒ Data sheets prepared/submitted by or on behalf of the applicant/consultant.
  ☒ Office concurs with data sheets/delineation report.
  ☐ Office does not concur with data sheets/delineation report.
☐ Data sheets prepared by the Corps: .
☐ Corps navigable waters' study: .
☒ U.S. Geological Survey Hydrologic Atlas:Lake Calumet HA 205, 1966, .

B. ADDITIONAL COMMENTS TO SUPPORT JD: Site visit on May 27, 2016 to walk ditches.

☒ Areas are ditches (check all that apply): .
☒ Non-tidal drainage and irrigation ditches excavated on dry land (51 FR 41217, Nov. 13, 1986). .
☒ Ditches (including roadside ditches) excavated wholly in and draining only uplands and that do not carry a relatively permanent flow of water (USACE JD Form Instructional Guidebook 5/30/2007). .
☐ Ditches that do not have a relatively permanent flow into waters of the U.S. or between two (or more) waters of the U.S. (USACE JD Form Instructional Guidebook 5/30/2007). .

☐ Area(s) are artificial waters created in upland or dry land: .
☐ Artificially irrigated areas which would revert to upland if the irrigation ceased (51 FR 41217, Nov. 13, 1986). .
☐ Artificial lakes or ponds created by excavating and/or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing (51 FR 41217, Nov. 13, 1986). .
☐ Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating and/or diking dry land to retain water for primarily aesthetic reasons (51 FR 41217, Nov. 13, 1986). .
☐ Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States (51 FR 41217, Nov. 13, 1986). .
☐ Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the Clean Water Act (other than cooling ponds as defined in 40 CFR 423.11(m) which also meet criteria of this definition) (33 CFR 328.3 (a)). .

☐ Area(s) are swales (USACE JD Form Instructional Guidebook 5/30/2007). .
☐ Area(s) are erosional features (including gullies) (USACE JD Form Instructional Guidebook 5/30/2007). .
☐ Area(s) are prior converted cropland (33 CFR 328.3(a)(8)). .
☐ Area(s) are uplands. .
☐ Other: .

INTRODUCTION

A wetland delineation of the 78.9-acre permanent project envelope for the southern portion of the Chicago Transit Authority's Red Line Extension, near Lake Calumet was conducted on August 13 and 19, 2015. The site is located west of Interstate 94 (Bishop Ford Expressway), north of 130th Street, along the east side of the Metropolitan Water Reclamation District of Greater Chicago's (MWRD) Calumet Waste Water Treatment plant within the City of Chicago, Cook County, Illinois (Exhibit 1). The site is further located in Sections 22, 26, and 27, Township 37 North, Range 14 East. The project permanent envelope includes Cottage Grove Avenue, parts of the MWRD property, railroad lines, and other disturbed urban-industrial landscapes. The property has been disturbed by various grading, dumping, and filling activities over the past decades.

EXISTING DATA

The United States Geological Survey (USGS) topographic map indicates open water at the locations of the MWRD sewage lagoons and sludge drying beds (Exhibit 2), but does not indicate any wetlands or blue line streams within the defined project permanent envelope. The National Wetland Inventory (NWI) map similarly depicts the sewage lagoons and sludge drying beds, but also indicates the presence of wetlands within the project permanent envelope (Exhibit 3) that are designated PF01/EMCd (palustrine, forested, broad-leaved deciduous/emergent seasonally flooded, partially drained/ditched). The Flood Insurance Rate Map indicates no mapped floodplain or floodway within the project permanent envelope (Exhibit 4). The USGS Hydrologic Atlas indicates no flood of record waters within the project permanent envelope (Exhibit 5). The Cook County Soil Survey (Exhibit 6) shows six (6) different soil series of orthents, or urban land within the project permanent envelope.

WETLAND DELINEATION

Wetlands within the project permanent envelope were delineated by Vincent Mosca and Jeffrey Mengler, PWS of Hey and Associates, Inc. using procedures outlined in the 1987 Corps of Engineers' (Corps) Wetland Delineation Manual and the 2010 Regional Supplement: Midwest Region. The entire property was inspected, with areas supporting wetland plant species prioritized for investigation. If inspection revealed that wetland plant species comprised more than 50 percent of the plant cover, the suspected wetland was further examined for field indicators of hydric soil and hydrology. The Corps-accepted field indicators of hydric soil include: gleyed and low chroma matrix and mottle colors, and iron and manganese concretions. Necessary hydric soil indicators were field verified in the wetland area if possible. In most cases in this project permanent envelope, the gravel and fill precluded investigation with hand tools, and the disturbed profiles would not have been illuminating. The Corps-approved field indicators of hydrology include: visual observation or photographic evidence of soil inundation or saturation during the growing season, oxidized channels associated with living roots and rhizomes, water marks, drift lines, waterborne sediment deposits, waterstained leaves, surface scoured areas and drainage patterns. Wetland hydrologic criteria were met in the areas delineated as wetland.

Lists of observed plant species in the wetland areas were compiled and data were gathered to complete Corps jurisdictional dataforms. A native vegetative quality rating was calculated for each wetland using the Floristic Quality Assessment (FQA) of Swink and Wilhelm as published in *Plants of the Chicago Region,* 1994. The FQA method assigns to plant species a rating that reflects the fundamental conservatism that the species exhibits for natural habitats. A native species that exhibits specific adaptations to a narrow spectrum of the environment is given a high rating. Conversely, a ubiquitous species that exhibits adaptations to a broad spectrum of environmental variables is given a low rating. Utilizing this method, a Floristic Quality Index (FQI) is derived for a given area. The FQI is an indication of native vegetative quality for an area: generally 1-19 indicates low vegetative quality, 20-35 indicates high vegetative quality and above 35 indicates "Natural Area" quality.

RESULTS

Fifteen (15) wetlands totaling 15.34 acres within the project permanent envelope were delineated on the property (Exhibit 7). The wetland boundaries shown on an aerial photograph in Exhibit 7 were recorded with sub-meter accuracy GPS unit in the field on August 13 and 19, 2015. Lists of the observed plant species for the wetland areas are given in Exhibit 8. The Corps' jurisdictional dataforms for upland and wetland areas are included as Exhibit 9. Georeferenced representative color photographs of the upland and wetland areas are provided in Exhibit 10.

Following is a table that summarizes the delineated wetlands. Wetland acreages were calculated based upon the sub-meter accuracy GPS data imported into a Geographical Information System (GIS).

Table 1. Summary of Wetlands within Project Limits.

Wetland	Area within Project Limits (acres)	Total Wetland Area (acres)	FQI[1]	Native Mean C[2]	HQAR[3]	Wetland Type	Dominant Vegetation
1 & 2	0.19	0.38	3.89	1.38	No	Drainage swale	Common reed (*Phragmites australis*)
3	0.83	0.83	6.36	4.5	No[4]	Marsh	Common reed and purple loosestrife (*Lythrum salicaria*)
4	0.07	1.85	6.43	2.43	No	Drainage swale	Common reed
5	2.73	2.73	4.95	1.75	No	Drainage swale	Common reed
6	2.26	2.26	11.13	2.43	No	Drainage swale & degraded wet prairie	Common reed
7	1.63	1.63	13.68	2.79	No	Drainage swale & degraded wet prairie	Common reed
8	1.61	1.77	6.43	2.43	No	Degraded marsh	Common reed
9	1.09	1.09	2.04	0.83	No	Drainage swale/marsh	Common reed
10	0.07	0.07	6.43	2.43	No	Drainage ditch	Common reed
11	0.05	n/a	3.00	1.50	No	Drainage ditch	Common reed
12	3.56	3.56	3.00	1.50	No	Degraded marsh	Common reed
13	0.53	0.66	2.86	1.17	No	Wooded	Box Elder (Acer negundo), Common reed (*Phragmites australis*)
14	0.20	0.88	4.00	1.33	No	Drainage swale	Common reed
15	0.52	n/a	2.00	1.00	No	Drainage swale	Common reed
TOTAL	15.34	17.71					

1 The Floristic Quality Index (FQI) is an indication of native vegetative quality for an area: generally 1-19 indicates low vegetative quality, 20-35 indicates high vegetative quality and above 35 indicates "Natural Area" quality.
2 The Native Mean C is an indication of native vegetative quality for an area. Areas with value of 3.5 or greater are considered high quality.
3 The Chicago District U.S. Army Corps of Engineers has designated various Waters of the United States to be high-quality aquatic resources (HQARs). This designation is based on the definitions found within the Regional Permit Program that became effective April 1, 2007.
4 While this area has a Native Mean C of greater than 3.5, it was based on the presence of only two native species. The remainder of the vegetation was comprised of non-native species and would not be considered high quality in any ecological assessment.

Wetlands 1 and 2 are both part of the same drainage swale along the east-west portion of South Cottage Grove Avenue, just north of 135th Street. It is dominated by common reed and defined on the south by the 135th Street embankment, on the north and west by the Cottage Grove Avenue entrance off 135th Street, and on the east by a railroad access road. It is of very low floristic quality and wetland function, and has debris and trash scattered throughout it.

Wetland 3 is on the north side of the east-west portion of South Cottage Grove Avenue, and is connected to Wetland areas 5 and 9. It is dominated by common reed. It is defined by a gravel road and fill on all sides. This was one of the few areas that had standing water during the August 2015 assessment. It is of low quality and function. It should be noted that the mean C value is 4.5, which suggests a high quality area, but this mean C value is based on the only 2 native species observed – the other 4 species were all invasive non-native species.

Wetland 4 is another drainage swale that runs from the entrance to the MWRD Calumet Wastewater Treatment Plant (WWTP) west along 135th Street. It is entirely dominated by common reed. The north boundary is defined by a mowed embankment up to the WWTP facility fence, and the southern boundary is defined by 135th Street and shoulder. The mowed area was composed of typical upland turf and weed species and not hydrophytic species, indicating that the edge of mowing corresponded with the edge of wetland. Wetland 4 appears to receive drainage from 135th Street via several stormsewers that create the undulating southern boundary.

Wetland 5 is a drainage swale that runs along the west side of South Cottage Grove Avenue from Wetland 3 north to the entrance and gatehouse for the Calumet WWTP. It is dominated by common reed, with patches of sandbar willow (*Salix interior*) and cottonwood trees (*Populus deltoides*). The eastern boundary is defined by Cottage Grove Avenue and the western boundary is a chain-link fence and mowed turf grass within the MRWDGC property.

Wetland 6 is a wet prairie drainage swale along a Indiana Harbor Belt Railroad line that does not appear to have frequent use. It is generally bounded by the railroad ballast on the west side and higher ground dominated by common buckthorn (*Rhamnus cathartica*) on the east side. Dominant vegetation was common reed, though pockets of native plant species were observed.

Similarly, Wetland 7 is a drainage swale on the west side of the same Indiana Harbor Belt Railroad line through the site. It is also bounded by the railroad ballast and higher ground covered in common buckthorn. It is of moderate floristic quality when calculated to include the scattered native wet prairie species observed, but is largely dominated by the invasive common reed.

Wetland 8 is an area of degraded marsh inside the MWRD Calumet WWTP perimeter fence, located just southeast of the gatehouse and entrance. It is surrounded by areas of fill/gravel that are much higher in elevation than the ground in the wetland area. The embankments around this wetland pocket are very steep and eroded, often at a 1:1 slope or steeper. The vegetation was dominated by common reed. It is an area of very low quality.

Wetland 9 is connected to Wetland 3 and ultimately Wetland 5. At the southern end of Wetland 5, these 3 wetland areas form a u-shaped marsh swale around a gravel fill pad that is 3-4 feet higher in elevation. This area is bounded by the MWRD Calumet WWTP entrance road and Cottage Grove Avenue. The vegetation was dominated by common reed, and it is of low quality.

Wetland 10 is a small drainage ditch that runs from the 135th Street bridge over the Indiana Harbor Belt Railroad/Metra South Shore rail lines, to Cottage Grove Avenue. It is generally lined by cottonwoods and dead green ash (*Fraxinus pennsylvanica*) with common reed dominant in the ditch. The ditch was also littered with old tires and other refuse.

Wetland 11 is a small part of a wet area between the gravel railroad access road, and the Metra South Shore rail line. Most of the wetland is outside of the project limits and is dominated by common reed.

Wetland 12 is a marsh area located just north of the MWRD Calumet WWTP gatehouse. It is bounded by gravel access roads on the east and west sides, and the entrance road on the south. On the north side the wetland gives way to higher ground dominated by common buckthorn and a variety of upland weeds. The marsh is dominated by common reed.

Wetland 13 is a small wetland drainage swale located between the Metra South Shore Electric railroad line and the Indiana Harbor Belt Railroad freight line. It is dominated by common reed and is bounded by railroad ballast.

Wetland 14 is a swale located on the east side of the Indiana Harbor Belt Railroad/Metra South Shore line, but west of the MWRD fence around some sludge drying beds and other facilities. It is partially wooded by box elder and cottonwood but in open areas remains dominated by common reed.

Wetland 15 refers to a narrow drainage swale dominated by common reed located along a MWRD gravel access road in the northwest part of the project permanent envelope. It is of very low quality.

There are no High Quality Aquatic Resources on the subject property or mapped on adjacent properties. All wetlands observed were dominated by the invasive common reed, often in dense monotypic stands. The surrounding land is primarily developed urban or industrial landscapes.

SUMMARY AND CONCLUSIONS

The wetland delineation revealed 15 wetland areas totaling 15.34 acres within the project permanent envelope as depicted on Exhibit 7. All wetlands were of low quality and dominated by the invasive common reed. Most of the wetland boundaries are defined by fill and other manmade features. A jurisdictional determination will need to be requested from the U.S. Army Corps of Engineers to determine if the wetlands are under their Clean Water Act jurisdiction or if they are isolated wetlands of Cook County.

The following floristic inventories, prepared by Hey and Associates, Inc., follow the nomenclature given in the National Wetland Plant List: (Lichvar, R. W., M. Butterwick, N.C. Melvin, and W. N. Kirchner 2014); The National Wetland Plant List 2014 Update of Wetland Ratings. (Phytoneuron 2014-41:1-42); and bio data/nomenclature follows Kartesz, J. T., 2013 *Floristic Synthesis of North America. Version 1.0 Biota of North American Program*. It also provides local synonymies based on Swink and Wilhelm's 1994 *Plants of the Chicago Region*.

Each species is listed with its database acronym and coefficient of conservatism (0 = weedy, 10 = conservative), and followed by its corresponding National Wetland Category (OBL = obligate wetland species, FACW = facultative wetland, FAC - facultative species, FACU = facultative upland, UPL = upland species), habit, duration, and nativity. Native taxa are those species believed to have been present in the Chicago region prior to European settlement.

The conservatism metric information above the species list provides analysis of the vegetative quality of the site. It shows the total number of species present (species richness), the mean coefficient of conservatism (Mean C), the floristic quality index (FQAI), and mean wetness; calculated separately for native species only and then including the adventive species (W/Adventives). The Mean C datum indicates the average coefficient of conservatism. The FQAI is derived by multiplying the Mean C by the square root of the number of species. If the FQAI of an area registers in the middle 30's or higher, one can be relatively certain that there is sufficient native character to be of rather profound environmental importance in terms of a regional natural area perspective. The wet indicator value indicates the mean or average wet indicator category for all species present, natives only and then with adventives – numbers less than 0 indicate hydrophytic vegetation, while numbers greater than 0 correspond to the upland vegetation categories. The table also provides the number of species in each physiognomic or habit class, native versus adventive along with their percentage of the total inventory.

WETLAND DETERMINATION DATA FORM - Midwest Region

Project/Site Lake Calumet CTA Red Line Extension City/County: Cook Sampling Date: 8/13/2015
Applicant/Owner: CTA/MWRD State: Illinois Sampling Point: 1
Investigator(s): J Mengler, V Mosca Section, Township, Range: T34N R14E S26
Landform (hillslope, terrace, etc.): ditch Local relief (concave, convex, none): ditch
Slope (%): ____ Lat: 41.660019 Long: -87.595429 Datum: ____
Soil Map Unit Name: urban land-orthents clayey complex, nearly level NWI Classification: none
Are climatic/hydrologic conditions of the site typical for this time of the year? Y (If no, explain in remarks)
Are vegetation ____, soil Y, or hydrology ____ significantly disturbed? Y Are "normal circumstances" present? Y
Are vegetation ____, soil ____, or hydrology ____ naturally problematic? N

SUMMARY OF FINDINGS

(If needed, explain any answers in remarks.)

Hydrophytic vegetation present? Y
Hydric soil present? ____
Wetland hydrology present? Y

Is the sampled area within a wetland? Y
If yes, optional wetland site ID: Wetland 1

Remarks: (Explain alternative procedures here or in a separate report.)

Relied primarily upon vegetation and landscape position due to dry time of season, and mostly urbanland/fill for substrate.

VEGETATION -- Use scientific names of plants.

	Absolute % Cover	Dominant Species	Indicator Status
Tree Stratum (Plot size: 9 m)			
1 *Populus deltoides*	20	Y	FAC
2 *Acer saccharinum*	20	Y	FACW
3 *Ulmus americana*	5	N	FACW
4			
5			
	45	= Total Cover	
Sapling/Shrub stratum (Plot size: 4.6 m)			
1 *Salix interior*	15	Y	FACW
2 *Populus deltoides*	10	Y	FAC
3 *Fraxinus pennsylvanica*	5	N	FACW
4			
5			
	30	= Total Cover	
Herb stratum (Plot size: 1 m sq)			
1 *Phragmites australis*	95	Y	FACW
2			
3			
4			
5			
6			
7			
8			
9			
10			
	95	= Total Cover	
Woody vine stratum (Plot size: 1 m sq)			
1			
2			
	0	= Total Cover	

Dominance Test Worksheet

Number of Dominant Species that are OBL, FACW, or FAC: 5 (A)
Total Number of Dominant Species Across all Strata: 5 (B)
Percent of Dominant Species that are OBL, FACW, or FAC: 100.00% (A/B)

Prevalence Index Worksheet

Total % Cover of:			
OBL species	0	x 1 =	0
FACW species	140	x 2 =	280
FAC species	30	x 3 =	90
FACU species	0	x 4 =	0
UPL species	0	x 5 =	0
Column totals	170	(A)	370 (B)

Prevalence Index = B/A = 2.18

Hydrophytic Vegetation Indicators:

__ Rapid test for hydrophytic vegetation
X Dominance test is >50%
X Prevalence index is ≤3.0*
__ Morphological adaptations* (provide supporting data in Remarks or on a separate sheet)
__ Problematic hydrophytic vegetation* (explain)

*Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic

Hydrophytic vegetation present? Y

Remarks: (Include photo numbers here or on a separate sheet)

SOIL

Sampling Point: 1

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth (Inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type*	Loc**		

*Type: C = Concentration, D = Depletion, RM = Reduced Matrix, MS = Masked Sand Grains. **Location: PL = Pore Lining, M = Matrix

Hydric Soil Indicators:

___ Histisol (A1)
___ Histic Epipedon (A2)
___ Black Histic (A3)
___ Hydrogen Sulfide (A4)
___ Stratified Layers (A5)
___ 2 cm Muck (A10)
___ Depleted Below Dark Surface (A11)
___ Thick Dark Surface (A12)
___ Sandy Mucky Mineral (S1)
___ 5 cm Mucky Peat or Peat (S3)
___ Sandy Gleyed Matrix (S4)
___ Sandy Redox (S5)
___ Stripped Matrix (S6)
___ Loamy Mucky Mineral (F1)
___ Loamy Gleyed Matrix (F2)
___ Depleted Matrix (F3)
___ Redox Dark Surface (F6)
___ Depleted Dark Surface (F7)
___ Redox Depressions (F8)

Indicators for Problematic Hydric Soils:

___ Coast Prairie Redox (A16) (**LRR K, L, R**)
___ Dark Surface (S7) (**LRR K, L)**
___ 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
___ Iron-Manganese Masses (F12) (**LRR K, L, R**)
___ Very Shallow Dark Surface (TF12)
___ Other (explain in remarks)

*Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic

Restrictive Layer (if observed):
Type: gravel, ballast, fill
Depth (inches): not determined

Hydric soil present? ___

Remarks:

Area mapped as urban land, and located along road at base of another road embankment. Probe refusal within 2-4 inches due to gravel and fill.

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

X Surface Water (A1)
___ High Water Table (A2)
___ Saturation (A3)
___ Water Marks (B1)
X Sediment Deposits (B2)
___ Drift Deposits (B3)
___ Algal Mat or Crust (B4)
___ Iron Deposits (B5)
___ Inundation Visible on Aerial Imagery (B7)
X Sparsely Vegetated Concave Surface (B8)
___ Water-Stained Leaves (B9)
___ Aquatic Fauna (B13)
___ True Aquatic Plants (B14)
___ Hydrogen Sulfide Odor (C1)
___ Oxidized Rhizospheres on Living Roots (C3)
___ Presence of Reduced Iron (C4)
___ Recent Iron Reduction in Tilled Soils (C6)
___ Thin Muck Surface (C7)
___ Gauge or Well Data (D9)
___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

___ Surface Soil Cracks (B6)
X Drainage Patterns (B10)
___ Dry-Season Water Table (C2)
___ Crayfish Burrows (C8)
___ Saturation Visible on Aerial Imagery (C9)
___ Stunted or Stressed Plants (D1)
___ Geomorphic Position (D2)
___ FAC-Neutral Test (D5)

Field Observations:

	Yes	No	Depth (inches):
Surface water present?		X	
Water table present?		X	
Saturation present? (includes capillary fringe)	X		0

Wetland hydrology present? Y

Describe recorded data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

Saturation within ditch channel lined by hydrophytes.

WETLAND DETERMINATION DATA FORM - Midwest Region

Project/Site: Lake Calumet CTA Red Line Extension City/County: Cook Sampling Date: 8/13/2015
Applicant/Owner: CTA/MWRD State: Illinois Sampling Point: 2
Investigator(s): J Mengler, V Mosca Section, Township, Range: T37N, R14E, S26
Landform (hillslope, terrace, etc.): ditch Local relief (concave, convex, none): ditch
Slope (%): ____ Lat: 41.6906323 Long: -87.6205465 Datum: ____
Soil Map Unit Name: urban land-orthents clayey complex, nearly level NWI Classification: none
Are climatic/hydrologic conditions of the site typical for this time of the year? Y (If no, explain in remarks)
Are vegetation ____, soil Y, or hydrology ____ significantly disturbed? Y Are "normal circumstances" present? Y
Are vegetation ____, soil ____, or hydrology ____ naturally problematic? N

SUMMARY OF FINDINGS

(If needed, explain any answers in remarks.)

Hydrophytic vegetation present?	Y	Is the sampled area within a wetland?	Y
Hydric soil present?		If yes, optional wetland site ID:	Wetland 2
Wetland hydrology present?	Y		

Remarks: (Explain alternative procedures here or in a separate report.)

Relied primarily upon vegetation and landscape position due to dry time of season, and mostly urbanland/fill for substrate.

VEGETATION -- Use scientific names of plants.

Hydrophytic vegetation present?	Y	
Hydric soil present?		**Is the sampled area within a wetland?** Y
Wetland hydrology present?	Y	If yes, optional wetland site ID: Wetland 6

Remarks: (Explain alternative procedures here or in a separate report.)

Relied primarily upon vegetation and landscape position due to dry time of season, and mostly urbanland/fill for substrate.

VEGETATION -- Use scientific names of plants.

FAC species	0	x 3 =	0
FACU species	0	x 4 =	0
UPL species	0	x 5 =	0
Column totals	104 (A)		188 (B)

Prevalence Index = B/A = 1.81

Hydrophytic Vegetation Indicators:

- __ Rapid test for hydrophytic vegetation
- X Dominance test is >50%
- X Prevalence index is ≤3.0*
- __ Morphological adaptations* (provide supporting data in Remarks or on a separate sheet)
- __ Problematic hydrophytic vegetation* (explain)

*Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic

Hydrophytic vegetation present? Y

Remarks: (Include photo numbers here or on a separate sheet)

SOIL

Sampling Point: 6

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth (Inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type*	Loc**		

*Type: C = Concentration, D = Depletion, RM = Reduced Matrix, MS = Masked Sand Grains. **Location: PL = Pore Lining, M = Matrix

Hydric Soil Indicators:

___ Histisol (A1)
___ Histic Epipedon (A2)
___ Black Histic (A3)
___ Hydrogen Sulfide (A4)
___ Stratified Layers (A5)
___ 2 cm Muck (A10)
___ Depleted Below Dark Surface (A11)
___ Thick Dark Surface (A12)
___ Sandy Mucky Mineral (S1)
___ 5 cm Mucky Peat or Peat (S3)
___ Sandy Gleyed Matrix (S4)
___ Sandy Redox (S5)
___ Stripped Matrix (S6)
___ Loamy Mucky Mineral (F1)
___ Loamy Gleyed Matrix (F2)
___ Depleted Matrix (F3)
___ Redox Dark Surface (F6)
___ Depleted Dark Surface (F7)
___ Redox Depressions (F8)

Indicators for Problematic Hydric Soils:

___ Coast Prairie Redox (A16) (**LRR K, L, R**)
___ Dark Surface (S7) (**LRR K, L)**
___ 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
___ Iron-Manganese Masses (F12) (**LRR K, L, R**)
___ Very Shallow Dark Surface (TF12)
___ Other (explain in remarks)

*Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic

Restrictive Layer (if observed):
Type: gravel, ballast, fill
Depth (inches): not determined

Hydric soil present? ___

Remarks:

Area mapped as urban land, and located between road and railroad.

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

___ Surface Water (A1)
___ High Water Table (A2)
___ Saturation (A3)
X Water Marks (B1)
X Sediment Deposits (B2)
___ Drift Deposits (B3)
X Algal Mat or Crust (B4)
___ Iron Deposits (B5)
___ Inundation Visible on Aerial Imagery (B7)
___ Sparsely Vegetated Concave Surface (B8)
X Water-Stained Leaves (B9)
___ Aquatic Fauna (B13)
___ True Aquatic Plants (B14)
___ Hydrogen Sulfide Odor (C1)
___ Oxidized Rhizospheres on Living Roots (C3)
___ Presence of Reduced Iron (C4)
___ Recent Iron Reduction in Tilled Soils (C6)
___ Thin Muck Surface (C7)
___ Gauge or Well Data (D9)
___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

___ Surface Soil Cracks (B6)
X Drainage Patterns (B10)
___ Dry-Season Water Table (C2)
___ Crayfish Burrows (C8)
___ Saturation Visible on Aerial Imagery (C9)
___ Stunted or Stressed Plants (D1)
___ Geomorphic Position (D2)
___ FAC-Neutral Test (D5)

Field Observations:
Surface water present? Yes ___ No X Depth (inches): ___
Water table present? Yes ___ No X Depth (inches): ___
Saturation present? Yes X No ___ Depth (inches): 0
(includes capillary fringe)

Wetland hydrology present? Y

Describe recorded data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

Saturation within drainage swale along railroad.

WETLAND DETERMINATION DATA FORM - Midwest Region

___ Depleted Matrix (F3)
___ Redox Dark Surface (F6)
___ Depleted Dark Surface (F7)
___ Redox Depressions (F8)

Indicators for Problematic Hydric Soils:

___ Coast Prairie Redox (A16) (**LRR K, L, R**)
___ Dark Surface (S7) (**LRR K, L)**
___ 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
___ Iron-Manganese Masses (F12) (**LRR K, L, R**)
___ Very Shallow Dark Surface (TF12)
___ Other (explain in remarks)

*Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic

Restrictive Layer (if observed):
Type: gravel, ballast, fill
Depth (inches): not determined

Hydric soil present? ___

Remarks:

Area mapped as urban land, and located between gravel roads.

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

___ Surface Water (A1)
___ High Water Table (A2)
___ Saturation (A3)
___ Water Marks (B1)
___ Sediment Deposits (B2)
___ Drift Deposits (B3)
___ Algal Mat or Crust (B4)
___ Iron Deposits (B5)
___ Inundation Visible on Aerial Imagery (B7)
___ Sparsely Vegetated Concave Surface (B8)
X Water-Stained Leaves (B9)
___ Aquatic Fauna (B13)
___ True Aquatic Plants (B14)
___ Hydrogen Sulfide Odor (C1)
___ Oxidized Rhizospheres on Living Roots (C3)
___ Presence of Reduced Iron (C4)
___ Recent Iron Reduction in Tilled Soils (C6)
___ Thin Muck Surface (C7)
___ Gauge or Well Data (D9)
___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

___ Surface Soil Cracks (B6)
X Drainage Patterns (B10)
___ Dry-Season Water Table (C2)
___ Crayfish Burrows (C8)
___ Saturation Visible on Aerial Imagery (C9)
___ Stunted or Stressed Plants (D1)
___ Geomorphic Position (D2)
___ FAC-Neutral Test (D5)

Field Observations:

	Yes		No			
Surface water present?	Yes		No	X	Depth (inches):	
Water table present?	Yes		No	X	Depth (inches):	
Saturation present? (includes capillary fringe)	Yes	X	No		Depth (inches):	0

Wetland hydrology present? Y

Describe recorded data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

Saturation within drainage swale along roads.

WETLAND DETERMINATION DATA FORM - Midwest Region

Project/Site Lake Calumet CTA Red Line Extension City/County: Cook Sampling Date: 8/19/2015
Applicant/Owner: CTA/MWRD State: Illinois Sampling Point: 11
Investigator(s): J Mengler, V Mosca Section, Township, Range: T37N, R14E, S27
Landform (hillslope, terrace, etc.): swale Local relief (concave, convex, none): swale
Slope (%): ______ Lat: 41.665712 Long: -87.600738 Datum: ______
Soil Map Unit Name: orthents, loamy, nearly level NWI Classification: none
Are climatic/hydrologic conditions of the site typical for this time of the year? Y (If no, explain in remarks)
Are vegetation ______ , soil Y , or hydrology ______ significantly disturbed? Y
Are vegetation ______ , soil ______ , or hydrology ______ naturally problematic? N
Are "normal circumstances" present? Y

SUMMARY OF FINDINGS

(If needed, explain any answers in remarks.)

Hydrophytic vegetation present?	Y	**Is the sampled area within a wetland?**	N
Hydric soil present?		If yes, optional wetland site ID:	
Wetland hydrology present?	N		

Remarks: (Explain alternative procedures here or in a separate report.)

Relied primarily upon vegetation and landscape position due to dry time of season, and mostly urbanland/fill for substrate.

VEGETATION -- Use scientific names of plants.

___ Dark Surface (S7) (**LRR K, L)**
___ 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
___ Iron-Manganese Masses (F12) (**LRR K, L, R**)
___ Very Shallow Dark Surface (TF12)
___ Other (explain in remarks)

*Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic

Restrictive Layer (if observed):
Type: gravel, ballast, fill
Depth (inches): not determined

Hydric soil present? ___

Remarks:

Area mapped as urban land, and located at base of roadway embankment and along railroad

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

___ Surface Water (A1)
___ High Water Table (A2)
X Saturation (A3)
___ Water Marks (B1)
___ Sediment Deposits (B2)
___ Drift Deposits (B3)
___ Algal Mat or Crust (B4)
___ Iron Deposits (B5)
___ Inundation Visible on Aerial Imagery (B7)
___ Sparsely Vegetated Concave Surface (B8)
X Water-Stained Leaves (B9)
___ Aquatic Fauna (B13)
___ True Aquatic Plants (B14)
___ Hydrogen Sulfide Odor (C1)
___ Oxidized Rhizospheres on Living Roots (C3)
___ Presence of Reduced Iron (C4)
___ Recent Iron Reduction in Tilled Soils (C6)
___ Thin Muck Surface (C7)
___ Gauge or Well Data (D9)
___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

___ Surface Soil Cracks (B6)
X Drainage Patterns (B10)
___ Dry-Season Water Table (C2)
___ Crayfish Burrows (C8)
___ Saturation Visible on Aerial Imagery (C9)
___ Stunted or Stressed Plants (D1)
___ Geomorphic Position (D2)
___ FAC-Neutral Test (D5)

Field Observations:

Surface water present?	Yes		No	X	Depth (inches):	
Water table present?	Yes		No	X	Depth (inches):	
Saturation present? (includes capillary fringe)	Yes	X	No		Depth (inches):	0

Wetland hydrology present? Y

Describe recorded data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

Saturation within drainage swale along higher ground, wet mud among old tires.

WETLAND DETERMINATION DATA FORM - Midwest Region

Project/Site Lake Calumet CTA Red Line Extension City/County: Cook Sampling Date: 8/19/2015
Applicant/Owner: CTA/MWRD State: Illinois Sampling Point: 15
Investigator(s): J Mengler, V Mosca Section, Township, Range: T37N R14E S26
Landform (hillslope, terrace, etc.): ditch Local relief (concave, convex, none): ditch
Slope (%): ____ Lat: 41.660019 Long: -87.595429 Datum: ____
Soil Map Unit Name: urban land-orthents clayey complex, nearly level NWI Classification: none
Are climatic/hydrologic conditions of the site typical for this time of the year? Y (If no, explain in remarks)
Are vegetation ____, soil Y, or hydrology ____ significantly disturbed? Y Are "normal circumstances" present? Y
Are vegetation ____, soil ____, or hydrology ____ naturally problematic? N

SUMMARY OF FINDINGS

(If needed, explain any answers in remarks.)

Hydrophytic vegetation present?	Y		
Hydric soil present?		**Is the sampled area within a wetland?**	Y
Wetland hydrology present?	Y	If yes, optional wetland site ID:	Wetland 11

Remarks: (Explain alternative procedures here or in a separate report.)

Relied primarily upon vegetation and landscape position due to dry time of season, and mostly urbanland/fill for substrate.

VEGETATION -- Use scientific names of plants.

WETLAND DETERMINATION DATA FORM - Midwest Region

Project/Site: Lake Calumet CTA Red Line Extension   City/County: Cook   Sampling Date: 8/19/2015
Applicant/Owner: CTA/MWRD   State: Illinois   Sampling Point: 19
Investigator(s): J Mengler, V Mosca   Section, Township, Range: T37N R14E S27
Landform (hillslope, terrace, etc.): ditch   Local relief (concave, convex, none): ditch
Slope (%): ______   Lat: 41.667289   Long: -87.600100   Datum: ______
Soil Map Unit Name: urban land-orthents clayey complex, nearly level   NWI Classification: none
Are climatic/hydrologic conditions of the site typical for this time of the year? Y (If no, explain in remarks)
Are vegetation ______, soil Y, or hydrology ______ significantly disturbed? Y
Are vegetation ______, soil ______, or hydrology ______ naturally problematic? N
Are "normal circumstances" present? Y

SUMMARY OF FINDINGS

(If needed, explain any answers in remarks.)

Hydrophytic vegetation present?	N	Is the sampled area within a wetland? N
Hydric soil present?		
Wetland hydrology present?	N	If yes, optional wetland site ID: ______

Remarks: (Explain alternative procedures here or in a separate report.)

Relied primarily upon vegetation and landscape position due to dry time of season, and mostly urbanland/fill for substrate.

VEGETATION -- Use scientific names of plants.

		Absolute % Cover	Dominant Species	Indicator Status
Tree Stratum (Plot size: 9 m)				
1	*Morus alba*	40	Y	FAC
2	*Acer negundo*	20	Y	FAC
3				
4				
5				
		60	= Total Cover

7				
8				
9				
10				
		25	= Total Cover	
Woody vine stratum (Plot size: 1 m sq)				
1				
2				
		0	= Total Cover	

Dominance Test Worksheet

Number of Dominant Species that are OBL, FACW, or FAC:	3	(A)
Total Number of Dominant Species Across all Strata:	6	(B)
Percent of Dominant Species that are OBL, FACW, or FAC:	50.00%	(A/B)

Prevalence Index Worksheet

Total % Cover of:

OBL species	0	x 1 =	0	
FACW species	5	x 2 =	10	
FAC species	60	x 3 =	180	
FACU species	35	x 4 =	140	
UPL species	0	x 5 =	0	
Column totals	100	(A)	330	(B)
Prevalence Index = B/A =			3.30	

Hydrophytic Vegetation Indicators:

___ Rapid test for hydrophytic vegetation
___ Dominance test is >50%
___ Prevalence index is ≤3.0*
___ Morphological adaptations* (provide supporting data in Remarks or on a separate sheet)
___ Problematic hydrophytic vegetation* (explain)

*Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic

Hydrophytic vegetation present? N

Remarks: (Include photo numbers here or on a separate sheet)

SOIL

Sampling Point: 19

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth (Inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type*	Loc**		

*Type: C = Concentration, D = Depletion, RM = Reduced Matrix, MS = Masked Sand Grains. **Location: PL = Pore Lining, M = Matrix

Hydric Soil Indicators:

___ Histisol (A1)
___ Histic Epipedon (A2)
___ Black Histic (A3)
___ Hydrogen Sulfide (A4)
___ Stratified Layers (A5)
___ 2 cm Muck (A10)
___ Depleted Below Dark Surface (A11)
___ Thick Dark Surface (A12)
___ Sandy Mucky Mineral (S1)
___ 5 cm Mucky Peat or Peat (S3)
___ Sandy Gleyed Matrix (S4)
___ Sandy Redox (S5)
___ Stripped Matrix (S6)
___ Loamy Mucky Mineral (F1)
___ Loamy Gleyed Matrix (F2)
___ Depleted Matrix (F3)
___ Redox Dark Surface (F6)
___ Depleted Dark Surface (F7)
___ Redox Depressions (F8)

Indicators for Problematic Hydric Soils:

___ Coast Prairie Redox (A16) (**LRR K, L, R**)
___ Dark Surface (S7) (**LRR K, L)**
___ 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
___ Iron-Manganese Masses (F12) (**LRR K, L, R**)
___ Very Shallow Dark Surface (TF12)
___ Other (explain in remarks)

*Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic

Restrictive Layer (if observed):
Type: gravel, ballast, fill
Depth (inches): not determined

Hydric soil present? ______

Remarks:

Area mapped as urban land, and located between gravel roads. Probe refusal within 2-4 inches due to gravel and fill.

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

___ Surface Water (A1)
___ High Water Table (A2)
___ Saturation (A3)
___ Water Marks (B1)
___ Sediment Deposits (B2)
___ Drift Deposits (B3)
___ Algal Mat or Crust (B4)
___ Iron Deposits (B5)
___ Inundation Visible on Aerial Imagery (B7)
___ Sparsely Vegetated Concave Surface (B8)
___ Water-Stained Leaves (B9)
___ Aquatic Fauna (B13)
___ True Aquatic Plants (B14)
___ Hydrogen Sulfide Odor (C1)
___ Oxidized Rhizospheres on Living Roots (C3)
___ Presence of Reduced Iron (C4)
___ Recent Iron Reduction in Tilled Soils (C6)
___ Thin Muck Surface (C7)
___ Gauge or Well Data (D9)
___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

___ Surface Soil Cracks (B6)
___ Drainage Patterns (B10)
___ Dry-Season Water Table (C2)
___ Crayfish Burrows (C8)
___ Saturation Visible on Aerial Imagery (C9)
___ Stunted or Stressed Plants (D1)
___ Geomorphic Position (D2)
___ FAC-Neutral Test (D5)

Field Observations:
Surface water present? Yes ______ No X Depth (inches): ______
Water table present? Yes ______ No X Depth (inches): ______
Saturation present? Yes ______ No X Depth (inches): ______
(includes capillary fringe)

Wetland hydrology present? N

Describe recorded data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

No evidence of hydrology observed, Ground cover mostly dry undisturbed leaf litter.

Application No. 5108502

Name of Applicant Metropolitan Sanitary District of Greater Chicago

Effective Date 10 June 1985

R.O.W. FILE #1

Expiration Date *(If applicable)* 10 June 1988

DEPARTMENT OF THE ARMY
PERMIT

Referring to written request dated 24 January 85 **for a permit to:**

( ) Perform work in or affecting navigable waters of the United States, upon the recommendation of the Chief of Engineers, pursuant to Section 10 of the Rivers and Harbors Act of March 3, 1899 *(33 U.S.C. 403)*;

(x) Discharge dredged or fill material into waters of the United States upon the issuance of a permit from the Secretary of the Army acting through the Chief of Engineers pursuant to Section 404 of the Clean Water Act *(33 U.S.C. 1344)*;

( ) Transport dredged material for the purpose of dumping it into ocean waters upon the issuance of a permit from the Secretary of the Army acting through the Chief of Engineers pursuant to Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 *(86 Stat. 1052; P.L. 92-532)*;

Metropolitan Sanitary District of Greater Chicago
100 East Erie Street
Chicago, Illinois 60629

is hereby authorized by the Secretary of the Army:

to construct a municipal sludge drying facility

in a wetland near the Little Calumet River

at $W\frac{1}{2}$ of Section 27, T37N, R14E, near 130th and Indiana Avenue,
Chicago, Cook County, Illinois

in accordance with the plans and drawings attached hereto which are incorporated in and made a part of this permit *(on drawings, give file number or other definite identification marks.)*

24 January 1985 permit application and plans
29 May 1985 letter and enclosures

subject to the following conditions:

I. General Conditions:

a. That all activities identified and authorized herein shall be consistent with the terms and conditions of this permit; and that any activities not specifically identified and authorized herein shall constitute a violation of the terms and conditions of this permit which may result in the modification, suspension or revocation of this permit, in whole or in part, as set forth more specifically in General Conditions j or k hereto, and in the institution of such legal proceedings as the United States Government may consider appropriate, whether or not this permit has been previously modified, suspended or revoked in whole or in part.

b. That all activities authorized herein shall, if they involve, during their construction or operation, any discharge of pollutants into waters of the United States or ocean waters, be at all times consistent with applicable water quality standards, effluent limitations and standards of performance, prohibitions, pretreatment standards and management practices established pursuant to the Clean Water Act (*33 U.S.C. 1344*), the Marine Protection, Research and Sanctuaries Act of 1972 (*P.L. 92-532, 86 Stat. 1052*), or pursuant to applicable State and local law.

c. That when the activity authorized herein involves a discharge during its construction or operation, or any pollutant (*including dredged or fill material*), into waters of the United States, the authorized activity shall, if applicable water quality standards are revised or modified during the term of this permit, be modified, if necessary, to conform with such revised or modified water quality standards within 6 months of the effective date of any revision or modification of water quality standards, or as directed by an implementation plan contained in such revised or modified standards, or within such longer period of time as the District Engineer, in consultation with the Regional Administrator of the Environmental Protection Agency, may determine to be reasonable under the circumstances.

d. That the discharge will not destroy a threatened or endangered species as identified under the Endangered Species Act, or endanger the critical habitat of such species.

e. That the permittee agrees to make every reasonable effort to prosecute the construction or operation of the work authorized herein in a manner so as to minimize any adverse impact on fish, wildlife, and natural environmental values.

f. That the permittee agrees that he will prosecute the construction or work authorized herein in a manner so as to minimize any degradation of water quality.

g. That the permittee shall allow the District Engineer or his authorized representative(s) or designee(s) to make periodic inspections at any time deemed necessary in order to assure that the activity being performed under authority of this permit is in accordance with the terms and conditions prescribed herein.

h. That the permittee shall maintain the structure or work authorized herein in good condition and in reasonable accordance with the plans and drawings attached hereto.

i. That this permit does not convey any property rights, either in real estate or material, or any exclusive privileges; and that it does not authorize any injury to property or invasion of rights or any infringement of Federal, State, or local laws or regulations.

j. That this permit does not obviate the requirement to obtain state or local assent required by law for the activity authorized herein.

k. That this permit may be either modified, suspended or revoked in whole or in part pursuant to the policies and procedures of 33 CFR 325.7.

l. That in issuing this permit, the Government has relied on the information and data which the permittee has provided in connection with his permit application. If, subsequent to the issuance of this permit, such information and data prove to be materially false, materially incomplete or inaccurate, this permit may be modified, suspended or revoked, in whole or in part, and/or the Government may, in addition, institute appropriate legal proceedings.

m. That any modification, suspension, or revocation of this permit shall not be the basis for any claim for damages against the United States.

n. That the permittee shall notify the District Engineer at what time the activity authorized herein will be commenced, as far in advance of the time of commencement as the District Engineer may specify, and of any suspension of work, if for a period of more than one week, resumption of work and its completion.

o. That if the activity authorized herein is not completed on or before ________ day of ________, 19________, (*three years from the date of issuance of this permit unless otherwise specified*) this permit, if not previously revoked or specifically extended, shall automatically expire.

p. That this permit does not authorize or approve the construction of particular structures, the authorization or approval of which may require authorization by the Congress or other agencies of the Federal Government.

q. That if and when the permittee desires to abandon the activity authorized herein, unless such abandonment is part of a transfer procedure by which the permittee is transferring his interests herein to a third party pursuant to General Condition t hereof, he must restore the area to a condition satisfactory to the District Engineer.

r. That if the recording of this permit is possible under applicable State or local law, the permittee shall take such action as may be necessary to record this permit with the Register of Deeds or other appropriate official charged with the responsibility for maintaining records of title to and interests in real property.

s. That there shall be no unreasonable interference with navigation by the existence or use of the activity authorized herein.

t. That this permit may not be transferred to a third party without prior written notice to the District Engineer, either by the transferee's written agreement to comply with all terms and conditions of this permit or by the transferree subscribing to this permit in the space provided below and thereby agreeing to comply with all terms and conditions of this permit. In addition, if the permittee transfers the interests authorized herein by conveyance of realty, the deed shall reference this permit and the terms and conditions specified herein and this permit shall be recorded along with the deed with the Register of Deeds or other appropriate official.

u. That if the permittee during prosecution of the work authorized herein, encounters a previously unidentified archeological or other cultural resource within the area subject to Department of the Army jurisdiction that might be eligible for listing in the National Register of Historic Places, he shall immediately notify the district engineer.

II. **Special Conditions:** (*Here list conditions relating specifically to the proposed structure or work authorized by this permit*):

1. That the permittee notify Mr. Tom Slowinski, Chief, Regulatory Functions Branch, Chicago District Office, 219 South Dearborn Street, Chicago, Illinois 60604-1797, telephone 312/353-6428 at least five days in advance of commencement and completion of the work authorized herein.

2. That the permittee supply a copy of this permit with all attachments to his contractor or project engineer so that all terms and conditions are fully known and understood.

3. That the permittee submit any revisions of plans or location to this issuing office for approval before work is begun.

4. That the permittee comply with the Illinois Environmental Protection Agency's conditions (attached), as stated in their 22 March 1985 water quality certification for the project under Section 401 of the Clean Water Act (Public Law 95-217).

5. That the permittee develop and implement the wetland mitigation plan in accordance with their 29 May 1985 letter and enclosures.

3.

The following Special Conditions will be applicable when appropriate:

4.

STRUCTURES IN OR AFFECTING NAVIGABLE WATERS OF THE UNITED STATES:

a. That this permit does not authorize the interference with any existing or proposed Federal project and that the permittee shall not be entitled to compensation for damage or injury to the structures or work authorized herein which may be caused by or result from existing or future operations undertaken by the United States in the public interest.

b. That no attempt shall be made by the permittee to prevent the full and free use by the public of all navigable waters at or adjacent to the activity authorized by this permit.

c. That if the display of lights and signals on any structure or work authorized herein is not otherwise provided for by law, such lights and signals as may be prescribed by the United States Coast Guard shall be installed and maintained by and at the expense of the permittee.

d. That the permittee, upon receipt of a notice of revocation of this permit or upon its expiration before completion of the authorized structure or work, shall, without expense to the United States and in such time and manner as the Secretary of the Army or his authorized representative may direct, restore the waterway to its former conditions. If the permittee fails to comply with the direction of the Secretary of the Army or his authorized representative, the Secretary or his designee may restore the waterway to its former condition, by contract or otherwise, and recover the cost thereof from the permittee.

e. Structures for Small Boats: That permittee hereby recognizes the possibility that the structure permitted herein may be subject to damage by wave wash from passing vessels. The issuance of this permit does not relieve the permittee from taking all proper steps to insure the integrity of the structure permitted herein and the safety of boats moored thereto from damage by wave wash and the permittee shall not hold the United States liable for any such damage.

MAINTENANCE DREDGING:

a. That when the work authorized herein includes periodic maintenance dredging, it may be performed under this permit for ______________________ years from the date of issuance of this permit (*ten years unless otherwise indicated*);

b. That the permittee will advise the District Engineer in writing at least two weeks before he intends to undertake any maintenance dredging.

DISCHARGES OF DREDGED OR FILL MATERIAL INTO WATERS OF THE UNITED STATES:

a. That the discharge will be carried out in conformity with the goals and objectives of the EPA Guidelines established pursuant to Section 404(b) of the Clean Water Act and published in 40 CFR 230;

b. That the discharge will consist of suitable material free from toxic pollutants in toxic amounts.

c. That the fill created by the discharge will be properly maintained to prevent erosion and other non-point sources of pollution.

DISPOSAL OF DREDGED MATERIAL INTO OCEAN WATERS:

a. That the disposal will be carried out in conformity with the goals, objectives, and requirements of the EPA criteria established pursuant to Section 102 of the Marine Protection, Research and Sanctuaries Act of 1972, published in 40 CFR 220-228.

b. That the permittee shall place a copy of this permit in a conspicuous place in the vessel to be used for the transportation and/or disposal of the dredged material as authorized herein.

This permit shall become effective on the date of the District Engineer's signature.

Permittee hereby accepts and agrees to comply with the terms and conditions of this permit.

APPLICANT'S COPY

JOINT APPLICATION FORM

INFORMATION

Information in the application is made a matter of public record through issuance of a public notice. Disclosure of the information requested is voluntary; however, the data requested is necessary in order to communicate with the applicant and to evaluate the permit application. If necessary information is not provided, the permit application cannot be processed nor can a permit be issued.

18 United States Code Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact or makes any false, fictitious, or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious, or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years or both.

Applicant is informed that all approvals must be obtained before work can be started.

INSTRUCTIONS

General:

It is very important that you provide a complete and accurate application (form, drawings, and support information) concerning your project. If the application is incomplete or unacceptable, it will be returned. This usually results in delaying the evaluation of your application.

Submit one copy of the application (form, drawings, and support information) to each regulatory agency (Corps of Engineers, Illinois Department of Transportation, Division of Water Resources (IDOT/DWR), and the Illinois Environmental Protection Agency). For addresses see attached "Protecting Illinois Waters" and jurisdictional boundary map. (For the construction of dams, the IDOT/DWR copy of the application should always be sent to the Springfield office.)

Application:

Item 6 of the application must provide a complete description of the activity and always include the purpose and intended use. For any major activity, additional support information should be provided by attached sheets to the application.

Dredging and Fill Activities - Describe the location, type, composition and quantity of material to be dredged/filled, method of dredging/filling, and method of transportation to disposal/fill site. Also describe the disposal/fill site by including location, quantity of material it will hold, composition of receiving soil, and method of containment. Provide Illinois Environmental Protection Agency material analysis data as required.

The application must be signed by the applicant; however:

1. It may be signed by a duly authorized agent (named in Item 5) if this form is accompanied by a statement by the applicant designating the agent and agreeing to furnish upon request supplemental information in support of the application.
2. If the applicant is a corporation, the president or other authorized officer shall sign the application form.
3. If the applicant is a county, city or other political subidivision, the application form shall be signed by an appropriate authorized officer.
4. If the applicant is a partnership, each partner shall sign the application form.
5. If the applicant is a trust, the trust officer shall sign the name of the trustee by him (her) as trust officer. A disclosure affidavit must be filed with the application, identifying each beneficiary of the trust by name and address and defining the respective interests therein.

Environmental Assessment:

Pursuant to Section 102 of the National Environmental Policy Act, Public Law 91-190, an assessment of the environmental impacts and determination of need for an environmental impact statement must be made for Federally permitted activities. The environmental assessment will, in part, be based on the following written support information (attached sheets to application) which you must submit:

1. Complete description of project (Item 6 of application).
2. Analysis of the need and purpose of the proposed project.
3. Description of the environment in the vicinity of the project which would be directly affected by the permitted action as well as any of the secondary effects.

a. Ecological and Natural Resource Impacts (permanent and temporary)
- (1) Fish and wildlife populations (include threatened and endangered species)
- (2) Aquatic habitat (include shellfish and benthic life)
- (3) Vegetation habitat
- (4) Wetland area (marshes, bogs, swamps, etc.)
- (5) Water resources
  - (a) Public water supply (surface, ground)
  - (b) Water conservation (reuse, reduction of use)
  - (c) Water quality (chemical, physical, and biological integrity of general area)
- (6) Air quality and noise
- (7) Soil erosion and siltation

b. Social and Economical Impacts (permanent and temporary)
- (1) Aesthetics
- (2) Cultural values
  - (a) Historic and archaeological sites
  - (b) Other (national rivers, wilderness areas, recreation areas, parks, monuments, wild and scenic rivers, etc.)
- (3) Recreational areas (present and potential)
- (4) Public facilities and services (health, safety, etc.)
- (5) Navigation (commercial and small craft)
- (6) Flood damage prevention and effect on local flood heights
- (7) Shore erosion and accretion
- (8) Land use
  - (a) Conservation
  - (b) Prime and unique farmlands
  - (c) Food production
  - (d) Existing and potential use (zoning and planning)
- (9) Economic
  - (a) Energy needs
  - (b) Employment (regional growth)
  - (c) Tax base (property values)

4. Identification of practical alternatives (methods and locations) to the proposed action which would accomplish all the objectives desired, those which would provide only a partial solution to the objectives of the project, and the alternative of no action. This analysis is required so that the final project recommendation is made in the best overall public interest.

Drawings:

Each sheet of drawings submitted should contain a title block in the lower right hand corner identifying the proposed activity and contain the name of the body of water, river mile (if applicable), number of the sheet and total number of sheets in set, and date the drawing was prepared.

The first sheet of the drawings should include a vicinity map which shows:

1. Project site
2. Name of waterway
3. All applicable boundary lines
4. Name of and distance to local town, community or other identifying location
5. Names of all roads in the vicinity of the site
6. Graphic or numerical scale
7. North arrow

The drawings should also include a plan view of the project showing:

1. Existing shoreline and the normal water surface elevation (if Mean Sea Level datum is not used, adjustment should be indicated)
2. Adjacent property lines and ownership as listed in item 7 of the application form
3. Principal dimensions of the structure or work and extent of encroachment into the waterway (as measured from a fixed structure or object)
4. Distance between proposed activity and navigation channel, when applicable
5. Floodway/Floodplain lines if established and if known
6. North arrow
7. Graphic or numerical scale
8. A note describing the proposed method of revegetion or stabilization of disturbed areas

The drawings should also contain a section view of the project showing:

1. Shoreline, elevations, extent of encroachment, and principal dimensions of the work as shown in plan view
2. Graphic or numerical scales (horizontal and vertical)

ATTACHEMENT TO PERMIT APPLICATION, PARAGRAPH 6

This project will develop an area of 70 net acres in size, for use as an "agitation" drying facility. Sludge having a concentration of 15% to 30% will be delivered to the "agitation" drying facility. The latter relatively "wet" sludge will be spread in thin layers over the drying facility area and subjected to agitation and compression by operating heavy construction equipment, such as bulldozers and tractor mounted horizontal augers, over its surface. The "agitation" drying areas shall be prepared by sealing the ground over the entire area with clay, or other suitable material, to obtain an adequate impermeable surface. The use of existing onsite materials as well as excavated materials from other MSDGC construction activities shall be considered. A crushed stone base, a bituminous base course, and a bituminous wearing surface shall be laid in adequate thickness over the impervious surface. Drainage from each parcel shall be returned to the closest appropriate MSDGC sewer from a draw-off box.

Subject: Application for Permit to Site Sludge Drying Facility in a Wetland West of Calumet Sewage Treatment Plant, Chicago, Cook County, Illinois (R.O.W. File #1, 84-270-2P) - Response to Corps' Comments

Dear Colonel Finch:

The Sanitary District is in receipt of your letter and attachments dated May 10, 1985. In reviewing your transmittal we note that you have identified three aspects of the proposed project as requiring clarification. These aspects are: a) review of alternatives; b) protection of groundwater; and c) mitigation of wetland laws.

Further detail regarding each of the three aspects is provided below in sufficient detail, we believe, to make it unnecessary for us to prepare individual responses to each of the parties who submitted comments to you relative to this project.

(1) Review of alternatives

Detail studies and cost-effective analyses have been made of solids handling alternatives by the MSDGC. At the conclusion of the studies, the analyses showed that the most feasible alternative for handling Calumet STW and WSW-STW sludges would be to dry them to 60% solids and dispose of them in a landfill. A summary of the studies is contained in the attached Facilities Planning Study, Solids Update - April 1985 (Exhibit A).

The site chosen for Project 84-270-2P is the closest available agitation drying site at the Calumet STW. It possesses abundant area, roads, and utility services which contribute to providing very efficient land use. Also, the location so near the Calumet STW will result in the minimum operational costs for sludge hauling.

(2) Protection of the groundwater

A 2' minimum impervious clay seal will be provided beneath the sludge drying area to prevent groundwater contamination. Also, water stops in the concrete retaining walls will be provided to contain liquids in the drying area. The clay seal will be a cohesive impervious material having the following properties:

Item	Specification
Maximum percent retained on No. 4 sieve	15
Minimum percent passing No. 200 sieve	25
Maximum liquid limit	50
Minimum plasticity index	10
Maximum coefficient of permeability	10^{-7} cm/sec

The facility is designed so that all surface runoff from the drying cells and any passage into the granular subbase beneath the bituminous surface is transported via sewers and underdrains back to the treatment plant.

Four groundwater monitoring wells will be provided on the Calumet-West site which will be sampled on a regular basis by our R&D Department. The water quality data will be transmitted to IEPA. A copy of the groundwater monitoring data from Project 80-159-2P "LASMA Solids Drying Site-WSW STW," which was submitted to the IEPA on April 9, 1985, is attached (Exhibit B). The LASMA drying site is similar to the proposed project.

(3) Mitigation of wetland laws

Attached as Exhibit C is a proposed wetland and support area located within the Sanitary District's property line. This proposed development represents a 15½-acre site removed from project development and proposed to be set aside permanently as a quality wetland area.

The proposed development is a result of staff meetings and site review between the Sanitary District, the Corps, and the U.S. Fish and Wildlife Service. The proposed development includes a surface water lake of 7½ acres, a wet zone of 4½ acres and an upland support area of 3½ acres. It has been designed in a naturalistic configuration to enhance its visual quality and provide quality wetland habitat and support.

The Sanitary District is proposing that this 15½-acre development area be removed from the sludge drying area contract, and be developed into a quality wetland on the basis of the following schedule:

- completion of preliminary design - September 1985,
- completion of design contract documents - January 1986,
- and award and construction - summer 1986.

The Sanitary District agrees to consult with the Corps, the Fish and Wildlife Service, and the Illinois Department of Conservation in the development of design criteria, preliminary design, and final contract documents.

In addition to the proposed 15½-acre development, the design for the project drainage system includes approximately 6 acres of surface drainage swales. They fit into the Corps' definition of wetland area, and should be considered as part of the mitigation proposal.

It is the judgment of the Sanitary District that the above responds to the issues raised in the Corps' summary letter and attachments. Therefore, the Sanitary District requests that the Corps issue the permit which will allow the construction of this project to commence at the earliest possible time.

Sincerely yours,

METROPOLITAN SANITARY DISTRICT OF
GREATER CHICAGO

Illinois Environmental Protection Agency · 2200 Churchill Road, Springfield, IL 62706

217/782-0610

MSDGC (Cook County)
Sludge Drying Facility -- Isolated Wetland
Log #C-73-85

March 22, 1985

Department of the Army
Chicago District
Corps of Engineers
219 South Dearborn Street
Chicago, Illinois 60604

Gentlemen:

This Agency received a request on February 1, 1985, from the Metropolitan Sanitary District of Greater Chicago requesting necessary comments for environmental consideration concerning the construction of a sludge drying facility on approximately 70 acres adjacent to the Calumet Sewage Treatment Works. We offer the following comments.

Based on the information included in this submittal, it is our engineering judgment that the proposed project may be completed without causing water pollution as defined in the Illinois Environmental Protection Act, provided the project is carefully planned and supervised.

These comments are directed at the effect on water quality of the construction procedures involved in the above described project and is not an approval of any discharge resulting from the completed facility, nor an approval of the design of the facility. These comments do not supplant any permit responsibilities of the applicant towards this Agency.

This Agency hereby issues certification under Section 401 of the Clean Water Act (PL 95-217), subject to the applicant's compliance with the following conditions:

1. The applicant shall not cause:
   a. violation of applicable water quality standards of the Illinois Pollution Control Board, Title 35, Subtitle C: Water Pollution Rules and Regulations;
   b. water pollution as defined and prohibited by the Illinois Environmental Protection Act; and
   c. interference with water use practices near public recreation areas or water supply intakes.

2. The applicant shall provide adequate planning and supervision during the project construction period for implementing construction methods, processes and cleanup procedures necessary to prevent water pollution and control erosion.

3. Any spoil material excavated, dredged or otherwise produced must not be returned to the river or stream but must be deposited in a self-contained area in compliance with all State statutes, regulations and permit requirements with no discharge to the waters of the State unless a permit has been issued by this Agency. Any back filling must be done with clean material and placed in a manner to prevent violation of stream water quality standards.

4. The applicant shall comply with the Subtitle C permit issued for these facilities by the Agency.

5. This certification becomes effective when the Department of the Army, Corps of Engineers, includes the above conditions #1 through 4 as conditions of the requested permit issued pursuant to Section 404 of PL 95-217.

This certification does not grant immunity from any enforcement action found necessary by this Agency to meet its responsibilities in prevention, abatement, and control of water pollution.

Very truly yours,

Thomas G. McSwiggin

NOTES:

2- THE UPLAND (DRY) ZONE AREA SHALL BE CONSTRUCTED TO MEET THE NEW SERVICE ROAD AND SHALL DRAIN TO OPEN WATER.

3- ALL PEAT AND SIMILAR MATERIALS AS DIRECTED BY THE ENGINEER SHALL BE REMOVED FROM THE SWAMP AREA AND STOCKPILED SEPARATELY FOR USE IN CONSTRUCTION OF THE WET ZONE AREA. DRYING CELL NO. 5, SOUTH OF THE WETLANDS, MAY BE USED FOR THIS PURPOSE.

4- THE CONTRACTOR SHALL REMOVE AND DELIVER APPROXIMATELY 114-3'x3'x3' CONCRETE BLOCKS, LOCATED ALONG THE SOUTHERN BOUNDRY OF THE WETLANDS, TO THE CALUMET S.T.W. AT A SITE AS DIRECTED BY THE ENGINEER.

5. ANY MARINE OR OTHER WILDLIFE HELPLESSLY STRANDED BY THE DRAINING OF THE SWAMPY AREA SHALL BE TRANSPORTED TO CELL NO. 5 AS DIRECTED BY ENGINEER.

6. THE CONTRACTOR SHALL FILL THE WETLANDS, AFTER COMPLETION, WITH UNCONTAMINATED STORM WATER OR GROUND WATER TAKEN FROM THE UNDERDRAIN SYSTEM AT THE CALUMET SLUDGE DRYING AREA - WEST. STORM WATER RETAINED IN CELL NO. 5 MAY ALSO BE USED

7. IF INSUFFICIENT WATER IS AVAILABLE TO FILL THE WETLANDS, THE CONTRACTOR MAY USE A WELL OR 1 PART MSDGC FINAL PLANT EFFLUENT WATER, TAKEN FROM THE PLANT EFFLUENT, IN A MANNER APPROVED BY THE ENGINEER, TO EVERY 3 PARTS STORM WATER. ALL PUMPS, WELLS, HOSE, ELECTRICAL SERVICE, ETC. REQUIRED TO PROVIDE WATER TO FILL THE WET LANDS SHALL BE PROVIDED BY THE CONTRACTOR UNDER THE CONTRACT.

Kensington Marsh – Drainage Runoff from Proposed Rail Yard

In order to maintain allowable flow rates into the Kensington Marsh (Marsh), nine (9) proposed detention ponds are included (8 above ground and 1 underground) in the proposed railroad yard project limits. The Marsh is considered "open water" which allows for a higher allowable release rate in comparison to discharging to an underground drainage pipe system. Prior to entering each respective detention pond, runoff would be collected by underdrains wrapped in a permeable filter fabric and located between selected railroad tracks. The underdrains are located in the sub-ballast section. These underdrains connect into pipes that outlet into respective detention ponds. The combination of the ballast, sub-ballast, and underdrains with filter fabric comprise the Volume Control Best Management Practices (VCBMP's) by minimizing suspended solids entry into the detention ponds. The VCBMP receives credit for the required water quality pre-treatment. Pre-treatment devices such as BaySaver units will be used to filter the parking lot and roof drainage before it enters a respective detention ponds. To mitigate flow rates, the ponds utilize an outlet control structure, which includes orifices, a grate, and discharge pipe. Ultimately, the runoff exits the pond via the discharge pipe and enters the Marsh. The access road to the railyard includes catch basins with a deep sump. The deep sump is used to collect sediment. The pipe leaving the catch basins connects into the pipe network that enters the Marsh (i.e. the road drainage does not enter the detention ponds). See Table A: Kensington Marsh (DP-Marsh) for volume of runoff and flow rates entering the Marsh.

Office of Water Resources
160 N. LaSalle Street, Suite S-703
Chicago, IL 60601

Re: Illinois Coastal Management Federal Consistency Review
CTA Red Line Extension Project
Chicago, Cook County, Illinois

Dear Mr. Casey:

The Chicago Transit Authority (CTA) is preparing a Final Environmental Impact Statement (EIS) for the Red Line Extension (RLE) Project and we are submitting this letter and enclosures for your review and initial determination as to whether a federal consistency review would be required for the RLE Project. This letter describes the project including detailing the portion of the RLE Project that is within the Illinois coastal zone boundaries and the federal financial assistance.

Project Description

CTA, as project sponsor to the Federal Transit Administration (FTA), proposes to extend the Red Line from the existing 95th/Dan Ryan terminal to 130th Street. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. This project is one part of the Red Ahead Program to extend and enhance the entire Red Line.

CTA and FTA published a Draft Environmental Impact Statement (EIS) on October 6, 2016 that evaluated the environmental impacts of constructing and operating the RLE Project. The Draft EIS proposed a terminal station, the 130th Street station, located north of 130th Street adjacent to the Metropolitan Water Reclamation District of Greater Chicago (MWRD) Calumet Water Reclamation Plant.

In 2017, the Chicago Housing Authority demolished three housing blocks of the Altgeld Gardens neighborhood, creating an opportunity to relocate the station to the area of the demolished blocks. In 2019, CTA began exploring this opportunity to relocate the 130th Street station adjacent to the Altgeld Gardens neighborhood. The relocated 130th Street station would be constructed in a previously developed area within the Illinois coastal zone. As the project location map depicts (**Enclosure A**), the Illinois Coastal Management Program boundary follows 130th Street in this location. The 130th Street station in the Draft EIS was outside this boundary. However, the relocated 130th Street station (located south of 130th Street) would be within the Illinois coastal zone boundaries. The new station location is currently being evaluated as part of a Supplemental Environmental Assessment (EA).

The 130th Street station would include an at-grade station platform located south of 130th Street. A station entrance would be located at the terminus of the extension north of 132nd Street. A five-bay bus turnaround would be located to the west of the main station for direct transfers. A park & ride facility would be located northwest of the station platform, with another station entrance at the top level to bridge over the tracks to access the station platform for park & ride transfers. CTA Transportation Offices would also be located at the terminus, with a connection to the park & ride facility and nearby station entrance. The Transportation Offices would include office space and restroom facilities for station personnel.

The RLE Project would improve transit access and pedestrian connections to the Forest Preserves of Cook County Beaubien Woods Forest Preserve, located south of the project, and its amenities, including access to the Little Calumet River and the boat launch located within the forest preserve. The RLE Project would open up opportunities to create a gateway to the Beaubien Woods Forest Preserve from the rest of the city and surrounding suburbs through direct connection to the rail transit network through a new station, enhanced bus service connections at the station, and a proposed park & ride facility directly adjacent to the forest preserve.

Although there are wetlands located within the Illinois coastal zone boundaries (between 130th Street and Old 130th Street on both sides of the existing Conrail railroad tracks), these wetlands would not be impacted by the RLE Project.

Stormwater drainage from the relocated 130th Street station would be sent to the existing city stormwater system. Design features would be included to manage stormwater drainage so as not to overload the existing stormwater system.

Federal Financial Assistance

This RLE Project would be funded, in part, by the FTA Capital Investment Grants – New Starts Program, which is a listed federal financial program in the Illinois Coastal Management Program. CTA submitted a request for entry into the Project Development phase in November 2020 and received approval in December 2020. **Enclosure B** includes the letter from FTA approving the RLE Project for entry into Project Development.

We appreciate your review of these materials at your earliest convenience to determine whether a full federal consistency review would be required for the RLE Project. If you have any questions or require further information, please contact me at mfratinardo@transitchicago.com or Robin

Martel at rmartel@wightco.com or 312.261.5730. If preferred, we can set up a virtual meeting to discuss any clarifications or questions you have regarding this request.

Regards,

Marlise Fratinardo
Senior Project Manager, Planning
Chicago Transit Authority

Re: Project Development Initiation – Red Line Extension

Dear Mr. Carter:

Thank you for your letter, dated November 3, 2020, requesting entry into the Project Development (PD) phase under the Federal Transit Administration's (FTA) Capital Investment Grants (CIG) New Starts program for the Chicago Transit Authority's (CTA) Red Line Extension (RLE) project (the Project). After reviewing your initial letter, FTA requested additional information including an updated map and supporting documentation for available funding on November 17, 2020, and received response on November 27, 2020. At that time, FTA determined that the information provided was sufficient to enter the PD phase.

Please note that the CTA undertakes the PD work at its own risk, and that the Project must still progress through further steps in the CIG program to be eligible for consideration to receive CIG funding.

Per the requirements of the Fixing America's Surface Transportation (FAST) Act, the following activities must be completed during PD:

- Select a locally preferred alternative;
- Have the locally preferred alternative adopted into the fiscally constrained long range transportation plan;
- Complete the environmental review process; and
- Complete the activities required to develop sufficient information for evaluation and rating under the CIG criteria.

The FTA encourages you to familiarize yourself with the information found on the CIG program webpage at https://www.transit.dot.gov/funding/grant-programs/capital-investments/about-program. There you will find more details and information on the activities mentioned above including answers to frequently asked questions and the information that must be provided to FTA for eventual project evaluation and rating.

The FTA will be in contact to discuss its technical assistance and project oversight plans as the Project moves through PD. The FTA would appreciate periodic updates from CTA on the status of completion of PD activities. CTA must contact FTA no later than six months prior to your anticipated request to enter the Engineering phase so that we can proceed with our formal project oversight process and take the steps necessary to undertake our evaluation and rating.

CTA must formally request an extension from FTA if the PD activities mentioned above and outlined more fully on our website cannot be completed within the two-year timeframe specified in the FAST Act. In determining whether to grant an extension, FTA will consider the reasons an extension is needed, the reasonableness of the proposed revised schedule, and the timeframe needed to complete PD activities. The FTA anticipates extensions will be granted only on an occasional basis rather than on a routine basis, and only for unforeseen and unusual circumstances that might arise. If an extension to the two-year timeframe is not granted by FTA, the Project will be withdrawn from PD. CTA will be asked to complete additional work before being allowed to reapply for entry into the program.

With this entry into PD, CTA has pre-award authority to incur costs for PD activities prior to grant approval and to retain eligibility of those activities for future FTA grant assistance. PD activities include the work necessary to complete the environmental review process and as much engineering and design activities as CTA believes are necessary to support the environmental review process. Upon completion of the environmental review process, FTA extends pre-award authority to project sponsors in PD to incur costs for as much engineering and design as necessary to develop a reasonable cost estimate and financial plan, utility relocation, and real property acquisition and associated relocations. This pre-award authority does not constitute a commitment that future Federal funds will be approved for PD or any other Project cost. As with all pre-award authority, relevant Federal requirements must be met prior to incurring costs in order to preserve eligibility of the costs for future FTA grant assistance.

If you have any questions or comments, please contact Faisal Chowdhury at (202) 366-9851 or faisal.chowdhury@dot.gov.

RE: IDNR/CMP Federal Consistency Certificate IFC2021017 by the Chicago Transit Authority for the extension of the Red Line from the existing 95th/Dan Ryan terminal to 130th Street, in Chicago, IL

Dear Ms. Fratinardo,

Thank you for the above referenced Illinois Coastal Management Program (ICMP) Federal Consistency Certificate (FCC) dated August 27, 2021. Department staff has reviewed the FCC and concur that the proposed activity complies with the enforceable policies of the ICMP and will be conducted in a manner consistent with the ICMP.

If you have any questions, feel free to contact me at 312 793-5947 or james.casey@illinois.gov.

Sincerely,

James P. Casey

In Reply Refer To: May 17, 2021
Consultation Code: 03E13000-2021-SLI-0569
Event Code: 03E13000-2021-E-01314
Project Name: CTA RLE 130th Street Station

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The attached species list identifies any federally threatened, endangered, proposed and candidate species that may occur within the boundary of your proposed project or may be affected by your proposed project. The list also includes designated critical habitat if present within your proposed project area or affected by your project. This list is provided to you as the initial step of the consultation process required under section 7(c) of the Endangered Species Act, also referred to as Section 7 Consultation.

Please note! For all **wind energy projects** and **projects that include installing towers that use guy wires or are over 200 feet in height**, please contact this field office directly for assistance, even if no federally listed plants, animals or critical habitat are present within your proposed project or may be affected by your proposed project.

For all other projects, continue the Section 7 Consultation process by going to our Section 7 Technical Assistance website at http://www.fws.gov/midwest/endangered/section7/s7process/index.html. If you are familiar with this website, you may want to go to Step 2 of the Section 7 Consultation process at http://www.fws.gov/midwest/endangered/section7/s7process/step2.html.

Under 50 CFR 402.12(e) (the regulations that implement Section 7 of the Endangered Species Act) the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally. You may verify the list by visiting the ECOS-IPaC website http://ecos.fws.gov/ipac/ at regular intervals during project planning and implementation and completing the same process you used to receive the attached list. As an alternative, you may contact this Ecological Services Field Office for updates.

Although no longer protected under the Endangered Species Act, be aware that bald eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), as are golden eagles. Projects affecting these species may require measures to avoid harming eagles or may require a permit. If your project is near an eagle nest or winter roost area, see our Eagle Permits website at http://www.fws.gov/midwest/midwestbird/EaglePermits/index.html to help you determine if you can avoid impacting eagles or if a permit may be necessary.

We appreciate your concern for threatened and endangered species. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Endangered Species Act Species

There is a total of 8 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 1 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

Disclaimer

The Illinois Natural Heritage Database cannot provide a conclusive statement on the presence, absence, or condition of natural resources in Illinois. This review reflects the information existing in the Database at the time of this inquiry, and should not be regarded as a final statement on the site being considered, nor should it be a substitute for detailed site surveys or field surveys required for environmental assessments. If additional protected resources are encountered during the project's implementation, compliance with applicable statutes and regulations is required.

Terms of Use

By using this website, you acknowledge that you have read and agree to these terms. These terms may be revised by IDNR as necessary. If you continue to use the EcoCAT application after we post changes to these terms, it will mean that you accept such changes. If at any time you do not accept the Terms of Use, you may not continue to use the website.

1. The IDNR EcoCAT website was developed so that units of local government, state agencies and the public could request information or begin natural resource consultations on-line for the Illinois Endangered Species Protection Act, Illinois Natural Areas Preservation Act, and Illinois Interagency Wetland Policy Act. EcoCAT uses databases, Geographic Information System mapping, and a set of programmed decision rules to determine if proposed actions are in the vicinity of protected natural resources. By indicating your agreement to the Terms of Use for this application, you warrant that you will not use this web site for any other purpose.

2. Unauthorized attempts to upload, download, or change information on this website are strictly prohibited and may be punishable under the Computer Fraud and Abuse Act of 1986 and/or the National Information Infrastructure Protection Act.

3. IDNR reserves the right to enhance, modify, alter, or suspend the website at any time without notice, or to terminate or restrict access.

Security

EcoCAT operates on a state of Illinois computer system. We may use software to monitor traffic and to identify unauthorized attempts to upload, download, or change information, to cause harm or otherwise to damage this site. Unauthorized attempts to upload, download, or change information on this server is strictly prohibited by law.

Unauthorized use, tampering with or modification of this system, including supporting hardware or software, may subject the violator to criminal and civil penalties. In the event of unauthorized intrusion, all relevant information regarding possible violation of law may be provided to law enforcement officials.

Privacy

EcoCAT generates a public record subject to disclosure under the Freedom of Information Act. Otherwise, IDNR uses the information submitted to EcoCAT solely for internal tracking purposes.

Chicago Illinois Field Office
230 South Dearborn Street, Suite 2938
Chicago, IL 60604

Re: Evaluation of Effects on Federally Listed Species and Critical Habitats
CTA Red Line Extension Project
Chicago, Cook County, Illinois

Dear Ms. Clemency:

The Chicago Transit Authority (CTA) is preparing a Final Environmental Impact Statement (EIS) for the Red Line Extension (RLE) Project (Proposed Action). Part of this process includes an evaluation of the project's impact on endangered species and critical habitat.

Project Description

CTA, as project sponsor to the Federal Transit Administration (FTA), proposes to extend the Red Line from the existing 95th/Dan Ryan terminal to 130th Street. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. This project is one part of the Red Ahead Program to extend and enhance the entire Red Line. The Preferred Alignment potential action area is shown in **Enclosure A** as **Figure 1: Project Location**.

Endangered Species Act Federally Listed Species

The USFWS Chicago Ecological Services Field Office was contacted through the Information for Planning and Consultation (IPaC) system regarding the potential presence of species under the jurisdiction of USFWS within the Preferred Alignment potential action area (Consultation Code: 03E13000-2021-SLI-0700). This list was generated using a quarter mile buffer around the Preferred Alignment. The USFWS Official Species List is included as **Enclosure B** of this document. Species lists were previously generated for different project segments as follows: 108th Street crossover (03E13000-2021-E-01134), 120th Street yard and shop (03E13000-2021-E-01136), and 130th Street station (E03E13000-2021-E-01138). Listed species are the same across all three segments. The IPaC system review indicates that eight (8) threatened, endangered, or candidate species may occur within the area: Northern long-eared bat (*Myotis septentrionalis*), piping plover (*Charadrius melodus*), red knot (*Calidris canutus rufa*), eastern massasauga (*Sistrurus catenatus*), Hine's emerald dragonfly (*Somatochlora hineana*), eastern prairie fringed orchid (*Platanthera leucophaea*), leafy prairie-clover (*Dalea foliosa*), and prairie bush-clover (*Lespedeza leptostachya*). **Table 1** presents a list of the federally listed species and their preferred habitat. Additional descriptions of these species and their habitats are summarized below.

Table 1: USFWS IPaC Identified Species

Federal Threatened and Endangered Species Matrix				
Common Name	**Species Name**	**Status**	**Habitat**	**Presence**
Mammals				
Northern Long-eared Bat	*Myotis septentrionalis*	T	Winter habitat includes caves and mines suitable for hibernation. Summer habitat includes trees with loose (exfoliating) bark or crevices of live trees or snags.	Suitable habitat may be present
Birds				
Piping Plover	*Charadrius melodus*	E	Wide, flat, open, sandy beaches with very little grass or other vegetation. Nesting territories often include small creeks or wetlands.	Suitable habitat is not present
Red Knot	*Calidris canutus rufa*	T	Coastal areas or large wetland complexes for migratory stopovers.	Suitable habitat is not present
Reptiles				
Eastern Massasauga	*Sistrurus catenatus*	T	Wet areas including wet prairies, marshes, and low areas along rivers and lakes. Also uses adjacent uplands during part of the year. Often hibernates in crayfish burrows but may also be found under logs and tree roots or in small mammal burrows.	Suitable habitat is not present
Insects				
Hine's Emerald Dragonfly	*Somatochlora hineana*	E	Spring fed wetlands, wet meadows, and marshes.	Suitable habitat is not present
Plants				
Eastern Prairie Fringed Orchid	*Platanthera leucophaea*	T	Moist to mesic black soil prairies, sand prairies, thickets, pothole marshes, and fens.	Suitable habitat is not present

Federal Threatened and Endangered Species Matrix				
Common Name	**Species Name**	**Status**	**Habitat**	**Presence**
Leafy Prairie-clover	*Dalea foliosa*	E	Prairie remnants along the Des Plains River in Illinois, in thin soils over limestone substrate.	Suitable habitat is not present
Prairie Bush-clover	*Lespedeza leptostachya*	T	Dry to mesic prairies with gravelly soil.	Suitable habitat is not present

Status Key: C = Candidate, CH = Critical Habitat, E = Endangered, T = Threatened

Preferred Alignment Habitat

Vegetation in the northern two thirds of the Preferred Alignment potential action area and vicinity primarily consists of parkway trees and landscaping around buildings. According to the descriptions in the *Chicago Nature and Wildlife Plan*, the Preferred Alignment potential action area is comprised of woodland forest and city neighborhoods habitat. The majority of woodland forest is in the 120th Street yard and shop area located roughly between Kensington Avenue and 130th Street on the west side of Cottage Grove Avenue. Some smaller wooded sections are also present south of 130th Street. Observed species include eastern cottonwood (*Populus deltoides*) and oak species (*Quercus* sp.). Cottonwood trees are the primary dominant tree species in the vicinity. Common reed (*Phragmites australis*) dominated wetlands are present in the Preferred Alignment potential action area, generally adjacent to the "woodland forest" areas. These wetlands are low quality wetlands with low plant diversity. The remaining area includes urban lots and maintained landscapes.

The Metropolitan Water Reclamation District of Greater Chicago (MWRD) operates the Calumet Water Reclamation Plant in the area south of Kensington Avenue. The American Recycling facility is located immediately north of the proposed 120th Street yard and shop location. Both operations involve regular passage of heavy vehicle traffic through the "woodland forest" segments. Existing rail and roads are present throughout the Preferred Alignment potential action area.

No Effect Finding

CTA, in coordination with FTA, has determined that implementation of the Proposed Action would have No Effect on the piping plover, red knot, eastern massasagua, Hine's emerald dragonfly, eastern prairie fringed orchid, leafy prairie-clover, or prairie bush-clover. The following species accounts are sourced from USFWS descriptions.

Piping Plover: Piping plovers are a migratory shorebird that nests in North America and winters along the coast of the Gulf of Mexico, or further south. It includes the Great Lakes in its breeding grounds. Piping plovers use wide, flat, open, sandy beaches with limited grass or other vegetation. No suitable habitat is present in the Preferred Alignment potential action area.

Red Knot: Similar to the piping plover, the red knot is a migratory shorebird that nests in North America and migrates south for the winter. Primary habitat includes sandy or gravelly beaches and sandbars or alkaline wetlands. No suitable habitat is present in the Preferred Alignment potential action area.

Eastern Massasagua: Eastern Massasagua are found in wet areas, including wet prairies, marshes, and low areas along rivers and lakes. They use adjacent uplands during part of the year, including areas of open canopy for basking, and areas of suitable foraging and retreat sites. They often hibernate in crayfish burrows, the burrows of other small animals, or under logs and tree roots. Generally, the eastern massasagua requires non-fragmented connections between the different habitat areas inhabited throughout the year. Population persistence declines in populations of less than 130 individuals. Home ranges can vary from 2.5 acres to 336 acres. No suitable habitat is present in the Preferred Alignment potential action area.

Hines Emerald Dragonfly: Hine's emerald dragonfly lives in calcerous spring-fed marshes and sedge meadows that overlie dolomite bedrock. No suitable habitat is present in the Preferred Alignment potential action area.

Eastern Prairie Fringed Orchid: Eastern prairie fringed orchid are found in wet to mesic prairie or wetland communities, such as sedge meadows, fens, or marsh edges. No suitable habitat is present in the Preferred Alignment potential action area.

Leafy Prairie-clover: In Illinois, leafy prairie-clover is found along the Des Plaines River in prairie remnants in thin soils over limestone substrate. It prefers sites with a wet spring and fall and a dry summer with open sun. No suitable habitat is present in the Preferred Alignment potential action area.

Prairie Bush-clover: Prairie bush-clover is found in mesic prairies that have gravelly soil. No suitable habitat is present in the Preferred Alignment potential action area.

Northern Long-eared Bat Determinations

A Project Submittal Form for the Range-wide Programmatic Consultation for Indiana Bat and Northern Long-eared Bat is attached as **Enclosure C**.

The northern long-eared bat spends winter months in hibernacula located in caves and mines. Summer roosting habitat for the northern long-eared bat includes loose (exfoliating) tree bark, tree crevices, or snags. The northern long-eared bat has also been known to roost in man-made structures. Foraging habitat includes forest and below-canopy areas in primarily upland forests on hillsides and ridges as well as along paths, ponds, and streams at forest edges.

The Preferred Alignment has not been formally surveyed for the presence of suitable bat habitat trees at this time. Historically, a railyard occupied the wooded area of the 120th Street yard and shop, as identified through aerial review. Early successional woody vegetation has colonized the area since the removal of the railyard. Specific removal dates are unknown. The yard was reduced in size after 1952 and was still present at least until 1974. Images for 1988 and 1998 appear to show an apparent increase in woody vegetation in the former yard area. Trees observed during non-protocol level field reviews of the Preferred Alignment tend to be relatively young (many greater than 8 inches in diameter), and do not yet exhibit the characteristics of older tree damage that create suitable bat roost opportunities. The majority of trees observed in the Preferred Alignment potential action area are eastern cottonwoods. Trees with exfoliating bark, such as shagbark hickory (*Carya ovata*), have not been observed. Suitable habitat is assumed to be potentially present in the absence of any formal summer habitat survey.

Tree removal has been analyzed for the Preferred Alignment potential action area. Tree removal quantities discussed represent the maximum acreage to be removed. The final acreage of trees removed is anticipated to be lower. From the existing crossing of the Union Pacific Railroad tracks over the Canadian National/Metra Electric District tracks near Kensington Park, to the northern connection with the existing 95th Street/Dan Ryan terminal, approximately 15.5 acres of trees may be removed. These trees are in the urban environment and are within 100 feet of existing roadways and railroad tracks. These trees are unlikely to provide suitable bat roosting opportunities due to their location in a dense urban environment. The alignment to the southeast of this segment (the 120th Street yard and shop and 130th Street station vicinities) is assumed to contain suitable bat roosts. No suitable habitat has been formally documented. There will be up to 30.4 acres of trees removed within 100 feet of existing road or rail surfaces. Up to 18.2 additional acres of trees will be removed between 100 and 300 feet of existing road or rail surfaces. Refer to **Enclosure A**, **Figure 2: Tree Removal 120th Street Yard and Shop, 130th Street Station**.

CTA, on behalf of FTA, has completed this review under the Programmatic Biological Opinion for Transportation Projects in the Range of the Indiana Bat and Northern Long-eared Bat, as revised February 2018. A project submittal form is included in this package. CTA intends to implement avoidance and minimization measures as indicated in the included project submittal form. The standard sheet of Avoidance and Minimization Measures has been included as **Enclosure D** for reference. CTA intends to avoid all tree removal during the active season. Because tree removal would occur between 100 and 300 feet from roads and rail and habitat is assumed to be present, the project would fall under a May Affect, Likely to Adversely Affect (LAA) determination. CTA requests that USFWS either provide concurrence with this effect determination or coordinate with any agency information that indicates this location does not contain suitable habitat for the northern long-eared bat.

We appreciate your review of these materials at your earliest convenience to provide concurrence with the determination and any supplemental supporting information that may be available. Please advise if there are any further actions needed to facilitate the implementation of the Proposed Action in a manner that avoids or minimizes adverse effects to federally listed species. If you have any questions or require further information, please contact me at mfratinardo@transitchicago.com or Mr. Kelsey Kropp at krkropp@transystems.com or 816-490-1319. If preferred, we can set up a virtual meeting to discuss any clarifications or questions you have regarding this request.

Regards,

Marlise Fratinardo
Senior Project Manager, Planning
Chicago Transit Authority

Project Name: CTA Redline Extension

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The attached species list identifies any federally threatened, endangered, proposed and candidate species that may occur within the boundary of your proposed project or may be affected by your proposed project. The list also includes designated critical habitat if present within your proposed project area or affected by your project. This list is provided to you as the initial step of the consultation process required under section 7(c) of the Endangered Species Act, also referred to as Section 7 Consultation.

Please note! For all **wind energy projects** and **projects that include installing towers that use guy wires or are over 200 feet in height**, please contact this field office directly for assistance, even if no federally listed plants, animals or critical habitat are present within your proposed project or may be affected by your proposed project.

For all other projects, continue the Section 7 Consultation process by going to our Section 7 Technical Assistance website at http://www.fws.gov/midwest/endangered/section7/s7process/index.html. If you are familiar with this website, you may want to go to Step 2 of the Section 7 Consultation process at http://www.fws.gov/midwest/endangered/section7/s7process/step2.html.

Under 50 CFR 402.12(e) (the regulations that implement Section 7 of the Endangered Species Act) the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally. You may verify the list by visiting the ECOS-IPaC website http://ecos.fws.gov/ipac/ at regular intervals during project planning and implementation and completing the same process you used to receive the attached list. As an alternative, you may contact this Ecological Services Field Office for updates.

Although no longer protected under the Endangered Species Act, be aware that bald eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), as are golden eagles. Projects affecting these species may require measures to avoid harming eagles or may require a permit. If your project is near an eagle nest or winter roost area, see our Eagle Permits website at http://www.fws.gov/midwest/midwestbird/EaglePermits/index.html to help you determine if you can avoid impacting eagles or if a permit may be necessary.

We appreciate your concern for threatened and endangered species. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

- Official Species List

Official Species List

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

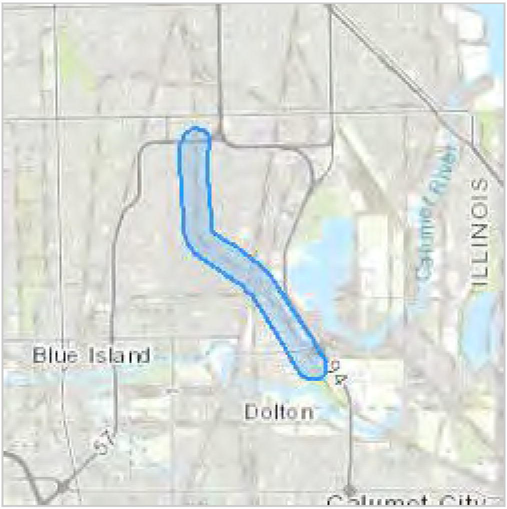
Chicago Ecological Service Field Office
U.s. Fish And Wildlife Service Chicago Ecological Services Office
230 South Dearborn St., Suite 2938
Chicago, IL 60604-1507
(312) 485-9337

Project Summary

Consultation Code: 03E13000-2021-SLI-0700
Event Code: 03E13000-2021-E-01692
Project Name: CTA Redline Extension
Project Type: TRANSPORTATION
Project Description: CTA, as project sponsor to the Federal Transit Administration (FTA), proposes to extend the Red Line from the existing 95th/Dan Ryan terminal to 130th Street. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. This project is one part of the Red Ahead Program to extend and enhance the entire Red Line.

Project Location:

Approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@41.6851895,-87.62411376600002,14z



Counties: Cook County, Illinois

Endangered Species Act Species

There is a total of 8 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 1 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

[1] NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Mammals

NAME	STATUS
Northern Long-eared Bat *Myotis septentrionalis* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9045	Threatened

Birds

NAME	STATUS
Piping Plover *Charadrius melodus* Population: [Great Lakes watershed DPS] - Great Lakes, watershed in States of IL, IN, MI, MN, NY, OH, PA, and WI and Canada (Ont.) There is **final** critical habitat for this species. The location of the critical habitat is not available. Species profile: https://ecos.fws.gov/ecp/species/6039	Endangered
Red Knot *Calidris canutus rufa* There is **proposed** critical habitat for this species. The location of the critical habitat is not available. Species profile: https://ecos.fws.gov/ecp/species/1864	Threatened

Reptiles

NAME	STATUS
Eastern Massasauga (=rattlesnake) *Sistrurus catenatus* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/2202	Threatened

Insects

NAME	STATUS
Hine's Emerald Dragonfly *Somatochlora hineana* There is **final** critical habitat for this species. The location of the critical habitat is not available. Species profile: https://ecos.fws.gov/ecp/species/7877	Endangered

Flowering Plants

NAME	STATUS
Eastern Prairie Fringed Orchid *Platanthera leucophaea* No critical habitat has been designated for this species. This species only needs to be considered under the following conditions: ▪ Follow the guidance provided at https://www.fws.gov/midwest/endangered/section7/s7process/plants/epfos7guide.html Species profile: https://ecos.fws.gov/ecp/species/601	Threatened
Leafy Prairie-clover *Dalea foliosa* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/5498	Endangered
Prairie Bush-clover *Lespedeza leptostachya* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/4458	Threatened

Critical habitats

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

Administration (FRA), and Federal Transit Administration (FTA)

Range-wide Programmatic Consultation for
Indiana Bat and Northern Long-eared Bat

Project Submittal Form

Updated June 2019

The use of the Assisted Determination Key in the U.S. Fish and Wildlife Service (Service) Information for Planning and Conservation (IPaC) System is strongly recommended for submitting project-level information to the Service for use of the range-wide programmatic consultation covering actions that may affect the Indiana bat and/or northern long-eared bat (NLEB). However, if not using the key, transportation agencies must provide this submittal form (or a comparable Service approved form) with project-level information to the Service. The completed form should be submitted to the appropriate Service Field Office prior to project commencement. For more information, see the Standard Operating Procedure for Site Specific Project(s) Submission in the User's Guide (Section 3).

By submitting this form, the transportation agency ensures that each component of the proposed project(s) adheres to the criteria and conditions of the range-wide programmatic consultation, as outlined in the biological assessment (BA) and biological opinion (BO). Upon submittal of this form, the appropriate Service Field Office may review the project-specific information provided and request additional information. For projects that may affect, but are not likely to adversely affect (NLAA) the Indiana bat and/or NLEB, if the applying transportation agency is not contacted by the Service with any questions or concerns within 14 calendar days of form submittal, it may proceed under the range-wide programmatic consultation and assume concurrence of the NLAA determination made by the Service in the BO. For projects that may affect, and are likely to adversely affect (LAA) the Indiana bat and/or the NLEB, the appropriate Service Field Office will respond[1] within 30 calendar days of receiving a complete project-level submission, which includes, but may not be limited to this completed form.

Further instructions on completing the submittal form can be found by hovering your cursor over each text box.

---

1. Date: 7/27/2021

2. Lead agency: FTA

   *This refers to the **Federal governmental** lead action agency initiating consultation; select **FHWA, FRA or FTA** as appropriate.*

3. Requesting agency: Chicago Transit Authority (CTA)

   This refers to the transportation agency completing the form (it may or may not be the same as the Lead Agency.

   - Name: Marlise Fratinardo

---

[1] Service Field Offices should use the response letter template for projects that may affect, and are likely to adversely affect the Indiana bat and/or NLEB.

- Title: RLE Senior Project Manager
- Phone: 312-681-4124
- Email: mfratinardo@transitchicago.com

4. Consultation code:[2] 03E13000-2021-SLI-0700

5. Project name(s): CTA Red Line Extension (RLE)

6. Project description:
Please attach additional documentation or explanatory text if necessary.

This project involves the extension of the CTA Red Line by 5.6 miles. Please refer to the description in the accompanying coordination letter for further description.

7. Project location (county, state): Chicago, Cooke County, Illinois
If not delineated in IPaC, attach shape files.

8. For species other than Indiana bat and NLEB (from IPaC official species list):

☑ No effect – project(s) are inside the range, but no suitable habitat (see additional information attached).

☐ May affect – see additional information provided for those species (see attached or forthcoming).

Please confirm and identify how each component of the proposed project(s) adheres to the criteria of the BO by completing the following (see User Guide Section 2.0):

---

[2] Available through IPaC System Official Species List: https://ecos.fws.gov/ipac/

NO EFFECT

9. For Indiana bat/NLEB, if applicable, select your no effect determination:

☐ No effect – project(s) are outside the species' range.

☐ No effect – project(s) are inside the species range with no suitable summer habitat within the project action area; project(s) must also be greater than 0.5 miles from any hibernaculum unless meeting exceptions listed below.

☐ No effect – project(s) do not involve any construction activities[3] (e.g., bridge/ abandoned structure assessments, surveys, planning and technical studies, property inspections, and property sales).

☐ No effect – project(s) do not cause any stressors to the bat species, including as described in the BA/BO (i.e., do not involve habitat removal, tree removal/ trimming, bridge or structure activities, temporary or permanent lighting, or use of percussives (e.g., lining roadways, unlighted signage, rail road crossing signals, signal lighting, and minor road repair such as asphalt fill of potholes, etc.)).

☐ No effect - project(s) within 0.5 mile of hibernacula that are limited to the maintenance of the surrounding landscape at existing facilities (e.g., rest areas, stormwater detention basins) located outside suitable summer habitat – no new ground disturbance.[4]

☐ No effect – project(s) are within 300 feet from the existing road/rail surface surface (must also be greater than 0.5 miles of a hibernacula) that include percussives or other activities that increase noise above existing traffic/background levels:

- within areas that contain suitable habitat **(documented or undocumented),**
- conducted during the **inactive season**, and
- does not involve tree removal/trimming or bridge/structure work.

☐ No effect – project(s) includes removal, replacement, or maintenance of bridge(s) and/or structure(s) without any signs of bats (bridge/structure assessment documents no sign of bat use (bats, guano, etc.)) and does not impact suitable summer habitat within the project action area.

Proceed with this form to identify how other components of the proposed project adhere to the criteria of the BO.

---

[3] Construction refers to activities involving ground disturbance, percussive noise, and/or lighting.

[4] Ground disturbance is defined as any activity that compacts or disturbs the ground. Ground disturbance can be caused by the use of hand tools (shovels, pick axe, posthole digger, etc.), heavy equipment (excavators, backhoes, bulldozers, trenching and earthmoving equipment, etc.), and heavy trucks (large four wheel drive trucks, dump trucks and tractor trailers, etc.). Note that ground disturbance can be a component of other actions (e.g., bulldozing trees). Contact the local Service Field Office, as needed, to assist in determining if and how ground disturbance may affect bat hibernacula.

MAY AFFECT, NOT LIKELY TO ADVERSELY EFFECT – W/O AMMS

10. For Indiana bat/NLEB, if applicable, select your may affect, NLAA determination (without implementation of AMMs):

☐ NLAA – project(s) are inside the species range and within suitable bat habitat, but **negative** bat presence/absence (P/A) surveys; must also be greater than 0.5 miles from any hibernaculum.

☐ NLAA – project(s) are within 300 feet of the existing road/rail surface (must also be greater than 0.5 miles of a hibernacula) that include percussives or other activities that increase noise above existing traffic/background levels:
  - within areas that contain **undocumented** habitat
  - conducted during the **active season**
  - does not involve tree removal/trimming or bridge/structure work.

☐ NLAA – project(s) are limited to slash pile burning (must also be greater than 0.5 miles from any hibernaculum).

☐ NLAA – project(s) are limited to wetland or stream protection activities associated with compensatory wetland/stream mitigation that do not clear suitable habitat (must also be greater than 0.5 miles from any hibernaculum).

☐ NLAA – project(s) within 0.5 mile of hibernacula that are limited to the maintenance of the surrounding landscape at existing facilities (e.g., rest areas, stormwater detention basins) located within suitable summer habitat – no new ground disturbance or tree removal/trimming.

Proceed with this form to identify how other components of the proposed project adhere to the criteria of the BO.

MAY EFFECT, NOT LIKELY TO ADVERSELY AFFECT – WITH AMMs

11. For Indiana bat/NLEB, if applicable, document your may affect, NLAA determination (**with implementation of AMMs)** by completing the following section; use #13 to document AMMs).

Affected Resource/Habitat Type:

a. Trees

☐ Verify that the project is within 100 feet of existing road/rail surfaces.

☐ Verify that all tree removal/trimming occurs greater than 0.5 mile from any hibernaculum.

☐ Verify that all trees to be removed/trimmed are clearly demarcated.

☐ Verify that no documented Indiana bat and/or NLEB roosts and/or surrounding summer habitat within 0.25 mile of documented roosts will be impacted.

☐ Verify that all tree removal/trimming will occur outside the active season (i.e., will occur in winter):[5]

Or

☐ Verify that tree removal/trimming will include 10 or fewer trees[6] per project during the active season, and visual emergence survey[7] observed no bats.
Acres of trees 0-100 feet of existing road/rail surface proposed for removal/ trimming: 45.9

☐ Verify that all applicable lighting minimization measures will be implemented.

b. Bridge/Structure Work

Projects Proposed work:

Timing of work:

Signs of bat activity on/in bridge/structure? Yes: ○ No: ○

☐ Verify that work will be conducted outside the active season, or if during the active season, verify that no roosting bats will be harmed or disturbed in any way:[8]

☐ Verify that work will maintain suitable roosting habitat.[9]

☐ Verify that all applicable lighting minimization measures will be implemented.

Proceed with this form to identify how other components of the proposed project adhere to the criteria of the BO.

MAY AFFECT, LIKELY TO ADVERSELY AFFECT

12. For Indiana bat/NLEB, if applicable, document your may affect, LAA determination by completing the following section (use #13 to document AMMs).

---

[5] Coordinate with the local Service Field Office for appropriate dates.

[6] Areas containing more than 10 trees will be assessed by the local Service Field Office on a case-by-case basis with the project proponent.

[7] Refer to http://www.fws.gov/midwest/endangered/mammals/inba/inbasummersurveyguidance.html

[8] See page 12 of the User Guide for a description of activities that are NLAA roosting bats during the active season.

[9] This only applies when assessment documents signs of bat use of when bat use is assumed.

Affected Resource/Habitat Type:

a. Trees

Project Location:

☑ 0-100 feet from edge of existing road/rail surface

☑ 100-300 feet from edge of existing road/rail surface

☑ Verify that all tree removal/trimming occurs greater than 0.5 mile from any hibernaculum

Timing of tree removal/trimming:

☑ Verify that no documented Indiana bat roosts or surrounding summer habitat within 0.25 mile of documented roosts will be impacted between May 1 and July 31.

☑ Verify that no documented NLEB roosts or surrounding summer habitat within 150 feet of documented roosts will be impacted between June 1 and July 31.

Acres of trees 0-100 feet of existing road/rail surface proposed for removal/trimming: 45.9

Acres of trees 100-300 feet of existing road/rail surface proposed for removal/trimming: 18.2

☑ Verify that all applicable lighting minimization measures will be implemented.

b. Bridge/Structure Work Projects

Proposed work:

Timing of work:

☐ Verify no signs of a maternity colony.

☐ Verify that work will maintain suitable roosting habitat.[10]

☐ Verify that all applicable lighting minimization measures will be implemented.

13. For Indiana bat/NLEB, if applicable to the action type, the following AMMs will be implemented[11] unless P/A surveys and/or bridge/structure assessments document that

---

[10] This only applies when assessment documents signs of bat use or when bat use is assumed.

[11] See AMMs Fact Sheet (Appendix C) for more information on AMMs.

the species are not likely to be present:

☑ General AMM 1 (required for all projects)

☑ Tree Removal AMM 1
☑ Tree Removal AMM 2 (required for NLAA)
☑ Tree Removal AMM 3 (required for all projects)
☑ Tree Removal AMM 4 (required for NLAA)

Range-wide Programmatic Consultation for
Indiana Bat and Northern Long-eared Bat

Avoidance and Minimization Measures

Updated January 2018

For projects to be covered by the Programmatic Biological Opinion (BO), specific avoidance and minimization measures (AMMs) related to the Indiana bat and northern long-eared bat (NLEB) will be implemented where applicable. AMMs, if adopted under appropriate circumstances, are expected to reduce the potential impacts of the proposed action on both bat species. In some instances, impacts will be reduced to levels that are insignificant or discountable; therefore, not likely to adversely affect (NLAA) either species. In other cases, take will be unavoidable even with the implementation of AMMs; therefore, likely to adversely affect (LAA) either species.

The following AMMs are necessary to avoid and minimize impacts to the Indiana bat and NLEB, and where applicable, are required for projects using the range-wide programmatic consultation.

AMMs for Projects NLAA

Unless presence and absence (P/A) summer surveys[1] document that the species are not likely to be present, the following AMMs are REQUIRED, as applicable, in order for projects to NLAA the Indiana bat and the NLEB (i.e., projects qualify to use the range-wide programmatic informal consultation).

All NLAA Projects

General AMM 1. Ensure all operators, employees, and contractors working in areas of known or presumed bat habitat are aware of all FHWA/FRA/FTA (Transportation Agencies) environmental commitments, including all applicable AMMs.

Lighting

Lighting AMM 1. Direct temporary lighting away from suitable habitat during the active season.

Lighting AMM 2. When installing new or replacing existing permanent lights, use downward-facing, full cut-off[2] lens lights (with same intensity or less for replacement lighting); or for those transportation agencies using the BUG system developed by the Illuminating Engineering Society,[3] the goal is to be as close to 0 for all three ratings with a priority of "uplight" of 0 and "backlight" as low as practicable.

---

[1] P/A summer surveys conducted within the fall swarming/spring emergence home range of a documented Indiana bat hibernacula (contact local USFWS Field Office for appropriate home range) that result in a negative finding requires additional consultation with the local USFWS Field Office to determine if clearing of forested habitat is appropriate and/or if seasonal clearing restrictions are needed to avoid and minimize potential adverse effects on fall swarming and spring emerging Indiana bats.

[2] http://www.lithonia.com/micro_webs/nighttimefriendly/cutoff.asp

Tree Removal

The word "trees" as used in the AMMs refers to trees that are suitable habitat[4] for each species within their range. The word **documented** means habitat where bats have actually been captured and/or tracked.

Tree Removal AMM 1. Modify all phases/aspects of the project (e.g., temporary work areas, alignments) to the extent practicable to avoid tree removal in excess of what is required to implement the project safely.
Note: Tree Removal AMM 1 is a minimization measure, the full implementation of which may not always be practicable. Projects may still be NLAA as long as Tree Removal AMMs 2, 3, and 4 are implemented.

Tree Removal AMM 2. Apply time of year (TOY) restrictions for tree removal[5] when bats are not likely to be present, or
Limit tree removal to 10 or fewer trees[6] per project at any time of year within 100 feet of existing road/rail surface and **outside of documented** roosting/foraging habitat[7] or travel corridors;[8] visual emergence survey must be conducted **with no bats observed**.[9]

Tree Removal AMM 3. Ensure tree removal is limited to that specified in project plans and ensure that contractors understand clearing limits and how they are marked in the field (e.g., install bright colored flagging/fencing prior to any tree clearing to ensure contractors stay within clearing limits).

Tree Removal AMM 4. Do not remove:

- **documented** Indiana bat or NLEB roosts that are still suitable for roosting; or
- trees within 0.25 miles of roosts; or
- **documented** foraging habitat any time of year.

---

[3] http://www.ies.org/pdf/education/ies-fol-addenda-1-%20bug-ratings.pdf
http://shop.innovativelight.com/media/cms/BUG_ratings_3044A7612FA89.pdf

[4] See the USFWS' current summer survey guidance for our latest definitions of suitable habitat.

[5] Coordinate with the local USFWS Field Office for appropriate dates.

[6] Areas containing more than_10 trees will be assessed by the USFWS local field office on a case-by-case basis with the project proponent.

[7] Documented roosting or foraging habitat **–** for the purposes of this BA, we are considering documented habitat as that where Indiana bats and/or NLEB have actually been captured and tracked using (1) radio telemetry to roosts; (2) radio telemetry biangulation/triangulation to estimate foraging areas; or (3) foraging areas with repeated use documented using acoustics. Documented roosting habitat is also considered as suitable summer habitat within 0.25 miles of documented roosts.

[8] Documented travel corridor **-** for the purposes of this BA, we are considering documented corridors as that where Indiana bats and/or NLEB have actually been captured and tracked by using (1) radio telemetry; or (2) tree corridors located directly between documented roosting and foraging habitat.

[9] Refer to http://www.fws.gov/midwest/endangered/mammals/inba/inbasummersurveyguidance.html

Bridges

The following Bridge AMMs are REQUIRED, as applicable, in order for projects to NLAA the Indiana bat and the NLEB (i.e., projects qualify to use the range-wide programmatic informal consultation) unless one or more of the following criteria apply:

- the bridge is 1000 feet or more from suitable bat habitat; or
- bridge assessments[10] have occurred to document no signs of bat use; or
- P/A surveys have occurred[11] to document that the bat species are not likely to be present.

Bridge AMM 1. To completely avoid direct effects to roosting bats, perform any bridge removal, replacement, and/or maintenance work during the winter hibernation period[12] unless a hibernating colony of bats is present. Also, follow Bridge AMM 4.
Note: Bridge AMM 1 is an avoidance measure for direct effects, the full implementation of which may not be practicable. If bridge removal, replacement, and/or maintenance work must be performed outside of the winter hibernation period, then follow Bridge AMMs 2-4.

Bridge AMM 2. - Colony or Assuming Presence of Bats
If assuming presence of bats or if bridge assessment or P/A surveys suggest presence of a colony of bats, and work is conducted during the active season, ensure activity will not disturb bats. The following types of bridge work can generally be conducted with the presence of bats:

- above deck work where construction equipment or materials do not extend to the underside of deck where bats may be located (e.g., materials that may drip down to underside of deck), and does not include percussives (vibration) or noise levels above general traffic (e.g., road line painting, wing-wall work).
- below deck work that is conducted away from roosting bats and does not involve percussives or noise level above general traffic (e.g., wing-wall work, some abutment, beam end, scour, or pier repair).

Bridge AMM 3. - Small Number of Bats
If bridge assessment or P/A surveys suggest presence of a small number of bats (<5 – not a colony),[13] and work is conducted during the active season, the following types of bridge work can generally be conducted with the presence of bats:

- above deck work where construction equipment or materials do not extend to the underside of deck where bats may be located (e.g., materials that may drip down to underside of deck), and does not include percussives (vibration) or noise levels above general traffic (e.g., road line painting, wing-wall work).

---

[10] Bridge/structure assessments are valid for two years.
[11] Ensure coordination with local Service FO regarding the applicability of P/A surveys for this use.
[12] Coordinate with the local USFWS Field Office for appropriate dates.
[13] This number is far lower than the typical maternity colony size (USFWS 2007, 2014).

- below deck work that is conducted away from roosting bats and does not involve percussives or noise level above general traffic (e.g., wing-wall work, some abutment, beam end, scour, or pier repair).
- any other bridge repair, retrofit, maintenance, and/or rehabilitation (which may include activities with percussives) conducted in the evening while the bats are feeding, starting one hour after sunset, and ending one hour before daylight excluding the hours between 10 p.m. and midnight[14] and keep the light localized.

Bridge AMM 4. If assuming presence of bats, or if bridge assessment or P/A survey suggests presence of bats, ensure suitable roosting habitat is maintained. Suitable roosting sites may be incorporated into the design of a new bridge.

Structures

This category is intended to capture manmade structures that may provide bat roosting or hibernation habitat that are not bridges. They may include, but are not limited to, rest areas, offices, sheds, outbuildings, barns, and parking garages.

Unless structure assessments[15] have occurred to document that the species are not likely to be present, the following AMMs are REQUIRED, as applicable, in order for projects to NLAA the Indiana bat and the NLEB (i.e., projects quality to use the range-wide programmatic informal consultation).

Structure AMM 1. If the goal of the project is to exclude bats, coordinate with your local USFWS Field Office and follow Acceptable Management Practices for Bat Control Activities in Structures guidance document (White-nose Syndrome Conservation and Recovery Working Group 2015).[16]

Structure AMM 2. If structure maintenance, repair, and/or alteration will be performed **during the winter hibernation period**,[17] determine if work will occur in an area with hibernating bats. If hibernating bats or signs of frequent bat activity are observed, Transportation Agencies and State DOTs will conduct maintenance activity or similar structure alteration in a manner that will not disturb bats using the structure.

Structure AMM 3. If structure maintenance, repair, and/or alteration will be performed **outside of the winter hibernation period**, determine if work will occur in an area with roosting bats. If bat activity or signs of frequent bat activity (e.g., guano stains) are observed, Transportation Agencies and State DOTs will conduct maintenance activity or similar structure alteration in a manner that will not disturb bats using the structure.

---

[14] Keeley and Tuttle (1999) indicated peak night roost usage is between 10:00 p.m. to midnight.

[15] Structure assessment for occupied buildings means a cursory inspection for bat use. For abandoned buildings a more thorough evaluation is required (See Appendix D for bridge/structure assessment guidance).

[16] https://www.whitenosesyndrome.org/sites/default/files/resource/wns_nwco_amp_1_april_2015_0.pdf

[17] Coordinate with the local USFWS Field Office for appropriate dates.

Structure AMM 4. If bat activity or signs of frequent bat activity is observed, Transportation Agencies and State DOTs will not remove the structure.
Note: If there are concerns about human health/safety/property, coordinate with a nuisance wildlife control officer and the local USFWS Field Office.

Hibernacula

The following AMM is REQUIRED, as applicable, in order for projects to NLAA the Indiana bat and the NLEB (i.e., projects qualify to use the range-wide programmatic informal consultation).

Hibernacula AMM 1. For projects located within karst areas, on-site personnel will use best management practices,[18] secondary containment measures, or other standard spill prevention and countermeasures to avoid impacts to possible hibernacula. Where practicable, a 300 foot buffer will be employed to separate fueling areas and other major containment risk activities from caves, sinkholes, losing streams, and springs in karst topography.

AMMs for Programmatic LAA

Unless P/A summer surveys[19] document that the species are not likely to be present, the following AMMs will be implemented (as specified below) for projects LAA the Indiana bat and NLEB (i.e., projects qualify to use the range-wide programmatic formal consultation).

All LAA Projects

General AMM 1. Ensure all operators, employees, and contractors working in areas of known or presumed bat habitat are aware of all Transportation Agency environmental commitments, including all applicable AMMs. *{REQUIRED for programmatic NLAA or LAA}*

Lighting

Lighting AMM 1. Direct temporary lighting away from suitable habitat during the active season. *{REQUIRED for programmatic NLAA or LAA}*

Lighting AMM 2. When installing new or replacing existing permanent lights, use downward-facing, full cut-off[20] lens lights (with same intensity or less for replacement lighting); or for those transportation agencies using the BUG system developed by the Illuminating Engineering Society,[21] the goal is to be as close to 0 for all three ratings with a priority of "uplight" of 0 and "backlight" as low as practicable. *(REQUIRED for programmatic NLAA OR LAA)*

---

[18] Coordinate with the appropriate Service Field Office on recommended best management practices for karst in your State.

[19] P/A summer surveys conducted within the fall swarming/spring emergence home range of a documented Indiana bat hibernacula (contact local USFWS Field Office for appropriate home range) that result in a negative finding requires additional consultation with the local USFWS Field Office to determine if clearing of forested habitat is appropriate and/or if seasonal clearing restrictions are needed to avoid and minimize potential adverse effects on fall swarming and spring emerging Indiana bats.

[20] http://www.lithonia.com/micro_webs/nighttimefriendly/cutoff.asp

http://shop.innovativelight.com/media/cms/BUG_ratings_3044A7612FA89.pdf

Tree Removal

The word "trees" as used in the AMMs refers to trees that are suitable habitat[22] for each species within their range. The word **documented** means habitat where bats have actually been captured and/or tracked.

Tree Removal AMM 1. Modify all phases/aspects of the project (e.g., temporary work areas, alignments) to the extent practicable to avoid tree removal in excess of what is required to implement the project safely.
Note: Tree Removal AMM 1 is a minimization measure, the full implementation of which may not always be practicable.

Tree Removal AMM 2. – *Not required for LAA*

Tree Removal AMM 3. Ensure tree removal is limited to that specified in project plans and ensure that contractors understand clearing limits and how they are marked in the field (e.g., install bright colored flagging/fencing prior to any tree clearing to ensure contractors stay within clearing limits). *{REQUIRED for programmatic NLAA or LAA}*

Tree Removal AMM 4. – *Not required for LAA*

Tree Removal AMM 5. Avoid conducting tree removal within **documented** Indiana bat roosting/foraging habitat[23] or travel corridors from May 1-July 31. *{REQUIRED for programmatic LAA}*

Tree Removal AMM 6. Minimize tree removal within suitable Indiana bat habitat (no documented habitat) from May 1-July 31 in the following manner. *{REQUIRED for programmatic LAA}*

1) Limit clearing such that all trees can be visually assessed.
2a) Conduct visual emergence surveys if trees are greater than or equal to 9 inches diameter at breast height (dbh).
    - If no bats are observed, proceed with clearing the following day (NLAA).
    - If bats observed, modify project to conduct tree removal after August 1 (LAA).

   or

2b) If trees are <9 inches dbh, no emergence survey required (LAA).

---

[22] See the USFWS's current summer survey guidance for our latest definitions of suitable habitat.

[23] Documented roosting or foraging habitat **–** for the purposes of this BA, we are considering documented habitat as that where Indiana bats and/or NLEB have actually been captured and tracked using (1) radio telemetry to roosts; (2) radio telemetry biangulation/triangulation to estimate foraging areas; or (3) foraging areas with repeated use documented using acoustics. Documented roosting habitat is also considered as suitable summer habitat within 0.25 miles of documented roosts.

Tree Removal AMM 7. Avoid removing documented NLEB maternity roosts and trees within 150 feet of those roosts from June 1-July 31. *{REQUIRED for programmatic LAA}*

Bridges

The following Bridge AMMs will be applied (as specified below) for projects LAA the Indiana bat and the NLEB (i.e., projects qualify to use the range-wide programmatic formal consultation) unless one or more of the following criteria apply:

- the bridge is 1000 feet or more from suitable bat habitat; or
- bridge assessments[24] have occurred to document no signs of bat use; or
- P/A surveys have occurred[25] to document that the bat species are not likely to be present.

Bridge AMM 1. To completely avoid direct effects to roosting bats, perform any bridge removal, replacement, and/or maintenance work during the winter hibernation period[26] unless a hibernating colony of bats is present. Also, follow Bridge AMM 4.
Note: Bridge AMM 1 is an avoidance measure, the full implementation of which may not be practicable. If bridge removal, replacement, and/or maintenance work must be performed outside of the winter hibernation period, the remaining Bridge AMMs will be applied as specified below.

Bridge AMM 2. – *Not required for LAA*
Bridge AMM 3. – *Not required for LAA*

Bridge AMM 4. If assuming presence of bats, or bridge assessment or P/A surveys suggests presence of bats, ensure suitable roosting habitat is maintained. Suitable roosting sites may be incorporated into the design of a new bridge. *{REQUIRED for programmatic NLAA or LAA}*

Structures

This category is intended to capture manmade structures that may provide bat roosting or hibernation habitat that are not bridges. They may include, but are not limited to, rest areas, offices, sheds, outbuildings, barns, and parking garages.

Unless structure assessments[27] have occurred to document that the species are not likely to be present, the Structure AMMs will applied (as specified below) for projects LAA the Indiana bat and NLEB (i.e., projects qualify to use the range-wide programmatic formal consultation).

Structure AMM 1. If the goal of the project is to exclude bats, coordinate with your local USFWS Field Office and follow Acceptable Management Practices for Bat Control Activities in Structures guidance document.[28] *{REQUIRED for programmatic NLAA and LAA Indiana bat, and NLAA NLEB}*

---

[24] Bridge/structure assessments are valid for two years.
[25] Ensure coordination with local Service FO regarding the applicability of P/A surveys for this use.
[26] Coordinate with local USFWS Field Office for appropriate dates.
[27] Structure assessment for occupied buildings means a cursory inspection for bat use. For abandoned buildings a more thorough evaluation is required (See Appendix D for bridge/structure assessment guidance).

Structure AMM 2. – *Not required for LAA*
Structure AMM 3. – *Not required for LAA*

Structure AMM 4. If bat activity (or signs of frequent bat activity) is observed, Transportation Agencies and State DOTs will not remove the structure. *{REQUIRED for programmatic NLAA and LAA Indiana bat, and NLAA NLEB.}*
Note: If there are concerns about human health/safety/property, coordinate with a nuisance wildlife control officer and the local USFWS field office.

Hibernacula

The following AMM is REQUIRED, as applicable, for projects LAA the Indiana bat and the NLEB (i.e., projects qualify to use the range-wide programmatic formal consultation).

Hibernacula AMM 1. For projects located within karst areas, on-site personnel will use best management practices,[29] secondary containment measures, or other standard spill prevention and countermeasures to avoid impacts to possible hibernacula. Where practicable, a 300 foot buffer will be employed to separate fueling areas and other major containment risk activities from caves, sinkholes, losing streams, and springs in karst topography. *{REQUIRED for programmatic NLAA or LAA}*

Subject: Re: [EXTERNAL] CTA Red Line Extension: Effects on Federally Listed Species/Critical Habitat

You don't often get email from shawn_cirton@fws.gov. [Learn why this is important [aka.ms]]

EXTERNAL EMAIL This email originated outside of CTA. **NEVER CLICK or OPEN** unexpected links or attachments. **NEVER** provide User ID or Password. CTA IT Support will NEVER ask you for such information. If this email seems suspicious, contact CTA Help Desk at x12345.

Ms. Fratinardo,

We have reviewed your correspondence and request for concurrence. We agree with your "No Effect" determinations for the species located in Cook County, IL. The Service does not provide concurrence on "No Effect" (NE) determinations. Regarding your "May Affect- Likely to Adversely Affect" (MA-LAA) determination, your letter notes that, CTA, on behalf of FTA, has completed its review under the Programmatic Biological Opinion for Transportation Projects in the Range of the Indiana Bat and Northern Long-eared Bat and that CTA intends to implement avoidance and minimization measures as indicated in the included project submittal form (including avoiding all tree removal during the active bat season). Therefore, a "May Affect- Not Likely to Adversely Affect" (MA-NLAA) determination is warranted. As noted in the Programmatic Biological Opinion, "Projects included in the programmatic scope of this consultation include those that result in no effect (NE) or may affect for the Indiana bat and/or the NLEB. It provides advance USFWS concurrence with “not likely to adversely affect” (NLAA) determinations that are consistent with these criteria, subject to project-level verification." Therefore, Service concurrence is not required for the Service recommended MA-NLAA determination.

We plan to review the EIS when the document is available for review. If you have any questions, please feel free to contact me.

Dear Ms. Clemency,

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to extend the existing Red Line 5.6 miles south from the existing 95th/Dan Ryan terminal to 130th Street. In accordance with the National Environmental Policy Act, CTA is completing an Environmental Impact Statement (EIS). Part of this process includes an evaluation of the project's effects on federally listed species and critical habitat. Please find attached a letter and supporting information requesting concurrence on effects to federally listed species and critical habitat for the Red Line Extension (RLE) Project. Included in this request is documentation for the Range-wide Programmatic Consultation for Indiana Bat and Northern Long-eared bat.

CTA requests your review and concurrence of the attached provided materials. Please reach out with any questions. Thank you!

Best,
Marlise

IDNR Ecological Compliance Assessment Tool (EcoCAT) Request Letter

November 17, 2021

Applicant: TranSystems
Contact: Kelsey Kropp
Address: 2400 Pershing Road
Suite 2400
Kansas City, MO 64108

IDNR Project Number: 2207119
Date: 11/17/2021
Alternate Number: P404140019, 2107455

Project: CTA Redline Extension
Address: 95th Street Terminal, Chicago

Description: Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to extend the Red Line from the existing 95th/Dan Ryan terminal to 130th Street. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. This project is one part of the Red Ahead Program to extend and enhance the entire Red Line.

Natural Resource Review Results

Consultation for Endangered Species Protection and Natural Areas Preservation (Part 1075)

The Illinois Natural Heritage Database shows the following protected resources may be in the vicinity of the project location:

Lake Calumet INAI Site
Blanding's Turtle *(Emydoidea blandingii)*
Little Blue Heron *(Egretta caerulea)*
Osprey *(Pandion haliaetus)*
Yellow-Crowned Night Heron *(Nyctanassa violacea)*
Yellow-Headed Blackbird *(Xanthocephalus xanthocephalus)*

An IDNR staff member will evaluate this information and contact you to request additional information or to terminate consultation if adverse effects are unlikely.

RE: CTA Redline Extension
Consultation Program
EcoCAT Review #2207119
Cook County

Dear Mr. Kropp,

The Department has received your submission of this project for the purposes of consultation pursuant to the Illinois Endangered Species Protection Act [520 ILCS 10/11], the Illinois Natural Areas Preservation Act [525 ILCS 30/17], and Title 17 Illinois Administrative Code Part 1075. Additionally, the Department may offer advice and recommendations for species covered under the Fish & Aquatic Life Code [515 ILCS 5, et seq.]; the Illinois Wildlife Code [520 ILCS 5, et seq.]; and the Herptiles-Herps Act [510 ILCS 69].

The proposed action consists of extending the existing Chicago Transit Authority (CTA) Redline from the existing 95th/Dan Ryan terminal to 130th Street 5.6 miles south and terminating at 130th street in Chicago, IL.

EcoCAT has indicated records for the following state listed species and Illinois Natural Area Inventory sites within the project vicinity:

State Listed
Osprey *(Pandion haliaetus)*

Illinois Natural Area Inventory Sites
Lake Calumet

Due to the project location and proximity to threatened resources, the Department recommends the following actions be considered in order to avoid causing adverse impacts:

Osprey
This large bird of prey is known to build nests on top of man-made structures such as cell towers and telephone poles

1. Removal of vertical structures such as telephone poles, light poles, etc. should be done between the dates of November 1st and March 31st.
2. If these dates cannot be accommodated, a nesting survey should be conducted to determine if species are utilizing structures in the project area.
    a. Please forward survey results and methodology to the Department for review and concurrence.

Lake Calumet

If temporary or permanent lighting is required, the Department recommends the following to minimize adverse effects to wildlife:

- All lighting should be fully shielded fixtures that emit no light upward.
- Only "warm-white" or filtered LEDs (CCT < 3,000 K; S/P ratio < 1.2) should be used to minimize blue emission.
- Only light the exact space with the amount (lumens) needed to meet industry safety requirement.
- If LEDs are to be used, avoid the temptation to over-light based on the higher luminous efficiency of LEDs.

Given the above recommendations are adopted, the Department has determined that impacts are unlikely.

In accordance with 17 Ill. Adm. Code 1075.40(h), please notify the Department of your decision regarding these recommendations.

Consultation on the part of the Department is closed unless additional information or advice related to this proposal is required. Consultation for Part 1075 is valid for two years unless new information becomes available which was not previously considered; the proposed action is modified; or additional species, essential habitat, or Natural Areas are identified in the vicinity. If the action has not been implemented within two years of the date of this letter, or any of the above listed conditions develop, a new consultation is necessary.

The natural resource review reflects the information existing in the Illinois Natural Heritage Database at the time of the project submittal and should not be regarded as a final statement on the project being considered, nor should it be a substitute for detailed site surveys or field surveys required for environmental assessments. If additional protected resources are unexpectedly encountered during the project's implementation, the applicant must comply with the applicable statutes and regulations.

Please contact Kyle Burkwald of this office at 217-785-4984 or Kyle.Burkwald@illinois.gov for additional information on this review, or if providing a response to this correspondence.

Thank you,

Bradley Hayes

Attachment H – Section 4(f) Coordination Materials

MEETING NOTES

Date: December 5, 2019 1:30 PM

Place: Forest Preserves of Cook County (FPCC) 536 N. Harlem, River Forest, IL

Project/Purpose: Red Line Extension Update and Coordination: 130th Street Station

Attendees:

Name	Initials	Organization
Sonali Tandon	ST	Chicago Transit Authority
Marlise Fratinardo	MF	Chicago Transit Authority
Leah Dawson Mooney	LM	Chicago Transit Authority
Tom Williams	TW	RLE PMC
Patrick Dunn	PD	RLE PMC
Dan Loftus	DL	RLE PMC
Erika Selke	ES	City of Chicago
Kindy Kruller	KK	FPCC
Chris Slattery	CS	FPCC
Jessica Becker	JB	FPCC
Credell Walls	CW	FPCC
Angela Brooks (Phone)	AB	Chicago Housing Authority

Notes By: Dan Loftus

The following meeting notes set forth our understanding of the discussions and decisions made at this meeting. If no objections, questions, additions, or comments are received within 5 working days from issuance of the meeting notes, we will assume our understandings are correct. We are proceeding based on the contents of these meeting notes.

---

1. Introductions

2. RLE Project Overview – MF provided an overview of the project including Project Location, Station Locations, Yard/Shop Location, and additional design features.

3. Project Status – MF summarized the project status including a brief history of the project as well as a summary of where we are in the FTA New Starts Capital Investment Grant (CIG) Process (preparing for entry into the two-year CIG Project Development phase) and where we are heading (Entry into Engineering, after exiting Project Development).

4. 130th Street Station Opportunity – TW presented the current and potential future terminal station locations near 130th Street. The conceptual design presented in the Draft Environmental Impact Statement (EIS) shows the station and parking are north of 130th Street adjacent to a Metropolitan Water Reclamation District of Greater Chicago (MWRD) facility. Subsequent to the Draft EIS, the Chicago Housing Authority demolished the housing buildings on three blocks

of the Altgeld Gardens housing development directly south of the Draft EIS station location and south of 130th Street. TW referred to a graphic depicting a conceptual design of the new station and parking opportunity noting benefits and challenges.

Benefits of the relocated station include proximity to the residents of Altgeld Gardens, safer access by avoiding the crossing of 130th Street and better opportunities for commercial development. Challenges include traffic access to the station, internal circulation of traffic within Altgeld Gardens, accommodation of existing travel routes (e.g., Carver Military Academy, etc.), potential impacts resulting from Altgeld Gardens being eligible for the National Register of Historic Places, and the need to utilize FPCC land where the new station would be sited. On this last item, the following was discussed:

- Current access to the FPCC Beaubien Woods Flatfoot Lake parking lot near the proposed station site is from the south along Doty Avenue. FPCC noted that the roadway is currently closed and in poor condition with vegetation growing out of the pavement. Traffic from the south uses their parking lot as a bypass to access Carver Military Academy and other areas north. Their parking lot surface is not designed to handle this type of through traffic. Doty Avenue is therefore an important route for FPCC. CDOT has jurisdiction of the road and has been informed of the situation.
- The Old 130th Street crossing is used by people to access Carver Military Academy. People currently make a U-turn on Ellis Avenue to get there. Closure of the roadway may impact access to the school.
- FPCC noted that their policy is that they do not sell land; they lease it, which is a negotiated process. For an easement, it is typically a one-time payment.
- LM discussed the potential for a land swap between FPCC and the City of Chicago to allow for the purchase of the land by CTA. The swap could potentially include city-owned land adjacent to Beaubien Woods. Land swap doesn’t involve leasing but is a formal transfer. ES noted that this is an ongoing conversation.
- FPCC noted that on some projects they are co-sponsors and this has helped to alleviate Section 4(f) issues.
- FPCC noted that the proposed land acquisition involves an existing access road and that their access to the Beaubien Woods would need to be reconsidered. FPCC noted their concern about how people would access the parking garage and the routing of cars and buses for the station, specifically with people coming through their park property. Signage and wayfinding will be an important element of the new station and also for FPCC users to navigate the area.
- FPCC land acquisition transactions have historically included a benefits package in addition to lease payments that are coordinated by FPCC’s land use committee. This benefits package may include the improvements to Doty Avenue.
- FPCC asked about ownership of 134th Street right-of-way east of church row north of Beaubien Woods. Ownership was uncertain, but believed to be CDOT.
- FPCC noted that Ton Farm Underground Railroad tours come to Beaubien Woods.
- FPCC noted that future interests at Beaubien Woods include additional trails and connections to Altgeld Gardens and connecting the two halves of the park (boat ramp area and Flatfoot Lake area) bisected by the railroad. An upcoming Openlands study

would address trails in this area. The current railroad crossing at 132nd Street does not have gates.

- In 2020, FPCC plans to repave and reduce the parking lot for the boat ramp area of Beaubien Woods to reduce their maintenance costs.
- FPCC noted that the station could be a gateway (benefit) to Beaubien Woods. Safety and bike access (connections to bike trails) would be important. FPCC stated that despite the proximity of the park to Altgeld Gardens, people currently don't feel safe accessing on foot.
- To start a pre-application for their land use committee to review, FPCC requested CTA submitting an interest cover letter with key exhibits from the presentation.

The meeting adjourned at 3:30 PM.

Meeting Minutes

Project: **Red Line Extension**
Meeting Purpose: **FPCC Land Use Review Committee Meeting**
Date: **Thursday, November 5, 2020**
Location: **Remote Meeting**
Time: **1:30 PM**

Chairperson: **Matt Gomez (FPCC)**

Attendees: (See Attached copy of Sign-in-Sheet)

Item No.	*Date*	*Item Description*	*Responsibility/ Status*	*Due/Closed Date*
1.00	**Introductions**			
2.00	**Project Overview**			
2.01	11/5/20	The Preferred Alignment was selected in 2018, generally following the existing UPRR alignment and extending from the existing Red Line terminus at 95th St and ending at 130th St in Altgeld Gardens. Four new stations and new Shop/Yard will be added.		
2.02	11/5/20	Project benefits include equity, connectivity and access to the far south side, economic opportunity, frequent rail service, and sustainable transportation.		
2.03	11/5/20	Federal funding is being pursued under the New Starts Program. Earlier this year the Preliminary Engineering Consultant (PEC) was engaged to produce the environmental documents and 30% engineering drawings. The Supplemental Environmental Assessment (EA) has been initiated for the relocation of the 130th Station, and the official entry letter into the New Starts Project Development has been submitted to the FTA.		
2.04	11/5/20	The Draft EIS showed the 130th Station north of 130th St, adjacent to the MWRD wastewater treatment facility. With the recent demolition of homes on CHA blocks within Altegeld Gardens, a new location south of 130th St. withing the now vacant blocks garnered support from stakeholder groups and will be vetted through the NEPA process with a Supplemental EA.		
3.00	**Confirm FPCC Ownership and Holdings**			
3.01	11/5/20	A map of parcel ownership near the 130th Station south location was provided.		
3.02	11/5/20	All alignments considered south of 130th Street would impact the northern FPCC parcel. The larger southern FPCC parcel would only be impacted for a construction easement for the land North of 132nd Street. The northern FPCC parcel is approximately 7 acres and would be a full parcel impact. The southern parcel impact is approximately 0.5 acres for the removal of the apron connecting the old access road and 132nd St. and for regrading and restoring the area.		
3.03	11/5/20	No dedicated ROW was found for 132nd St, and confirmation was requested from FPCC that this street is within the FPCC owned parcel.	FPCC	
4.00	**Proposed Improvements and Alternatives Considered**			
4.01	11/5/20	CTA will maintain the facilities for the service life of the station, and estimates that the construction period will be approximately 5 years and impacts to the FPCC parcel near 132nd St would potentially last 2-3 construction seasons.		
4.02	11/5/20	A conceptual station layout south of 130th was provided, noting that this image is for internal discussions only and has not been made public.		

4.03	11/5/20	Providing a station closer to Beaubien Woods creates a gateway into the nearby FPCC holdings, can improve access for users of Beaubien Woods and enhance connection to the residential areas. This would also eliminate FPCC maintenance for the access road between 132nd St and Old 130th St. Mitigation measures could also be developed to enhance Beaubien Woods.		
4.04	11/5/20	The public also benefits from safer pedestrian movements between Altgeld Gardens, Carver Military Academy, and the new 130th Station, and this project supports the objectives in the Altgeld-Murray Master Plan.		
4.05	11/5/20	A location north of 130th St was considered in the Draft EIS, and all locations south of 130th St would impact FPCC property due to design constraints with the alignment.		
5.00	**Next Steps**			
5.01	11/5/20	For the Section 4(f) process, a formal Section 4(f) evaluation must be performed to determine the use and impacts to the Section 4(f) resource that is Beaubien Woods. Collaboration with FPCC is desired to develop mitigation measures that will result in a de minimus impact. The NEPA process also requires that impacts to FPCC be disclosed to the public and mitigation measures identified. This would be done through the Supplemental EA. The first Supplemental EA draft will be submitted to CTA in January 2021, approval by FTA and public hearing is anticipated for Fall 2021. The Final EIS and ROD will present mitigation measures and final findings for Section 4(f) impacts and is targeted for Spring 2022.		
5.02	11/5/20	CTA inquired about the FPCC process to identify mitigation measures and future collaboration opportunities. CTA and FPCC agree that additional conversations will be required.		
5.03	11/5/20	The land owned by the CHA is identified as potential area for future development. Discussions will be required with CHA and HUD to determine a long term arrangement for the use of this property. Coordination with CHA is ongoing.		
5.04	11/5/20	FPCC requested records of Stakeholder meetings, and CTA will provide Meeting Minutes.	CTA	
5.05	11/5/20	FPCC discussed the "Better Beaubien" effort, which could help identify opportunities for mitigation measures although this plan was not finalized. It was prepared by AIA pro bono. There is a vision for expanding Beaubien Woods further west. FPCC will provide this document to CTA. CTA remains engaged with the City regarding their land holdings in the area and the potential opportunity for land swaps.	FPCC	
5.06	11/5/20	FPCC expressed interest in a trail along the North side of the river, which could also provide pedestrian and bike access to the 130th Station.		
5.07	11/5/20	Changes in land use and disposition of land require a determination that no harm to the FPCC facilities and mission would occur and that the level of impact would be acceptable. Mitigation would extend beyond fair market value for the property and would need to provide additional benefits above and beyond what makes them whole for the land loss.		
5.08	11/5/20	FPCC inquired about CTA intentions for the permanent take, and CTA noted that there are several possible mechanics for this acquisition including a purchase plus mitigation measures, long term lease agreement, or land swap. Through Section 4(f), project funds could be used to mitigate any impacts.		
5.09	11/5/20	Previous conversations discussed a land swap between FPCC and city-owned parcels to the west, which would match the required acreage. The CHA parcel adjacent to these City parcels would also make sense as a recreational space, and CTA can discuss availability of this parcel with CHA. Parcels to the west of Beaubien Woods along the river have various owners. FPCC noted that Openlands is spearheading the analysis of the vacant properties for the African American Water Trail.		
6.00	**Action Items**			

6.01	11/5/20	CTA will provide Meeting Minutes and details from stakeholder meetings.	CTA	
6.02	11/5/20	FPCC will provide the "Better Beaubien" documentation.	FPCC	
6.03	11/5/20	FPCC will review submitted materials on the RLE project and evaluate/discuss benefits to the FPCC. FPCC will also research and confirm ownership of the Southern parcel and 132nd St.	FPCC	
6.04	11/5/20	A separate meeting will be set up to discuss more details regarding the CTA RLE project and FPCC parcels.	CTA/FPCC	
Please notify the author of the minutes of any corrections and/or clarifications within five (5) business days, otherwise minutes will be considered final.

---

1) Introductions

2) Project Overview

- Preferred Alignment: 95th Street to 130th Street
- Relocation of 130th Street station

3) Confirm FPCC Ownership and Holdings

- Parcel parallel to Conrail right-of-way (contains access road)
- Beaubien Woods
- 132nd Street right-of-way

4) Proposed Improvements and Alternatives Considered

- 130th Street station area concept (see attachment)
- Construction and Operations of RLE
- Benefits to FPCC and Public
- Alternatives Considered

5) Next Steps

- Section 4(f) Coordination
- Determination of Use and Impacts
- Review Potential Mitigation Measures

6) Action Items

Meeting Minutes

Project: **Red Line Extension**
Meeting Purpose: **FPCC/CTA Discussion on 130th Station**
Date: **Thursday, February 4, 2021**
Location: **Remote Meeting**
Time: **8:30 AM**

Chairperson: **Marlise Fratinardo**

Attendees: (See Attached copy of Sign-in-Sheet)

Item No.	*Date*	*Item Description*	*Responsibility/ Status*	*Due/Closed Date*
1.00	**Purpose of Meeting**			
1.01	2/4/21	The purpose of this meeting was to further discuss the 130th Station impact on FPCC property.		
2.00	**Project Background**			
2.01	2/4/21	At the 11/5/20 FPCC Land Use Committee meeting, CTA presented the potential to use the FPCC parcel at the proposed 130th Station location.		
2.02	2/4/21	The 130th Station was originally envisioned North of 130th St in the Draft EIS, but demolished housing within Altgeld Gardens presented an opportunity for the station to be relocated adjacent to the Altgeld Gardens community. This was compatible with the CHA master plan and received positive reception from stakeholders.		
2.03	2/4/21	A new NEPA analysis and Supplemental EA document will be needed to document the 130th Station location change.		
3.00	**Current Alignment**			
3.01	2/4/21	The proposed alignment currently involves tunneling under 130th St using the FPCC parcel for the tracks and the Altgeld Gardens parcel for the station.		
3.02	2/4/21	Altgeld Gardens is in the process to be listed in the National Register of Historic Places (NRHP), which would be adjacent to the station location.		
3.03	2/4/21	Community members near the 130th Station have expressed interest in the addition of retail amenities in the neighborhood, and CTA is performing a TSD study in coordination with DPD to determine what types of development opportunities could be supported.		
3.04	2/4/21	The current proposed alignment provides ample space for development opportunities within the Altgeld Gardens parcel.		
4.00	**Alternate Alignment**			
4.01	2/4/21	An alternate alignment was explored, shifting the alignment approximately 150 ft further West to avoid the FPCC parcel.		
4.02	2/4/21	The alternate alignment is feasible but shifts the station closer to the historic resource and significantly reduces the developable area. Both visual and noise/vibration impacts to the community are expected to increase with this alignment.		
4.03	2/4/21	This option does not provide FPCC opportunities for a land swap or betterment.		
4.04	2/4/21	Access to the TCA Health Clinic would be impacted from this alignment, and a few parking spaces would be eliminated.		
5.00	**Potential Mitigation Strategies**			
5.01	2/4/21	FPCC required no net loss for acreage as a minimum but preferred a land swap that would increase total acreage.		
5.02	2/4/21	There was a desire for better integration between the FPCC property, community and future CTA station, including trail connections. Improved connections to Carver Park were also desired.		

5.03	2/4/21	FPCC expressed interest in the CHA Blocks 12 and 15, in addition to the City of Chicago parcels previously discussed.		
5.04	2/4/21	In the Altgeld Gardens Master Plan, Block 15 is shown as an extension of Carver Park for active recreation. Block 12 was shown as unprogrammed open space after the demolition.		
6.00	**Section 4(f) Process**			
6.01	2/4/21	CTA proposed a Section 4(f) schedule based on the RLE project timeline.		
6.02	2/4/21	CTA has discussed a potential land swap with the City of Chicago, and the City of Chicago felt the parcels were an obvious candidate for a land swap.		
6.03	2/4/21	An initial discussion was held with CHA but additional discussions are needed. A meeting has been scheduled with CHA, and CTA will discuss CHA plans for Blocks 12 and 15.		
6.04	2/4/21	Coordination with CPD will occur after the meeting with CHA.		
6.05	2/4/21	CTA noted that the NEPA process and FEIS/ROD must be complete prior to acquiring any land for a land swap unless FTA approves a corridor preservation type acquisition.		
6.06	2/4/21	CTA suggested that an agreement in principle could suffice for the NEPA process, which would identify that an appropriate mitigation for Section 4(f) has been agreed upon. This is required before FTA approval and legal sufficiency review of the Supplemental EA. FPCC would be willing to have an agreement in principal.		
6.07	2/4/21	The Supplemental EA includes a chapter on Section 4(f), and an agreement with FPCC regarding mitigation measures is needed for the preliminary de minimis determination. This agreement can include acreage requirements, ecological sufficiency, trails, or other proposed betterments. The Supplemental EA will be presented to the public, and a public hearing will be held in November/December 2021. Coordination between CTA and FPCC will be held to discuss public comments, and mitigation measures will be finalized in the Final EIS/ROD in Q3 of 2022.		
6.08	2/4/21	The Supplemental EA public hearing will be a public open house, providing documents for review and an open forum for the public to ask questions.		
6.09	2/4/21	FPCC requested public engagement in advance of the Supplemental EA public hearing, preferably ahead of the Q2 Conservation and Policy Council meeting on 4/22/21. CTA noted that several TSD outreach events are scheduled during this timeframe, and the engagement website can be leveraged to gather public input.		
6.10	2/4/21	CTA requested FPCC input on the FPCC process.	FPCC	
6.11	2/4/21	FPCC will present updates at the 4/1/21 FPCC Land Use Committee Meeting.		
6.12	2/4/21	CTA identified that to meet the Supplemental EA schedule, a preliminary agreement, if needed to be approved by the FPCC Board, would be needed in July or September 2021.		
6.13	2/4/21	A meeting will be scheduled the week of 2/22/21 to discuss updates in advance of the 3/4/21 FPCC Land Use Committee Meeting.		
6.14	2/4/21	A field visit can be planned in late March or early April to assess parcel conditions.		
6.15	2/4/21	A multi-agency meeting will be scheduled to coordinate the requests and determine the path forward. That multi-agency meeting should be held after individual agency meetings with the CHA and CPD are held. Target late March for the multi-agency meeting.		
6.16	2/4/21	CTA will update the Section 4(f) schedule to include the 2/18/21 scheduled CPD meeting and will add in dates for the field visit and the additional FPCC Small Group Meeting #2. CTA will provide meeting dates to FPCC.	CTA	

Please notify the author of the minutes of any corrections and/or clarifications within five (5) business days, otherwise minutes will be considered final.

Item No.	*Date*	*Item Description*	*Responsibility/ Status*	*Due/Closed Date*
1.00	**Updates**			
1.01	2/24/21	CTA met with the Chicago Housing Authority (CHA) on 2/10/21 to discuss plans for Blocks 12 and 15. CHA has no plans for these blocks but will confirm if a solar array project may still be pursued. There are no existing contracts or funding for the expansion of Carver Park.		
1.02	2/24/21	CTA met with the Chicago Park District (CPD) on 2/18/21. CPD also had no current plans or funding to extend Carver Park into Block 15.		
1.03	2/24/21	Both CHA and CPD were excited to collaborate and support the process to figure out mutual agency goals.		
1.04	2/24/21	CPD expressed interest in improved connections between Carver Park and Beaubien Woods and meeting resident desires for connections to recreational spaces.		
1.05	2/24/21	CTA has reached out to Cheryl Johnson from People for Community Renewal (PCR) to discuss community feedback on the solar panel project and proposed Section 4(f) mitigations.		
1.06	2/24/21	FPCC has begun discussing the land use and acquisition request with the Conservation Policy Council, and robust community engagement is important to the policy advisors.		
2.00	**Mitigations**			
2.01	2/24/21	FPCC noted that there is desire for a land swap to be more than 1 to 1, as FPCC desires to generally increase holdings. CTA inquired how much more than 1 to 1 would be needed at a minimum. FPCC desires as much land as possible but would be open to an easement or partial property ownership of the CHA parcels.		
2.02	2/24/21	CTA noted that CHA is developing a document in March that could include the land disposition, but CTA confirmed that the CHA land disposition process is a long process that would involve a public process and application through HUD.		
2.03	2/24/21	FPCC requested CTA convey requests from other agencies to assist in developing the FPCC mitigation request strategy.	CTA	
2.04	2/24/21	The main mitigation desired by FPCC is as much land from Blocks 12 and 15 as could be available. FPCC preferred full or partial acquisition of Block 15 but if Block 15 was not available, Block 12 should also be considered. FPCC did not have a clear vision for the use of Block 12.		
2.05	2/24/21	Other desired FPCC mitigations include consultation and/or funding for a safe path connection, trail connections between Carver Military Academy and Beaubien Woods, signage, space within the CTA station to promote recreational activities and assistance vacating the ROW South of Block 15 and DPD parcels.		
2.06	2/24/21	CTA and FPCC agreed that it would be preferred for CTA to provide funding to FPCC rather than consultation for the trail connections.		

2.07	2/24/21	FPCC noted that there is a strong desire for a connection from the boat launch to the community. FPCC desires engineering analysis on a trail crossing the ditch that runs north/south on edge of FPCC land to connect Carver Park to the boat launch.		
2.08	2/24/21	FPCC suggested that a nature play area could make sense adjacent to Carver Park.		
2.09	2/24/21	The CDOT roadway, Doty Ave, East of Beaubien Woods has been repaved adjacent to the parking lot for Flatfoot Lake, but the roadway North of this area is in poor condition and may be a concern to community members accessing Carver Military Academy.		
2.10	2/24/21	The FPCC Resource Management Department may request restoration or funding for restoration of land or have other requests. This department has not provided feedback or requests but is expected to provide input at the March Land Use Committee Meeting.		
3.00	**Process**			
3.01	2/24/21	FPCC noted that it would be important to perform a site visit to the properties to ensure the properties meet ecological criteria, and FPCC requested that this site visit be scheduled 4-6 weeks from 2/24/21. FPCC will complete the ecological assessment.		
3.02	2/24/21	A multi-agency meeting will be set up to discuss next steps, agreements needed and a timeframe. FPCC supported coordination with other local agencies for future land use and development plans, but FPCC anticipated that a proposed plan will be available no earlier than May 2021.		
3.03	2/24/21	CTA and FPCC agreed that CPD, DPD, FPCC, CHA, CTA and PCR should attend the multi-agency meeting.		
3.04	2/24/21	CTA noted that CTA cannot acquire land until the NEPA process is complete, but an understanding of acceptable mitigations is required for the Section 4(f) chapter of the Supplemental EA and Final EIS.		
3.05	2/24/21	Documentation and agreements for a de minimis finding will be similar to those with CPD in the Draft EIS. The draft finding was presented to the public in the Draft EIS public hearing. FTA provided comments based on the Draft EIS hearing, and CPD agreed to the finding.		
3.06	2/24/21	FPCC presented the tradeoffs between the Preferred Alignment and the West Option at the February FPCC Land Use Committee. Leadership has requested a recommendation from the Land Use Committee on whether the mitigations or avoidance of impact would be preferable. FPCC is developing the overall betterment strategy and indicated that it will be presented at the Conservation and Policy Council meeting on 4/22/21.	FPCC	
3.07	2/24/21	To meet project timelines, an agreement in principle is needed by summer 2021, ahead of FTA review of the Supplemental Environmental Assessment (EA). The Supplemental EA is scheduled to be published in November 2021.		
3.08	2/24/21	TSD outreach events will be held in early May and early fall. The previous TSD outreach event was combined with NEPA topics, and NEPA topics could be added to the upcoming TSD events if appropriate.		
3.09	2/24/21	CTA has engaged local stakeholders and the public at the Altgeld Gardens Temporary Advisory Council (TAC) Meeting and at the 130th Station open house meeting. In the previous FPCC/CTA coordination meeting, FPCC noted the desire for additional community engagement activities ahead of the 4/22/21 Conservation Policy Council Meeting, and CTA requested clarification of what additional outreach would be needed.		
3.10	2/24/21	FPCC will hold internal discussions at the March Land Use Committee Meeting, then another small group coordination meeting will be held between CTA and FPCC. A larger multi-agency meeting and site visit will also be scheduled.		
3.11	2/24/21	At the FPCC Land Use Committee Meeting, FPCC expects to receive feedback from other FPCC departments and will follow up with CTA if any big requests are made.	FPCC	

3.12	2/24/21	FPCC aims to outline terms of the mitigations request and reach conceptual agreement before the 4/22/21 Conservation Policy Council Meeting.	FPCC	
3.13	2/24/21	More direction is needed from FPCC leadership if an administrative action is sufficient for agreement or if board approval will be needed.	FPCC	
3.14	2/24/21	The Section 4(f) process requires an agreement in principle by May 2021 to move forward with engineering and design to procure funding for the final design. FPCC typically presents a Memorandum of Agreement (MOA) to the board for public documentation. Additional discussion is needed to coordinate the various requirements. FPCC suggested that a staff level recommendation could be developed and presented to the board for public review, and the public outreach could also be used for the RLE Section 4(f) documentation.		
3.15	2/24/21	CTA envisions that the land acquisition would occur as soon as the Record of Decision (ROD) is approved in summer 2022, as the FPCC land is critical to the 130th Street Station development.		
3.16	2/24/21	CTA will need to develop a strategy to incorporate FPCC betterments in the project timeline and noted that this timetable may vary from the land acquisition timeline.	CTA	
3.17	2/24/21	FPCC believed that Conservation Policy Council concurrence on the conceptual deal should precede public outreach to ensure leadership is in agreement with the approach. CTA suggested this public outreach could occur in June 2021.		
3.18	2/24/21	CTA noted that the May TSD outreach meeting will be corridor wide, and CTA and FPCC agreed that a more focused audience would be preferred.		
3.19	2/24/21	FPCC suggested that the interagency meeting could happen at the site visit.		
3.20	2/24/21	A timeframe for the MOA or other agreement for the land transfers will need to be determined.	CTA/FPCC	
3.21	2/24/21	CTA will suggest dates for the next FPCC/CTA coordination meeting in mid March.	CTA	
4.00	**Other**			
4.01	2/24/21	Solar panels could be installed at the 130th Street Station for neighborhood power. An overall CTA solar strategy is still being developed. Solar arrays may be incompatible with the historic designation of Altgeld Gardens.		
4.02	2/24/21	FPCC expressed concerns with visual impacts of a solar array adjacent to Beaubien Woods or connecting paths.		
4.03	2/24/21	CTA will reach out to PCR and noted that any solar array concepts developed should be discussed with CHA for potential impacts to the National Register Historic District nomination.	CTA	
4.04	2/24/21	FPCC noted that consultation with a community developer solar partner on solar array concepts could be helpful.		
4.05	2/24/21	CTA will look into obtaining feedback from the general CTA solar RFP regarding the solar options at 130th Street Station in coordination with the station development.	CTA	
4.06	2/24/21	CTA noted that the solar array planning should consider station development, and the construction of the station may affect light levels.		
4.07	2/24/21	FPCC and CTA agreed that there may be visual impacts from a solar array.		
4.08	2/24/21	The CTA TSD Team requested a listening session with FPCC to discuss programming, future plans and other planning questions. CTA requested FPCC availability and list of FPCC or partner participants. FPCC will provide suggested participants and availability.	FPCC	

Please notify the author of the minutes of any corrections and/or clarifications within five (5) business days, otherwise minutes will be considered final.

Meeting Minutes

Project: **Red Line Extension**
Meeting Purpose: **FPCC Coordination Meeting**
Date: **Tuesday, March 16, 2021**
Location: **Remote Meeting**
Time: **1:00 PM**

Chairperson: **Marlise Fratinardo**

Attendees: (See Attached copy of Sign-in-Sheet)

Item No.	*Date*	*Item Description*	*Responsibility/ Status*	*Due/Closed Date*
1.00	**Introduction - Purpose of Meeting**			
1.01	3/16/21	The purpose of this meeting was for FPCC and CTA to present updates on the Section 4(f) coordination since the previous small group coordination meeting on 2/24/21.		
2.00	**Updates**			
2.01	3/16/21	A site visit has been scheduled for 3/26/21. CTA has informed CPD and CHA about the meeting but has not received any responses. CTA believed that it would be more productive to have a smaller group and did not invite CPD or CHA to attend.		
2.02	3/16/21	CTA discussed the land swap, project updates, station area layout, and community impacts with Cheryl Johnson (PCR, community advocate). CTA did ask about the future plans for Blocks 12 and 15. Cheryl was interested in the pathway to connect Carver Park and Altgeld Gardens to the Beaubien Woods boat launch. CTA did not ask about the solar array for Blocks 12 or 15. CTA invited Cheryl to the upcoming site visit and is waiting feedback on the project updates and site visit invitation.		
2.03	3/16/21	An FPCC Land Use Committee Meeting was held on 3/4/21, and discussions focused on mitigation ideas that were also discussed with the RLE Team at the 2/24/21 meeting, including exhibit space and advertising. FPCC will reach out to the Field Museum about a potential gathering space that they are planning.	FPCC	
2.04	3/16/21	The TSD Consultant and FPCC will meet to focus on the economic development and TSD land uses. The Section 4(f) process will not be a focus. FPCC noted that Jacqui Ulrich and Adam Kessel will be involved in the TSD discussions.		
2.05	3/16/21	FPCC noted that there is a general openness to considering the use of the FPCC parcel for the RLE project with the right betterment package.		
2.06	3/16/21	The FPCC Resource Management Department objective is to seek betterments for the ecological quality of land in the area of impact. They have not yet weighed in about the betterments.		
2.07	3/16/21	FPCC had created a mowed path that has been used informally as a trail. FPCC believed the mowed path would be the easiest place to have a trail connection, but there may be challenges to crossing the ravine. The FPCC Program Department would take the lead on the path location, but the Resource Management Department should also provide input. Formal concepts will need to be developed if this is identified as a formal mitigation.		

2.08	3/16/21	After the field visit and 4/1/21 FPCC Land Use Committee Meeting, FPCC will write a draft betterments and mitigation measures request. This will be presented to the Conservation Policy Council at the meeting on 4/22/21. FPCC noted that the Conservation Policy Council has thus far been supportive and anticipates that they will generally defer to the staff level recommendations.	FPCC	
2.09	3/16/21	CTA indicated that after FPCC provides their draft betterment and mitigation measures request, CTA will need to coordinate and share that request with the FTA.		
2.10	3/16/21	It was discussed that there may need to be iterations of the betterments and mitigation measures. FPCC will need to confer with Conservation Policy Council for each iteration.		
2.11	3/16/21	FPCC believed it would be helpful to understand where the delineation between parcels would be in the field. CHA Block 15 is fenced off, and the City of Chicago parcels can be identified by heavy forestation. CHA Block 12 is open.		
2.12	3/16/21	Upon demolition of CHA Blocks 11, 12 and 13, there was one Recognized Environmental Concern (REC) that required further investigation but was later determined not to be a problem. The Ph II ESAs did not find any environmental concerns with the soils, and no remediation was needed.		
2.13	3/16/21	CTA did not recall any environmental analyses available for CHA Block 15. FPCC requested confirmation.	CTA	
2.14	3/16/21	CTA did not recall any environmental analyses available for the City of Chicago parcels but will confirm. Since these parcels were never developed, any environmental analyses would likely be very old or non-existent. CTA will also inquire about background on how these properties were acquired.	CTA	
2.15	3/16/21	CTA has reached out to CHA about a possible indoor location to meet in case of inclement weather on the day of the site visit but has not received a response. CTA will follow up.	CTA	
2.16	3/16/21	CTA will coordinate with CHA to ensure access to the fenced in Block 15 parcel.	CTA	
2.17	3/16/21	FPCC still desired to have a multi-agency meeting with CHA, CPD, DPD, FPCC and CTA in mid-April, after the 4/1/21 FPCC Land Use Committee Meeting but before the 4/22/21 Conservation Policy Council Meeting. Proposed dates include 4/12/21 and 4/14/21. CTA will take the lead to schedule the meeting.	CTA	
2.18	3/16/21	FPCC desired to have the community engagement meeting in May after the draft mitigation measures request is proposed to CTA.		
2.19	3/16/21	Because the City of Chicago parcels are densely forested, it may not be accessible during the site visit.		
2.20	3/16/21	FPCC suggested that it may be beneficial for someone to scout out the area prior to the site visit. CTA will follow up.	CTA	
2.21	3/16/21	In a previous coordination meeting, CHA agreed to follow up on the status of the solar array project. CTA will follow up with the CHA.		
2.22	3/16/21	FPCC has a discussion scheduled regarding the possibility of the superintendent issuing the mitigation measures without board action. Board action would not legally be required but may be desired. FPCC will follow up and ask the question after the April 1st Land Use Committee meeting.	FPCC	
2.23	3/16/21	Land acquisition is not anticipated to begin until 2022 after the completion of the environmental work and completion of the Record of Decision. Acquisition of the FPCC parcel is anticipated to be a high priority that will be completed early.		
2.24	3/16/21	Some of the FPCC betterments could be implemented by CTA and others by FPCC.		
3.00	**Meetings**			
3.01	3/16/21	A site visit has been scheduled for 3/26/21.		

3.02	3/16/21	The multi-agency meeting will be scheduled.	CTA	
3.03	3/16/21	A targeted community engagement meeting for pre-Section 4(f) will be scheduled in May.	CTA	
Please notify the author of the minutes of any corrections and/or clarifications within five (5) business days, otherwise minutes will be considered final.

FPCC Request for Section 4(f) Concurrence Memorandum

May 13, 2021

MEMORANDUM

TO: Leah Dawson Mooney, Director of Strategic Planning & Policy, CTA

cc: Eileen Figel, Deputy General Superintendent
Matt Gomez, Land Use Review Committee Coordinator

FROM: Arnold Randall, General Superintendent, Forest Preserves of Cook County

RE: CTA 130th Street Red Line Station – Request for 4(f) Concurrence

DATE: May 13, 2021

This memo sets out proposed draft terms for a 4(f) concurrence letter from the Forest Preserves of Cook County ("FPCC") in support of proposed plans by the Chicago Transit Authority ("CTA") to develop a new 130th Street Red Line Station (the "Project") on or near a 7-acre FPCC parcel that currently is used for access to the Beaubien Woods Boat Launch recreation site.

FPCC property is eligible for protection under federal regulations 23 U.S.C. 138 and 39 U.S.C. 303, which were originally enacted as Section 4(f) of the Department of Transportation Act of 1966, which is implemented under 23 CFR 774 to protect publicly owned parks, recreation areas, and wildlife and waterfowl refuges.

Forest Preserve staff and advisors are committed to ensuring that Forest Preserves' current land is managed and maintained in accordance with its mission. Use of land by other entities for public utilities, infrastructure or other uses unrelated to the Forest Preserves' mission are to be granted sparingly. A recent position paper on the **Acquisition and Disposition of Land** admonishes against any net loss of land and reaffirms a commitment to expand our holdings.

However, on extremely rare occasions, the FPCC will transfer its land when the project will advance FPCC plans and policies, will enhance natural and recreational resources and result in overall betterment of the forest preserves. FPCC staff recognize the important public benefit that will result from the proposed extension of the CTA Red Line and believe that impacts to forest preserve land or disposition of forest preserve land needed for the station can be ameliorated and mitigated to result in overall betterment of the forest preserves and community residents.

This memo confirms preliminary support from Forest Preserve staff for the project and a finding of *de minimis* impact to FPCC land after mitigation, assuming two different potential levels of impact.

Lower-Impact Scenario mitigation measures - to offset diminished access to the boat launch from the north and mitigate noise and vibration impacts on 7 acres of forest preserve land immediately adjacent to the proposed station:

1. Transfer of approximately 7 acres of vacant land owned by the City of Chicago (red circle on Figure 1), subject to confirmation of community support for this transfer and additional terms and conditions;[1]

2. $250,000 payment to FPCC for ecological restoration, habitat enhancement and beautification of expanded Beaubien Boat Launch land to encourage use and enjoyment by community residents and visitors arriving via public transit;

3. New trail connection from Altgeld Gardens recreation facilities on 133rd Street to the Beaubien Woods Boat Launch (concept planning currently in process);

4. Wayfinding and information signage inside the proposed station and outdoor signage at 130th Street and Ellis Avenue and other locations (see Figure 2); and

5. Forest Preserve advertising to encourage CTA riders to use public transportation to visit the Forest Preserves at the 130th Street station, other Red Line stations south of Roosevelt, and inside local trains and busses.

Higher-Impact Scenario – additional public benefits to be included in Transit-Supported Development Plan. In addition to priority mitigation measures listed above which are necessary for a finding of *de minimis* impacts under section 4(f), the proposed project provides an opportunity for the public agencies involved to work together to provide a broad range of benefits to this community. We are committed to collaborating with the CTA and the other public agencies to maximize these public benefits. The public benefits suggested below will also offset loss of forest preserve acreage through the disposition of 7 acres of forest preserve land if this is needed. We ask that you include these additional public benefits in the Transit-Supported Development Plan for further multi-agency coordination and implementation:

6. Transfer of approximately 14 acres of additional vacant land owned by the CHA immediately east of Carver Park (a Chicago Park District facility) and immediately north of the vacant City-owned parcels (see red circles in Figure 3);

7. Vacation of north-south street (highlighted in Figure 4) to ensure continuity of FPCC property in the Beaubien Woods area;

8. Additional trail connections between Carver Park and Beaubien Woods (alignment to be determined);

---

[1] ***Additional Terms and Conditions:*** *Additional information is needed for transfer parcels to confirm they are free and clear of debris, utility infrastructure, environmental conditions, liens and encumbrances and subject to approval by the Board of Commissioners of the Forest Preserve District of Cook County.*

9. Improve sidewalks and add split-rail fencing along perimeter of requested CHA parcels to allow for improved walkability and prevent fly-dumping; and

10. Include bike sharing station outside the CTA station.

CTA Request for Section 4(f) Mitigation Measures Concurrence

August 19, 2021

CHICAGO TRANSIT AUTHORITY

567 West Lake Street
Chicago, Illinois 60661-1498
TEL 312 664-7200
www.transitchicago.com

August 15, 2021

Mr. Arnold Randall
General Superintendent
Forest Preserves of Cook County
536 North Harlem Avenue
River Forest, IL 60305

Re: Concurrence on Section 4(f) Mitigation Measures Request
Chicago Transit Authority Red Line Extension Project

Dear Superintendent Randall:

The Chicago Transit Authority (CTA) is providing our concurrence on the Forest Preserves of Cook County (FPCC) Section 4(f) Lower-Impact Scenario mitigation measures request as detailed in your May 13, 2021 memorandum, included as **Enclosure A** for reference.

FPCC identified a Lower-Impact Scenario of mitigation measures to offset diminished access to the Beaubien Woods Forest Preserve boat launch from the north, and mitigate noise and vibration impacts on seven acres of forest preserve land east-adjacent to the proposed 130th Street station. Five specific mitigation measures were outlined in the FPCC memo:

1. Transfer of approximately seven acres of vacant land owned by the City of Chicago, subject to confirmation of community support for this transfer and additional terms and conditions;
2. $250,000 payment to FPCC for ecological restoration, habitat enhancement and beautification of expanded Beaubien Boat Launch land to encourage use and enjoyment by community residents and visitors arriving via public transit;
3. New trail connection from Altgeld Gardens recreation facilities on 133rd Street to the Beaubien Woods Boat Launch (FPCC concept planning currently in process);
4. Wayfinding and information signage inside the proposed station and outdoor signage at 130th Street and Ellis Avenue and other locations; and

5. Forest Preserve advertising to encourage CTA riders to use public transportation to visit the Forest Preserves at the 130th Street station, other Red Line stations south of Roosevelt, and inside local trains and busses.

The first mitigation measure, the transfer of seven acres of City-owned land to FPCC ownership is comprised of two parcels. The two parcels are located southeast of the intersection of 133rd Street and Greenwood Avenue and are identified as:

- 1108 East 133rd Street, PIN 25-35-100-016
- 500 East 134th Street, PIN 25-35-100-010

Pursuant to the City's concurrence, CTA will complete Phase I and Phase II environmental site assessments (ESAs) for the two city-owned parcels to determine their environmental conditions. The ESAs will ascertain the need for any cleanup and remediation action. Subsequently, if CTA determines that the cleanup and remediation costs are cost-prohibitive, we reserve the right to amend the land transfer of the City-owned parcels to the FPCC as a mitigation measure. If this is the case, CTA will continue to work with FPCC to identify alternative mitigation measures that would satisfy the intent of the first mitigation measure and is acceptable to both parties.

As to the second measure, it is CTA's understanding that the $250,000 will be applied for restoration of the city-owned parcels (brush clearing, dead tree removal, etc.), pavement removal, landscape restoration of the existing seven-acre FPCC parcel that would no longer be used as an access drive, and tree planting and landscape restoration on other existing Beaubien Woods land if possible.

For the third, fourth, and fifth measures, CTA will continue to coordinate the specific details for the new trail connection as FPCC completes their Phase 1 design. When available, FPCC will provide trail design details and an estimate of costs. FPCC will assume long-term maintenance responsibility for trail improvements on their land. Proposed signage locations will be coordinated with CTA and other jurisdictional agencies depending on the locations of the signage. Advertising will be coordinated between FPCC and CTA for ad placement, format, and timing.

CTA will continue to work with FPCC to meet your community outreach needs and develop the details for implementation of the Lower-Impact Scenario mitigation measures listed above. This letter of concurrence for the Lower-Impact Scenario mitigation measures will be included in the Supplemental Environmental Assessment (EA) and Final Environmental Impact Statement (EIS) being prepared for the RLE Project. The letter will serve to document that, with the incorporation of mitigation measures, the RLE Project will have a Section 4(f) "No Use" of Beaubien Woods Forest Preserve.

If you have any questions, please contact me at lmooney@transitchicago.com or 312.388.3533 or Marlise Fratinardo at mfratinardo@transitchicago.com. If preferred, we can set up a virtual meeting to discuss any questions you have regarding this communication.

Regards,

Leah Dawson Mooney
Director of Strategic Planning & Policy
Chicago Transit Authority

Section 1
Introduction

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street. The proposed Red Line Extension (RLE) Project would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. The RLE Project would reduce commute times for residents, improve mobility and accessibility, and provide connection to other transportation modes. The project could also foster economic development, where new stations may serve as catalysts for neighborhood revitalization and help reverse decades of disinvestment in local business districts. In addition, the RLE Project would provide a modern, efficient car storage yard and shop facility that would help improve service and allow for future enhancements on the entire Red Line. The project is part of CTA's Red Ahead Program, a comprehensive initiative for maintaining, modernizing, and expanding the Red Line. CTA proposes to cover a portion of the project funding by applying for federal funds administered by FTA.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted in 2017, CTA selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented UPRR East and West Options. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly one-half mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place, the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

This technical memorandum summarizes the public and agency outreach efforts conducted for the selection of the Preferred Alignment. This includes general outreach related to the announcement of the Preferred Alignment, as well as displacement-specific outreach efforts conducted to property owners and residents who would be potentially displaced by the project. Outreach to property owners in 2018 served to follow up with the more comprehensive notices and outreach conducted in 2016 to notify property owners affected by either the UPRR East or West Options. Based on selection of the Preferred Alignment, outreach efforts in early 2018 provided information to owners of 258 private properties on whether their property would be impacted or whether it was no longer impacted by the Preferred Alignment. Four private properties and three property owners impacted by the Preferred Alignment were not identified as impacted with both the UPRR East and West Options in 2016. These properties were identified as impacted during additional study of the geometry of crossing over UPRR at 108th Place and modifications to the alignment east of Union Pacific Railroad right-of-way in 2017.

Details of public outreach conducted before, and as part of the development of the RLE Project Draft EIS, are provided as part of the Draft EIS.

Section 2
Project Informational Materials and Open House Notification

CTA used a variety of outreach and notification methods to announce the Preferred Alignment, notify potentially-displaced property owners and residents, and invite interested parties to attend and participate in the public open house meeting.

CTA issued a press release on Friday, January 26, 2018 announcing the Preferred Alignment and the upcoming public open house meeting. In addition, CTA performed the following as part of the announcement of the Preferred Alignment and open house:

- Updated the project website to include the open house flyer
- Published display advertisements in six regional and local newspapers
- Posted transit alert cards, or "car cards" at the 95th Street Terminal, on Red Line trains, and on buses that serve the project area
- Sent letters to all cooperating and participating agencies with information on the Preferred Alignment and the open house
- Sent an eBlast to all email addresses on the project contact list
- Sent postcards to all mailing addresses on the project contact list

2.1 Informational Materials

CTA produced a variety of materials to inform the public about the RLE Project and announcement of a Preferred Alignment and open house.

2.1.1 Project Handout

The RLE Project Handout provided details about the project in a compact, one-page, front and back format. The following information was included on the flyer:

- Description of the Preferred Alignment and how it compares to the East and West Options
- Information about comments received during 2016 public outreach and comment period
- Property displacement and noise and vibration impacts
- Expected next steps and timeline for the project

The Project Handout was available at all community meetings, displacement meetings, and the public open house. **Attachment 1** contains both English and Spanish language versions of the Project Handout.

2.2 Press Release

On January 26, 2018, the City of Chicago Mayor's Office and CTA Media Relations issued a press release announcing the Preferred Alignment and the public open house meeting. The press release was accompanied by a verbal announcement from Mayor Rahm Emanuel on the same day at Block Park, 346 W. 104th Street, located in the project area. At the press event, Mayor Emanuel provided context on the implications of the RLE Project for the City and for residents. The press release was posted to the Office of the Mayor's website and the CTA's website on January 26, 2018. The press release is included in **Attachment 1**.

2.3 Display Ads

CTA prepared display ads announcing the Preferred Alignment and the public open house meeting. Display ads were published in several local and regional publications (see **Table 1**). **Attachment 1** contains tear sheets for each publication. The publications include traditional news outlets, local community publications, and a Spanish language publication.

Table 1: Display Ads Announcing Public Open House

Publication Date	Media Outlet
1/27/2018	Chicago Sun-Times
1/31/2018	Chicago Defender
1/31/2018	Beverly Review
1/31/2018	Chicago Citizen
2/2/2018	Hoy (Spanish Newspaper)
2/3/2018	Chicago Crusader

2.4 Project Website

CTA updated the RLE Project website on January 26, 2018 (the date of announcement). The website provides general information about the RLE Project, archived materials about the public hearing and public comment period for the Draft EIS, and updated information on the Preferred Alignment. The website's Frequently Asked Questions were also updated along with images and documents that show the alignment. The project website also contains historical project information from 2009-2014. Copies of the exhibit boards from the open house were posted to the website following the open house on February 13, 2018. **Attachment 1** contains a PDF of the project website.

2.5 Postcard Notifications

On January 26, 2018, CTA mailed postcards with information on the selection of a Preferred Alignment and invited community members to the public open house. The postcards were mailed to approximately 4,268 addresses, including public agencies, business groups, churches, schools, community/neighborhood groups and associations within or near the project area, which were initially identified in the Alternatives Analysis in 2007-2009 and added to in later project phases. In addition, postcards were mailed to all residents and businesses near the Preferred Alternative and previous alternative alignments, including those on parcels either immediately adjacent to the alignment or separated from the alignment by a street, park, vacant parcel, or one residence. Attendees of previous Red Ahead project meetings who requested information about other Red Line projects were also included in the postcard mailing. The postcard provided details about the public open house, including how to utilize transit for meeting location access and contact information to request assistance at the open house. The postcard also included an offer of additional interpretation services in Spanish or sign language with advance notice. **Attachment 1** contains a copy of the postcard.

2.6 eBlast Notifications

CTA sent an email (eBlast) to approximately 1,200 email addresses on the RLE Project contact list on January 26, 2018. The eBlast included information on the project, selection of a Preferred Alignment and information about the public open house with appropriate links to the project website. CTA sent a second eBlast to 1,186 email addresses on February 7, 2018, reminding recipients of the upcoming public open house. In both instances, more than 300 people opened the email. **Attachment 1** contains copies of the two eBlasts.

2.7 Transit Alert Cards

CTA developed a transit alert card, or “car card,” to provide information about the selection of the Preferred Alignment and public open house. CTA posted copies of the transit alert cards at the 95th Street Terminal, on all Red Line rail cars, and on all buses operating out of the 103rd Street garage, which serves many of the routes that operate within the project limits.

Attachment 1 contains a copy of the transit alert card.

2.8 Media Coverage

In response to the CTA announcement on January 26, 2018, news articles about the RLE Project appeared in local media. **Table 2** summarizes the articles about the project that appeared within one month of the announcement. **Attachment 2** contains a copy of each article.

Section 3
Public and Agency Outreach

CTA has maintained active, ongoing public and agency outreach since the Alternatives Analysis in 2006. This section details additional public and agency outreach efforts conducted as part of the early 2018 outreach efforts to reach and coordinate with the public, including elected officials and community groups, as well as federal, state, and local agencies.

3.1 Elected Officials Briefings

CTA contacted federal, state, and local elected officials to inform them of the Draft EIS, the scheduled public open house, and to provide additional project information about the RLE Project. On January 24 and 25, 2018, CTA met with elected officials to brief them on the project and the selection of the Preferred Alignment. **Table 3** summarizes the elected official offices that were briefed. **Attachment 3** contains sign-in sheets from these meetings.

Table 3: Federal, State, and Local Official Briefings

Representing	Date of Briefing
Chicago 6th Aldermanic Ward	1/24/2018
Chicago 8th Aldermanic Ward	1/24/2018
Chicago 9th Aldermanic Ward	1/24/2018
Chicago 10th Aldermanic Ward	1/24/2018
Chicago 17th Aldermanic Ward	1/24/2018
Chicago 21st Aldermanic Ward	1/24/2018
Chicago 34th Aldermanic Ward	1/24/2018
U.S. Senator Tammy Duckworth	1/25/2018
U.S. Representative Bobby L. Rush, Illinois 1st District	1/25/2018
U.S. Representative Robin Kelly, Illinois 2nd District	1/25/2018
State Senator Jacqueline Y. Collins, Illinois 16th District	1/25/2018
State Senator Donne Trotter, Illinois 17th District	1/25/2018
State Representative Marcus Evans, Illinois 33rd District	1/25/2018
State Representative Thaddeus Jones, Illinois 29th District	1/25/2018
Cook County 4th District	1/25/2018
Cook County 5th District	1/25/2018

3.2 Community Groups Outreach

CTA Government and Community Relations staff conducted focused outreach to interested groups about the project and to inform them about the selection of the Preferred Alignment. During this outreach, CTA Government and Community Relations staff offered to meet with each group to discuss the project and its impacts. **Table 4** lists the community groups that met with CTA in 2018. **Attachment 3** contains meeting sign-in sheets and meeting notes.

Table 4: Community Group Meetings

Organization	Date	Attendees
Agape Community Center	3/08/2018	5
People for Community Recovery (Altgeld Gardens)	4/16/2018	7
Chicagoland Prison Outreach	5/18/2018	3
Greater Roseland Chamber of Commerce	6/27/2018	9
Southeast Jobs Collaborative	9/20/2018	16

CTA Government and Community Relations staff will continue to reach out to these groups as the project moves forward and leverage existing relationships to ensure meaningful engagement.

3.3 Agency Outreach

CTA sent letters to federal, state, and local cooperating and participating agencies as well as tribal organizations. These letters contained information on the Preferred Alignment, updates to the RLE Project, and invited representatives to attend the public open house. The agencies and organizations that received this notice are listed below. **Attachment 4** contains letter templates and mailing lists.

Cooperating Agency

- Federal Highway Administration

Federal Participating Agencies

- Department of Energy
- Department of Health and Human Services
- Department of Housing and Urban Development
- Federal Emergency Management Agency
- Federal Railroad Administration
- Transportation Security Administration
- U.S. Environmental Protection Agency
- U.S. Fish and Wildlife Service

Regional Participating Agencies

- Metra Commuter Rail
- Metropolitan Water Reclamation District of Greater Chicago
- Pace Suburban Bus Service
- Regional Transportation Authority

State Participating Agencies

- Illinois Commerce Commission
- Illinois Department of Natural Resources
- Illinois Department of Transportation
- Illinois Environmental Protection Agency
- Illinois Historic Preservation Agency

Local Participating Agencies

- City of Chicago, Office of the Mayor
- Chicago Department of Business Affairs and Consumer Protection
- Chicago Department of Fleet and Facility Management
- Chicago Department of Planning and Development
- Chicago Department of Transportation
- Chicago Housing Authority
- Chicago Park District
- Chicago Police Department

Tribal Organizations

- Citizen Potawatomi Nation
- Forest Country Potawatomi
- Ho-Chunk Nation
- Miami Tribe of Oklahoma
- Peoria Tribe of Indians of Oklahoma
- Pokagon Band of Potawatomi Indians
- Potawatomi Nation-Hannahville Indian Community
- Prairie Band of Potawatomi Nation
- Sac and Fox Nation of Mississippi in Iowa
- Sac and Fox Nation of Missouri
- Sac and Fox Nation of Oklahoma

In addition to sending letters, CTA Government and Community Relations and RLE Project staff met with state, regional and local participating agencies to update them on project status, inform them of the selection of the Preferred Alignment and discuss future coordination opportunities and needs. **Table 5** lists the agencies that met with CTA in 2018. **Attachment 4** contains meeting sign-in sheets and meeting notes.

Table 5: Agency Meetings

Agency	Date	Attendees

Cook County Land Bank Authority	4/3/2018	1

Section 4
Public Open House

CTA hosted a public open house to provide an update on project progress and present the Preferred Alignment. The open house provided the public with an opportunity to ask questions about the Preferred Alignment and other project details in an open, conversational setting. The public open house was held:

Date:	Tuesday, February 13, 2018
Time:	6:00 to 8:00 p.m.
Location:	Gwendolyn Brooks College Preparatory Academy 250 E. 111th Street Chicago, IL 60628

The open house location was accessible per the Americans with Disabilities Act (ADA). The open house was held in the project area and accessible by public transportation (CTA's Red Line 95th Street Terminal and CTA buses #115 Pullman/115th Street, #34 South Michigan Avenue, and #119 Michigan/119th Street). For the convenience of all attendees, the rail station and bus routes nearest to the public open house site were publicized on the public open house flyer, postcard notice, eBlasts, and on the project website. To provide the greatest opportunity for community participation, the public open house was scheduled on a weekday evening. Spanish translators and an interpreter for deaf and hard of hearing individuals were available during the public open house. A total of 246 people signed in at the public open house. **Attachment 5** contains photos from the public open house as well as the sign-in sheets and other meeting materials.

4.1 Public Open House Format

The public open house provided attendees an opportunity to review the proposed project, the Preferred Alignment, potential environmental and property impacts as well as mitigation measures proposed. The open house format also allowed the public to provide feedback, ask questions and discuss concerns directly with project staff.

Exhibit boards staffed by project team members provided information on the project purpose and need; the process for determining the Preferred Alignment and alternatives considered in the Draft EIS; environmental impacts of the project and proposed mitigation measures; and information on the process to be followed for property acquisition and relocation.

Project team members staffed workstations to answer specific questions from the public related to property acquisition and relocation and project engineering.

CTA played a video about the project called "Improving Access, Increasing Livability: The CTA Red Line South Extension." The video re-played continually throughout the meeting in a corner of the room. The video was prepared by the Chicago Metropolitan Agency for Planning (CMAP) in partnership with CTA. The video is available online: www.cmap.illinois.gov/mobility/transit/red-line.

4.2 Public Open House Materials

Project team members offered open house attendees comment cards and Project Handouts as they entered the open house. Both the comment card and Project Handout were available in both English and Spanish. A Spanish language interpreter and an interpreter for deaf and hard of hearing individuals were available to assist attendees. Copies of the public open house exhibits were made available on the project website and remain available as part of the project website.

The comment cards allowed attendees to submit written comments during or after the public open house. Space was provided on the front and back sides of comment cards for commenters to provide feedback. Directions were included on how to submit feedback after the meeting. **Attachment 5** contains both English and Spanish language public open house comment cards.

4.3 Exhibit Boards

CTA developed project exhibit boards for use during the public open house. The boards included the following:

1. Welcome (Open House Purpose and Ways to Provide Comments)
2. Project Purpose and Need
3. Preferred Alignment (Narrative Explanation)
4. Preferred Alignment (Maps)
5. Project Visualizations (Stations)
6. We Heard You (Summary of Comments Received on Draft EIS)
7. Property Displacements
8. Noise and Vibration Impacts
9. Section 4(f) – Impacts to Parks
10. Park Concept Visualizations
11. Quick Facts about Acquisition and Relocation
12. Next Steps and Timeline

Attachment 5 contains the exhibit boards.

CTA and project team members, including professional planners and engineers, provided attendees with specific information related to these topics and answered questions at each exhibit board area and workstation. Copies of the exhibit boards were made available on the project website directly after the public open house and remain available on the project website.

The workstation dedicated to potential property displacements resulting from the project included large-scale maps of the project area showing potential property displacements, as well as addresses and photos to facilitate discussion. CTA also provided FTA's "General Acquisition & Relocation Information" brochures, which summarize property owners' and tenants' rights under the Uniform Relocation Assistance and Real Property Acquisition Act of 1970 ("Uniform Act"). Relocation outreach specialists staffed the workstation to discuss specific displacement-related questions with meeting attendees. CTA also posted the property displacement maps and address listings on the project website (see **Section 5**).

4.4 Comments Received

CTA invited open house attendees to submit comments during the public open house. Comments could also be submitted via email or U.S. mail. Email comments could be sent to a project-specific email address (RedExtension@transitchicago.com) found on the comment cards, project website, and on all notification materials. The comment cards, project website, and all other noticing materials also provided the mailing address for submitting written comments via U.S. mail. CTA received a total of 42 comments between January 26, 2018 and April 26, 2018; **Table 5** summarizes the number of written public comments received. No additional written comments were received from public agencies, tribes, or railroads.

Main themes from the comments included:

- Project funding questions
- Alternate transit options for the area in substitution or in addition to the Red Line extension
- Frequency of bus service following project completion
- Requests for more information about displacement and property acquisition
- Concerns about parking lot locations, spaces and need
- Concerns about noise and vibration and other potential inconveniences to the community resulting from train service and construction
- Requests for the project to employ community members
- Incorporating community designs/artistic expression opportunities
- Potential for transit-oriented development

Table 6: Summary of Comments Received

Format Returned	Number of comments
Public Open House	27
Displacements Meetings	2
Community Group Meetings	2
Email	11
Total	**42**

Attachment 6 contains all comments received between January 26, 2018 and April 16, 2018.

Section 5
Displacement Outreach

CTA undertook an extensive outreach process to notify property owners and lessees affected by the displacements required for the Preferred Alignment. CTA took similar measures to communicate with properties owners and lessees who would no longer experience displacement as a result of the selection of the Preferred Alignment. To provide the greatest opportunity for stakeholder questions and input, CTA employed a variety of methods to notify property owners and lessees of displacements and educate them about the displacement and relocation process as described in the Uniform Act.

5.1 Informational Materials

5.1.1 Frequently Asked Questions

CTA produced a Frequently Asked Questions (FAQs) document to help answer the most common questions potentially-impacted property owners and tenants might have about the property acquisition and relocation process. The document answered the following questions:

- Which alignment option did CTA select?
- How would I know if my property is affected?
- What are my rights as a property owner?
- What type of compensation will I receive?
- How will CTA determine the purchase price for my property?
- What if I don't own this property but rent an apartment, or lease space for my business?
- If CTA acquires my property, will you provide me help in relocating?
- What will happen next with the RLE Project?
- If I have additional questions about potential property acquisitions, who should I call?
- How can I learn more about the RLE Project?

The FAQs handout was included in all mailings to potentially-displaced property owners and tenants and the public open house. **Attachment 7** contains a packet of information about displacements that was posted on the RLE Project website; the packet includes a brief overview of the displacement process and the displacements FAQs handout. Both the English and Spanish language versions of the FAQs are provided in **Attachment 7**.

5.1.2 FTA General Acquisition & Relocation Information Brochure

CTA provided FTA's "General Acquisition & Relocation Information" brochure to property owners and lessees as requested. It was also made available at the public open house. The brochure summarizes the acquisition and relocation process. **Attachment 7** contains the brochure.

5.2 Letters Mailed to Property Owners and Tenants

CTA mailed letters to 231 property owners and tenants at approximately 150 private properties that would be affected by the Preferred Alignment. The letters detailed updated project information, including how the Preferred Alignment impacts the property, and information about the property acquisition and relocation process. Another 127 letters were sent to property owners and tenants at private properties that are not affected by the Preferred Alignment, but who were previously notified about potential displacement during the 2016 Draft EIS process. Letters to property owners and tenants were sent via both regular and certified mail on January 25, 2018 to arrive on January 26, 2018. FAQs were included in these letters. Letters and FAQs in Spanish were sent to property owners and tenants identified as Spanish-speaking through previous outreach efforts.

In addition, CTA reached out separately to the public agencies and railroads that would be affected by the project by mailing each agency/railroad a letter with agency/railroad-specific information. Letters to public agencies and railroads were mailed on January 26, 2018.

Attachment 7 contains copies of the letters sent to private property owners, tenants, public agencies, and railroads.

5.3 Door-to-Door Outreach

In addition to delivery via regular and certified mail, CTA's relocation outreach specialists went door-to-door to hand deliver the letters and materials from January 26, 2018 to February 6, 2018. The outreach specialists visited potentially-displaced properties and properties that would no longer be displaced. Outreach specialists spoke with property owners and tenants and provided an explanation of the RLE Project, displacements, and provisions under the Uniform Act that would apply to properties acquired for the project. CTA's relocation outreach specialists acted as a single point-of-contact to answer specific questions regarding relocation rights, requirements, processes and anticipated timelines.

Many potentially-displaced property owners and tenants were home when the relocation outreach specialists hand-delivered the letters. At properties where no one was present and the building did not appear vacant, outreach specialists left the letters and materials at the front door.

5.4 Displacements Community Meetings

CTA invited potentially-displaced property owners and tenants to attend one of two informational community meetings on February 6, 2018 and February 8, 2018 in the project area to learn more about the project and the acquisition and relocation process. All who received a letter were welcome to attend either of the meetings. During the meetings, attendees could review exhibit boards that described the project and the acquisition and relocation process.

Each meeting had three workstations where attendees could speak with relocation outreach specialists and CTA staff and one workstation where attendees could have a conversation with project engineers. These stations allowed one-on-one conversations about the reasons for displacement specific to their property, the project timeline, their rights under the Uniform Act, and the benefits that would be provided to them. A total of 27 people signed in at the two meetings. **Table 6** shows the locations, dates and times, and attendee counts of each meeting. **Attachment 8** contains photos, sign-in sheets, and exhibit boards from the displacements meetings.

Table 7: Displacements Community Meeting Information

Meeting Location	Date and Time	Attendees
Fenger Academy High School 11220 S. Wallace Street Chicago, IL 60628	February 6, 2018 5:30 - 7:30 PM	12
Palmer Park Gymnasium 201 E. 111th Street Chicago, IL 60628	February 8, 2018 5:30 - 7:30 PM	15

5.4.1 Displacements Meetings Materials

Project team members offered meeting attendees comment cards, displacement FAQs documents, RLE Project Handouts, and the FTA's "General Acquisition & Relocation Information" brochure. Attendees were also invited to provide their contact information and check a box at sign-in to indicate that they would like to be contacted to set up an in-person meeting to discuss their property. A Spanish language interpreter and an interpreter for deaf and hard of hearing individuals were available at both displacements meetings. A copy of the displacement FAQs were made available on the project website and remain available as part of the project website.

The comment cards allowed attendees to submit written comments during or after the displacements meetings.

Large-scale maps of the project area with displaced properties clearly marked and labeled were provided to allow meeting attendees and CTA representatives to easily identify attendees' properties. These maps facilitated discussion about reasons for potential displacement specific to each property. Individual property information sheets with addresses and photos further facilitated discussion. **Attachments 7 and 8** contain the materials made available at the displacements meetings.

5.4.2 Exhibit Boards

Four exhibit boards were on display during the displacements meetings. The boards included the following topics:

1. Welcome (Meeting Purpose, Ways to Provide Comments and Schedule Individual Meetings)

2. Preferred Alignment (Description)

3. Preferred Alignment (Map)

4. Quick Facts About Acquisition and Relocation

5. Next Steps and Timeline

CTA and project team members, including professional planners and engineers, provided attendees with specific information related to these topics and answered questions at each exhibit board area and workstation. Copies of the exhibit boards were made available on the project website after the public open house and remain available on the project website.

5.4.3 Comments Received

Attendees were invited to provide comments in writing during the displacements meetings. Meeting attendees were advised that they could also submit their comments via email or U.S. mail. Email comments could be sent to a project-specific email address (RedExtension@transitchicago.com) found on the comment cards, project website, and on all notification materials. The comment cards, project website, and all other noticing materials also provided the mailing address for submitting written comments via U.S. mail.

A total of 2 written comment cards were submitted during the displacements meetings. Those comment cards are included in **Attachment 6**.

5.5 Customer Service Hotline

In an effort to quickly provide reliable communication regarding displacements and the property acquisition and relocation process, CTA's Customer Service Department fielded calls from potentially-displaced property owners and residents.

Customer service representatives answered general inquiries. Questions and concerns requiring additional expertise, such as those regarding specific properties or details about the property acquisition and relocation process, were forwarded to the RLE Project Uniform Act experts to be answered within 24 hours of the initial request.

5.6 Individual Consultations

RLE Project Uniform Act experts, building on relationships developed from initial property outreach in 2016, have continued to provide property owners and tenants with the opportunity to discuss the project and its impacts through individual consultations by phone or in person. These efforts, while more informal in nature, have provided property owners with additional assistance and ability to answer questions about the project and process/timeline for acquisition during 2018 outreach efforts in particular.

Mayor Emanuel and CTA Announce Preferred Alignment for Red Line Extension to 130th Street

1/26/2018

Expanded rail service to the Far South Side of Chicago will improve access to jobs and opportunity, promote economic development

Mayor Rahm Emanuel and the Chicago Transit Authority (CTA) today announced that the agency has selected a preferred alignment for the Red Line Extension (RLE)—a project that will extend the Red Line to 130th Street from 95th Street. The RLE project will provide new access to rail service for Far South Side residents, connecting them to affordable housing, jobs, services and educational opportunities.

“Today we are taking a major step towards extending the Red Line to 130th Street and delivering the jobs and economic opportunities that go with it,” Mayor Emanuel said. “By extending the Red Line south we are strengthening Chicagoans’ connections to each other, to opportunity and to the world.”

The proposed 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue and 130th Street. Each of the new stations would include bus and parking facilities. The project is expected to create an estimated 6,200 jobs.

After taking into consideration extensive public feedback, technical analysis and other factors, the CTA selected a route for the RLE project that would:

- Begin the extension at 95th Street and run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 109th Street;
- Cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street; and
- Continue south to 130th Street.

“We are happy to introduce our preferred alignment for the Red Line Extension, a transformational project that will expand rail service to Chicago’s southernmost communities and create better access to jobs, education and opportunities,” CTA President Dorval R. Carter, Jr. said. “We made this selection based on feedback from the community, and look forward to moving forward on this project.”

The preferred RLE alignment would provide all the benefits of new rail service for the area while minimizing the impact on local businesses and homes. The alignment is a hybrid of two previously considered alignments—the East and West Options, named for where they were located next to existing freight railroad tracks—and offers the best of each while limiting the number of properties CTA must purchase to build the rail extension. The selected alignment also takes advantage of several large parcels of land that are currently vacant and will allow for economic development opportunities.

The project is a key part of Mayor Emanuel and CTA's "Red Ahead" investment in its busiest rail line that includes the $425 million Red Line South Reconstruction that was completed in 2013 and the ongoing $280 million construction of a new 95th Street Terminal, which will be completed in 2018.

What's next?
CTA will host a public open house on February 13, 2018 from 6 p.m. until 8 p.m. at the Gwendolyn Brooks College Preparatory Academy gymnasium (250 East 111th Street, Chicago, Illinois) to present the alignment to the community.

CTA will produce a final Environmental Impact Study (EIS) that will include further preliminary engineering work and will analyze impacts of the proposed alignment. This engineering work is required before CTA can apply for more than $1 billion in federal funds to support the RLE project, estimated to cost $2.3 billion.

CTA expects to apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase of this project, a necessary step to pursue federal funding for the project under the competitive federal "New Starts" program. For more information on the Red Line Extension project, visit transitchicago.com/redeis.

Project Handout - English

RED AHEAD
Moving Ahead to a Better Red

Red Line Extension

The proposed **Red Line Extension (RLE) Project** is one part of CTA's **Red Ahead Program**, a comprehensive initiative for maintaining, modernizing, and expanding Chicago's most-traveled rail line.

Preferred Alignment Selected

The Chicago Transit Authority (CTA) is proposing to extend the Red Line from the existing terminal at 95th/Dan Ryan to 130th Street, subject to the availability of funding. The proposed 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities.

Based on public feedback, technical analysis, and agency coordination, CTA has selected a route that would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

How the Preferred Alignment Compares

The Preferred Alignment is a combination of the previously presented East and West Options. It would capture the benefits and minimize the impacts of either option and incorporates the feedback received on the Draft Environmental Impact Statement (EIS).

Project Benefits/Impacts	East Option	West Option	Preferred Alignment
Minimizes Affected Parcels	☒	☑	☑
Minimizes Affected Residences	☒	☑	☑

RED AHEAD
Moving Ahead to a Better Red

Red Line Extension

2016 PUBLIC OUTREACH
WE HEARD YOU!

CTA received 284 comments during the comment period. Many comments expressed concern about property displacements and potential noise and vibration impacts. The Preferred Alignment would have ***fewer impacts*** than either the East or West Option.

Property Displacement Impacts

The Preferred Alignment would affect ***fewer residences*** than the East Option, and ***fewer businesses and jobs*** than the West Option.

Noise and Vibration Impacts

CTA would construct an approximately 4-foot high noise barrier along the tracks and implement other mitigation strategies to ***resolve all potential severe and moderate noise impacts*** due to the project. Based on the analysis, the project would result in ***no impacts from vibration***.

Next Steps and Timeline

Now that CTA has selected the Preferred Alignment, a Final Environmental Impact Statement will be prepared and preliminary engineering will be conducted. On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next 5 years for the RLE Project, which will allow for completion of these next steps.

CTA will apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase to pursue federal funding for construction of this project under the competitive federal “New Starts” program. Project Development and securing full funding for the RLE Project under this program is a multiyear, multistep process. CTA will continue to work with the community to complete this important project.

RED AHEAD

Avanzando a un rojo mejor

Red Line Extension

El **Proyecto de expansión de la línea roja (RLE)** propuesto es parte del **programa Red Ahead** (Rojo a la vista) de CTA, una iniciativa amplia para mantener, modernizar y expandir la línea de tren más transitada de Chicago.

Alineamiento preferido elegido

Chicago Transit Authority (CTA) propone expandir la Línea Roja desde la terminal existente desde 95th/ Dan Ryan hasta 130th Street, sujeto a la disponibilidad de fondos. La expansión propuesta de 5.3 millas incluiría cuatro estaciones nuevas cerca de 103rd Street, 111th Street, Michigan Avenue y 130th Street. Cada estación nueva incluiría instalaciones para autobuses y estacionamiento.

Basándose en los comentarios del público, análisis técnico y coordinación de las agencias, CTA ha elegido una ruta que correría al oeste de los rieles de Union Pacific Railroad (UPRR) desde I-57 sur hasta aproximadamente 108th Place, luego cruzaría los rieles de UPRR y correría al este de los rieles hasta cruzar los rieles de Metra Electric cerca de 119th Street, y continuaría en dirección sur hacia 130th Street.

Cómo se compara el alineamiento preferido

El alineamiento preferido es una combinación de las opciones este y oeste de UPRR presentadas anteriormente. Capturaría los beneficios y minimizaría los impactos de cualquiera de las opciones. Además, incorpora los comentarios recibidos sobre el borrador de la Declaración de Impacto Ambiental.

Beneficios/ impactos del proyecto	Opción este	Opción oeste	Alineamiento preferido
Minimiza parcelas afectadas	☒	☑	☑
Minimiza residencias afectadas	☒	☑	☑
Minimiza negocios afectados	☑	☒	☑
Evita impacto sobre la estación histórica: Roseland Pumping Station	☒	☑	☑
Maximiza las oportunidades de desarrollo económico	☑	☒	☑

RED AHEAD

Avanzando a un rojo mejor

Red Line Extension

DIFUSIÓN AL PÚBLICO 2016
LO ESCUCHAMOS!

CTA recibió 284 comentarios durante el periodo de comentarios. Muchos comentarios expresaron preocupación sobre los desplazamientos de las propiedades y los posibles impactos de ruido y vibración. El alineamiento preferido tendría ***menos impacto*** que con las opciones este u oeste.

Impacto de desplazamientos de propiedades

El alineamiento preferido afectaría ***menos residencias*** que con la opción este, y ***menos negocios y empleos*** que con la opción oeste.

Impacto del ruido y vibración

CTA construiría una barrera de ruido de aproximadamente 4 pies de altura a lo largo de los rieles e implementaría otras estrategias de mitigación para ***resolver todos los posibles impactos de ruido graves y moderados*** debido al proyecto. Basándose en el análisis, el proyecto ***no tendría impacto de vibración.***

Próximos pasos y plazos

Ahora que CTA ha elegido un alineamiento preferido, se preparará una declaración de impacto ambiental final y se llevarán a cabo estudios preliminares de ingeniería. El 27 de noviembre de 2016, el alcalde Emanuel y CTA anunciaron la aprobación de fondos por la cantidad de $75 millones durante los próximos 5 años para el proyecto de RLE, los cuales permitirán que se completen los próximos pasos.

CTA solicitará a la Federal Transit Administration (FTA) el ingreso a la fase de desarrollo del proyecto para obtener fondos federales para la construcción del proyecto conforme al programa federal competitivo “New Starts”. El desarrollo del proyecto y la obtención de todos los fondos para el proyecto de RLE conforme a este programa es un proceso de varias etapas que tomará varios años. CTA continuará trabajando con la comunidad para completar este proyecto importante.

Red Line Extension Project

When and Where?

Tuesday, February 13, 2018 – 6:00 - 8:00 p.m.

Gwendolyn Brooks College Preparatory Academy
Main Gym (West Side of Building)
250 E. 111th Street, Chicago, IL 60628

**Please enter through Door 8. Parking available in rear of the building. Parking lot entrance via King Drive.*

This location served by CTA Bus #111, 4, 34, 111A, 115, and 119; and Metra Electric 111th Street (Pullman) Station.

This facility is accessible to people with disabilities.

At the open house, you will learn more about the Preferred Alignment and anticipated project benefits and impacts. You will also have the opportunity to provide feedback.

CTA has developed additional details for the proposed RLE route

CTA is proposing to extend the Red Line from the existing terminal at 95th/Dan Ryan to 130th Street, subject to the availability of funding. This project is one part of CTA's Red Ahead Program, a comprehensive initiative for maintaining, modernizing, and expanding Chicago's most-traveled rail line.

Based on public feedback, technical analysis, and agency coordination, CTA has selected a Preferred Alignment that would run along the west side of the Union Pacific Railroad (UPRR) tracks from I-57 south to approximately 108th Place, then would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. The Preferred Alignment is a combination of the previously presented UPRR East and West Options. It would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement.

CTA welcomes your comments and feedback about the Preferred Alignment and potential impacts.

Do you require assistance?

If you require an interpreter, including sign language services, or other accommodations at this open house, contact **Gerald Nichols, CTA Vice President, Community Relations,** at least 5 days before the open house at **(312) 681-3700** or GNichols@transitchicago.com.

She the People: Girlfriends' Guide to Sisters Doing it for Themselves

“She the People” ensemble members Alexis J. Roston and Kimberly Michelle Vaughn.

By Rick and Brenda McCain
Let's Play

Brenda and Rick McCain

“She The People: Girlfriends' Guide to Sisters Doing it for Themselves” is directed by Carly Heffernan and is written by Carisa Barreca, Marla Caceres, Carly Heffernan, Tien Tran and Lauren Walker. This power team has led the way of women taking the lead by shedding some light on an invasion of women taking center stage and reclaiming comedy through liberty and the pursuit of hilariousness.

The women of The Second City are taking us back to move us forward in time with considerable laughter while roasting the patriarchy (the government) who has tried to keep women living in their place in society in “The Middle Ages!”

“I Am Woman Hear Me Roar” is the mission of this all woman play, with its serious topics from the smorgasbord of some funny issues that women are dealing with today.

This form of entertainment is relevant now more than ever because it reflects upon real situations with relatable characters. “She The People” allows the audience to connect to great storytelling while delivering political and social messages through comedy.

Women can share their perspective on a largescale of issues from reproductive rights to under-representation in most major industries to everyday attack on small issues; from unrealistic beauty expectations and outdated ideals on femininity to mansplaining in the media.

To witness this up close and to be able to see these very intuitive encounters come to life on the stage and find humor in them is ingenious, liberating, encouraging and necessary for all women.

This two-act sketch gives a great mix of smart, silly and straight up sexy comedy with six very talented actresses. “Girlfriends' Guide to Sisters Doing it for Themselves” will have you literally laughing out loud as they tackle women's concerns with wit and unstoppable humor. The all woman cast in this side-splitting show takes us on a journey of how far we have progressed over the years as we have come to a standstill unleashing the power of merriment.

“She The People” is delightfully amusing and facetiously witty from women shown in television commercials advertising everything from deodorant to medicine to fibromyalgia. Let's hear it for American women trying to balance family, career and cocktails amid today's politically-challenged climate.

Let's Play recommends this play because sometimes girls just want to have fun. So, grab your mothers, sisters, friends, aunts, nieces, cousins and co-workers to come out and celebrate freedom to laugh out loud where it's safe to take off your pants! And yes men, you are allowed to join in on the fun.

The cast includes:

Carisa Barreca
Alex Bellisle
Katie Caussin
Maria Randazzo
Aexis J. Roston
Kimberly Michelle Vaughn

Red Line Extension

You are invited to a Public Hearing on the

Red Line Extension Project

CTA is proposing to extend the Red Line 5.3 miles from 95th Street to 130th Street.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment, which would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options. It would capture the benefits and minimize the impact of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement.

When and Where?
Tuesday, February 13, 2018 – 6:00 - 8:00 p.m.

Gwendolyn Brooks College Preparatory Academy
Main Gym (West Side of Building)
250 E. 111th Street, Chicago, IL 60628

Please enter through Door 8. Parking available in rear of the building. Parking lot entrance via King Drive.

This location is served by CTA Bus #111, 4, 34, 111A, 115, and 119; and Metra Electric 111th Street(Pullman) Station.

Facility accessible to people with disabilities.

This meeting will be conducted in an open house format.

Br. Rice senior forward Susmarski, a team captain, works his way around a St. Ignatius defender in the first game of the Kennedy Cup series. The Crusaders did not score against St. Ignatius goalie Charles Doherty during two games. Br. Rice looks to be a threat in the Chicago Catholic League again next year. (Review photo)

Young Crusaders look to state

by Tim O'Brien

With the team struggling in mid-December and landing near the bottom of the Chicago Catholic League (CCL) hockey standings, a berth in the Kennedy Cup playoffs was no sure thing.

However, the Crusaders closed strong, catching fire at the right time to earn a playoff berth.

The eight-seed against top-seeded St. Ignatius, Br. Rice pushed the Wolfpack in both games but were ultimately swept, falling 1-0 on Jan. 25 and 4-0 on Jan. 27 at Southwest Ice Arena in the best-of-three series.

"We started the season off really rough where we couldn't win a game, but near the end of the season we got in a groove and really took off," said Br. Rice junior Billy Jeffers. "It was a cool push to the playoffs. We played well against Ignatius, but our offense couldn't generate many opportunities."

Br. Rice, a 21-seed, will square off against 12-seed York in the upcoming state playoffs with a date and time to be announced.

With the Crusaders struggling to knock in a goal in the St. Ignatius series, senior goalkeeper Josh Moro did his best to keep the team afloat.

He finished with 53 saves over two games and limited the Wolfpack to 2 goals through the third period of game two. St. Ignatius finally broke through, piling up 3 goals in 6 minutes late in the third.

Moro said positives will come despite the series sweep.

"As a defense, it was a strong series. We kept the slot cleared," Moro said. "That's what we need to build off of for state. It's definitely frustrating. We thought we could go further and beat Ignatius, but we've got a lot of positives going in."

Moro has been the defensive backbone for a young Crusaders squad that this year typically plays four freshmen and waves of underclassmen overall.

"Josh has always been the pillar for the team, and he came up so big for us at the end of the season," said Br. Rice Coach Paul Manning. "We just couldn't bury the puck. We ended up losing to a better team; that's it."

Fighting its way into the Kennedy Cup playoffs, Br. Rice posted some key wins late, including a 1-0 shutout over St. Rita and a playoff-clinching 1-0 win over Benet on the last day of the regular season.

Even when things looked bleak, Moro knew the effort would be there.

"This team has so much heart," Moro said. "Winning 1-0 and dominating or losing 1-0, they're going all out every second. That's what I love about the team."

With so many young players expected back, Jeffers, a Beverly resident and St. Barnabas graduate, knows the Crusaders will be a threat in the CCL next year.

"I think we can be a really good hockey team next year," Jeffers said. "We've got to work hard in the offseason and get prepared."

Br. Rice junior defender Billy Jeffers, a Beverly resident and St. Barnabas graduate, takes a shot in game one against St. Ignatius. Jeffers and senior goalkeeper Josh Moro led a defense that slowed down the Wolfpack offense that scored 10 goals in two games against the Crusaders in the regular season. (Review photo)

RIDGE BEVERLY
BASEBALL & GIRLS SOFTBALL
2018 REGISTRATION

When: Now through February 28

Where: Online at www.ridgebeverlylittleleague.com

For: Boys ages 4-13

Consider alternatives to opioids to manage pain after surgery

(BPT) - If you're having surgery, you can expect to be sore and uncomfortable for a few days, whether you're recovering at home or in the hospital. But it's best to limit opioids or avoid them altogether, opting for alternatives to manage pain and discomfort, recommends the American Society of Anesthesiologists (ASA).

Unfortunately, many patients leave the hospital following surgery with a prescription for 30 or more highly addictive opioid pills (e.g., Vicodin, hydrocodone and oxycodone), and about 6 percent are still using them three months or longer after the procedure.

"Nobody needs a prescription for 30 or 50 opioids, and even those who are in major pain should only take them for a day or two," said ASA President James D. Grant, M.D., M.B.A., FASA. "There are effective alternatives. Many people don't need opioids at all or at least should drastically reduce the amount they take."

Addiction can start after taking only a few opioids. More than 2 million Americans abuse these medications, which can create a feeling of euphoria and make the body believe the drug is necessary for survival. Since 2000, opioid overdose deaths in the U.S. have increased 200 percent.

Don't take that chance. During Physician Anesthesiologists Week (Jan. 28 to Feb. 3), ASA offers advice for coping with pain and discomfort as you recover from surgery.

* Ask about alternatives - Only take opioids when you are in extreme pain. Medications such as ibuprofen (Motrin), naproxen (Aleve) and acetaminophen (Tylenol) can help with pain and soreness. While it's never a good idea to rely on any type of pain pills for too long, these medications are not addictive and are far less risky than opioids.

* Manage your expectations - Everyone feels pain differently, but soreness and discomfort after surgery are normal and will improve within a day or two. These sensations are less severe than pain, which is usually sharp or intense. You usually don't treat muscle soreness after a hard workout with an opioid, so if you are sore, and not in severe pain, try ibuprofen or naproxen.

* Be an active participant in your own care - While you are in recovery, the nurse will ask you if you are in pain and if so, how much. Be descriptive in explaining how you feel. If you are in major pain, ask that the opioid prescription be written for a small amount, and only take them for a day or two, three at most. Unused pills can fall into the wrong hands. In fact, more than half of people who misuse prescription painkillers get them from a friend or relative. Your pain will improve significantly within a few days whether or not you take opioids.

* Be aware of other downsides to opioids - Opioids cause severe constipation and often don't manage pain as well as people expect. Additionally, they can cause hyperalgesia, or an increased sensitivity to pain.

"The opioid crisis is huge and affects everyone, rich and poor, male and female. It's got to stop, and reducing opioid use during recovery after surgery is a big part of the solution," said Dr. Grant. "Those who are in continued severe pain after surgery should ask a physician anesthesiologist or other pain specialist about alternative strategies to manage pain, including exercise, nerve blocks and non-opioid medications."

ASA is committed to ending opioid abuse and has launched several initiatives to combat the epidemic. For more information, review ASA's National Pain Strategy.

* Be an active participant in your own care - While you are in recovery, the nurse will ask you if you are in pain and if so, how much. Be descriptive in explaining how you feel. If you are in major pain, ask that the opioid prescription be written for a small amount, and only take them for a day or two, three at most. Unused pills can fall into the wrong hands. In fact, more than half of people who misuse prescription painkillers get them from a friend or relative. Your pain will improve significantly within a few days whether or not you take opioids.

* Be aware of other downsides to opioids - Opioids cause severe constipation and often don't manage pain as well as people expect. Additionally, they can cause hyperalgesia, or an increased sensitivity to pain.

"The opioid crisis is huge and affects everyone, rich and poor, male and female. It's got to stop, and reducing opioid use during recovery after surgery is a big part of the solution," said Dr. Grant. "Those who are in continued severe pain after surgery should ask a physician anesthesiologist or other pain specialist about alternative strategies to manage pain, including exercise, nerve blocks and non-opioid medications."

ASA is committed to ending opioid abuse and has launched several initiatives to combat the epidemic. For more information, review ASA's National Pain Strategy.

To learn more about the critical role physician anesthesiologists play before, during and after surgery, visit asahq.org/WhenSecondsCount.

Red Line Extension

You are invited to an Open House on the

Red Line Extension Project

CTA is proposing to extend the Red Line 5.3 miles from 95th Street to 130th Street.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment, which would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options. It would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement.

Red Line Extension

Está invitado a una audiencia pública sobre el

Proyecto de expansión de la Línea Roja

CTA propone expandir la Línea Roja 5.3 millas desde 95th Street hasta 130th Street.

Basándose en las opiniones del público, planificación de proyecto y trabajo de ingeniería adicional realizado en el pasado año, CTA ha elegido un alineamiento preferido, el cual correría al oeste de los rieles de Union Pacific Railroad desde I-57 sur hasta aproximadamente 108th Place, luego cruzaría los rieles de Union Pacific Railroad y correría al este de los rieles hasta cruzar los rieles de Metra Electric cerca de 119th Street y continuaría en dirección sur hacia 130th Street.

El alineamiento preferido es una combinación de las opciones este y oeste de UPRR presentadas anteriormente. Capturaría los beneficios y minimizaría los impactos de cualquiera de las opciones. Además, incorpora los comentarios recibidos sobre el borrador de la Declaración de Impacto Ambiental (DIA).

Fecha y lugar?
Martes 13 de febrero de 2018
6:00 - 8:00 p.m.

Gimnasio principal de Gwendolyn Brooks College Preparatory Academy (al lado oeste del edificio)

250 E. 111th St, Chicago, IL 60628

Por favor entre por la puerta 8. Hay estacionamiento disponible detrás del edificio. La entrada del lote de estacionamiento se encuentra en King Drive.

Esta ubicación es dispone del servicio de autobuses de CTA #111, 4, 34, 111A, 115 y 119; y la estación 111th Street (Pullman) de Metra Electric.

Las instalaciones son accesibles a las personas con discapacidades.

La reunión se llevará a cabo en un formato abierto al público.

AUTOR DE MR. MERCEDES Y QUIEN PIERDE PAGA
STEPHEN
KING
FIN DE
GUARDIA
PLAZA JANÉS

'Fin de guardia'
(Plaza Janés)

Es el último volumen de la trilogía basada en la historia del detective Bill Hodges, que dio inicio con la novela 'Mr. Mercedes' en 2014

Fin de guardia

Por Stephen King

La hora más oscura es la que precede al alba.

A Rob Martin le vino esta máxima a la cabeza al volante de la ambulancia, mientras avanzaba lentamente por Upper Marlborough Street camino de la base, el Cuartel de Bomberos número 3.

Se dijo que quienquiera que la formulara desde luego había dado en el clavo, porque estaba más oscuro que el culo de una marmota y no faltaba mucho para que amaneciera.

Aunque el día, cuando por fin despuntase, no iba a ser gran cosa; amanecería con resaca, por así decirlo. Se había levantado una niebla densa, cargada con el olor del cercano Gran Lago, en realidad no tan grande.

Y para hacerlo todavía más divertido caía una llovizna tenue y fría. Rob cambió el limpiaparabrisas de intermitente a lento. No mucho más adelante surgieron de la negrura dos arcos amarillos inconfundibles.

—¡Las tetas doradas de América! —exclamó Jason Rapsis en el asiento del copiloto. Rob había trabajado con muchos sanitarios durante los quince años que llevaba en Urgencias, y Jace Rapsis era el mejor: de trato fácil cuando no pasaba nada, inalterable y concienzudo cuando ocurría todo al mismo tiempo—. ¡Nos darán de comer! ¡Alabado sea el capitalismo! ¡Para, para!

—¿Seguro? —preguntó Rob—. ¿Después de la demostración práctica de lo que puede hacerte esa mierda que acabamos de ver?

Volvían de un servicio en una de las McMansiones de Sugar Heights, donde un tal Harvey Galen había telefoneado a Urgencias quejándose de unos dolores atroces en el pecho. Lo encontraron tumbado en el sofá de lo que los ricos sin duda llamaban «el gran salón», como una ballena varada con pijama de seda azul. Su mujer daba vueltas en torno a él, convencida de que estiraría la pata de un momento a otro.

—¡McDonald's, McDonald's! —entonó Jason brincando en su asiento. El profesional serio y competente que acababa de tomar las constantes vitales al señor Galen (mientras Rob, justo a su lado, sostenía el maletín de primeros auxilios con el equipo para las maniobras de respiración y los fármacos para el corazón) había desaparecido. Con el flequillo rubio delante de los ojos, Jason parecía un crío de catorce años demasiado grande para su edad—. ¡Te digo que pares!

Rob paró. A él tampoco le vendría mal plantarse ante un McMuffin de salchicha, acompañado quizá de una de aquellas cosas de patata y cebolla que parecían lenguas de búfalo al horno.

Había varios coches en el carril de la ventanilla de autoservicio. Rob se situó al final de la cola.

National A. Philip Randolph Pullman Porter Museum announces

Gentle Warrior Awards Gala Recipients

Outstanding local women in business, technology, education and labor, an iHeart Radio executive, and a longtime elected state official are among the honorees to be recognized at the National A. Philip Randolph Pullman Porter Museum Gentle Warrior Awards gala on Feb. 24 from 5 to 9 p.m. in the Parkway Ballroom, 4455 S. King Drive.

Educator Beulah McLloyd, principal of Walter H. Dyett School for the Arts, and Illinois State Rep. LaShawn K. Ford will receive the Gentle Warrior Award, along with nationally recognized figures including U.S. Rep. Maxine Waters (D-California; to be accepted by her designee) and actor-producer-director Robert Townsend ("Hollywood Shuffle").

Jaquie Algee, vice president and director of external relations for SEIU Healthcare and one of the organizers of the Women's March on Chicago, is joined by Derrick Brown, director of urban programming for iHeart Radio, as this year's Change Agent Award recipients.

And JinJa Birkenbeuel, CEO of Birk Creative and a Google technology coach, will be the inaugural recipient of the Descendants of Distinction Award, created to honor descendants of the Pullman Porters, the group of distinguished railroad workers who formed the first Black labor union in the U.S., chartered under the American Federation of Labor. Birkenbeuel joins a long list of renowned descendants that include former first lady Michelle Obama, actress Taraji P. Henson ("Hidden Figures," "Empire"), actor Andre Braugher and Tom Joyner, host of the Tom Joyner Morning Show.

Beulah McLloyd

JinJa Birkenbeuel

Jaquie Algee

Derrick Brown

"The Pullman porters introduced class, culture and education to the African American community and framed it in a way that made it important to us as a people," said Dr. Lyn Hughes, museum founder. "They planted seeds in our ancestry that made us want to do more, be more, strive for more. They were education stalwarts who gained middle class status in the service/-hospitality sector with dignity and conviction."

A. Philip Randolph founded the Brotherhood of Sleeping Car Porters. He was one of America's foremost labor and civil rights leaders, who became known as the "Gentle Warrior."

In 2000, in his honor, the NAPRPP museum created the Gentle Warrior Awards Gala to recognize individuals who exhibit a similar commitment, focus and tenacity that Randolph displayed.

For ticket information visit Eventbrite or go to https://aprpullmanportermuseum.org/special-events/. Entertainment to be provided by R&B, house music duo The Pullman Porters.

Rod Doss honored with NNPA Publisher Lifetime Achievement Award

By Stacy M. Brown (NNPA Newswire Contributor)

For 50 years, Rod Doss has remained dedicated to the **New Pittsburgh Courier** and his success has been among the more celebrated of Black Press publishers.

Doss received the National Newspaper Publishers Association's 2018 NNPA Publisher Lifetime Achievement Award at a ceremony in Las Vegas last week.

(Left-right) Dorothy Leavell, the chairman of the NNPA; Rod Doss, the publisher of the New Pittsburgh Courier; Marilyn Harvey, Rod Doss' sister; Dr. Benjamin F. Chavis, Jr., the president and CEO of the NNPA; and Hiram Jackson, the CEO of Real Times Media, celebrate Doss' career achievements, during the 2018 NNPA Mid-Winter Conference in Las Vegas, Nevada. (Freddie Allen/AMG/NNPA)

"There is no greater honor than to be recognized by your peers," said Doss.

NNPA Chairman Dorothy Leavell, NNPA President and CEO Dr. Benjamin F. Chavis Jr., and Real Times Media CEO Hiram Jackson were on hand to present Doss the award.

Doss was joined on the podium at the ceremony by his sister, Marilyn Harvey, who he called his biggest booster and biggest fan.

"His integrity as a journalist is impeccable," said Leavell. "He's contributed a lot and he's really deserving of this honor. [Rod Doss] put the 'I' in the word 'integrity.'"

Chavis said that Doss not only continues to manifest a distinguished career as a publisher of a Black-owned newspaper in America, but also that his work ethic embodies the high standards of journalism; Chavis added that Doss is committed to freedom, justice and equality for all humanity.

Robert W. Bogle, the chairman, president and CEO of **The Philadelphia Tribune,** agreed.

"He worked his way up and made a real difference," Bogle said. "He's provided leadership to the **New Pittsburgh Courier** that's led to the success of the newspaper."

Doss joined the **Courier** in 1967 as

Red Line Extension Project

Connecting the 95th/Dan Ryan Terminal to 130th Street

The Chicago Transit Authority (CTA) is proposing to extend the Red Line from the existing terminal at 95th/Dan Ryan to 130th Street, subject to the availability of funding. The proposed 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. This project is one part of the Red Ahead Program to extend and enhance the entire Red Line .

View the project map.

Project benefits

- Reduces commute times for residents both within and south of the project area.
- Improves mobility and accessibility for transit-dependent residents in the project area.
- Improves rapid transit rail service to isolated areas and provide viable linkages between affordable housing, jobs, services, and educational opportunities, thereby enhancing livability and neighborhood vitality.
- Provides an opportunity for potential connections and linkages to other public transportation modes including regional commuter rail in the project area.
- Fosters economic development in the project area, where new stations may serve as catalysts for neighborhood revitalization and help reverse decades of disinvestment in local business districts.
- Provides a modern, efficient rail car storage yard and shop facility to provide storage and cost-effective preventive maintenance for rail cars associated with the Red Line Extension (RLE) Project, rail cars currently stored in the existing 98th Street Yard and Shop, and rail cars supporting additional Red Line expansion of service.

What’s New?

CTA Selects a Preferred Alignment for Red Line Extension

In fall 2016, CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing on Tuesday, November 1, 2016 at St. John Missionary Baptist Church to obtain comments on the benefits and impacts of two options that were under consideration for the Red Line Extension (RLE) Project alignment—the East Option and the West Option. Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options and would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. See the project map.

This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option. See full press release.

Public Open House Scheduled for the Red Line Extension Preferred Alignment

CTA hosted a public open house on Tuesday, February 13, 2018 at Gwendolyn Brooks College Preparatory Academy to provide information on the Preferred Alignment for the RLE Project. The meeting location was ADA compliant and accessible by public transit.

This meeting was conducted in an open house format. CTA welcomed comments and feedback about the Preferred Alignment and potential impacts.

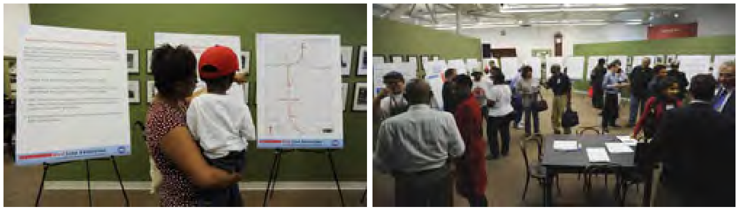
that includes four new rail stations on Chicago’s Far South Side. (See the full press release)

Draft EIS

CTA and the Federal Transit Administration (FTA) prepared a Draft EIS based on the technical analysis of impacts of the alternatives. The Draft EIS documents the benefits and impacts of the alternatives under consideration, which includes impacts to parks and wetlands.

The Draft EIS is available here.

Draft EIS public hearing and comments



CTA hosted a public hearing on Tuesday, November 1, 2016 at St. John Missionary Baptist Church to provide information about the Draft EIS and solicit comments from the public. The meeting location was ADA compliant and accessible by public transit.

This meeting was conducted in an open house format. The public was invited to provide comments on the Draft EIS either verbally to a court reporter or in writing during the public hearing.

Comments on the Draft EIS were accepted from October 6 to November 30, 2016, and CTA thanks everyone who submitted a comment. The Federal Transit Administration (FTA) and CTA will review the comments received during the public comment period and will address all comments in the Final EIS.

Draft Environmental Impact Statement (EIS)

Overview

The National Environmental Policy Act (NEPA) requires evaluation of potential environmental impacts associated with federal projects and actions. In accordance with the NEPA process, the Chicago Transit Authority (CTA) and the Federal Transit Administration (FTA) published a Draft Environmental Impact Statement (EIS) in 2016 that evaluated the environmental impacts of constructing and operating the proposed project. Two Union Pacific Railroad (UPRR) Alternative options were evaluated as part of the Draft EIS. Based on public feedback on the Draft EIS as well as additional project planning and engineering work conducted, CTA has selected a Preferred Alignment. Now that CTA has selected the Preferred Alignment, a Final EIS will be prepared and preliminary engineering will be conducted.

Draft Environmental Impact Statement

The Draft EIS was available for public review and comment from October 6 to November 30, 2016. The Draft EIS includes an evaluation of the No Build Alternative and the two UPRR Alternative options: the East Option and the West Option. The Draft EIS describes the alternatives, the existing environmental setting, the potential impacts from construction and operation of the alternatives, and proposed mitigation measures to reduce or eliminate potential impacts.

The purpose of the EIS is to study, in a public setting, the effects of the proposed project and its alternatives on the quality of the physical, human and natural environment. The evaluation provides details on the extent to which the proposed project affects these areas. Measures to avoid, minimize, and mitigate potential adverse impacts are also identified.

- The Preferred Alignment and Proposed Service
- The NEPA Process
- The Draft EIS: Benefits and Impacts of the RLE Project
- Next Steps

Alternatives

Q: Which alignment option did CTA select?
A: Based on additional project planning and engineering work conducted over the last year, CTA selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options and would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. See the project map.

The Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

Q: Is CTA still considering alternatives for rail service along Halsted Avenue or other Bus Rapid Transit improvements?
A: No. These alternatives were considered early in the environmental review process as potential alternatives. These alternatives have been eliminated based on additional technical analysis and public input received. In August 2014, CTA announced that the Union Pacific Railroad (UPRR) Alternative is the NEPA Preferred Alternative. CTA prepared a Draft Environmental Impact Statement (EIS), which analyzed the benefits and impacts of locating the line either to the east or west of the UPRR tracks. Based on public input and further planning and engineering conducted, a UPRR Preferred Alignment has now been selected. The Preferred Alignment is a combination of the previously presented East and West Options. See the project map.

Q: Previously, CTA was considering using the existing Union Pacific Railroad (UPRR) right-of-way to construct RLE. Is that still under

consideration?
A: No. CTA had previously considered an option that would have used the existing UPRR right-of-way for the elevated CTA track structure. This option was added in 2012 in response to the Chicago Department of Transportation feasibility study looking at moving UPRR freight operations out of the existing UPRR corridor before the RLE Project. The Right-of-Way Option would only be feasible if the separate project were implemented before implementation of the RLE Project. Coordination between local agencies and the railroads indicted that relocation of UPRR freight operations from this corridor presents considerable challenges; therefore, this option is no longer feasible. Estimated travel times and ridership were the same for the Right-of-Way Option as for the East and West Options.

Q: For the Preferred Alignment near the Union Pacific Railroad (UPRR) tracks, has CTA talked with Union Pacific Railroad representatives?
A: CTA has had preliminary conversations with UPRR and will continue to coordinate with the railroad as the project moves forward. UPRR requires that the CTA tracks be located at least 50 feet from the existing freight tracks because of safety considerations.

The Preferred Alignment and Proposed Service

Q: When would the extended Red Line be open for use?
A: Depending on funding availability and federal approvals, the earliest that the Red Line Extension is expected to begin construction would be in 2022 and service is anticipated to start in 2026.

Q: What are the proposed operating hours for the Red Line Extension?
A: The operating hours for the proposed extension are anticipated to be the same as for the current Red Line, which operates 24 hours every day of the year.

Q: What portion of the extension would be elevated?
A: The Red Line Extension would operate on an elevated structure from approximately 95th Street to 118th Street, where it would transition to an at-grade profile and then continue at grade before terminating near 130th Street. The 103rd Street, 111th Street, and Michigan Avenue stations would be elevated, and the 130th Street station would be at-grade.

Q: Will there be places to park near the new stations?
A: Yes, to accommodate passengers arriving at the Red Line Extension by car, park & ride facilities would be constructed near each station. A total of 3,700 parking spaces would be available along the corridor.

Q: Why is so much parking needed near the new stations?
A: CTA estimated parking demand based on travel demand modeling performed in 2009. CTA will conduct additional analysis and review of parking needs near stations and as part of next phases of project development and engineering.

Q: Would this extension connect to existing Metra Electric or South Shore services?
A: There is potential for connection of the proposed Red Line Extension to the Northern Indiana Commuter Transportation District (NICTD) South Shore Commuter Rail Line near 130th Street, where the two lines would be adjacent to each other. Currently, the NICTD South Shore commuter service does not have a 130th Street station and at this time future plans do not include a 130th Street station. This potential connection will be explored in further detail during the engineering phase. A connection between the Red Line Extension and Metra Electric District at Kensington/115th Street station is not possible because the proposed Red Line Extension routing crosses the Metra Electric District Line approximately ½ mile south of the Kensington/115th Street station.

Q: Is CTA coordinating with Metra on the Red Line Extension Project?
A: Yes, CTA is coordinating with Metra on our progress with the Red Line Extension Project. Metra is a participating agency in the environmental review process for the Red Line Extension Project.

The NEPA Process

Q: What is NEPA?
A: The National Environmental Policy Act of 1969 (NEPA) is a federal law that mandates the consideration of environmental impacts that may have significant impacts on the environment before a project is approved to receive federal funding. The NEPA process provides a decision-making framework to

consider the purpose and need for a proposed action, potential design solutions, project costs, and relative benefits of a proposed project.

Q: What is a Draft Environmental Impact Statement, or Draft EIS?
A: A Draft Environmental Impact Statement, or Draft EIS, summarizes potential impacts to the natural environment and community. The Draft EIS describes the potential environmental benefits and impacts of a proposed project, and identifies measures to avoid, minimize, and mitigate adverse impacts. A copy of the Draft EIS is available here.

Typically, environmental reviews for proposed transit projects address the following resource areas:

- Transportation
- Land use and economic development
- Displacement and relocation of existing uses
- Neighborhoods and communities
- Visual and aesthetic
- Noise and vibration
- Safety and security
- Historic and cultural resources
- Hazardous materials
- Air quality
- Wetlands
- Water quality
- Floodplains
- Vegetation and wildlife habitat
- Threatened and endangered species
- Geology and soils
- Energy
- Environmental Justice

The Draft EIS: Benefits and Impacts of the RLE Project

Q: Would CTA need to purchase private property because of the location of the proposed extension?
A: Yes, CTA would need to purchase private property to construct the Red Line Extension. For more information and additional FAQs related to displacements, please see the Potential Displacements page.

Q: How would the proposed extension affect noise and vibration in the community?
A: Section 4.5 of the Draft Environmental Impact Statement (EIS) evaluates the potential for noise impacts to the surrounding community. The analysis shows that all potential severe and moderate noise impacts due to the project would be mitigated by including welded rail, closed deck structures, and noise barriers as part of the final design of the project. Based on the analysis, the project would result in no impacts from vibration. The Preferred Alignment would have similar noise and vibration impacts and mitigations to those for the Union Pacific Railroad (UPRR) East or West Options discussed in the Draft EIS.

Q: What are the potential economic benefits or impacts of the proposed extension?
A: Section 4.1 of the Draft Environmental Impact Statement (EIS) evaluates the economic benefits and potential impacts of the proposed extension. As part of the public review of the Draft EIS, the public had the opportunity to review and comment on the analysis. The proposed project could spur economic revitalization and the development of more livable, transit-supportive communities near the proposed stations. The Chicago Metropolitan Agency for Planning states that the RLE Project would increase access to jobs; access to jobs within 1 hour of the proposed 111th Street station would increase by 56 percent. Additional jobs would be created with investment in the Red Line Extension Project.

Q: How would the proposed Red Line Extension affect current CTA services, both during construction of the new service and during operation of the new service?
A: Once the proposed extension is complete, existing bus routes may be changed to complement the new high-capacity transit service. Depending on the specific route of the service, the number of routes feeding into the 95th

Street Terminal may be reduced, which would also reduce congestion in and around this facility. More detailed construction schedules will be developed as additional engineering is completed for the project, after the environmental review. CTA's general guidelines minimize the effects of construction on existing transit services; however, bus reroutes are possible.

Q: How does work on the other Red Ahead projects affect progress on the Red Line Extension?
A: The Red Line Extension Project is one part of the Red Ahead Program to extend and enhance the entire Red Line. The Red Ahead Program consists of separate projects with their own separate sources of potential funding and timelines. These projects are mutually beneficial and are combined into the Red Ahead Program such that they are coordinated efficiently.

Q: CTA is renovating the 95th Street Terminal. Would the Red Line Extension be possible after the 95th Street Terminal improvements are complete?
A: Yes, the 95th Street Terminal improvements and the Red Line Extension Project would function together seamlessly to provide improved transit service throughout Chicago's Far South Side. More information about the 95th Street Terminal Improvement Project is available here.

Next Steps

Q: What are the next steps for the project now that the Draft EIS has been published?
A: The next steps are completing additional engineering and analyses required and preparing the Final EIS on the Preferred Alignment. The Final EIS will include and address all comments received during the public review period. The Final EIS will document the results of the Draft EIS process, confirm the Preferred Alignment, and include a list of committed final mitigation measures.

Concurrently with preparation of the Final EIS, CTA will also request entry into the FTA New Starts Project Development phase, which is the proposed federal funding source for this project. The FTA New Starts Program is highly competitive federal funding program, and the RLE Project will be evaluated by the federal government for potential selection into the program.

After completion of the Final EIS and FTA New Starts Project Development phase, CTA intends to apply to the Project Engineering phase, which will include design and engineering. Upon receiving a full funding grant agreement from FTA, the project will move into construction, which is expected to last about 5 years.

FTA Project Evaluation and Rating

Q: How would CTA fund the Red Line Extension Project?
A: The Red Line Extension Project would require an estimated $2.3 billion in capital costs. CTA is pursuing a wide range of federal, state, and local funding

sources with the help and support of the community. CTA intends to pursue federal New Starts funds for the RLE Project. Local matching funds would be required to secure federal funding. CTA is considering a number of options at this time. Options include the recent creation of a special transit-only tax-increment financing district, authorized by the General Assembly in June 2016, which could provide a portion of the local funding for the Red Line Extension Project.

Q: What is the federal New Starts program and why does CTA have to go through such a lengthy process?
A: FTA's New Starts Program is a discretionary funding source that helps fund major transit capital investment projects. New Starts funds are available for projects that expand rail service into an area that is not within the current transit footprint, and therefore entail a relatively longer environmental and planning process. CTA must compete with other New Starts projects from across the country that are already in line for funding.

Q: How can I receive updates and stay involved throughout the entire process?
A: Anyone can request to be added to the RLE contact list by sending an email to RedExtension@transitchicago.com. Members of the contact list will receive upcoming meeting notices, as well as future updates about the RLE Project. Updated information about the RLE Project will continue to be available on this project website.

Environmental analysis (2009–2014)

Public outreach has continued to be an integral part of the planning for this project during the environmental review planning phase for this project. As part of the Draft Environmental Impact Statement (EIS), a number of open houses, community newsletters, and a formal scoping process were conducted with the public, stakeholders, and other governmental agencies. Documents related to these activities are provided below. CTA will continue to involve and consult with the community as the project proceeds.

Open House - 2014

CTA conducted outreach in April and May of 2014 to update the public on the status of the project; inform them of proposed alternatives, anticipated project benefits, and impacts; and gather feedback. Outreach included meetings with elected officials, interested community groups, and a public open house. The open house was held May 13, 2014 at the Palmer Park Gymnasium, 201 E. 111th Street in Chicago from 5:30 PM to 7:30 PM.

May 2014 Open House Exhibit Boards
May 2014 Project Summary

Newsletter - 2013

CTA sent a newsletter with a general project update to the approximately 3,200 addresses on the stakeholder database on August 27, 2013.

August 2013 Newsletter

Open House - 2011

CTA held an open house meeting on August 2, 2011 to update the community regarding the RLE Project. The meeting was held at St. John Missionary Baptist Church, 211 E. 115th Street in Chicago from 6:00 PM to 8:30 PM.

August 2011 Open House Exhibit Boards

Scoping and Scoping Meetings - 2009

The process of determining the scope, focus, and content of an EIS is known as “scoping.” Scoping meetings are an opportunity to obtain information from the public and governmental agencies. The scoping process asks agencies and interested parties to provide input on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation, and potential effects and mitigation measures to be considered.

The official public comment period for scoping concluded on October 27, 2009. The comments received are summarized in the Scoping Report. Input received during scoping is used to refine the project purpose and need and alternatives, and to direct the analysis of environmental impacts. Public input is also used to help planners avoid potential impacts, and to identify potential mitigation measures.

Alternatives Analysis (2006–2009)

The purpose of the Alternatives Analysis (AA) Study, which ended in August 2009, was to examine a wide range of potential transportation options. In the AA process, the project's purpose and need were identified, alternatives that meet the purpose and need were developed and evaluated, and comprehensive and ongoing public involvement was initiated. Many different transportation alternatives were identified in the AA process. Based on public comment and an evaluation of those options against criteria that included cost, environmental factors, and feasibility considerations, the number of options was narrowed. There were three screening stages and the results of each screening stage were presented at public meetings. At each stage, there was an opportunity for the public to review and comment on the results. The end result of the AA process was the selection of a Locally Preferred Alternative by the Chicago Transit Board on August 12, 2009.

Screen 1 Analysis

The CTA held public open houses to receive input on preliminary findings from Screen 1 of the Alternatives Analysis Study for the proposed Red Line Extension.

Tuesday, April 10, 2007, 6-8 p.m.
Chicago State University, New Academic Library, 4th Floor Auditorium
9501 S. King Drive, Chicago, IL 60628

Wednesday, April 11, 2007, 6-8 p.m.
West Pullman Branch, Chicago Public Library
830 W. 119th St., Chicago, IL 60628

Presentations delivered at the Screen 1 meetings are available at the links below:

Preferred Alignment

The RLE Project would extend the heavy rail Red Line from the existing 95th Street Terminal to 130th Street. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place, the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

The RLE Project would include the following features:

- 5.3-mile heavy rail transit line extension from 95th Street Terminal to 130th Street
- Four new stations at 103rd Street, 111th Street, Michigan Avenue, and 130th Street
- New park & ride and bus facilities at each station with a total of 3,700 parking spaces along the corridor
- New yard and shop at 120th Street

The following figures are photo simulations of the proposed project:

	East Option 103rd Street Station (facing northeast)
103rd Street Station (facing south)		111th Street Station (facing west)

Alternatives development history

CTA undertook an extensive Alternatives Analysis process from 2006–2009 that considered multiple modes and corridor options for the RLE Project.

Starting with multiple modes and corridor options, CTA developed and screened alternatives through a combination of conceptual engineering, public input (open houses and stakeholder meetings), and preliminary analysis of potential impacts and costs.

The Chicago Transit Board designated the UPRR Alternative as the Locally Preferred Alternative on August 12, 2009.
In preparation for the Draft EIS and based on the outcomes of the Alternatives Analysis, CTA evaluated the following alternatives and options from 2012–2014:

- No Build Alternative
- Bus Rapid Transit Alternative
- Union Pacific Railroad Rail (UPRR) Rail Alternative
  - Right-of-Way Option
  - East Option
  - West Option
- Halsted Rail Alternative

In August 2014, based on the technical analysis and public input until then, CTA announced the NEPA Preferred Alternative—the UPRR Alternative. Because the Right-of-Way Option is not feasible, the Draft EIS evaluated only the East and West Options for the UPRR Alternative. The Draft EIS summarizes the environmental benefits and impacts of the No Build Alternative and the two UPRR Alternative options.

Based on public feedback, technical analysis, and agency coordination, CTA selected a Preferred Alignment in January 2018. The Preferred Alignment is a combination of the previously presented East and West Options, which would capture the benefits and minimizes the impacts of either option and incorporates the feedback received on the Draft EIS.

Potential Property Displacements

Through extensive planning for the Red Line Extension (RLE) Project, CTA has determined that it may be necessary to acquire certain properties to implement the project. Based on additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment and conducted outreach to property owners that would be displaced because of the project.

At this time, CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured. This is expected to be a multiyear process, and it may also be possible to further minimize property impacts with additional future engineering. Property owners and tenants who would be affected by acquisition and relocation will be protected under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (known simply as the “Uniform Act”), along with state regulations. CTA will treat property owners and tenants fairly and will seek cooperative settlements of property acquisitions. In addition, CTA will provide financial assistance and relocation services for property owners as well as commercial and residential occupants who must move because of the RLE Project.

You can read more about your rights as a property owner under applicable federal laws here:

- http://www.fhwa.dot.gov/real_estate/uniform_act/acquisition/real_property.cfm
- http://www.fhwa.dot.gov/real_estate/publications/your_rights/rights2014.pdf

Additional information about potentially displaced properties is available here.

FTA’s brochure on property acquisition and relocation assistance is available here.

Contact CTA’s customer service department by telephone at 1-888-YOUR-CTA (1-888-968-7282), or by e-mail at RedExtension@transitchicago.com if you have questions about potential displacement of your property.

Frequently asked questions about property displacements

Which alignment option did CTA select?

Based on additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options. This Preferred Alignment would capture the benefits and minimize the impacts of either Option and incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

How would I know if my property is affected?

The owners and tenants whose property would be affected by the Preferred Alignment were notified during the CTA door-to-door outreach, which started January 26, 2018. Letters informing owners and tenants of the selected alignment were also mailed out to all properties that were contacted in 2016—both those whose property would be affected by the Preferred Alignment, and those whose property would not be affected. CTA encourages community participation and property owner involvement. CTA will be conducting community meetings with property owners and tenants affected by the Preferred Alignment on Tuesday, February 6 from 5:30-7:30 at Fenger Academy High School (11220 S. Wallace Avenue, Chicago), and on Thursday, February 8 from 5:30-7:30 at Palmer Park (201 E. 111th Street, Chicago). Additionally, a public open house is scheduled for Tuesday, February 13, 2018 from 6-8pm at Gwendolyn Brooks College Preparatory Academy in the Main Gym (250 W. 111th Street, Chicago).

What are my rights as a property owner?

In the event that CTA ultimately determines it is necessary to purchase private property for the RLE Project, CTA would be required to follow the guidelines of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, along with state regulations. CTA will treat property owners fairly and will seek cooperative settlements of property acquisitions.

You can read more about your rights under applicable federal laws here:

http://www.fhwa.dot.gov/real_estate/uniform_act/acquisition/real_property.cfm
http://www.fhwa.dot.gov/real_estate/publications/your_rights/rights2014.pdf

What type of compensation will I receive?

CTA is required by federal law to offer to purchase each property for an amount that is no less than fair market value as determined by an independent appraisal. In some circumstances, if current appraisals are less than the original property purchase price, an owner may be eligible for compensation equal to the original purchase price.
In addition, CTA must provide financial assistance and relocation services, as required by federal regulations for property owners as well as commercial and residential occupants who must move because of the RLE Project.

How will CTA determine the purchase price for my property?

If CTA determines it is necessary to purchase your property for the RLE Project, it is required to hire an independent appraiser to inspect the property to determine fair market value. In that case, you, or a representative that you designate, will be invited to accompany the appraiser when the appraiser inspects your property. You or your representative may provide information about improvements to the property and any special features that may affect the value of the property such that these facts are considered in the appraisal.

What if I don't own this property but rent an apartment, or lease space for my business?

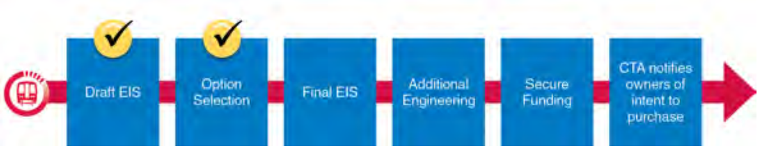
Non-owners who are leasing housing or commercial property that must be relocated because of the RLE Project are also protected by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended. If needed, CTA will provide financial assistance and relocation services to assist these residents and business owners in finding a new housing or business location.

If CTA acquires my property, will you provide me help in relocating?

If you are required to move, a relocation agent will contact you, answer your questions, and provide additional information about relocation assistance advisory services and relocation payments eligibility. The goal of the relocation agent is to facilitate a smooth transition to the replacement housing or business location.

What will happen next with the RLE Project?

On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next five years for the RLE Project. This investment will allow CTA to complete the Final EIS and preliminary engineering over the next few years. CTA plans to apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase to pursue federal funding for construction of this project under the competitive federal "New Starts" program. Project development and securing full funding for the RLE Project under this program is a multiyear, multistep process. Depending on funding availability and federal approvals, the earliest that the RLE Project is expected to begin construction would be in 2022, with service anticipated to start in 2026. Again, CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured.



If I have additional questions about potential property acquisitions, who should I call?

Contact CTA’s customer service department by telephone at 1-888-YOUR-CTA (1-888-968-7282), or by e-mail at RedExtension@transitchicago.com.

How can I learn more about the RLE Project?

You can learn more about the RLE Project and find updates on the status of the process on our webpage: www.transitchicago.com/RedEIS. To join the project contact list and get updates about the RLE Project, public meetings, and the status of environmental reviews, email RedExtension@transitchicago.com.

cta

You are invited to an Open House on the

Red Line Extension Project

CTA is proposing to extend the Red Line 5.3 miles from 95th Street to 130th Street.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment, which would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options. It would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement.

250 E. 111th Street, Chicago, IL 60628

**Please enter through Door 8. Parking available in rear of the building. Parking lot entrance via King Drive.*

This location served by CTA Bus #111, 4, 34, 111A, 115, and 119; and Metra Electric 111th Street (Pullman) Station.

The facility is accessible to people with disabilities.

In November 2016, CTA held a public hearing to obtain comments on the Red Line Extension (RLE) Draft Environmental Impact Statement (EIS), which documents the benefits and impacts of the two options of the project alignment under consideration.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th

Street and continuing south to 130th Street. The proposed 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include bus and parking facilities. The Preferred Alignment is a combination of the previously presented UPRR East and West Options. It would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement.

Click here to learn more about the Preferred Alignment and see a map.

CTA is hosting a public open house to provide information on the Preferred Alignment for the RLE Project. At the open house, you will learn more about the Preferred Alignment and anticipated project benefits and impacts. You will also have the opportunity to provide feedback. CTA determines path for proposed Red Line south extension to 130th Street

An artists' rendering of the proposed 103rd Street Station of the CTA Red Line. (Chicago Transit Authority)

Mary Wisniewski Contact Reporter Chicago Tribune

The CTA has decided on a path for its proposed extension of the Red Line's south branch, bringing the long-discussed project one step closer to getting done.

The proposed route, which will be announced Friday, starts at 95th Street and would run along the west side of the Union Pacific Railroad tracks from I-57 south to about 109th Street. There it would cross the UP tracks and continue along the east side of the tracks until crossing Metra Electric tracks near 119th Street, and then continue south to 130th Street, the CTA said.

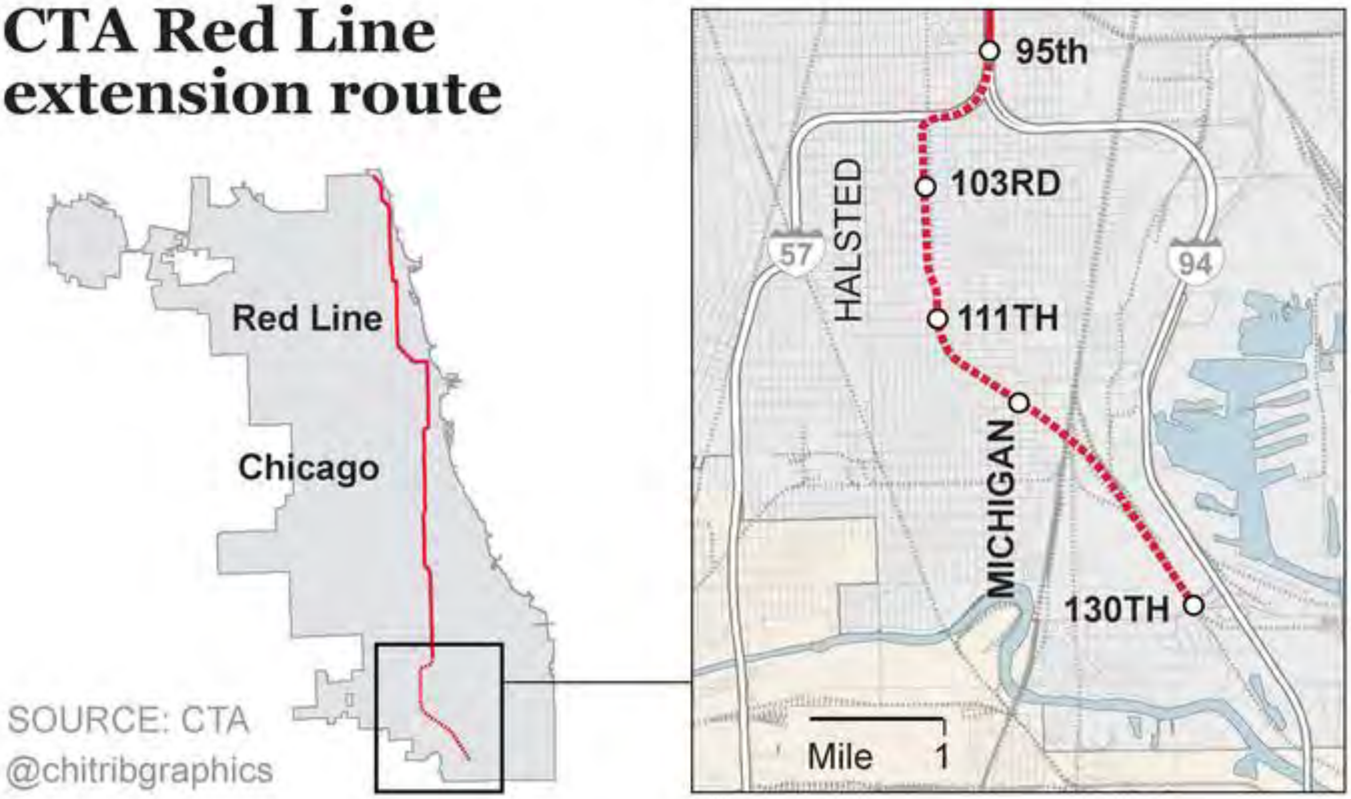
ADVERTISING

The 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue near 115th Street, and 130th Street with parking and bus connections.

The $2.3 billion project, if it gets funding, would fill in what activists have called a "transit desert" on the city's Far South Side as well as south suburban Riverdale. The city has not created an extension of an "L" line since the Orange Line opened in 1993.

The alignment was based on community feedback on both options the agency received in late 2016, CTA officials said. The chosen path limits the number of properties the agency may need to acquire to up to 154 privately owned parcels, with 79 buildings and the rest vacant lots, CTA officials said.

The CTA will hold an open house on Feb. 13 from 6 to 8 p.m. at the Gwendolyn Brooks College Preparatory Academy gymnasium to present the alignment to residents. The agency then must publish a final environmental impact study to include further analysis of the path and some preliminary engineering work.



CTA Red Line extension route

SOURCE: CTA
@chitribgraphics

CTA officials noted that the timing of the project is dependent on funding — the earliest construction would begin is 2022, and the project would take about four years.

The CTA would have to pursue federal and local funds for the project, which are tight, particularly since the Trump administration's stated budget priorities do not favor transit. A state law gave the city the authority to establish tax increment financing districts to fund four transit projects, including the Red Line extension, but no decision has been made to pursue TIF for the project, CTA officials said.

Tribune interviews with residents and business owners around the Union Pacific tracks south of 95th Street found wide support for the project, even if it results in displacement and noisy construction, because the communities need transit. The CTA said the line would save 20 minutes on a trip from 130th Street to the Loop.

Major changes planned for the CTA Red Line would make it a lot easier for thousands of people to get to work.

By Diane Pathieu and Evelyn Holmes

Friday, January 26, 2018

CHICAGO (WLS) --

Major changes planned for the CTA Red Line would make it a lot easier for thousands of people to get to work.

The Red Line is one of the busiest CTA lines, carrying 30 percent of all riders, and now it's expanding.

In a new proposal, the Red Line extension project would extend the Red Line, creating four new stations to the south near 103rd Street, 111th Street, Michigan Avenue, and 130th Street.

The extension's proposed route would start at 95th Street and would run along the west side of the Union Pacific Railroad tracks from I-57 south to about 109th Street. It would then cross up the UP tracks and continue along the east side of the tracks until crossing Metra Electric tracks near 119th Street before continuing south to 130th Street.

This new proposal, called "the preferred alignment" will limit the number of properties the CTA must purchase to build the rail extension.

The extension project will reduce commute times and provide easier access to the Red Line for Far South Side residents.

"I really appreciate the fact that they're extending it because for a lot of South Side people, it's a pain in the butt to get anywhere north using the Red Line," said CTA rider Kevin Hanna.

"I think it's going to be a great thing for Chicago. I am hoping that it would be better because I'm on the CTA every day, the CTA and Pace," said Red Line rider Christine Simmons.

City transit officials add that the project that could end up costing more than $2 billion. It would take about four years to complete.

The city hasn't extended an "L" line since the Orange Line opened in 1993.

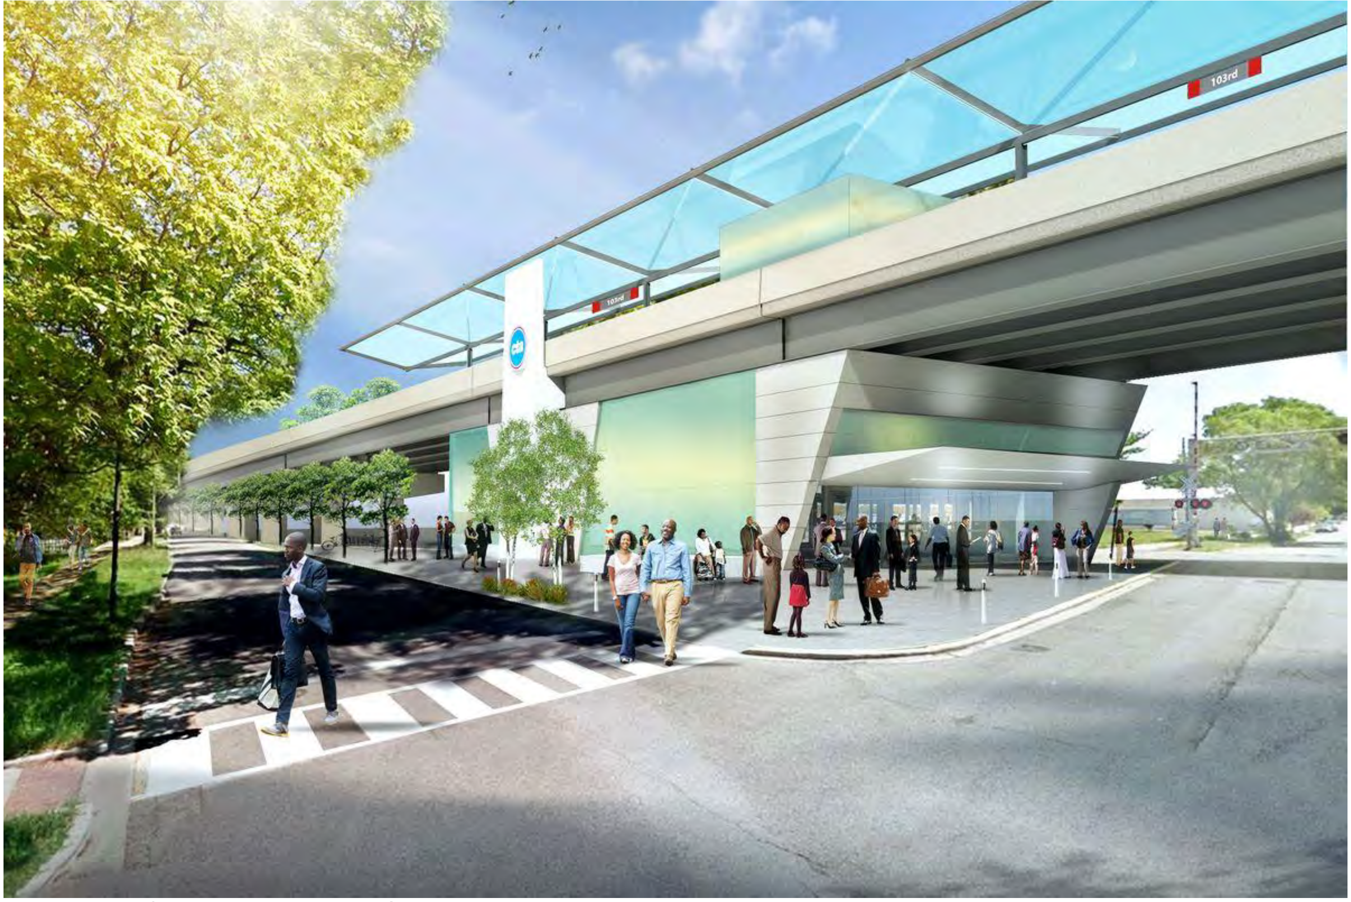
CTA reveals route, four new stations for Far South Side Red Line extension

The news brings the long-discussed project one step closer to reality

By **Jay Koziarz** Jan 26, 2018, 1:13pm CST



A rendering of new station at 103rd Street. *City of Chicago*

The planned extension of the Chicago Transit Authority's Red Line from 95th Street south to 130th Street took a big step forward Friday as officials announced the proposed path for the long-overdue transit improvement project.

Departing from the soon-to-be-revamped 95th Street terminal, the "preferred alignment"—or route—would run along the west side of the Union Pacific Railroad line to about 109th Street. From there, it would move to the east side of the U.P. tracks and continue south, cross the Metra Electric tracks near 119th street, and finally terminate at 130th Street.

Preferred Alignment
Proposed Station
Existing Station

A map showing newly announced track alignment for Chicago's southern Red Line extension. *City of Chicago*

According to the CTA, the final alignment was reached based on feedback from the community and a desire to acquire as few private properties as possible. While earlier iterations of the extension could have consumed as many as 259 parcels, the current plan limits acquisitions to 154 privately owned lots, reports the *Chicago Tribune*.

In addition to 5.3 miles of new track, the extension calls for the creation of four new stations at 103rd Street, 111th Street, Michigan Avenue near 115thStreet, and—of course—a 130th Street terminal in the Far South Side community of Riverdale.

The news is a key milestone for an infrastructure project that will bring vital rail service to residents of Chicago's Far South Side as well as "the jobs and economic opportunities that go with it," said Mayor Emanuel in a statement.

Construction on the $2.3 billion undertaking is dependent on funding and will require the CTA to seek financing from both local and federal governmental sources. The creation of a transit-specific Tax Increment Financing district for the project is a possibly, but so far no decision regarding TIF has been made.

If the city can secure funding, construction could begin in 2022. Once underway, the project will take an estimated four years to complete. In the meantime, the CTA will complete an environmental impact study required to apply for more than $1 billion in federal money.

An open house to present details of the alignment plan to local residents has been set for Feb. 13 at 6 p.m. at the Gwendolyn Brooks College Preparatory Academy gymnasium at 250 E. 111th Street.

Mayor Rahm Emanuel

Today we are taking a major step towards extending the @cta Red Line from 95th Street to 130th Street to improve access to jobs and promote economic development.

11:12 AM - Jan 26, 2018

Chicago Tribune

Five takeaways after CTA announces route for Red Line 'L' extension

CTA Red Line trains at the 95th Street CTA station in Chicago on Jan. 26, 2018. (Antonio Perez / Chicago Tribune)

Mary Wisniewski and Lisa Donovan Contact Reporter Chicago Tribune

The Chicago Transit Authority announced Friday where exactly they'll carve a path to extend the Red Line from 95th Street to 130th Street in Chicago.

That doesn't mean they're ready to break ground on the project, which city officials have talked about for more than 40 years. There's the issue of money (the city hasn't secured any) and bureaucracy (there's plenty) when any major public project is launched. Extending the Red Line south of the current 95th Street terminus — in the middle of the Dan Ryan Expressway — will likely be no different. Some takeaways:

ADVERTISING

1. It's a $2.3-billion project and city officials haven't secured the bulk of that. It's doubtful that President Donald Trump's infrastructure plan, expected to be rolled out in coming days, will offer much relief. His spending priorities suggest he's not high on public transportation. State and city coffers aren't exactly flush. And while there's much talk of involving the private sector, investors would be unlikely to see the CTA as something that offers a big return.
2. It doesn't hurt Mayor Emanuel, who was at a Friday news conference announcing the route, to make a big splash even as planning inches along. It's re-election time and he's trying to court the African-American vote.
3. If the CTA secured the money tomorrow, groundbreaking wouldn't begin until 2022 at the earliest because the city will need to do an environmental analysis and engineering work. The agency also must buy, and in some cases demolish, residential and retail buildings to make way for the 5.3 mile-elevated train extension.
4. Speaking of real estate, there's the looming question of whether neighborhoods along the route will draw speculators and drive up real estate prices. Will this mirror what's happening along The 606? Only time will tell.
5. With four new train stops along the extended route, planners expect 42,000 new passengers a day. Trains may be even more crowded than they are now, but the CTA says that commuters traveling from 130th Street to downtown will save about 20 minutes. Now, it takes about 58 minutes to ride the bus to the 95th Street stop and take the train downtown.

The story has been corrected to reflect the planned Red Line extension would run from 95th Street to 130th Street.

https://chicago.suntimes.com/chicago-politics/analysis-route-defined-where-will-city-find-2-3b-to-fund-red-line-extension/

CHICAGO SUN-TIMES

Route defined, where will city find $2.3B to fund CTA Red Line extension?

CHICAGO 01/26/2018, 04:47pm

RED AHEAD
Red Line Extension
95th Street
103rd Street
111th Street
CITY OF CHICAGO

Mayor Rahm Emanuel looks on as CTA President Dorval Carter discusses a plan to extend the Red Line''s south branch from 95th Street to 130th Street during a press conference near 103rd and Harvard, Friday, Jan. 26, 2018. The 5.3-mile extension would add four new stations near 103rd Street, 111th Street, Michigan Avenue near 115th Street and 130th Street, and is estimated to cost $2.3 billion. | Ashlee Rezin/Sun-Times

Fran Spielman
@fspielman | email

Mayor Rahm Emanuel says the idea of extending the CTA's Red Line from its south terminus at 95th Street all the way to 130th has been "talked about ad nauseam" and it's time to stop talking and start delivering.

But what the mayor delivered Friday was more talk.

Sure, he's further along than any of his predecessors, having chosen a specific route for the 5.3-mile extension and secured $85 million for engineering and environmental studies.

The route would run along the west side of the Union Pacific Railroad tracks from I-57 south to about 109th Street, then cross over to the east side of the UP tracks until it crosses the Metra Electric tracks near 119th Street before continuing south to 130th Street.

ANALYSIS

Four new stations would be built – near 103rd Street, 111th Street, Michigan Avenue near 115th Street and 130th Street. Displacement would be limited to 154 privately owned parcels that include 79 buildings.

But what good is a route if you don't have the $2.3 billion needed to build a project that would open in 2026 at the earliest?

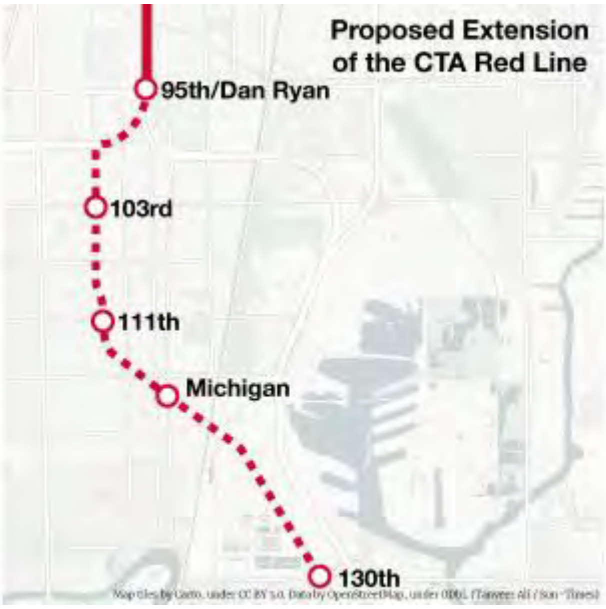
"We're gonna talk about making sure that the federal and state partners are a part of this. We're looking at… multiple different ways of funding it. I'm not gonna tell you yet because this is the first step," Emanuel said Friday.

Earlier this week, Emanuel described President Donald Trump's proposed infrastructure program as "fairy dust."

Can "fairy dust" from a president with whom Emanuel has been engaged in a year-long war of words help pay for a $2.3 billion project?

"I'm confident we will have the resources and secure the resources because of the significance of the project and the investment the city is willing to make," the mayor said.

"I'm not relying on everybody else. But they have to do their part — like they have in every other project we have done."



Map tiles by Carto, under CC BY 3.0. Data by OpenStreetMap, under ODbL. (Tanveer Ali / Sun-Times)

This is the proposed route of the South Side Red Line expansion.

Fourteen months ago, the City Council set a go-it-alone precedent that lets the state and federal governments off the hook when it comes to mass transit projects.

Aldermen hastily authorized a transit tax-increment-financing (TIF) district in a race to nail down $1.1 billion in federal funds to modernize the CTA's Red Line before then-President Barack Obama left office.

CTA President Dorval Carter Jr. said it's too early to talk about using a transit TIF, Emanuel's slow-starting Infrastructure Trust, an increased ride-sharing fee or "any another other innovative funding stream" to bankroll the Red Line extension.

"The TIF legislation was really a stop-gap measure because I didn't have a state capital plan and I was going to lose hundreds of millions of dollars in federal funding if I didn't get that commitment. It was never intended to be the foundation to meet all of our capital needs," Carter said.

Emanuel was elected in 2011 on the strength of the African-American vote and re-elected in 2015 with help from black voters who forgave him for closing a record 50 public schools.

He has spent the last two years trying to rehabilitate an image with black voters that took a beating after his handling of the Laquan McDonald shooting video.

As he prepares to ask Chicago voters to give him a third chance, Emanuel desperately needs to show some kind of progress toward delivering on his 2011 promise to extend the Red Line South to 130th.

The handful of African-American aldermen who joined Emanuel in Roseland's Block Park at 103rd and Harvard were asked whether Friday's route announcement would be enough of a political boost.

"Anything you can show you're doing to keep your promises and bring development into under-served areas is a great thing. The 95th Street station will also help," said Ald. Howard Brookins (21st).

"Even though there was some controversy with respect to the Englewood high school, that situation helps because it shows he's willing to put money into African-American communities, which is a criticism he gets from a lot of people in the community."

Ald. Carrie Austin (34th) flatly predicted that the project long promised and desperately needed to give Far South Side residents the mass transit parity and quick access to jobs they have long deserved "is going to happen in my time" in the City Council.

"I believe in the mayor's tenacity. He stays on it. He never lets it linger and linger…He can shake some trees"—even under Trump, Austin said.

Ald. Anthony Beale (9th) added, “This is a promise made over 40 years ago…This is another victory, another step closer to where we need to be to get this thing under construction.”

Chicago Tribune

As officials plan Red Line extension, there's still no green to fund it

The 5.3-mile $2.3 billion Red Line extension, in a CTA proposal announced Jan. 26, 2018, would fill in what community activists have called a “transit desert” on the South Side. (Antonio Perez / Chicago Tribune)

Mary Wisniewski, William LeeChicago Tribune

For Yolanda Christian, news that the CTA has chosen a path for its extension of the Red Line from 95th to 130th streets was music to her ears.

“They’ve been talking about this since I was a child,” said Christian, 45, who lives in the Altgeld Gardens complex on the city’s Far South Side. She said she and her neighbors must endure long bus rides just to get to the train to get to downtown jobs. “I think we really need this.”

ADVERTISING

The 5.3-mile, $2.3 billion Red Line extension would be built on both the west and east sides of the Union Pacific Railroad tracks — a long stretch of it west of Wentworth Avenue in Chicago and end in the city’s Riverdale neighborhood, the CTA announced on Friday. The extended line would fill in what community activists have called a “transit desert” on the South Side.

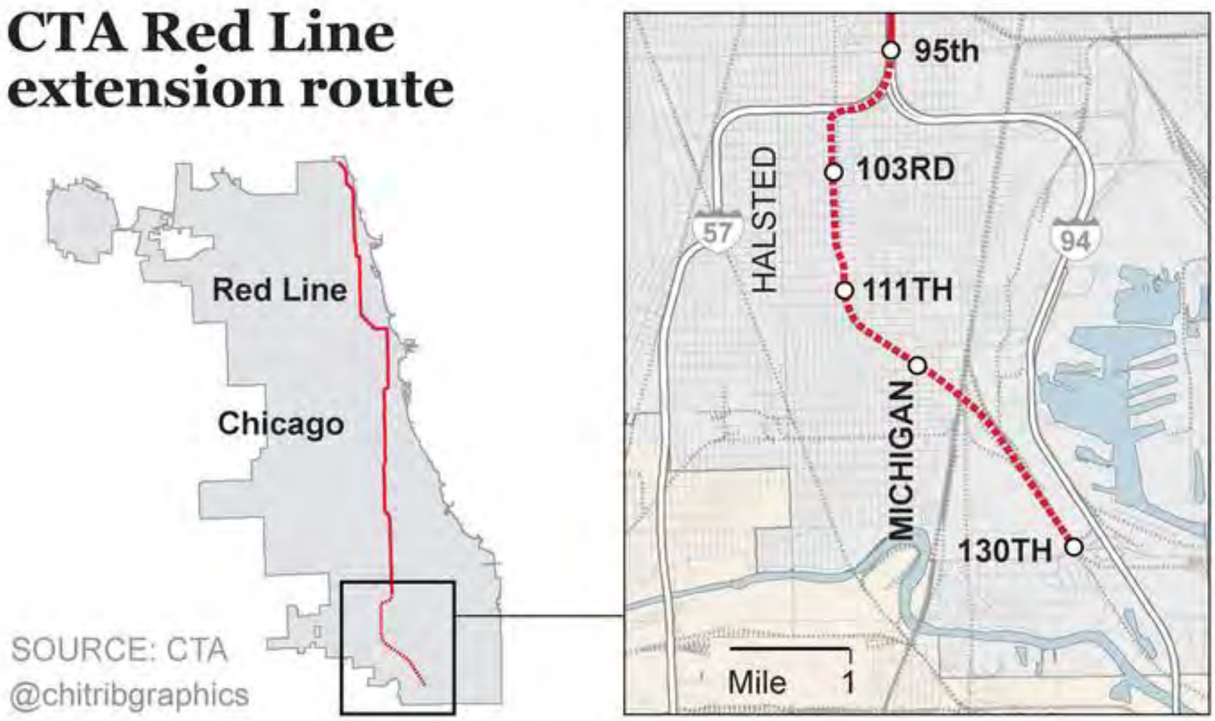
But now that the CTA has an idea about where to put the elevated train extension, the big question is how to pay for it.

The CTA was able to fund half the $2.1 billion Red and Purple Line modernization project through a federal grant in the last days of the administration of President Barack Obama, a Chicagoan and transit supporter. The rest of the project is being funded by tax increment financing in growing, populous and affluent North Side communities.

But the CTA will be seeking Red Line extension funding in a totally different environment — President Donald Trump had expressed hostility toward Chicago, and his stated budget priorities show little interest in transit. The cash-strapped state has cut back on transit operating funds and has not had a capital bill since 2009. And a transit TIF in the poorer and less populous far South Side is unlikely to be as lucrative as it would be up north.

Despite these prospects, both Mayor Rahm Emanuel and CTA President Dorval Carter were upbeat about upcoming efforts to secure a mix of federal, state and local funding for the project at a news conference on Friday near the site of a proposed new 103rd Street train station, one of four planned stops on the extension.

Carter noted that after decades of talk about the Red Line extension, the CTA is now putting real money into it — it has secured $85 million in federal, state and local funding for preliminary work, including engineering and an environmental analysis, which it needs to complete to get money for the project.



SOURCE: CTA
@chitribgraphics

"There is a federal process we have to go through to get the federal funding," Carter told reporters. "I intend to pursue that process. The timeline is going to be driven much more by our ability to get the state capital funding that we need to make the project happen than by whether or not there are federal resources to support it."

Emanuel said the project has economic merit and is just the type the state and the U.S. Department of Transportation want to see, though it is too early to talk about it with Transportation Secretary Elaine Chao.

"That would be premature at this point — what we just announced is the planning," Emanuel said. He said now is the time to proceed with the extension plans, since the CTA finished the $425 million Red Line South reconstruction in 2013 and is now completing a massive $280 million building of the 95th Street station.

Ald. Anthony Beale, whose 9th ward will be served by the extension, told the Tribune he'll be excited when he sees shovels in the ground. He noted that the extension had originally been promised by Mayor Richard J. Daley more than 40 years ago.

CTA Chairman Terry Peterson said he would not underestimate Emanuel's "creativity" in finding the money.

The newly proposed path would start at 95th Street and run along the west side of the Union Pacific Railroad tracks from I-57 south to about 109th Street. It would then cross the UP tracks and continue along the east side of the tracks until crossing Metra Electric tracks near 119th Street, and then continue south to 130th Street, the CTA said.

Rendering of the planned 103rd Street CTA station, all part of the proposed Red Line extension on the South Side (CTA)

In addition to a stop near 103rd Street, the CTA plans new stations near 111th Street, Michigan Avenue near 115th Street and 130th Street.

The route could require acquisition of up to 154 privately owned parcels, including 79 buildings. The CTA would be able to acquire the parcels through eminent domain, which allows a government entity to take properties for public use, after paying the owners. The price for the acquisitions is not yet known, CTA spokeswoman Tammy Chase said.

The CTA will hold an open house on Feb. 13 from 6 to 8 p.m. at the Gwendolyn Brooks College Preparatory Academy gymnasium to present the alignment to residents.

The earliest construction would begin is 2022, and the project would take about four years.

The Chicago Metropolitan Agency for Planning, the region's planning organization, identified the Red Line extension in its GO TO 2040 plan as a capital project of "regional significance." CMAP Executive Director Joe Szabo said in a statement that the next regional plan, ON TO 2050, coming out in June, will include strategies for securing money for high-priority projects in light of declining state and federal resources.

Elizabeth Williams, a 56-year-resident of the area near the 95th Street terminal, said she is hopeful that now is the right time for the extension, though she did express some concerns that the project would displace numerous businesses and longtime homeowners.

"I'd hate to see people who lose their homes, especially older folks that own their homes," Williams said.

Carter acknowledged that there would be disruptions from the project, but said there would also be great benefits to the community, including transit-oriented development opportunities and other economic development. The project also is expected to create about 6,200 jobs, the CTA said.

Emanuel said there is disruption now, caused by people having to waste time taking buses to the train. “If you don’t have to take a bus to a train, that means you have more time with your children,” he said.

CTA unveils proposed Red Line extension to 130th Street

POSTED 7:06 AM, JANUARY 26, 2018, BY WGN WEB DESK, NANCY LOO AND JULIAN CREWS, *UPDATED AT 05:29PM, JANUARY 26, 2018*

CTA unveils proposed Red Line extension to 130th Street
CTA RENDERING

CHICAGO -- The CTA and Mayor Rahm Emanuel have unveiled a plan today to extend the Red Line on the city's South Side.

Right now, the last stop on the south end of the Red Line is 95th Street.

But a new proposal will extend the line to 130th Street.

The five-mile extension would include four new stations: 103rd Street, 111th Street, Michigan Avenue, near 115th Street and 130th Street.

NEWS CATCH UP • STEVE BANNON TO SPEAK AT U CHICAGO, RED LINE EXTENSION & MORE

JAKE KREZ JANUARY 26, 2018

0 COMMENTS 0

It’s been a long week with highs and lows as disparate as January temperatures around Chicago and Mild Sauce is here to round up some of the headlines that matter to you with some added context. In this edition of the News Catch Up, we take a look at a proposed talk with Steve Bannon at the University of Chicago, new developments going up in the West Loop and a proposed extension to the Red Line. Check it all out below and be sure to catch our morning show, The Three Piece on Mild Sauce Radio for more news and commentary, Saturday mornings at 11 AM CST.

Steve Bannon to Speak at University of Chicago

Over the last couple of years conversations revolving around who can and cannot speak on college campuses has once again made it’s way into the national audience. Following students at the University of California-Berkeley protesting the likes of controversial speakers like Milos Yiannopoulos, the University of Chicago has decided to allow former Breitbart News Editor and White House Chief Strategist under Trump.

The decision, announced this week, is an important one that puts U of Chicago on the right side of history in the new-age of “designer news” where folks can pick and choose what to believe and expose themselves to. The decision however did not come without opposition. protests popped up on campus Thursday and several professors signed a letter to President Robert Zimmer. U of C, though, appears to be standing strong amidst a climate that has seen even DePaul wilt in the face of over-eager censorship based on feelings rather than rationale.

In an Editorial, the Chicago Tribune summed it up perfectly: “If this involved practically any other college in America, we’d be concerned the administration might buckle under the protests, and concoct some reason to disinvite Bannon to preserve harmony. There’s a pattern in place, from Berkeley to DePaul and beyond, of universities squelching controversial speaker events, especially those involving people on the political right. It’s part of the larger cultural movement of trigger warnings and safe spaces that believes kids on campus have a right to be protected from ideas that offend them.

Thankfully, the U. of C. thinks differently.”

Indeed. While there’s little doubt that a man that first associated himself with, and the was summarily fired by Donald Trump will say anything substantive, he does deserve the right to speak if given the opportunity. While colleges across the country participate in the undermining of the first amendment and journalism ethics in general, University of Chicago is standing as a beacon of how to handle these situations in a mature manner.

More High-Rises Slated for West Loop

The boom in the West Loop doesn't seem to be stopping any time soon. This week, plans were announced for yet another set of high-rises in the quickly-developing area just left of the Loop. Developer Sterling Bay showed off plans for four new buildings that will essentially look to gut whatever sense of the neighborhood still exists and lean full-heartedly into Rahm Emanuel's Tech hard-on, glossing the area in more glass and quick-pour concrete as local developers tug at the pants-leg of Amazon.

The plans are expansive to say the least. Extending north along Green Street from Randolph. Included in the plans are 19 and 20-story buildings on either side of Green St. where Coyne College currently stands. It and the parking lot across the street were purchased for $25 million last year. Included as well are proposals for a seven-story mixed-use building at 345 N. Morgan and a 21-story office building at 360 N Green, the latter the first new development north of the Metra tracks.

It's apparent that the deep-pocketed developers that have long dictated the migration of Chicagoans are once again hedging their bets, this time for the possibility of Amazon choosing the Fulton Market corridor for it's HQ2 headquarters. Despite the fact that may be a long-shot and the other persistent reality of Chicago losing more population than the rest of the country every year, lets keep our fingers crossed these get done before the bubble pops. Head over to Curbed for a more in-depth look at the project and our recurring feature, Cranes In The Sky.

CTA OK’s First L Extension Since 1993

An area of the city long-considered a “transit-desert” by activists may be getting some relief, as the Chicago Transit Authority announced plans for a $2.3 billion extension of the Red Line south to 130th St. The project, if approved for funding, would be the first extension of any ‘L’ since opening the Orange Line in 1993.

The extension follows a redevelopment of much of the south side Red Line stations which took place in 2012 and will bring transportation options to a large swath of neighborhoods that are largely without any. The 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue near 115th Street, and 130th Street with parking and bus connections that would extend as far south as suburban Riverdale.

According to the *Tribune*, “The CTA will hold an open house on Feb. 13 from 6 to 8 p.m. at the Gwendolyn Brooks College Preparatory Academy gymnasium to present the alignment to residents. The agency then must publish a final environmental impact study to include further analysis of the path and some preliminary engineering work.”

If all goes according to plan, the earliest date to break ground is 2020 with at least four years needed to finish the construction.

Chicago Plans a Red Line Extension—But Could It Be Done Faster and Cheaper?

The city has finally announced its preferred route from 95th Street to 130th Street. But with the Trump infrastructure plan looking unfavorable, will the Metra Electric option get a hearing?

BY WHET MOSER

PUBLISHED JAN. 29, 2018

What the (proposed) 103rd Street station on the (proposed) Red Line extension could look like by 2026 (at the earliest). PHOTO: CITY OF CHICAGO

The city announced its planned route for the long-discussed extension of the Red Line, which would be extended from its current South Side terminus at 95th Street down to 130th Street in between Lake Calumet and the Little Calumet River. Here's where they want to run it.

The city says it would be a 5.3-mile extension costing $2.3 billion dollars, $1 billion of which would come from the federal government.

The *Tribune* reports that it will shave off about 20 minutes from a commute from 130th Street to the Loop. That sounds about right: According to Google Maps, it's 28 minutes from the 95th Street Red Line Station to State & Lake. Currently to get from the approximate location of the proposed 130th Street station, it's a short walk and then a half-hour, 49-stop bus ride from Ellis Avenue and 131st Street to get to the 95th Street terminus.

One map gives a sense of how that could affect commuters. It's from a UIC-Great Cities Institute report on jobs and unemployment for youth, and it shows the number of jobs available within a half-hour commute of anywhere in the city. The 130th Street station would border the two community areas with the fewest number of jobs (as of 2014) available within a half-hour commute: 2,701. I've annotated it with the location of the 95th Street station and the proposed 130th Street station.

The 130th Street station would be on the border of Riverdale, which, the *Tribune*'s Alexia Elejalde-Ruiz reported in 2016, has the most economic hardship of any Chicago community area: a per-capita income below $7,500 and unemployment of 40 percent. Faster and more reliable public transit could be a considerable benefit for the far South Side neighborhood.

But there’s likely to be some pushback. The proposed route would cost the city over a billion dollars, and the additional federal money is up in the air: The White House’s infrastructure adviser said Trump’s infrastructure plan "will not include any new revenue to pay for $200 billion of new federal spending,” and apparently focus more on bringing non-federal money to the table. So, a near-50-percent match may not be realistic in the near future, and the situation could change again between now and 2022, the earliest time the city says it could begin.

Meanwhile, transit advocates have been pushing a proposal for many years that would convert the Metra Electric lines into something that functions more like the L, with greater frequency and a longer operating day, than the infrequent commuter rail pattern it runs on now.

The Metra Electric is highlighted in light yellow, the proposed Red Line extension in red. They cover similar territory.

If you wanted to take the Metra from Blue Island to Millennium Station on a Monday morning, the train leaves at 6:15, 6:40, 6:58, 7:20, 7:35, and 8 a.m. The last one will get you downtown by 8:56. After the 8 a.m. train, there's not another one for two hours and 18 minutes. The next trains are 12:18, 2:18, 4:18, 5:38, 6:38, and 7:41 p.m. And that's it for the rest of the day.

Going from downtown to Blue Island? The last train arrives in the latter at 8:23 p.m. It's a rush-hour train that mostly benefits 9-to-5 workers and doesn't really serve the night shift at all.

This case has been made many times. Sandy Johnston wrote a thorough piece about it for *South Side Weekly* last year. Steven Vance considered the idea for Streetsblog in 2016. As Johnston points out, and as you can see from the map, there are a *lot* of stations for the Metra Electric running through the Red Line extension area, far more than your typical Metra line—because it used to have L-level frequency and serve a rapid-transit-like purpose before it was absorbed by the RTA and run on a commuter-rail schedule.

Daniel Kay Hertz wrote that such a conversion would cost about $27 million per mile, compared to about $434 million per mile (including federal funding) for a Red Line extension. As Alon Levy writes in *CityLab*, the latter number is pretty average for American subway/elevated rail projects, which is far more expensive than European ones. If the $27 million-per-mile estimate is correct, that's less than half the cheapest new American construction Levy cites, a $65 million per mile light-rail project in Phoenix.

The *Tribune*'s Mary Wisniewski reported that the idea "has drawn the interest of Mayor Rahm Emanuel, who has asked the head of the Regional Transportation Authority to facilitate discussion on the issue." It hasn't gotten far enough along to serve as a replacement to the Red Line extension, apparently. At Streetsblog, John Greenfield thinks the reason is that "they believe that it will be easier to prize a federal grant out of the Trump administration than get CTA and Metra to play nice."

If the Red Line extension does happen, it wouldn't necessarily obviate the Metra Electric conversion; the North Side has comparable north-south L density and it's a good tie-in with the Obama Library. But much as CTA and the Metra have had trouble integrating their services, transit funding is likely to run into a headwind under the Trump administration's infrastructure plan. Yonah Freemark noted that it requires value capture financing for transit funds, such as property value increases that would pay for its cost through a tax-increment finance mechanism; as Greenfield points out, that might not be a realistic goal for a Red Line extension. In this quite realistic scenario, the city might have to wait for a different administration, or do some heavy relationship counseling for the metro's two public-rail agencies.

Patch

Mayor, CTA Announce 'Preferred Alignment' For Red Line Extension

Expanded rail service to the far South Side will improve access to jobs and opportunities, city officials say.

By Carrie Frillman, Patch Staff | Jan 29, 2018 1:16 am ET

CHICAGO -- Mayor Rahm Emanuel and the Chicago Transit Authority (CTA) last week announced that the agency has selected a preferred alignment for the Red Line Extension (RLE) — a project that will extend the Red Line to 130th Street from 95th Street.

The RLE project will provide new access to rail service for Far South Side residents, connecting them to affordable housing, jobs, services and educational opportunities.

"Today we are taking a major step towards extending the Red Line to 130th Street and delivering the jobs and economic opportunities that go with it," Mayor Emanuel said. "By extending the Red Line south we are strengthening Chicagoans' connections to each other, to opportunity and to the world."

The proposed 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue and 130th Street. Each of the new stations would include bus and parking facilities. The project is expected to create an estimated 6,200 jobs.

After taking into consideration extensive public feedback, technical analysis and other factors, the CTA selected a route for the RLE project that would:

Subscribe

- Begin the extension at 95th Street and run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 109th Street;
- Cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street; and
- Continue south to 130th Street.

"We are happy to introduce our preferred alignment for the Red Line Extension, a transformational project that will expand rail service to Chicago's southernmost communities and create better access to jobs, education and opportunities," CTA President Dorval R. Carter, Jr. said. "We made this selection based on feedback from the community, and look forward to moving forward on this project."

The preferred RLE alignment would provide all the benefits of new rail service for the area while minimizing the impact on local businesses and homes. The alignment is a hybrid of two previously considered alignments—the East and West Options, named for where they were located next to existing freight railroad tracks—and offers the best of each while limiting the number of properties CTA must purchase to build the rail extension. The selected alignment also takes advantage of several large parcels of land that are currently vacant and will allow for economic development opportunities.

The project is a key part of Mayor Emanuel and CTA's "Red Ahead" investment in its busiest rail line that includes the $425 million Red Line South Reconstruction that was completed in 2013 and the ongoing $280 million construction of a new 95th Street Terminal, which will be completed in 2018.

What's next?

The CTA will host a public open house on February 13, 2018 from 6 p.m. until 8 p.m. at the Gwendolyn Brooks College Preparatory Academy gymnasium (250 East 111th Street, Chicago, Illinois) to present the alignment to the community.

CTA officials will produce a final Environmental Impact Study (EIS) that will include further preliminary engineering work and will analyze impacts of the proposed alignment. This engineering work is required before CTA can apply for more than $1 billion in federal funds to support the RLE project, estimated to cost $2.3 billion.

CTA officials expects to apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase of this project, a necessary step to pursue federal funding for the project under the competitive federal "New Starts" program. For more information on the Red Line Extension project, visit transitchicago.com/redeis.

CTA unveils preferred alignment for Red Line extension

Rendering of the 103rd Street Station on the extension
Photo – Chicago Transit Authority

The Chicago Transit Authority (CTA) last week announced its preferred alignment for the proposed Red Line rail extension, which calls for extending the route from 95th Street to 130th Street.

The chosen route would begin at 95th Street and run along the west side of Union Pacific Railroad tracks from Interstate 57 to 109th Street. Then, the route would cross UP tracks and run along their east side until crossing the Metra Electric tracks near 119th Street.

From there, the route would continue south to 130th Street.

The 5.3-mile Red Line extension would include four stations near 103rd Street, 111th Street, Michigan Avenue and 130th Street. Each new station would include bus and parking facilities.

The CTA chose the preferred alignment after taking into account public feedback, technical analysis and several other factors, agency officials said in a press release.

The alignment is expected to provide the benefits of a new rail service while minimizing the impact on local homes and businesses. Agency officials will host an open house Feb. 13 to present the route to the community.

The CTA will produce a final environmental impact study that will include additional preliminary engineering work, which is required before the agency can apply for more than $1 billion in federal funding. The extension would cost an estimated $2.3 billion.

CTA officials also expect to apply to the Federal Transit Administration for entry into the project development phase — a necessary step to pursue federal funding under the competitive "New Starts" program.

In October 2016, the agency published the draft environmental impact statement for the Red Line extension.

CTA

The Chicago Transit Authority (CTA) has selected a preferred alignment for the Red Line Extension (RLE) project, which is set to extend the Red Line to 130th Street from 95th Street.

The RLE project is intended to provide new access to rail service for the city's Far South Side residents, CTA said.

"Today, we are taking a major step towards extending the Red Line to 130th Street and delivering the jobs and economic opportunities that go with it," Chicago Mayor Rahm Emanuel said. "By extending the Red Line south we are strengthening Chicagoans' connections to each other, to opportunity and to the world."

The proposed 5.3-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue and 130th Street. Each new station would feature bus and parking facilities, as well.

The CTA said it received extensive public feedback and technical analysis regarding the RLE project.

The transit authority selected a route for the project that would:

- Begin the extension at 95th Street and run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 109th Street

- Cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street
- Continue south to 130th Street

"We are happy to introduce our preferred alignment for the Red Line Extension, a transformational project that will expand rail service to Chicago's southernmost communities and create better access to jobs, education and opportunities," CTA President Dorval R. Carter, Jr. said. "We made this selection based on feedback from the community, and look forward to moving forward on this project."

The CTA said the preferred RLE alignment would minimize the effects on local businesses and homes and takes advantage of several large, vacant sections of land that will enable economic development opportunities.

The RLE project is part of Mayor Emanuel and CTA's "Red Ahead" plan for the Red Line that includes the ongoing $280 million construction of a new 95th Street Terminal, which is set for completion in 2018.

The CTA also said the project is expected to facilitate more than 6,000 jobs.

CTA will host a public open house on Feb. 13 to present the alignment to the community. The transit authority is set to produce a final Environmental Impact Study (EIS) that will include further preliminary engineering work and analyze impacts of the proposed alignment.

The engineering work must be completed before CTA can apply for more than $1 billion in federal funds to support the project, which has an estimated cost of $2.3 billion.

CTA said it intends to apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase of this project, which would allow the transit authority to pursue federal funding for the project under the competitive federal "New Starts" program.

Chicago Transit Authority unveils details for $2.3B rail extension

AUTHOR

Kim Slowey@kimslowey

PUBLISHED

Jan. 30, 2018

Dive Brief:

- The Chicago Transit Authority (CTA) announced new milestones in its planned 5.3-mile, $2.3 billion Red Line rail extension project, according to Curbed Chicago.
- The CTA made one of the most critical decisions — that is, the route the new line will follow — a choice that officials said would necessitate the fewest private property purchases. The authority also announced the location of four new stops.
- The CTA is expected to apply for federal and local funding, but it might create a transit-specific Tax Increment Financing (TIF) district as well. If the city can come up with the money and meet other requirements, construction could start in 2022.

Story continues below

Dive Insight:

Even though officials admitted the project faced some obstacles, Dorval Carter, CTA president, said in 2016 that the project could be life changing for those in need of educational and employment opportunities.

Chicago has a few other transportation projects in the works as well, including the $2.1 billion Red and Purple Modernization (RPM) rail initiative. That project entails station improvements, new tracks and other upgrades. The CTA secured a $1 billion Federal Transit Administration (FTA) grant for this project but only after the city approved a TIF. Before President Donald Trump took office, the Chicago City Council sped up approval of the project so that the FTA under former President Barack Obama would make the decision.

In December, the CTA chose three companies to bid on the project with the intention of starting construction in 2019.

Another project in the planning stages is an express transportation systembetween downtown Chicago and the city's O'Hare International Airport. One of the bidders on the project is Elon Musk's Boring Company. Musk has not offered specifics on what his plan will look like, but the project guidelines call for a public-private partnership-type relationship where the winning bidder will finance, operate and maintain the system.

The specifications also require a system design that can move commuters between Chicago and the airport in no more than 20 minutes. Musk told his Twitter followers that a Hyperloop system and the accompanying vacuum wouldn't be necessary for such a short trip, which has left onlookers wondering if the Boring Company will present a proposal for a skate system like it has in mind for a high-speed transportation tunnel system under Los Angeles.

New Red Line extension plan would uproot fewer Far South Side homes

By La Risa Lynch **| January 31, 2018**

Photo by Yingxu Jane Hao

Shari Henry's 101st Street home, which her parents bought in 1970, will no longer need to be acquired and demolished under the CTA's new proposal to extend the Red Line.

Shari Henry breathed a sigh of relief at the news.

The home she shares with her mother will not be taken to make way for the planned Red Line extension to the city's southern limits. She and her mother had been in a holding pattern since they received a letter in 2016 from the Chicago Transit Authority stating that their home was among 248 that could be acquired for the project. The Henry family home was among 94 privately owned properties that ended up being spared in CTA's final plan, announced late last week. Only 154 properties will have to be acquired.

"Just so much has been on hold because we've haven't known," said Henry, whose parents bought their house in the Fernwood neighborhood in 1970 after leaving the Dearborn Homes housing development. She had been putting off installing a new roof. "There was no need to do a roof if the house was going to be taken, if it was going to be torn down."

CTA Public Hearing
Tuesday, Feb. 13, 2018
6 – 8 p.m.
Gwendolyn Brooks College Preparatory Academy gymnasium
250 East 111th St.
Chicago, IL 60628

The preferred alignment to extend the Red Line will be presented to the community. Comments can be submitted at: RedExtension@transitchicago.com.

CTA's initial proposal included options for building the extension on either the east or west side of the Union Pacific Railroad tracks that stretch through the Far South Side. But the agency decided to use a hybrid of the two options: The elevated transit line will run west of the Union Pacific tracks from I-57, running partly on a grassy parkway, to 109th Street. There, it will cross over to the east side and continue south to the last of four new stops, at 130th Street in the Riverdale community.

The Henry's home was spared by the use of that 4-block stretch of green space. The majority of line will run along the east side, which is mostly residential but has more vacant properties that could be used for economic development.

But other residents will still be uprooted from their homes or businesses. Mims Donald will have to uproot the family-owned business that is in the extension's path. He has operated Donald's Auto Repair at the corner of West 115th Street and South Lafayette Avenue since his family first bought the business in 1976. CTA has proposed to build one of the four new stations in the area.

Still, Donald believes the extension is a good thing. "I'll be glad to see something coming in that improves the neighborhood," said Donald. "I am all for anything in this neighborhood that is going to help it."

Donald lived in the community for more than 30 years before moving to Calumet City. He said Roseland is not the same great neighborhood he once grew up in.

“Things just steady been going down because people can’t get any jobs,” he said. “Anything that is going to improve for people to get better jobs and have better transportation to get downtown … I am all for it. I can establish another business some other place. I am not gonna stand in the way.”

Donald is optimistic about the development as well as getting a fair price for his property. But other residents have been skeptical about the potential impact of the project on home value and the prospects for economic development. The area has long suffered from a lack of jobs, poor transit options to employment, and disinvestment as blacks moved in and whites fled to the suburbs during the 1950s and 60s.

RELATED

Far South Side homeowners question Red Line extension’s impact on property values

The city’s history of residential segregation has kept home values down. Coupled with the recent housing crisis, experts say homeowners may not get their original purchase price for their homes once the city begins acquiring properties. Home prices in Roseland, Riverdale and other Far South Side communities fell further during the housing crisis and recovered more slowly compared to the rest of Chicago.

Ald. Anthony Beale, whose 9th Ward encompass the majority of the Red Line extension, recognizes the residents’ concerns about getting a fair price for their property but says residents will get a fair shake.

“Nobody is coming out of this short-handed, and I am gonna make sure of that,” said Beale. He called the hybrid alignment a win-win for the community that minimizes displacement.

Beale is optimistic about the project, which has been more than 40 years in the making, but says he cannot get excited until the funding is secure. City and CTA officials expressed confidence about securing additional federal and state funding and have already secured $85 million for engineering and environmental work. The earliest construction would begin is 2022. The project would take four years to complete.

The 5.3-mile extension will include four new stations with park ‘n ride lots and bus connections, on 103rd Street, 111th Street, 115th and Michigan Avenue, and 130th Street. Studies have shown that on average property values near transit tend to increase. But areas suffering from low home values for a long time may not see an immediate increase. Instead, home values may rise steadily many years down the road.

Henry doesn’t see that happening where she lives. Her home is two blocks from the proposed station at 103rd Street. CTA’s 95th Street station, which now serves as the end of the line, is all the proof she needs. Though it is CTA’s busiest station, 95th Street itself has struggled economically. The station is currently undergoing a $280 million renovation.

“There has not been an increase in businesses around that area, and it’s been there for years,” Henry said. “So we can only hope that we fair a little better with an L station on 103rd.”

A proposed extension route to the CTA red line will extend the southbound ending from 95th/Dan Ryan to 130th.

Erin Dickson | CHRONICLE

The anticipated Red Line Extension project route proposed by the Chicago Transit Authority promises minimal community damage during construction and thousands of new jobs. But questions about how it will be funded still linger.

The project proposal, announced Jan. 26, is designed to provide new access to rail service for far South Siders. The 5.3-mile extension from its southern tip, 95th Street, would include four new stations near 103rd Street, 111th Street, Michigan Avenue and 130th Street, according to a Jan. 31 email interview with Jon Kaplan, a CTA spokesman.

“[The extension will] connect far South Side residents to affordable housing, jobs, services and educational opportunities,” Kaplan said. “The four new stations can help foster economic development in the area and serve as catalysts for neighborhood revitalization and help reverse decades of disinvestment in local business districts.”

CTA chose the route after public feedback from the community, and construction’s scheduling still depends on funding. The earliest construction would begin in 2022, and the project would take about four years and cost about $2.3 billion, according to Kaplan.

Kyle Whitehead, government relations director at Active Transportation Alliance, said the extension is a long-overdue project that has been discussed for decades.

The timeline of the project is typical for a major transportation construction, Whitehead said, but the challenge will be securing funds from state and federal administrations that are trying to spend less on transportation.

“We’re advocating for public dollars to be spent because it is important to have direct spending at every level of government on public transit,” Whitehead said. “That pays dividends for our communities towards economic development, public health and the environmental benefits that come with major transit projects like this one.”

The extension at 95th Street will run along the west side of the Union Pacific Railroad tracks from I-57 south to about 109th Street, then cross the railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street, where it will continue to 130th Street.

“From [ATA’s] perspective as advocates, the service will be similar regardless of which routes they chose,” Whitehead said. “The most important thing is that a route has been chosen and the project is entering the next stage.”

The South Side has long been considered a transportation desert, and the lack of public transit has hindered its communities, Whitehead said.

“While this investment would not completely solve the problem, it could dramatically change the situation for people, businesses and organizations,” Whitehead said. “But it’s important that people living there are benefiting from it and a part of the process of determining how their community is going to be changed and affected by this project.”

CTA will host a public open house at 6 p.m. on Feb. 13 at the Gwendolyn Brooks College Preparatory Academy gymnasium, 250 E. 111th St., to present the plan and get feedback from residents and business owners, Kaplan said.

Erin Dickson | CHRONICLE

P.S. Sriraj, director of the Urban Transportation Center at the University of Illinois at Chicago, said the city needs to look carefully into how the project may change the “flavor” of the neighborhoods. Railways have historically had a positive economic impact on communities, but gentrification cannot be predicted, Sriraj said.

“The only negative with improvement and accessibility [to the Red Line] is that some people may be bought out or forced to move, and it may end up happening in a manner that we might not recognize it,” Sriraj said. “With improvements in accessibility we have to question: Who will be the beneficiaries of those?”

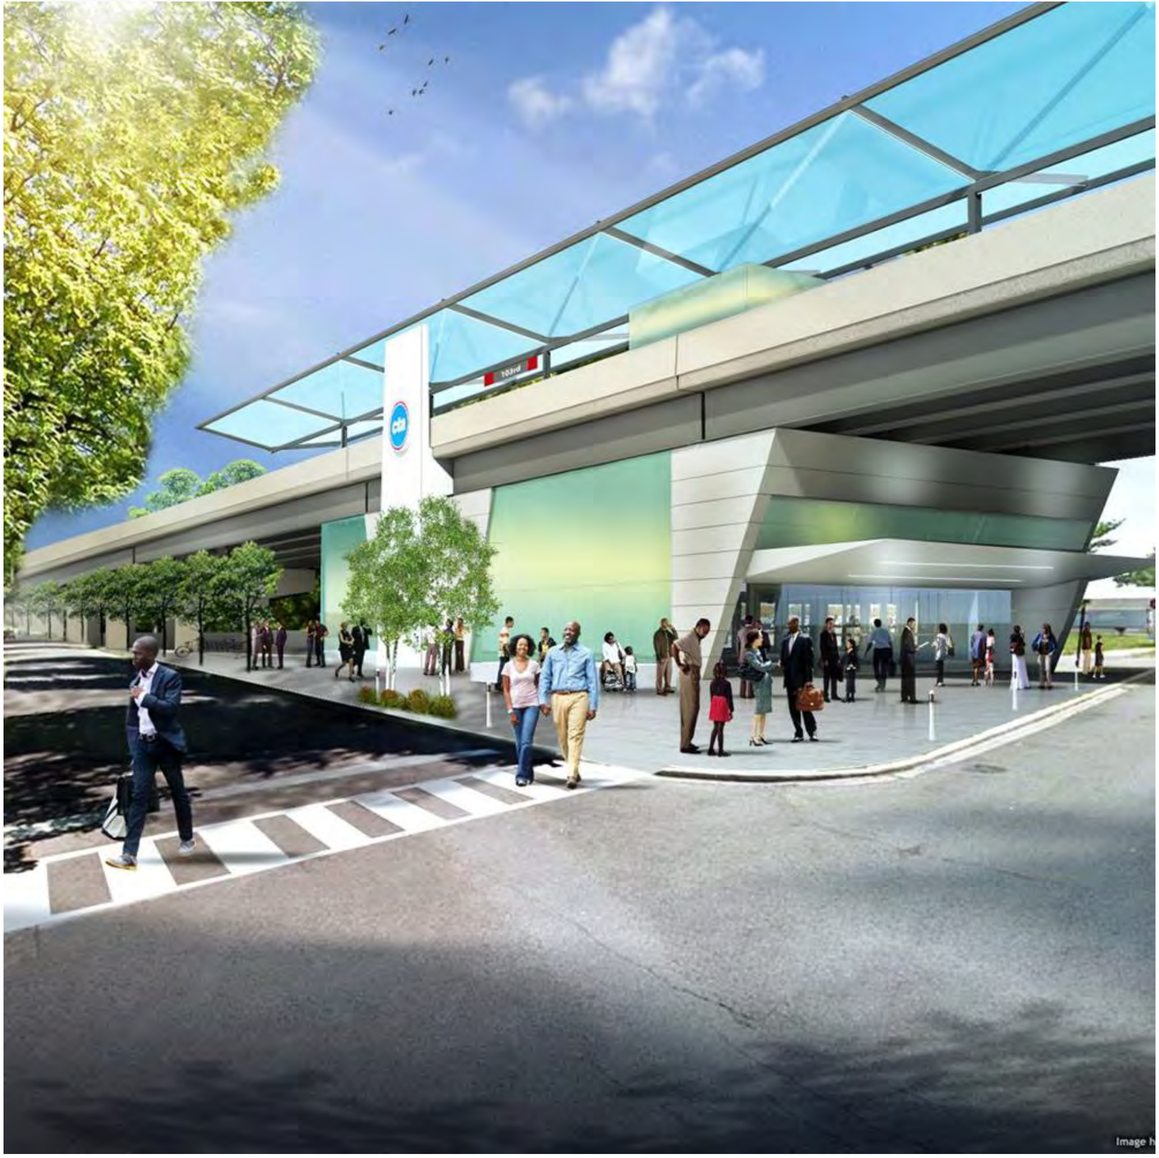
CTA announces route of proposed Red Line expansion

By MATTHEW MARANI • February 5, 2018

Midwest Transportation



A rendering of the proposed Red Line expansion is pictured here. (Courtesy CTA)

On January 26, the Chicago Transit Authority announced its ideal path for the proposed expansion of the city's Red Line south branch. The expansion, the system's first since 1993, is a major aspect of Mayor Rahm Emanuel's "Red Ahead" initiative to modernize and lengthen

Chicago's busiest train line. Over 240,000 Chicagoans ride the city's Red Line on an average weekday, representing over 40 percent of "L" ridership.

The "Red Ahead" initiative has already delivered tangible improvements to the second largest transport system in the country. Currently, a transit terminal designed by Chicago-based Exp. is rising on 95th Street, the current southern terminus of the Red Line. The $280 million project entails the renovation of the existing North Terminal and the construction of an entirely new South Terminal, with the intended goal of increasing passenger capacity for existing and future commuter demand. The renovated and expanded station will also include two new public artworks by Chicago-based artist Theaster Gates, and is expected to open in 2018.

The Chicago Tribune reports that the proposed route runs from 95th Street, along the preexisting Union Pacific freight tracks, to 130th Street. This route will expand the Red Line by 5.3 miles, add four new stations, and is estimated to cost $2.3 billion. State and local funding for the project is not yet fully realized, and considering the budget priorities laid out by the Trump administration's recently-leaked infrastructure plan, crucial federal funding remains precarious at best. The earliest the project will break ground is 2020, with an approximate four-year construction timeline.

The new stations, located on 103rd Street, 111th Street, Michigan Avenue, and 130th Street, will feature bus and parking facilities as a measure to decrease vehicular congestion within the greater Chicago area. As noted by *NBC Chicago*, the 5.3-mile extension primarily serves Chicago's Far South Side, an area currently designated as a "transit desert" due to its lack of public transport.

A proposed station within the South Side context. (CTC)

Expanding transportation opportunities in Chicago's South Side could dramatically impact the area's residents. According to CBS Chicago, the extension of the Red Line could shave 20 minutes off the commute from the Far South Side to Downtown Chicago, boosting the accessibility of affordable housing in the area. Although transportation projects tend to draw the ire of community groups, interviews conducted by the *Chicago Tribune* with residents and businesses across the proposed Red Line expansion reveal widespread support for the transit initiative.

According to *Progressive Railroading*, a final environmental impact study for the project will be released following a February 13 open house with the surrounding community. Following the study, the CTA can apply for over $1 billion in federal funding.

If funding is secured for the extension of the Red Line, the CTA will still have to contend with the approximately 150 private parcels along the proposed route. The financial and logistical hurdles are great, but the large-scale expansion of Chicago's "L" could prove a boon to residents and city alike.

Can the CTA and Metra play nice?

Benefits of increased cooperation could include fare integration and an alternative to the costly Red Line expansion.

By John Greenfield @greenfieldjohn

- BOBBY SIMS

On January 26, when Mayor Rahm Emanuel and the CTA unveiled the route for the $2.3 billion extension of the Red Line from 95th Street to 130th Street, the big question was where the heck the CTA would get the money from. City officials said they planned to apply for more than $1 billion in federal grants for the project. Trouble is, White House infrastructure adviser DJ Gribbin says that Donald Trump's forthcoming $200 billion infrastructure bill won't include any new revenue and will cut existing transportation funding—specifically, Amtrak and public transit.

For decades transit experts and advocates have pushed for a much cheaper, quicker solution to bring rapid transit to the far south side. The Metra Electric District route, aka the Electric Line, runs more or less parallel to the Red Line and makes eight stops within Roseland, Pullman, and other neighborhoods that would be served by the four extension stations, which are planned near 103rd, 111th, Michigan at 115th, and 130th Streets. Currently the Electric Line runs sporadically during nonrush periods. Running it more frequently, offering, say, 24-hour service at 15-minute intervals, and integrating its fare system with the CTA could likely be done at a fraction of the cost of the extension.

It could also be done a lot more quickly. The proposed project involves acquiring about 150 properties and building elevated tracks and stations. According to the CTA, it won't be fully operational until 2026 at the earliest, and work won't begin until 2022. The Electric Line conversion, which would only require retrofitting existing infrastructure, could almost certainly be completed sooner.

It's too bad the CTA and Metra don't play well together. It's not just that the CTA primarily serves the city, Metra the suburbs. Like the RTA and Pace, each of these transit agencies has its own board of directors—Emanuel appoints the majority of CTA board members, while most of the Metra directors are chosen by politicians from Republican-controlled suburban county boards. On top of that, the CTA and Metra compete with each other for funding and ridership.

The agencies insist that they get along just fine. "We see a cooperative relationship," said spokeswoman Susan Massel of the overseeing Regional Transit Authority, noting that the CTA, Metra, and Pace collaborated on the regional transit strategic plan the RTA approved in January. It calls for $30 billion in funding for transit infrastructure projects in the region, and Massel says all four agencies have committed to lobbying together for a steady annual revenue stream of $2 to $3 billion for capital investments.

But transit advocates argue that this cooperation is the exception that proves the rule.

"There are well-documented and systemic governance and financing problems that make the lack of cooperation between transit agencies predictable," said Active

Transportation Alliance executive director Ron Burke. "From the slow journey to a universal fare card, to funding decisions not tied to a strategic transit vision for the region, to the inability to convert the Metra Electric into a CTA-style service in Chicago, these shortcomings are a function of systemic problems."

Center for Neighborhood Technology executive director Scott Bernstein noted that the CTA and Metra still vie with each other for infrastructure grants from the Federal Transit Administration. "They don't lobby together and they don't put in joint applications, so in what way could you say that they aren't competing in that regard?"

Bernstein said he'd also like to see the RTA, the CTA, and Metra, which each have separate programs for promoting transit-oriented development, work together on this front, something that could not only save money but potentially attract more private-sector investments.

CTA spokeswoman Catherine Hosinski and Metra spokesman Michael Gillis point to the new Loop Link bus rapid transit corridor and the new Union Station Transit Center, which make it easier to transfer from Metra trains to CTA buses, as one example of the agencies' cooperation. And they maintain that the region already has an integrated fare payment system of sorts—the Ventra smartphone app lets CTA and Metra riders add value to their cards and permits Metra passengers to purchase tickets onboard without a surcharge.

Metropolitan Planning Council director Audrey Wennink noted that in some parts of the region the CTA and Metra vie for a larger cut of local sales tax revenue. Of course, they also compete for revenue from customers, and Wennink said it's understandable the agencies are dragging their feet about really integrating fares as opposed to merely sharing the Ventra app. "If a rider who transfers from Metra to CTA only has to pay a small transfer fee and not the full CTA fare, as is the case now, who absorbs that loss in revenue?" she asked.

One thing the agencies and the advocates can agree on is that much of the competition between the CTA and Metra is due to a factor beyond the agencies' control: there isn't sufficient investment in transit. "The funding pie needs to be bigger so we are both adequately funded," Gillis said. Instead, Illinois's budget deal last summer included cuts to state funding for the CTA, Metra, and Pace. As a result, all three systems raised fares this year. Metra also reduced service on some lines, including the Electric Line's Blue Island and South Chicago branches.

Wennink offered a few suggestions for increasing transit funding, including boosting the state gasoline tax—which has been stuck at 19 cents since 1990—and possibly switching to a distance-based driving tax in the future, so that revenue doesn’t decrease as more people switch from conventional cars to hybrid electric vehicles.

"Ultimately, if the transit agencies weren't so underfunded and not fighting for their lives, they might have more capacity to think creatively," Wennink said.   v

Chicago Tribune

The 5.3-mile $2.3 billion Red Line extension, in a CTA proposal announced Jan. 26, 2018, would fill in what community activists have called a “transit desert” on the South Side. (Antonio Perez / Chicago Tribune)

Elvia Malagon Chicago Tribune

The public will get a chance to check out plans, ask questions and even offer their own two cents about plans to extend the Red Line south of 95th Street at a Tuesday night open house hosted by the CTA.

The event will not include a formal presentation, but CTA staff will be on hand to answer questions from 6 p.m. to 8 p.m. Tuesday at the Gwendolyn Brooks College Preparatory Academy gymnasium at 250 E. 111th Street.

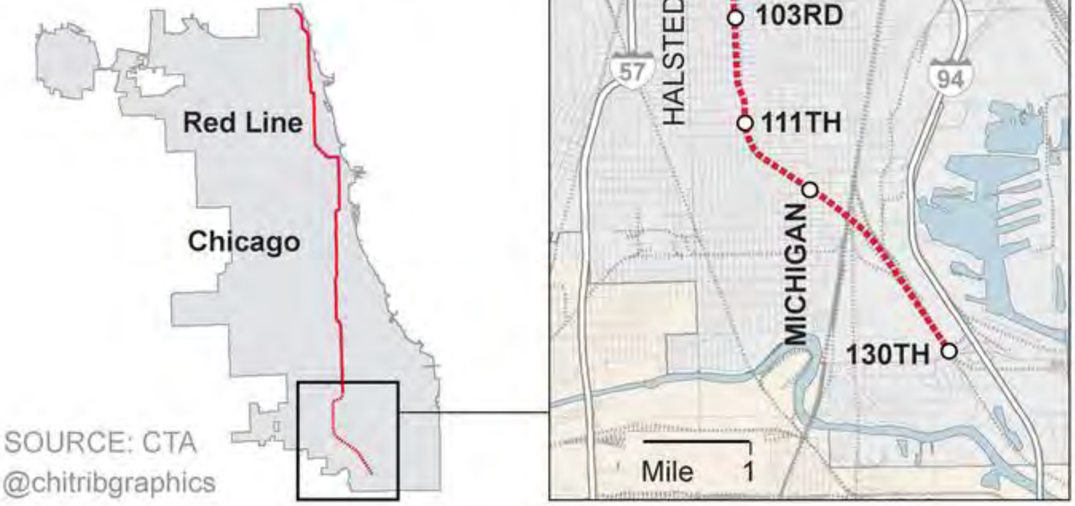
ADVERTISING

Last month, the CTA announced the planned route for a 5.3-mile Red Line extension through the Far South Side in an area some activists have deemed a “transit desert.” But questions loom about how to pay for such a huge project.

The proposed path starts at 95th Street and would run along the west side of the Union Pacific Railroad tracks from Interstate 57 south to about 109th Street, according to the CTA. From there the line would cross the Union Pacific Railroad tracks and continue along the east side of the tracks until crossing Metra Electric tracks near 119th Street, the CTA says. Then trains would continue south to 130th Street in Chicago’s Riverdale neighborhood.

The proposed plan includes four new stations: 103rd Street, 111th Street, Michigan Avenue and 130th Street.

CTA Red Line extension route



SOURCE: CTA
@chitribgraphics

In the past, community activists have called the area the line would extend to a “transit desert” because residents often have to take long bus rides to access trains headed to the Loop.

At Tuesday’s event, the focus of discussion will be on the preferred path and how the project may affect residents, the CTA said in an email. Residents can give the CTA written and oral feedback on the extension.

Funding for the project remains uncertain; the transit agency has secured federal, state and local funding to do preliminary work such as an engineering and an environmental analysis. Construction likely would not begin before 2022, and the entire project could take about four years to complete.

Those who cannot attend the open house can visit www.transitchicago.com/redeis for more information, including details about properties the CTA could acquire to move the project forward.

South Siders Share Their Thoughts on the Red Line Extension Project

- By James Porter
- Feb 14, 2018

THIS POST IS SUPPORTED BY GOGO charters

Attendees look over plans for the Red Line extension. Photo: James Porter

On February 13, a good-sized crowd of Chicago's South Side residents gathered at Gwendolyn Brooks College Prep in Roseland for a CTA open house. The subject under discussion was the extension of the Red Line past its current 95th Street terminal all the way to 130th Street. While this project has been discussed since the Richard J. Daley Era, this time around it may actually happen. In November 2016, Mayor Rahm Emanuel announced $75 million in funding for preliminary engineering for the extension, and last month the city announced the planned route for the new tracks.

The Preferred Alignment for the Red Line extension. Image: CTA

"The CTA has been working on this since 2006," said Sonali Tandon, senior project manager in strategic planning with for the agency, at yesterday's hearing. "We conducted an analysis which was looking at all the possible alternatives for extending the Red Line. That study was finished in 2009. After that, the CTA started working on the draft for the Environmental Impact Statement." That document was published in October 2016. "At that time we had two options that we presented to the public: the east option and west option of the Preferred Alignment. We had said that we would be coming out back to the public to announce the Select Alignment, which is what this meeting's about."

There has been concern from residents that the construction of new tracks might negatively impact local parks. "The East Option would have impacted two parks, Wendell Smith and Rock Park," Tandon said. "The West Option would have impacted Fernwood Parkway. The preferred alignment would only impact Fernwood Parkway. It is an inactive park; there are are no facilities over there. People could potentially be using it to play, but there is no play equipment over there. We have been working with the Chicago Park District for the past few years, in order to discuss those impacts and to identify mitigations to resolve those impacts. We have identified a replacement park so there would be parks elsewhere that would be used to mitigate the impact to Fernwood Parkway."

Tandon added that there is not enough room in the CTA's existing 98th Street rail yard to accommodate additional service. "The existing rail yard is in the median of the [I-94 / Bishop Ford] expressway," Tandon said. "It is severely constrained, so an extension cannot be accommodated in the same rail yard. We are proposing a new rail yard as part of the project at 120th Street. That would replace the existing yard."

Alderman Anthony Beale talks with residents at the hearing. Photo: James Porter

9th Ward alderman Anthony Beale told me he considers the movement on the Red Line extension be a positive development. “When Mayor Rahm Emanuel first took office in 2011, this was the number one item on the agenda, to make sure that this promise was kept from over forty years ago,” Beale said. “I expressed to him that this is the one item. [Local aldermen] Carrie Austin and Howard Brookins [and I] met with the mayor to make sure this was a priority for the city of Chicago… We’re really excited about how we’re moving forward with this.”

However, local residents seem to have more mixed feelings about the project. “I think it’s a great thing, the Red Line being extended to the Far South Side,” said Deloris Lucas, the leader of the bike group We Keep You Rollin’, who lives in the Golden Gate community. “It should have been incorporated a long, long time ago so that everyone would feel like we were the same type of citizen or resident of Chicago… Right now, the bus ride from 130th to 95th takes almost thirty minutes. That’s ridiculous. Transit should be much faster.”

Attendees Deloris Lucas, James Marshall Jr., and Fatimah Al-Nurridin. Photo: James Porter

Local resident Elaina McLauren would be glad to see the Far South Side get better transit access, but she's concerned about additional train noise. "I think the train should pass 95th street," she said. "But the way that it's being extended is what I have a problem with. It's being extended down the freight train line. I *live* near the freight train line – half a block away. When I chose to move to the Far South Side, it was because the Dan Ryan train was supposed to go down the expressway to 130th street… That was a good route! It didn't bother anybody's property. Now, it's going to bother my *sleep*!"

"The freight train and that CTA train are going to be running at the same time," McLauren added. "They thought it through, but they did not ask the neighborhood. When CTA comes through, the value of my house [will go] *down*. Who wants to live near a train?" She also expressed concern that the construction of the new tracks would damage her home's foundation.

Her companion Tommy McLauren questioned the location of the 130th Street station, which will serve the Altgeld Gardens housing project, but not much else. "When you get out there, there's nothing out there."

South Sider Ronald Jackson questioned Emanuel's motives in pushing for the Red Line extension at this point in the election cycle. "Why now, all of a sudden?" he asked. This is about an election. This is not about us. And if this project does get off the ground, what's the percentage of minorities having contracts?"

Jackson argued that since few Chicago pubic schools teach skills like carpentry, drafting, and welding nowadays, young people on the Far South Side won't be able to compete for jobs building the extension. "How is this gonna benefit us? This is going to benefit Rahm's people, and some of these – I hate to say – Uncle Tom aldermen who sit up here talking about they're for us."

Work on the Red Line wouldn't begin until 2022, and service wouldn't launch until 2026 at the earliest. That's if — and this is a big if — Chicago can secure funding for the $2.3 billion project. Things aren't looking good though, because Donald Trump's recently released infrastructure plan calls for cutting federal funding for transit. Some local transportation experts and advocates have proposed converting the Metra Electric District commuter line to rapid transit service as a quicker, cheaper alternative to building the Red Line Extension.

Steven Garth, Sr.

Minority Contractor will Contribute to Red Line Extension
By Christopher Shuttlesworth

Skidmore, Owings & Merrill, under the direction of Contractor Myron Goldsmith, completed the Chicago Dan Ryan Line in 1969. But due to current track conditions, Red Line riders are now experiencing longer travel times, more-crowded trains and less-reliable service, which has led the city to begin plans of reconstructing and extending the red line, according to the Chicago Transit Authority (CTA).

“It was 43 years ago that the CTA unveiled the newest line the (Dan Ryan),” said Terry Peterson, CTA chairman. “A lot has happened in Chicago since then and the South Red Line has become one of the busiest (L)

systems carrying more than 80,000 people on a week day.”

While Black contractors didn’t participate in building the Dan Ryan (Red) Line during the Civil Rights Movement, today, more Black Contractors like Garth Construction Services Corp., are Helping with the $2.3 billion dollar expansion of the Red Line.

Steven A. Garth Sr., chief executive officer (CEO) of Garth Construction Services Corp., a minority (MBE) family-owned operating company, and co-founder of Black Contractors United, said he is excited to be contributing to the work on the Red Line extension.

“I’m more than enthused due to the fact that we’ve worked on the Blue line, Green line and Brown line,” Garth Sr., said. “The Red Line is in our neighborhood and I’m happy.”

Garth Sr., graduated from Olive Harvey College in 1981 with two associate degrees in Construction Management and Architectural and Design. He also minored in Building design, Blueprint Reading, Estimating Business Law and Accounting.

In the last 40 years, Garth Sr., has contributed to the Skyline of Chicago, “Brick by Brick,” including the Comiskey Park, McCormick Place II, III and IV, The Harold Washington Library, the Leo Burnett Building, AT&T Corporate Building, O’Hare International Airport, Millennium Park and many Chicago Public Schools.

As the winner of 2016 Outstanding Minority Contractor of the Year, Garth Sr., advises all young contractors to attend a college to obtain trade training.

“They need to go to school to learn how to read blue print, estimate and learn the overall trade,” he said.

The proposed 5.3-mile Red line extension includes four new stations near 103rd Street, 111th Street, Michigan Avenue and 130th Street, according to a city of chicago press release. The project is expected to create an estimated 6,200 jobs including bus and parking facilities at the new stations.

Chicago’s Far South Side Is Finally Getting a Train—And It’s Thanks to Decades of Organizing

Residents hope the transit extension will shorten commutes and bring much-needed jobs.

BY PATRICK CORLEY

There’s a “balancing act,” LaFargue admits, between improving a community and gentrifying it. He cites rent control as a potential solution.

On Chicago's North Side, Michigan Avenue, is home to the Magnificent Mile, a super-dense corridor of gleaming skyscrapers and luxury shopping. But just a few miles south, in the predominantly Black neighborhood of Roseland, the same street serves as a reminder of the great disparities plaguing the city—swathes of vacant land, bricked and boarded windows, seemingly more parking lots than buildings.

Not helping this divide is the fact that Roseland and adjacent neighborhoods Pullman, West Pullman and Riverdale have been cut off from the city’s rail system (the “L”), and the attendant jobs and investment that tend to accompany transit. But at a January 26 press event, Mayor Rahm Emanuel and Chicago Transit Authority (CTA) officials unveiled their plan to finally extend the L’s Red Line by more than five miles, to the southern limits of the city. On February 13, the CTA presented the plan to Roseland at an open house in a school gymnasium, where city officials fielded questions and concerns from residents, many of whom seemed excited—though skeptical in light of the city’s track record of unfulfilled promises.

The four new stations, placed about a mile apart, will drastically reduce commute times for Far South Side residents, who are now forced to take buses as many as 35 blocks before even getting on the train. They may also, residents hope, attract businesses and end food deserts.

This is a victory that Roseland and adjacent communities have spent generations fighting for.

Michael LaFargue is the president of the Red Line Extension Coalition (RLEC), the grassroots collection of organizers driving this massive infrastructure project. There is hope in his voice as he envisions Roseland’s future, imagining a “Magnificent Mile South,” an urban mecca of shopping, parks, theatres and Black-owned business. While gentrification is a fear, LaFargue anticipates that this new connection to the rest of the city will attract businesses and transit-oriented development that can restore Roseland to its former relative glory and beyond.

The RLEC continues the work done by the Developing Communities Project, a nonprofit first led by Barack Obama in the 1980s. But the mission for equal transit began long before that.

Seventeen years after the L first opened, the 1909 Plan of Chicago, co-authored by master architect Daniel Burnham, envisioned beautiful parks and mass public transportation reaching all across the city. As the network evolved throughout the century, this vision came true for the North and West Sides. But the South Side, as LaFargue says, “has been left out.”

In the 1960s, Mayor Richard J. Daley promised to extend the trains beyond 95th Street, but this aim sat on the back burner as the city prioritized other infrastructure ventures. Jacky Grimshaw at the Center for Neighborhood Technology explains that the “supposedly objective” metrics used in deciding what to focus on, such as cost per mile and population density, “were skewed against communities on the Far South Side.”

The Far South Side is more than 90 percent African-American and in the 1970s formed a core of Chicago’s Black middle class. But as manufacturing declined and the city prioritized downtown development, the region saw massive job loss and now has among the city’s lowest median household incomes. Ledall Edwards, owner of Edwards Fashions, laments the “dramatic transition” that Roseland has undergone since his family opened the business in 1974. He says that over the years the city has been unresponsive to local efforts toward re-development, and he worries that the community is “not at the table” for future planning.

LaFargue acknowledges that, when it comes to the Red Line, the CTA has been mostly receptive to the community’s concerns about the path of the extension and the residents that could be displaced.

But he shares many of Edwards’ broader concerns: “Where the private sector fails,” he says, “the government’s supposed to come in and do better. … And it doesn’t seem like they’re doing that.”

The region has been among the hardest hit by recent austerity measures by both city and state government. In 2013, Emanuel’s administration closed dozens of schools on the South and West Sides, including four in Roseland and West Pullman. Roseland Community Hospital, where nearly two-thirds of patients are on Medicaid, is still reeling from devastating cuts caused by a two-year deadlock of the Illinois state budget. Roseland and its neighbors, with the highest percentage of public pension holders in the city, continue to suffer disproportionately from the $130 billion pension crisis, which threatens to slash monthly retirement payouts by as much as 20 percent.

In light of all this, says LaFargue, the extension is a welcome “step forward.”

But advocates recognize that the L extension is a double-edged sword. Alongside the benefits, better transit can lead to increased land values and higher rents that tend to push residents out. There’s a “balancing act,” LaFargue admits, between improving a community and gentrifying it. He cites rent control as a potential solution. Although it’s been outlawed in the state for two decades, rent control has recently been proposed by local lawmakers such as state Rep. Will Guzzardi (D) and Alderman Carlos Ramirez-Rosa.

LaFargue sees worker-owned cooperative businesses as another way to stave off gentrification, and stresses the importance of union jobs. He wants to make sure the wealth generated by Roseland’s new investments stays in Roseland.

The extension is set to open around 2026. Until then, there are some hurdles to clear as the project enters the funding phase. Lawmakers must negotiate concessions from state and local coffers; LaFargue sees a progressive income tax and a financial transaction tax as answers to the project’s $2.1 billion price tag.

But the real need is federal funding, which the city will apply for as it submits an environmental impact study to the Federal Transit Administration. Since the creation of the national highway system, cities have relied on a near-50 percent match in federal funds for this type of infrastructure project. But the current administration is likely to dole out closer to 20 percent, according to Kyle Whitehead at the Active Transportation Alliance, leaving underserved communities like Roseland in limbo.

In the meantime, LaFargue and the coalition will open dialogues for residents to have as much input as possible in deciding which developments will arrive at each station. The people of Roseland, LaFargue says, are “not just sitting there waiting. … We’re working.”

Would far-south-siders be willing to swap the long-awaited Red Line extension for a cheaper, quicker solution?

Residents of Roseland, Pullman, and other neighborhoods south of 95th weigh in on the Electric Line conversion.

By John Greenfield @greenfieldjohn

click to enlarge

Lelea Herring near the planned location of the 103rd Street Red Line stop

JOHN GREENFIELD

Thanks to Donald Trump, the funding outlook for the long-awaited $2.3 billion Red Line extension—proposed and postponed since the Nixon administration—looks pretty bleak right now.

In late January, Mayor Rahm Emanuel announced the planned route south from the current stopping point of 95th, winding 5.3 miles across Roseland and Pullman to Altgeld Gardens, with stations proposed near 103rd, 111th, Michigan at 116th, and 130th Streets. At the time the CTA was hoping to apply to the Federal Transit Administration for upward of $1 billion from its New Starts grant program, the main source of federal funding for public transportation expansion projects. But Trump's much-ballyhooed $1.5 trillion infrastructure bill, released February 11, contains no new revenue and, to make matters worse, his 2019 budget proposal calls for slashing $3.7 billion from New Starts. It looks like it might be impossible to fund the extension until a Chicago-friendly Democrat is in the White House again. Even in a best-case scenario, construction wouldn't begin until 2022, and service wouldn't start until 2026.

But for decades transit experts and advocates have pointed to a much cheaper alternative for bringing rapid transit to the far south side. The Metra Electric District line runs more or less parallel to the Red Line and makes eight stops in the neighborhoods that would be served by the extension. It would be relatively easy to convert it to el-style frequent service and integrate its fare system with the CTA. And while the Red Line project breaks down to $434 million per mile, local policy analyst Daniel Kay Hertz has estimated that converting Metra for the purpose would cost only $27 million a mile.

So far, however, discussion of this alternative possibility has been missing some important voices: those of the residents who'd stand to gain the most from the service extension. Would they be willing to trade a longer Red Line for cheap, frequent Metra service if it meant getting the improvements sooner than later?

To find out, I rode the train to 95th and traced the path of the proposed extension, buttonholing neighbors near the planned station locations.

From 95th the new tracks would run south along the Dan Ryan, then bend west along the north side of I-57 for about half a mile. Near Eggleston Avenue the Red Line would head south along the west side of the Union Pacific Railroad corridor.

At 103rd and Eggleston I met Lelea Herring, a retired surgical technician who lives nearby. She regularly takes the 103rd Street bus to the Red Line, rides north to Roosevelt, and then takes another bus west to Damen to see her doctor on the Illinois Medical Campus.

Herring was somewhat familiar with the Red Line extension plan. "It's convenient for me because it brings the train closer," she said. When I told her that it wouldn't be ready to ride until 2026 she wondered, "Oh Lord, will I even be here?" But she noted that rapid transit service on the Electric Line wouldn't do her much good either—the 103rd Street/Rosemoor Metra station is about the same distance from her home as the 95th Street terminal.

Around 108th Street the proposed Red Line route would cross to the east side of the Union Pacific tracks and continue south. Near the planned 111th station location I encountered Bruce Huskin, 58, who lives just south and works as a handyman. While he's enthusiastic about the possibility of having an el stop right by his house, he said inexpensive, frequent service on the Electric Line would also be useful for getting downtown, since he could ride a bus about a mile east to the 111th/Pullman Metra stop. "Whichever comes first, I'd be really excited for," he said.

After 111th, the Red Line would continue to hug the Union Pacific line as the railroad turns southeast and climbs an embankment to an overpass near 116th and Michigan. There I met Anthony Brown, 34, who lives near 115th and State and serves as a Safe Passage worker for Curtis Elementary, which is right by his home. On February 13 the CTA held an open house about the extension at nearby Gwendolyn Brooks College Prep. He said his neighbors and coworkers are looking forward to getting a Red Line stop nearby.

"We'd kind of given up because we hadn't heard anything for a while, but now the city is buying properties and asking questions," Brown said. "That's something a lot of us are really happy to see."

On the other hand, Brown said, if the Red Line extension wouldn't open for another eight years or more, the Electric Line conversion might be a good consolation prize. It would still be convenient for him—the 115th/Kensington station is about a ten-minute walk east from his house. And because the current Metra fare to the Loop is $5.50, paying the $2.50 CTA fare instead would be a significant savings.

After Michigan, the Red Line extension would continue southeast, cross the Electric Line, and join the South Shore Line corridor on its way to the future 130th Street station, located just northeast of Altgeld Gardens. Residents of that community would benefit greatly from the new el stop, since it would cut an estimated 20 minutes from their downtown commutes. The nearest Chicago Metra stop is at 121st and Michigan, about a ten-minute ride from the middle of the housing project via the #34 South Michigan bus.

At the point where the South Shore tracks pass under 130th Street, the thoroughfare is a high-speed four-lane road with no sidewalks and little foot traffic, so I headed west a few blocks to Rosebud Farms grocery store to talk with locals. There I spoke with

Sam McCarthy, a construction worker who lives three miles northwest at 122nd and Elizabeth, right by the Electric Line’s Racine station.

Although the Metra solution would give him inexpensive, frequent train access, he favors the Red Line extension. “[The Electric conversion] would be a good idea too, but it wouldn’t create as many construction jobs,” he said.

Obviously the pros and cons of the Red Line project and the Metra Electric conversion depend on where you live and where you need to go. But the latter definitely deserves further consideration. Far-south-siders have already been put off since the 70s. They shouldn’t have to wait until the Trump administration is just a bad memory before they get rapid transit service.

Re: CTA Red Line Extension Project
Update - Preferred Alignment Selected

Dear XXXXXX:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line–CTA's busiest rail line–south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

Your agency has previously accepted to be a participating agency for this project. All interested parties are invited to attend the upcoming public open house, during which CTA will present information about the Preferred Alignment and anticipated project benefits and impacts. The open house will be held at the time and location described below. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project Update - Preferred Alignment Selected
Draft Environmental Impact Statement

Dear Mr. Westlake:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line–CTA's busiest rail line–south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options. FTA and CTA received letter dated November 29, 2016 from USEPA, which rated the RLE Draft EIS as Lack of Objections and provided recommendations for the Final EIS. We would like to thank you for your review of the Draft EIS and recommendations for the Final EIS.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or

West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

The Final EIS will be prepared on this single selected option. CTA recognizes your recommendations for the Final EIS related to Environmental Justice and Community Engagement, Noise Impacts and Mitigations, Air Quality Impacts and Mitigations, Station and Station Area Development, Climate Change Adaptation and Resiliency, and Wetland and Natural Areas. We will consider these recommendations to add clarifications, conduct additional analysis, add supplemental documentation, and further develop and finalize the mitigation measures in the Final EIS. All correspondence including approved mitigation measures and commitments will be included in the Final EIS.

All interested parties are invited to attend the upcoming public open house, during which CTA will present information about the Preferred Alignment and anticipated project benefits and impacts. The open house will be held at the time and location described below. Representatives from your agency are encouraged to attend.

RE: CTA Red Line Extension Project Update - Preferred Alignment Selected
Draft Environmental Impact Statement

Dear Ms. Hunter:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options. FTA and CTA received letter dated November 29, 2016 from USEPA, which rated the RLE Draft EIS as Lack of Objections and provided recommendations for the Final EIS. We would like to thank you for your review of the Draft EIS and recommendations for the Final EIS.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

The Final EIS will be prepared on this single selected option. CTA thanks you for your comment on the Draft EIS, which was published in October 2016. We will contact you if human remains and/or cultural objects are discovered, regardless of initial determination as to site dating or cultural affiliation, to initiate consultation.

All interested parties are invited to attend the upcoming public open house, during which CTA will present information about the Preferred Alignment and anticipated project benefits and impacts. The open house will be held at the time and location described below. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project Update - Preferred Alignment Selected
Draft Environmental Impact Statement

Dear Ms. Nelson:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line–CTA's busiest rail line–south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options. FTA and CTA received letter dated November 29, 2016 from USEPA, which rated the RLE Draft EIS as Lack of Objections and provided recommendations for the Final EIS. We would like to thank you for your review of the Draft EIS and recommendations for the Final EIS.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

The Final EIS will be prepared on this single selected option. CTA thanks you for your comment on the Draft EIS, which was published in October 2016, and your concurrence with the determination that all measures to minimize harm have been employed concerning the resources subject to Section 4(f) use. As part of the Final EIS, FTA and CTA will continue to work with the Chicago Park District to finalize mitigations.

All interested parties are invited to attend the upcoming public open house, during which CTA will present information about the Preferred Alignment and anticipated project benefits and impacts. The open house will be held at the time and location described below. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Update - Preferred Alignment Selected

Dear XXXXXX:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

Your agency has previously accepted to be a participating agency for this project. All interested parties are invited to attend the upcoming public open house, during which CTA will present information about the Preferred Alignment and anticipated project benefits and impacts. The open house will be held at the time and location described below. Representatives from your agency are encouraged to attend.

WE WANT YOUR INPUT

on the Red Line Extension (RLE) Project

Based on public feedback, technical analysis, and agency coordination, CTA has selected a Preferred Alignment for the RLE Project that is a combination of the previously presented East and West Options. The Preferred Alignment would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement (EIS). CTA is interested in your feedback about the project. Please **PRINT**.

QUEREMOS SABER SU OPINIÓN

sobre el Proyecto de Expansión de Línea Roja (RLE)

Basándose en los comentarios del público, análisis técnico y coordinación de las agencias, CTA eligió el alineamiento preferido para el proyecto de RLE, el cual es una combinación de las opciones este y oeste presentadas anteriormente. El alineamiento preferido captaría los beneficios y minimizaría los impactos de cualquiera de las opciones. Además, incorpora los comentarios recibidos sobre el borrador de Declaración de Impacto Ambiental (DIA). A CTA le interesan sus comentarios sobre el proyecto. Por favor **ESCRIBA EN LETRA DE IMPRENTA.**

Welcome to the
Red Line Extension Project
Open House

The purpose of this open house is to:

- Share information about the Preferred Alignment of the Red Line Extension (RLE) Project
- Share information about anticipated project benefits and impacts

If you have questions, feel free to ask the representatives stationed around the boards and at workstations. There will be no formal presentation.

You may leave your comments with us today, or send a comment card to this address:

✉ **Chicago Transit Authority**
Strategic Planning, 10th Floor
Attn: Red Line Extension Project
567 W. Lake Street, Chicago, IL 60661

Moving Ahead to a Better Red

Red Line Extension

RLE Project Purpose and Need

Project Purpose

The RLE Project would reduce commute times for residents, improve mobility and accessibility, and provide connection to other transportation modes. The RLE Project could also foster economic development, where new stations may serve as catalysts for neighborhood revitalization. The RLE Project would also provide a modern, efficient car storage yard and shop facility.

Needs to be Addressed

- Transit trips to jobs are longer for Far South Side residents then they are for passengers in the Chicago seven-county region as a whole.
- Transit-dependent populations in the project area have limited direct access to rapid transit rail service.
- The project area is geographically isolated from major activity centers and provides residents limited viable transportation options, which limits access between affordable housing and employment centers outside the project area.
- Existing transit markets are underserved and transit connectivity is challenging in the project area.
- Disinvestment and limited economic development in the project area have negatively affected Far South Side communities.
- The existing 98th Street Yard does not have capacity to store rail cars for any substantial increase in Red Line capacity accompanying future Red Line expansion.

RED AHEAD

Moving Ahead to a Better Red

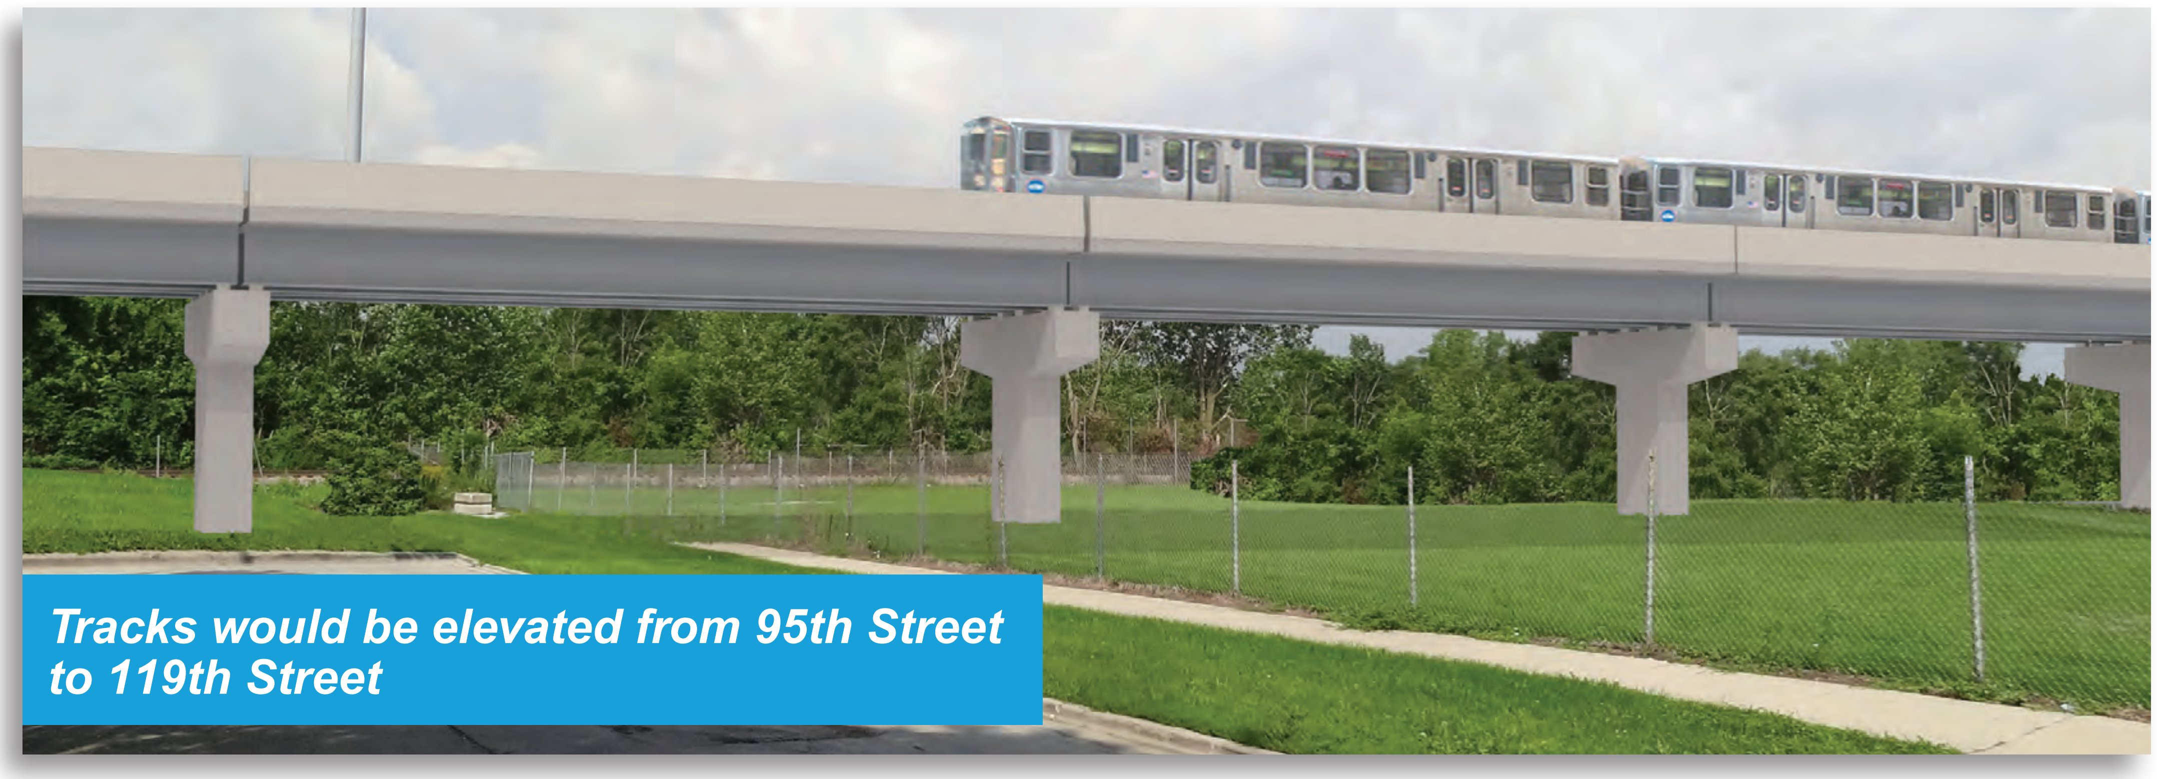
Red Line Extension

Preferred Alignment

Based on public feedback, technical analysis, and agency coordination, CTA has selected a route that would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

Project Benefits	East Option	West Option	Preferred Alignment
Minimizes Affected Parcels	☒	☑	☑
Minimizes Affected Residences	☒	☑	☑
Minimizes Affected Businesses	☑	☒	☑
Avoids Impact to Historic Roseland Pumping Station	☒	☑	☑
Maximizes Economic Development Opportunities	☑	☒	☑

The Preferred Alignment is a combination of the previously presented East and West Options. It would capture the benefits and minimize the impacts of either option, and it also incorporates feedback received on the Draft Environmental Impact Statement.



Tracks would be elevated from 95th Street to 119th Street

Note that appearance of project elements (such as parking structures, beams, columns, etc.) in visualizations is intended to show scale of project elements. Actual construction appearance may differ based on design decisions for colors, textures, finishes, and choice of specific design features.

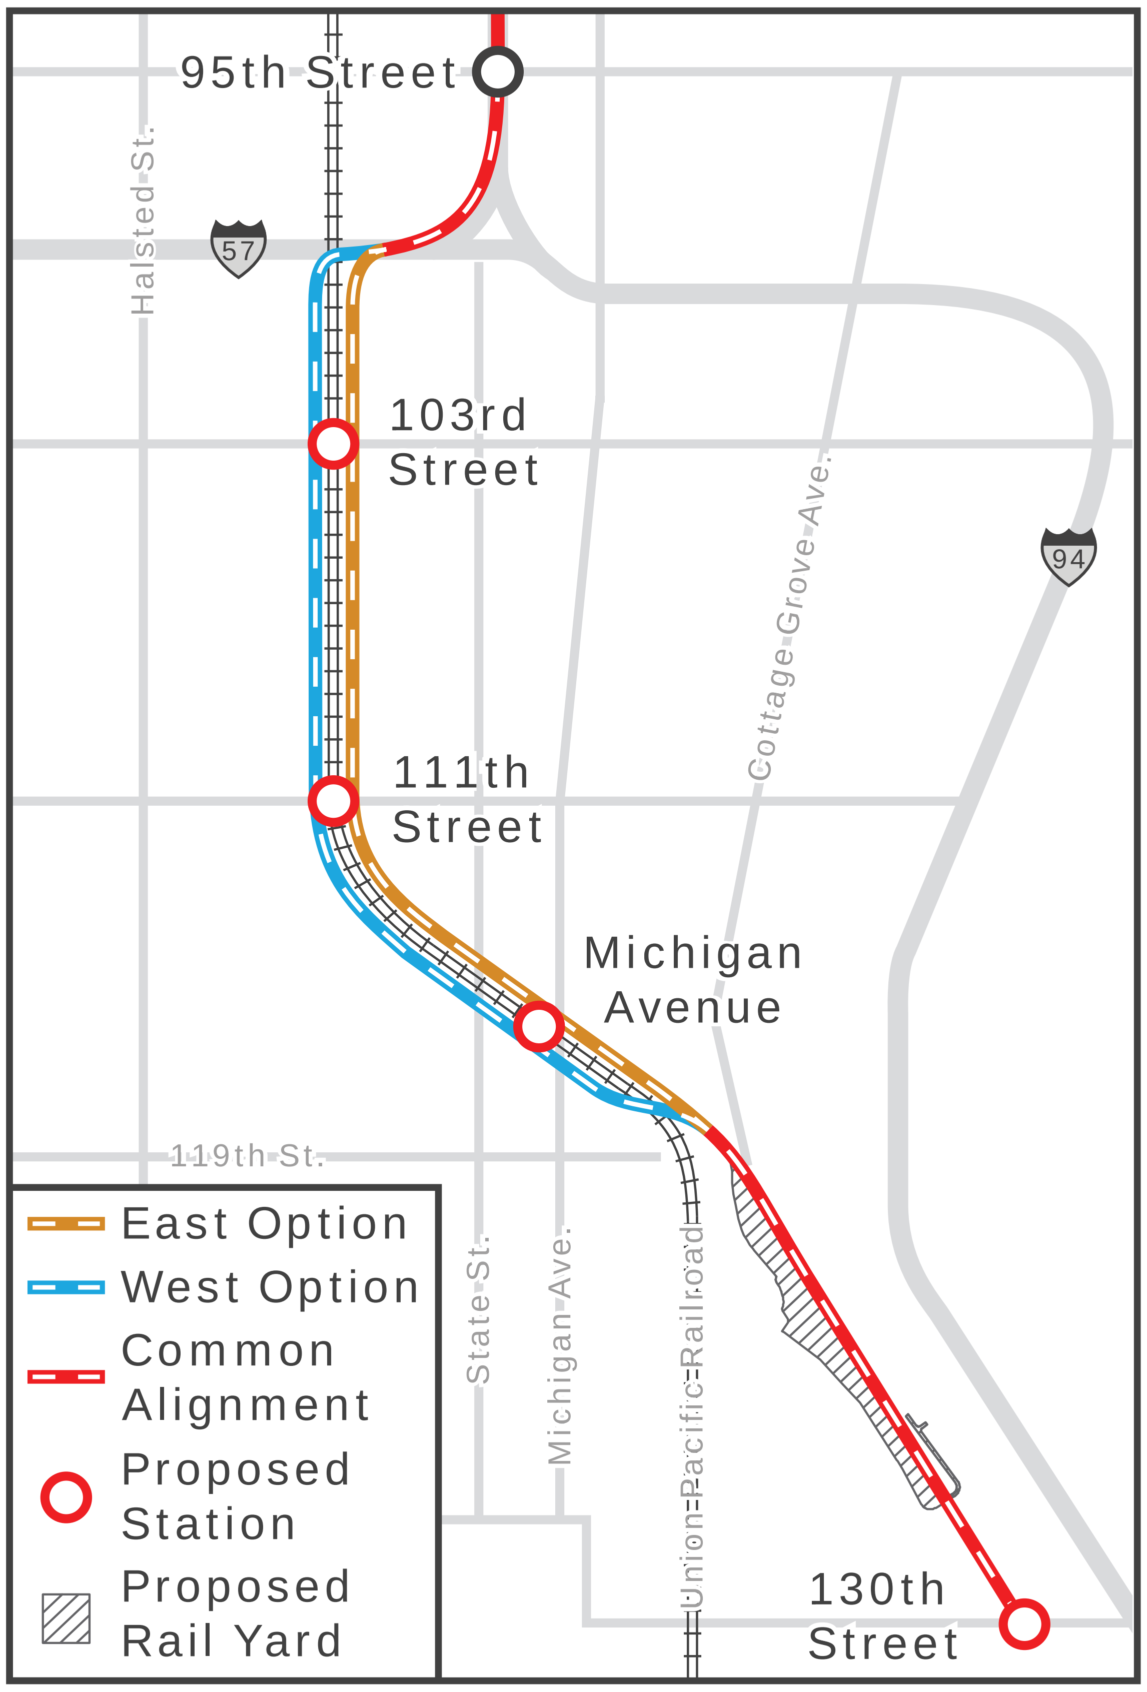
Preferred Alignment

- Same as the ***WEST OPTION*** north of ***108th Place***
- Same as the ***EAST OPTION*** south of ***108th Place***
- Same as the ***COMMON ALIGNMENT*** north of ***99th Street*** and south of ***119th Street***

Previously Considered Options:

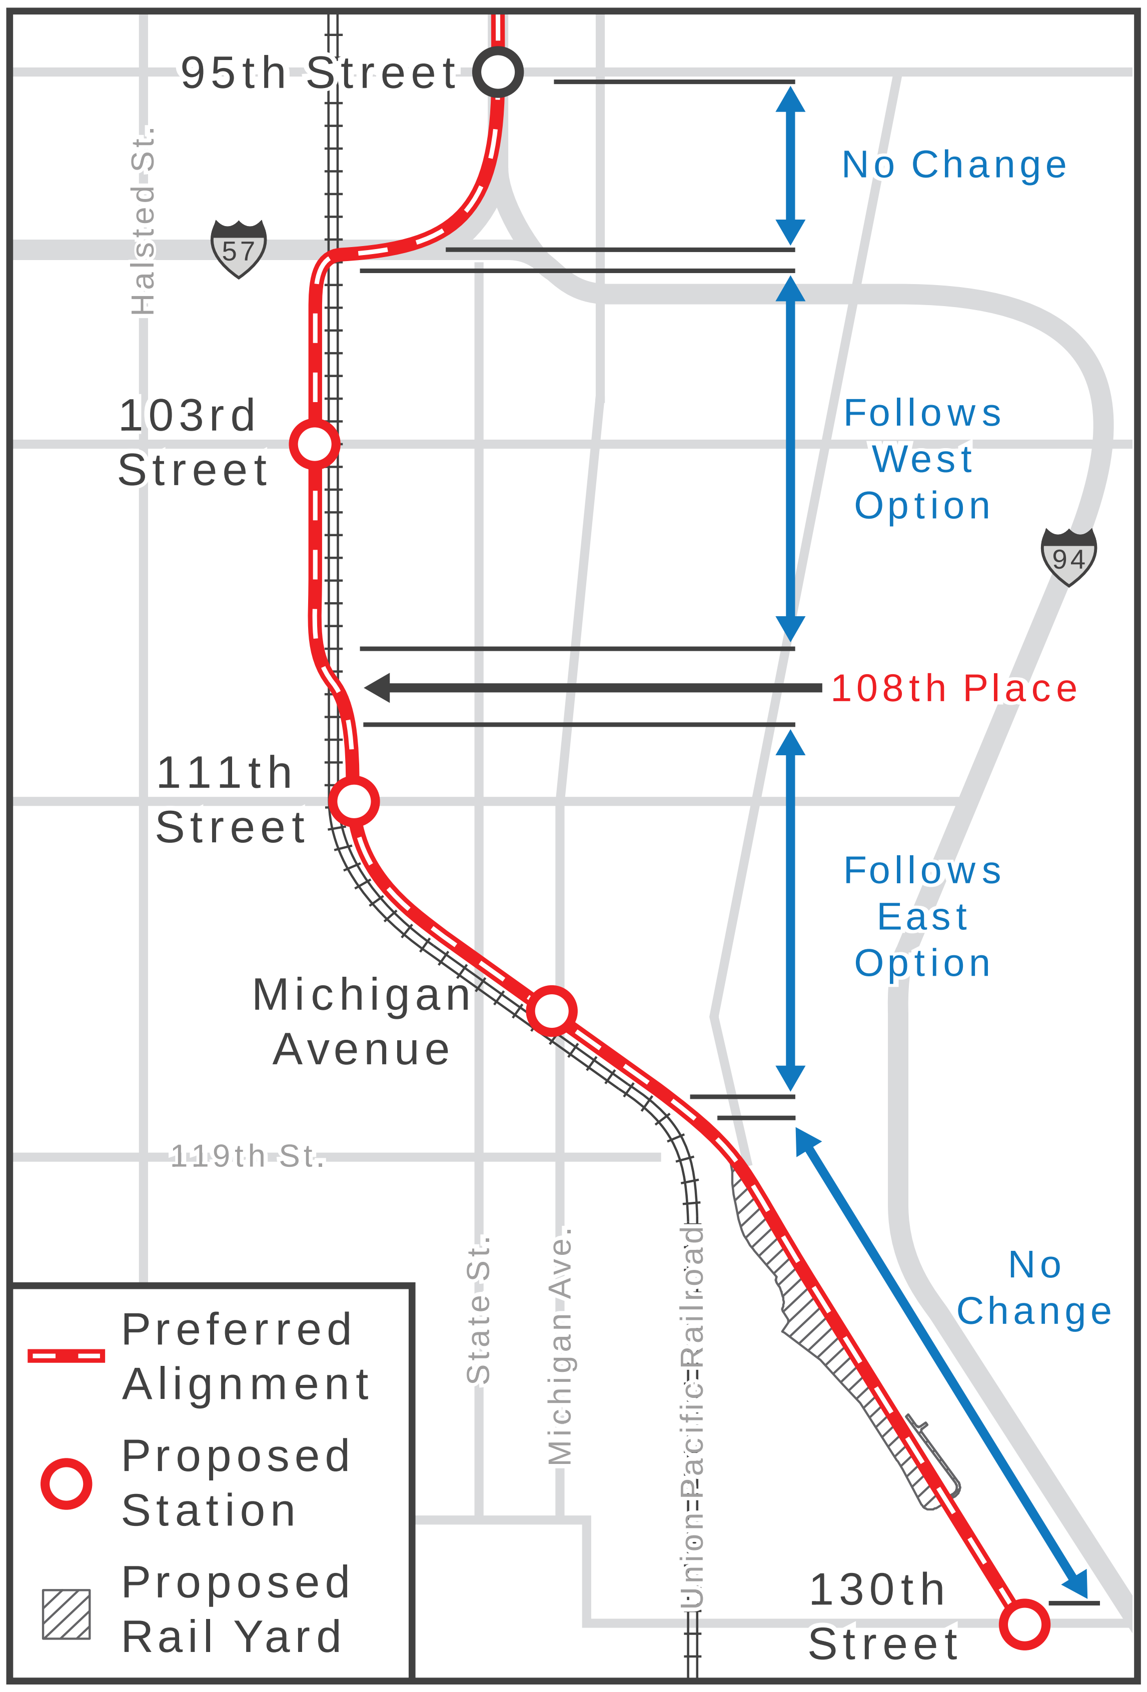
East OR *West*



95th Street
Halsted St.
57
103rd Street
94
Cottage Grove Ave.
111th Street
Michigan Avenue
119th St.
State St.
Michigan Ave.
Union Pacific Railroad
130th Street
East Option
West Option
Common Alignment
Proposed Station
Proposed Rail Yard

Combination of Options Selected:

Preferred Alignment



95th Street
Halsted St.
57
No Change
103rd Street
Follows West Option
94
108th Place
111th Street
Follows East Option
Michigan Avenue
119th St.
No Change
State St.
Michigan Ave.
Union Pacific Railroad
130th Street
Preferred Alignment
Proposed Station
Proposed Rail Yard

We Heard You!

CTA received 284 comments during the comment period for the Draft Environmental Impact Statement.

By the numbers

- **155** commenters provided input on whether they prefer the East or West Option
- **52** commenters asked about the public outreach process, and how to stay involved
- **45** commenters expressed concern about property displacements
- **44** commenters expressed concern about noise and vibration
- **39** commenters remarked about how the RLE Project would affect transportation in the project area, including parking
- **34** commenters had questions about the project timeline
- **33** comments asked about the alternatives considered

cta

Property Displacements

Construction of the project would require the acquisition of private property.

The Preferred Alignment would affect *fewer residences* than the East Option, and *fewer businesses and jobs* than the West Option.

Parcels	Preferred Alignment
Affected Parcels without Building Displacements	**157**
Affected Parcels with Building Displacements *(Residential Building Displacements)*	**79** *(59)*
Total Affected Parcels *(Affected Private Parcels)*	**236** *(154)*
Affected Businesses *(Full-Time Jobs)*	**5** *(6)*

- Impacts are based on conceptual engineering and represent the maximum impacts.
- Impacts will be confirmed in the Final EIS after more detailed conceptual design.
- Availability of vacant parcels and buildings near the affected properties will likely allow for affected businesses and residents to relocate within the project area.

RED AHEAD

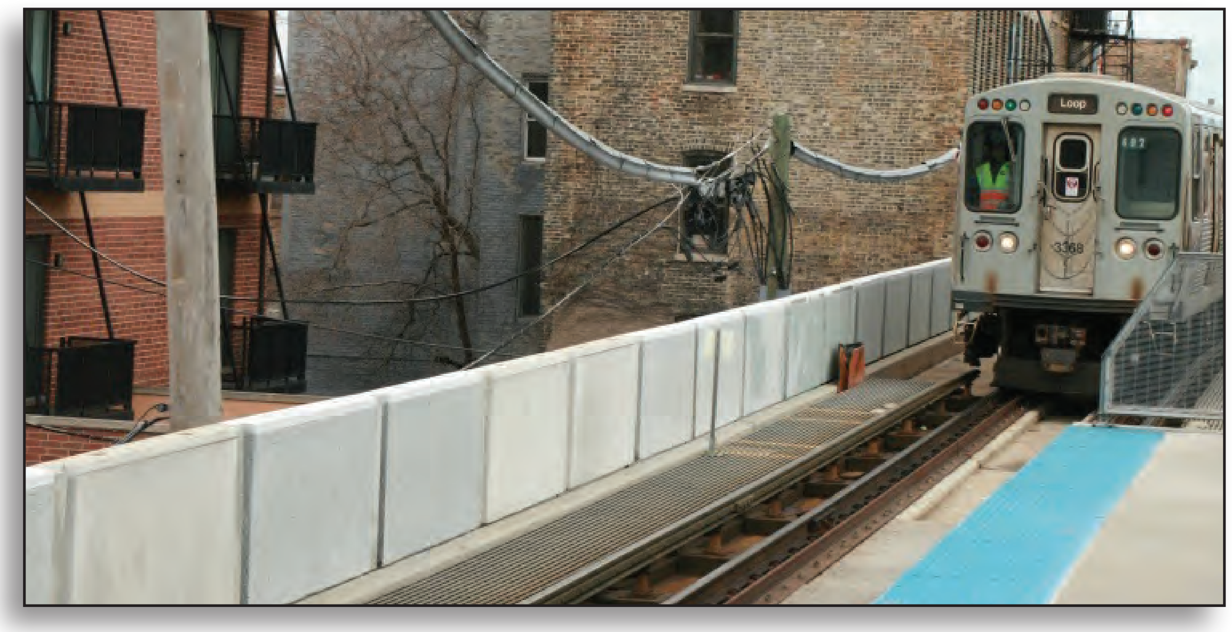
Moving Ahead to a Better Red

Red Line Extension

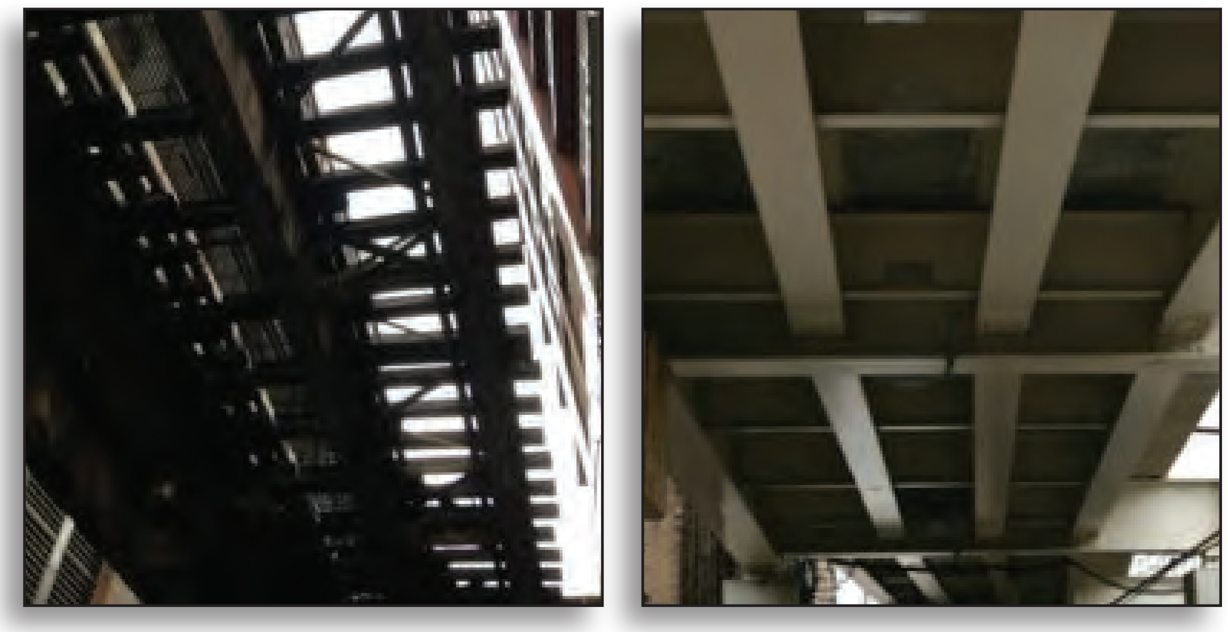
Noise and Vibration Impacts

What would CTA do to reduce, or mitigate, noise from the elevated track structure?

- Install noise barriers, which absorb and reduce noise from the tracks by 10 decibels.
- Use a closed-deck structure, which limits transmission of noise beneath the tracks.
- Use continuous welded rail, which has fewer joints and means a smoother and quieter ride.



Noise Barriers



Open versus Closed Deck

These mitigation strategies would resolve all potential severe and moderate noise impacts due to the project.

What about vibration?

Based on the analysis, the project would result in no impacts from vibration.

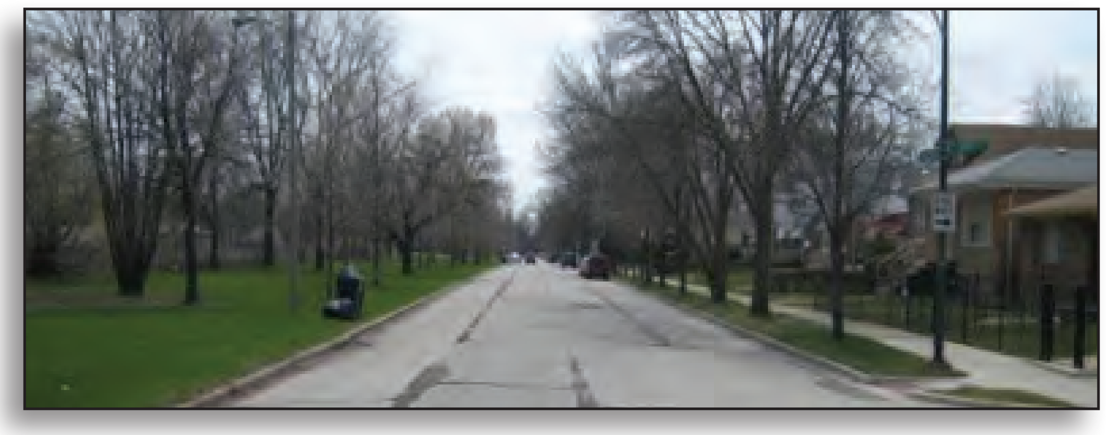
Because the CTA train cars are lighter and carry less weight (freight) than the freight trains that pass through the project area, vibration levels would not exceed FTA thresholds and no mitigation measures would be required. Elevated track structures also transmit less vibration through the ground than at-grade tracks.

RED AHEAD
Moving Ahead to a Better Red

Red Line Extension

Section 4(f) - Impacts to Parks

Section 4(f) of the USDOT Act of 1966 is a federal law that establishes special considerations and requirements when publicly owned parks or recreational areas are proposed to be used by a transportation project.



Fernwood Parkway

A portion of Fernwood Parkway would be affected Temporary closure of the overlapped section of Fernwood Parkway would be necessary during construction. There would also be a short-term closure of Wendell Smith Park during construction, but no permanent impacts.

Addressing Impacts to Fernwood Parkway

CTA has worked with the Chicago Park District to identify ways to minimize this park impact and, where possible, enhance community access to parks.

Mitigation Measures for Fernwood Parkway

- Provide a new replacement park in or near affected community area
- Restore or landscape any disturbed areas on affected parkland
- Incorporate context-sensitive design features at affected parks
- Potentially install a new bike path beneath the elevated structure

Potential Replacement Park Concepts

CTA worked with the Chicago Park District to develop replacement park options in the surrounding community. These are two locations currently under consideration. CTA will work with the Chicago Park District during the Final EIS to confirm a preferred location for park replacement and conduct additional analysis and outreach.

Quick Facts about Acquisition and Relocation

The property acquisition and relocation process is governed by the federal Uniform Relocation Assistance and Real Property Policies Act of 1970 (also known as the "Uniform Act"), which outlines the rights of owners and tenants of business and residential properties.

The process includes two main parts:

Acquisition – The purchase of your real estate. Property owners would not be paid less than fair market value for their land and buildings. In some circumstances, if current appraisals are less than the original purchase price, an owner may be eligible for compensation equal to the original purchase price.

Relocation – Additional benefits offered should you or your business be displaced. CTA will provide a relocation agent to every displaced person to help navigate the benefits that are available. Residential homeowner financial benefits may include:

1. Moving and Related Expenses
2. Replacement Housing Payments
3. Incidental Closing Costs

CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured.

cta

RED AHEAD

Moving Ahead to a Better Red

Red Line Extension

Next Steps and Timeline

Now that CTA has selected the Preferred Alignment, a Final Environmental Impact Statement will be prepared and preliminary engineering will be conducted. CTA and FTA will complete any additional analyses and respond to public comments on the Draft EIS as part of the Final EIS.

On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next 5 years for the RLE Project, which will allow for completion of these next steps.

CTA will apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase of this project to pursue federal funding for construction of the project under the competitive federal “New Starts” program.

Project Development and full funding for the RLE Project under this program is a multiyear, multistep process.

CTA will continue to work with the community to complete this important project.

WE WANT YOUR INPUT

on the Red Line Extension (RLE) Project

Based on public feedback, technical analysis, and agency coordination, CTA has selected a Preferred Alignment for the RLE Project that is a combination of the previously presented East and West Options. The Preferred Alignment would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement (EIS). CTA is interested in your feedback about the project. Please **PRINT**.

Name MICHAEL BROWN
Address 1522 E. 85TH STREET
City CHICAGO **State** IL **Zip** 60619
Email Address mbro92@gmail.com

Please describe your questions or concerns.

I am excited about the Redline Extension, but I live North of 95th Street.

1. Why isn't there a Park N Ride at 95th St or 87th Street? People that live near the Dan Ryan are not going to drive South to a parking garage when they work downtown.

2. Please consider utilizing the old Kennedy King College land at 67th + Vincennes as a Park N Ride. It could help reduce traffic on the Dan Ryan Exwy. The Redline could really use a Parking Lot. I would ride the Redline more if I could park closer instead of taking 2 buses to get to the Redline.

3. Since CTA ~~is~~ will be using FTA funds, is CTA awarding contracts to allow the Architect of Record and the Engineer of Record to be a DBE? CTA is building this project in a neighborhood that is primarily African-American. Please consider making the Prime Contractor an African-American Design Firm and most of the Subcontractors DBE firms.

Please describe your questions or concerns.

1. Parking GARAGE @ 116th St. - Will the parking GARAGE DESIGN CONSIDER THE AMOUNT OF TIME NEEDED TO ENTER THE GARAGE DURING PEAK RUSH HOUR? WILL THERE BE ENOUGH ENTRANCES IN ORDER TO ENTER THE GARAGE QUICKLY RATHER THAN BACKING UP THE QUEUE DOWN THE STREET DUE TO LIMITED ENTRANCE GATES?

2. HOW WILL PEOPLE BE ABLE TO PAY FOR PARKING? TRADITIONAL TICKET? PAY BY VENTRA? SPOTHERO? PARK WHIZ. HOW QUICKLY CAN PEOPLE ENTER/EXIT THE GARAGE.

3. WILL THE BRIDGE OVER THE METRA ELECTRIC ~~BE INSPECTED~~ BE INSPECTED? METRA ELECTRIC MAY HAVE LIMITATIONS THAT SLOW DOWN CONSTRUCTION DUE TO THE AIR RIGHTS AND [illegible] TIMES ALLOWED TO BUILD. OR LIMITED TIMES AVAILABLE TO PERFORM BRIDGE INSPECTIONS.

Thanks for this great event. As an urban planning grad student at UIC, I worked on a 10-year plan for the Riverdale area / 130th st. station of the RLE. Throughout that process, ~~[illegible]~~ one big takeaway was the importance of strong local economic development policy/programming to make sure that residents will be in the best position to be able to leverage the RLE. Having strong local retail and better local employment opportunities in place before the RLE comes will go a long way in helping the communities along the line use the extension as a real asset + economic catalyst. What a great opportunity for Chicago's South Side. Thanks!

I'm in favor of the prefferred alignment and I'm glad it was selected over the bus rapid transit option.

There are a large number of people living s/w of the proposed 130th station in Altgeld Gardens, and also E of the station in Hegewish. The station will not be pedestrian friendly for either group. I would like to see transit connections from the station to the existing neighborhoods to account for the "last mile" between the station + home. Potentially an extension of an E-W bus on 130th to touch Hegewisch, or, an extension or reroute of the #30 to include the new station. Anything other than needing a car to access the transit! Thank you.

When will this project be finished?

When the extension is completed, will there be more buses as far as you extend the rail service?

This morning there was a freight train that stopped right there where buses had to be rerouted, will this happen with this new extension?

Will most of the buses run all night once the project is completed?

Who provided the funding for this extension project?

I pray that the services that you give to the Northwest side e.g. extending the blue line to O'Hara that those live on the Southside will not have to wait so many years just to get an extension.

When will these busses start running in the morning and will there be an easy ascess for the riders to get to those busses?

My concerns are solely based on how would this effect
my living situations, sure the added business helps
create jobs & in some cases beautifies the area for a short
while. But this type of business can lead to me and
my family not being able to have a peace of mind with
outdoor activities like sitting on the porch.
Losing the privileges of being able to park outside
in front of my home due to the fact that
people will park their cars while at work.
People loitering
People littering causing my lawn many of
problems
Homeless people hanging out more frequently
Gang members finding common grounds to fight
My neighborhood "103rd place" off Princeton
is full of senior citizens we have lived
here over 30 + years this change will not
improve the area
Will there be parking permits issued

I would recommend that the artwork in the Stations reflects their prospective communities. I think that the artwork should be done fully or partially by residents in that community. Even if a professional, well-known artist is used, residents should be included in the process of creating the artwork. This would be a great opportunity for aspiring artists in our communities.

Contests could be created to help select artists.

If the artwork reflects and includes the community, more pride will be taken to keep the stations in good condition.

Community participation is key!

Thank you.

Over →

Additional Comments: I also recommend that empowerment zones be created in order to improve present businesses in the community, and create new businesses.

there is a great need for light industry in this community.

Extending The Red Line From 95th to 130th would provide direct access to the neighborhoods it would serve & could eliminate the need for buses that run along 103rd & 111th Streets to serve 95th. 103 103rd could run directly east to the 103rd/Stony Island Garage Terminal. 111 111th could run directly east to the east terminal currently served by 111A Pullman Shuttle.

NEIGHBORHOOD ~~COMMUNITY~~ BOUNDARDES

91^{ST} TO 95^{TH}
STATE STREET TO KING DRIVE

Over →

CTA RED LINE EXTENSION TO 130TH STREET

Proposal: The south section should be deleted and replaced by frequent express bus service to the 95th Street station.

The south section of the proposed Red Line Extension, from the 116th Street station to the 130th Street station will serve a discrete neighborhood.
The cost to build this double-tracked L line, the 130th St station, and associated traction power facilities will be very expensive.
The number of neighborhood residents using the new 130th St Station is likely to be very small: a tiny fraction of the line section's capacity.
Therefore, the construction and operating costs per rider using the 130th St station will be extremely high.

The location of the 130th St station –beyond a corner of the neighborhood served- will be inconvenient for most of the neighborhood's residents. Consider how long and inconvenient the walk will be from most of the neighborhood to the station.
A frequent bus service that circulates through the neighborhood before expressing on the Bishop Ford (*shoulder?*) to the 95th Street L station would be much more convenient to access and offer similar trip times compared to walking to the L station and then riding the train.
If rider demand warranted, direct rail transit service from the neighborhood to Hyde Park and the Loop could be inexpensively provided by building a modest station on the South Shore Line adjacent to the east side of the neighborhood. On a weekday morning between 5:00 am and 8:30 am, eight inbound South Shore trains could stop at this new station. {The South Shore currently serves the Hegewisch station in Illinois.} Ride time would be about 15 minutes to Hyde Park (which the Red Line does not serve) and 30 minutes to downtown Chicago at Van Buren Street – less than the extended Red Line.

Funding prospects for the Red Line Extension are tenuous at best. Optimistic, but realistic, scenarios suggests the new Extension will not begin service for 5 to 10 years. A Red Line Extension without the south segment to 130th Street would be substantially ($500 million?) less expensive – and therefore more likely to achieve funding approval.

Depending on the design, an express bus service to 95th Street could be running in 2 to 3 years.
The capital cost of an express bus service would be a tiny fraction of the cost of the 116th St to 130th Street L line.
The operating and maintenance costs of this express bus service would be much less than the operating and maintenance costs of the south segment of the Red Line Extension.

Chicago, IL 60628

My question is what material are you going to use to support the train tracks? Are they going to be on the ground (at-grade) like the Union Pacific rails? Or are they going to be suspended on cement pillars? If suspended, is it going to be open or closed (when looking up)?

How are you going to compensate the rest of the community because I think this project is going to cause a lot of inconveniences during construction. It's going to cause roads to close because of heavy machinery and material.

I have another two-story house at 11715 South Calumet that is rented out. I'm worried the tenants will leave due to the construction inconveniences and for the entire time the construction will last.

For now, those are all my concerns. Thank you.

To: Rachael Waters
Subject: RE: Inquiry

Hi Rachael,

Thank you for your interest in the Red Line Extension Project and contacting CTA. CTA announced selection of a Preferred Alignment for the Red Line Extension project on January 26th, 2018. The CTA Press Release can be viewed here.

The Preferred Alignment is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options. It would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). Additional information about the Preferred Alignment is available here.

CTA will produce a final Environmental Impact Study (EIS) that will include further preliminary engineering work and will analyze impacts of the Preferred Alignment. The Final EIS will document the results of the Draft EIS process, confirm the Preferred Alignment, and include a list of committed final mitigation measures. It will also include and address all comments received during the public review period of the Draft EIS.

Visit www.transitchicago.com/RedEIS to learn more about the project and to follow the progress of the project.

Subject: RE: PROPERTY ACQUISITIONS along "RED LINE EXTENSION" DISPLACEMENT PROJECT

Jen,

Thank you for your interest in the Red Line Extension Project and contacting CTA.

Property at East 106th Street and South Forest Avenue **would not be** displaced by the Red Line Extension project. The alignment information and map is available here.

CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured. CTA would then notify owners of affected properties of their intent to purchase.

Visit www.transitchicago.com/RedEIS to learn more about the project and to follow the progress of the project.

Subject:	RE: How does the Red Line Extension preferred route decision affect Wendel Smith Play Lot Park?

Michael,

Thank you for your interest in the Red Line Extension (RLE) Project and contacting CTA. The RLE Preferred Alignment would not have permanent impacts on Wendell Smith Park. It is however expected that there would be short-term closure of the park during construction.

The Preferred Alignment is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options. It would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). The Preferred Alignment would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Additional information about the Preferred Alignment is available here. CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured. CTA would then notify owners of affected properties of their intent to purchase.

Note that all impacts and mitigations would be confirmed in the Final EIS, which is the next step in the project development process.

Visit www.transitchicago.com/RedEIS to learn more about the project and to follow the progress of the project.

Subject: Comments on Red Line Extension

The extension will be nice for all the folks who live far south and have to travel by bus to the 95th street station.

I, on the other hand, will not be able to fall asleep on the ride south, as I might miss my stop at 95th! :-(

PLEASE ask CTA to provide porta potties or other restroom facilities at CTA stations. Its a LONG ride from 95th to the North side. CTA officials obviously do not ride the CTA trains. If they did, they would see/and SMELL how desperate people relieve themselves in the little vestibules at the ends of CTA cars AND in the elevators to and from platforms. Its very disgusting.

On another CTA TOPIC - the 79th and Western bus terminal......

Please run the #49 Bus the whole length of Western Ave IN THE CITY - terminating at 119th street and western before changing to the 349 PACE bus. Allow drivers to change posts at 79th if you must, BUT DO NOT REQUIRE RIDERS TO GET OFF AND TRANSFER BUSES AT 79TH. Its insane that from Beverly

(99th and Western) one must take THREE buses and two transfers just to get to Midway airport at 55th and Cicero. There should be only one transfer required: when one changes direction from north/south to east/west. The Ashland bus changes drivers somewhere around 70th street. Passengers are allowed to remain onboard and not forced off to brave the weather elements and local thugs.

Thanks for listening.

Lois Jacob

Potential Property Impacts
Red Line Extension (RLE) Project

To provide new Red Line rail transit service to residents in Chicago's Far South Side, the agency has determined that it may be necessary to acquire certain properties to implement the Red Line Extension Project. Based on public feedback, technical analysis, and agency coordination, CTA has selected a Preferred Alignment that would run along the west side of the Union Pacific Railroad (UPRR) tracks from I-57 south to approximately 108th Place, then would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. The Preferred Alignment is a combination of the previously presented UPRR East and West Options. It would capture the benefits and minimize the impacts of either option and it also incorporates the feedback received on the Draft Environmental Impact Statement.

Potential property impacts of the Preferred Alignment estimated at this time is summarized in the attached figures and tables.

The CTA is working with a dedicated team of relocation and community liaisons who have been contacting property owners, business owners, and renters to inform them about potential property displacements and answer questions. Over the next few years, CTA will conduct additional engineering, which will allow property needs to be further refined and to identify ways to minimize impacts to properties and conclude which properties would need to be acquired for the RLE Project. At this time, CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured. CTA would then notify owners of affected properties of their intent to purchase.

The CTA's goal is to make this as easy as possible on owners and renters. For the time being, there is no need for any owner or renter to relocate.

CTA is required to follow the guidelines of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, along with state regulations, to assure full protection of the rights of each property owner.

Among other requirements, these guidelines state that CTA must offer fair market value for any property it seeks to acquire. In some cases, property owners may be eligible for compensation at their original purchase price, if higher than the fair market value.

Additionally, CTA must provide financial assistance and relocation services for property owners as well as commercial and residential tenants who must move because of the RLE Project. Owners and renters were mailed information via regular and certified postal mail. In addition, relocation consultants have made in-person visits to the locations listed to provide additional information and collect feedback.

Owners and renters are encouraged to contact CTA's customer service department by telephone at 1-888-YOUR-CTA (1-888-968-7282), or by e-mail at RedExtension@transitchicago.com.

Red Line Extension (RLE) Project
Frequently Asked Questions

Which alignment option did CTA select?

Based on additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. The Preferred Alignment is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options. This Preferred Alignment would capture the benefits and minimize the impacts of either option and it also incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

How would I know if my property is affected?

The owners and tenants whose property would be affected by the Preferred Alignment were notified during the CTA door-to-door outreach, which started January 26, 2018. Letters informing owners and tenants of the selected alignment were also mailed out to all properties that were contacted in 2016—both those whose property would be affected by the Preferred Alignment, and those whose property would not be affected. CTA encourages community participation and property owner involvement. CTA will be conducting community meetings with property owners and tenants affected by the Preferred Alignment on Tuesday, February 6 from 5:30-7:30 at Fenger Academy High School (11220 S. Wallace Avenue, Chicago), and on Thursday, February 8 from 5:30-7:30 at Palmer Park (201 E. 111th Street, Chicago). Additionally, a public open house is scheduled for Tuesday, February 13, 2018 from 6-8pm at Gwendolyn Brooks College Preparatory Academy in the Main Gym (250 W. 111th Street, Chicago).

What are my rights as a property owner?

In the event that CTA ultimately determines it is necessary to purchase private property for the RLE Project, CTA would be required to follow the guidelines of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, along with state regulations. CTA will treat property owners fairly and will seek cooperative settlements of property acquisitions.

You can read more about your rights under applicable federal laws here:
http://www.fhwa.dot.gov/real_estate/uniform_act/acquisition/real_property.cfm
http://www.fhwa.dot.gov/real_estate/publications/your_rights/rights2014.pdf

What type of compensation will I receive?

CTA is required by federal law to offer to purchase each property for an amount that is no less than fair market value as determined by an independent appraisal. In some circumstances, if current appraisals are less than the original property purchase price, an owner may be eligible for compensation equal to the original purchase price.

In addition, CTA must provide financial assistance and relocation services, as required by federal regulations for property owners as well as commercial and residential occupants who must move because of the RLE Project.

How will CTA determine the purchase price for my property?

If CTA determines it is necessary to purchase your property for the RLE Project, it is required to hire an independent appraiser to inspect the property to determine fair market value. In that case, you, or a representative that you designate, will be invited to accompany the appraiser when the appraiser inspects your property. You or your representative may provide information about improvements to the property and any special features that may affect the value of the property such that these facts are considered in the appraisal.

What if I don’t own this property but rent an apartment, or lease space for my business?

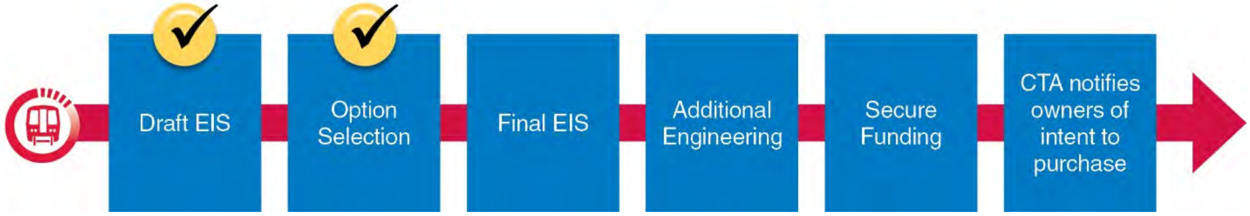
Non-owners who are leasing housing or commercial property that must be relocated because of the RLE Project are also protected by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended. If needed, CTA will provide financial assistance and relocation services to assist these residents and business owners in finding a new housing or business location.

If CTA acquires my property, will you provide me help in relocating?

If you are required to move, a relocation agent will contact you, answer your questions, and provide additional information about relocation assistance advisory services and relocation payments eligibility. The goal of the relocation agent is to facilitate a smooth transition to the replacement housing or business location.

What will happen next with the RLE Project?

On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next five years for the RLE Project. This investment will allow CTA to complete the Final EIS and preliminary engineering over the next few years. CTA plans to apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase to pursue federal funding for construction of this project under the competitive federal “New Starts” program. Project development and securing full funding for the RLE Project under this program is a multiyear, multistep process. Depending on funding availability and federal approvals, the earliest that the RLE Project is expected to begin construction would be in 2022, with service anticipated to start in 2026. Again, CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured.



If I have additional questions about potential property acquisitions, who should I call?

Contact CTA’s customer service department by telephone at 1-888-YOUR-CTA (1-888-968-7282), or by e-mail at RedExtension@transitchicago.com.

How can I learn more about the RLE Project?

You can learn more about the RLE Project and find updates on the status of the process on our webpage: www.transitchicago.com/RedEIS. To join the project contact list and get updates about the RLE Project, public meetings, and the status of environmental reviews, email RedExtension@transitchicago.com.

▨ Red Line Extension Project Footprint 🟫 Displaced Building 🟦 Affected Parcel

RED AHEAD
Moving Ahead to a Better Red

Red Line Extension

Parcels and buildings that may be displaced are shown to illustrate maximum impacts and possible locations. Due to the margin for error inherent in predicting displacements based on conceptual engineering, the actual displacements for each alternative may vary from what is shown. Some of the properties shown may not ultimately need to be acquired. Land only property impacts are shown on the entire lot, however, often only portions of the lot would be required. Property acquisitions will be confirmed as project engineering progresses.

Preferred Alignment
Parcels Affected by Land Acquisition

Count	Map ID	Parcel ID	Address	Land Use - Field (2017)	Displacement Type	Displacement Use
231	424	25-22-311-020-0000	11626 S. PRAIRIE AVENUE	Single-family Residential	Parcel with Building Displacement	Right-of-way
232	445	25-16-415-003-0000	349 W. 109TH STREET	Single-family Residential	Parcel with Building Displacement	Right-of-way
233	446	25-16-415-023-0000	348 W. 109TH PLACE	Single-family Residential	Parcel with Building Displacement	Right-of-way
234	447	25-16-500-017-0000	362 W. 108TH PLACE	Transportation (railroad)	Affected Parcel	Right-of-way
235	448	25-16-500-018-0000	364 W. 109TH STREET	Transportation (railroad)	Affected Parcel	Right-of-way
236	449	25-16-500-028-0000	359 W. 109TH STREET	Transportation (railroad)	Affected Parcel	Right-of-way

Note - The following parcels are defined as easements and are not included in the table: Map ID 1-24, 276, 282, 288, 291, 312, and 425. Publicly owned parcels that include a roadway are classified as “easements” for this analysis because CTA would require a use agreement with the public entity.

Proyecto de Expansión de la Línea Roja (RLE)
Preguntas frecuentes

¿Cuál opción de alineamiento eligió CTA?
Basándose en la planificación de proyecto y trabajo de ingeniería adicional realizado en el pasado año, CTA ha elegido un alineamiento preferido. El alineamiento preferido es una combinación de las opciones este y oeste de Union Pacific Railroad (UPRR) presentadas anteriormente. Este alineamiento preferido capturaría los beneficios y minimizaría los impactos de cualquiera de las opciones. Además, incorpora los comentarios del público y de la agencia sobre el borrador de la Declaración de Impacto Ambiental (DIA). El alineamiento preferido tendría menos impactos que con las opciones este u oeste. Afectaría menos residencias que con la opción este y menos negocios y empleos que con la opción oeste. Los impactos de ruido y vibración no serían mayores que los anticipados con la opción este u oeste.

¿Cómo sabré si mi propiedad será afectada?
Los dueños e inquilinos cuyas propiedades serán afectadas por el alineamiento preferido fueron notificados durante las labores de divulgación a domicilio, las cuales comenzaron el 26 de enero de 2018. También se enviaron cartas que informan a los dueños e inquilinos sobre el alineamiento elegido a todas las propiedades que fueron contactadas en el 2016, tanto las propiedades que serían afectadas por el alineamiento preferido, como aquellas que no serían afectadas. CTA alienta la participación de la comunidad y de los dueños de propiedades. CTA llevará a cabo reuniones comunitarias con los dueños e inquilinos de propiedades afectados por el alineamiento preferido el martes 6 de febrero de 5:30 a 7:30 p.m. en Fenger Academy High School (11220 S. Wallace Avenue, Chicago), y el jueves 8 de febrero de 5:30 a 7:30 p.m. en Palmer Park (201 E. 111th Street, Chicago). Además, se programó una casa abierta pública el martes 13 de febrero de 2018 de 6:00 a 8:00 p.m. en el gimnasio principal de Gwendolyn Brooks College Preparatory Academy (250 W. 111th Street, Chicago).

¿Cuáles son mis derechos como dueño de una propiedad?
Si CTA determina en última instancia que es necesario comprar propiedades privadas para el proyecto de RLE, CTA estaría obligada a seguir las guías establecidas en la Ley Uniforme de Asistencia para la Reubicación y Políticas de Adquisición de Propiedad Inmueble de 1970, según enmendada, y los reglamentos del estado. CTA tratará a los dueños de propiedades de manera justa e intentará llegar a acuerdos conjuntos para la adquisición de las propiedades.

Puede leer más sobre sus derechos conforme a las leyes federales correspondientes aquí:
http://www.fhwa.dot.gov/real_estate/uniform_act/acquisition/real_property.cfm
http://www.fhwa.dot.gov/real_estate/publications/your_rights/rights2014.pdf

¿Qué tipo de remuneración recibiré?
Las leyes federales exigen que CTA ofrezca comprar cada propiedad por una cantidad que no sea menor que el valor justo del mercado, según lo determine una tasación independiente. En algunas circunstancias, si las tasaciones actuales son por una cantidad menor que el precio de compra original de la propiedad, puede que el dueño califique para una remuneración equivalente al precio de compra original.

Además, CTA tiene que proporcionar asistencia financiera y servicios de reubicación, según lo exigen las normas federales, para los dueños de propiedades, así como los inquilinos comerciales y residenciales que tengan que mudarse debido al proyecto de RLE.

¿Cómo determinará CTA el precio de compra de mi propiedad?
Si CTA determina que es necesario comprar su propiedad para el proyecto de RLE, está obligada a contratar a un tasador independiente para inspeccionar la propiedad y determinar el valor justo del mercado. En ese caso, usted, o el representante que usted designe, será invitado a acompañar al tasador cuando éste inspeccione su propiedad. Usted o su representante podría proporcionar información sobre las mejoras a la propiedad y cualquier característica especial que podría afectar el valor de la propiedad para asegurarse de que esta información se considere en la tasación.

¿Qué sucedería si no soy dueño de la propiedad, pero alquilo un apartamento o arriendo un espacio para mi negocio?
Los que no sean dueños y estén arrendando una vivienda o propiedad comercial y tengan que mudarse por motivo del proyecto de RLE también están protegidos por la Ley Uniforme de Asistencia para la Reubicación y Políticas de Adquisición de Propiedad Inmueble de 1970, según enmendada. De ser necesario, CTA proporcionará asistencia financiera y servicios de reubicación para ayudar a estos residentes y dueños de negocios a encontrar una nueva vivienda o ubicación para su negocio.

Si CTA adquiere mi propiedad, ¿me ayudará con la mudanza?
Si tiene que mudarse, un agente de reubicación se comunicará con usted, contestará sus preguntas y le proporcionará información adicional sobre los servicios de asesoramiento de ayuda para la reubicación y si califica para pagos de reubicación. La meta del agente de reubicación es facilitar una transición sin problemas a la nueva vivienda o ubicación para el negocio.

¿Qué es lo próximo que sucederá con el proyecto de RLE?
El 27 de noviembre de 2016, el alcalde Emanuel y CTA anunciaron la aprobación de fondos por la cantidad de $75 millones durante los próximos cinco años para el proyecto de RLE. Esta inversión le permitirá a CTA terminar el DIA final y los estudios de ingeniería preliminares durante los próximos años. CTA tiene previsto solicitar a Federal Transit Administration (FTA) el ingreso a la fase de desarrollo del proyecto para obtener fondos federales para la construcción del proyecto conforme al programa federal competitivo "New Starts." El desarrollo del proyecto y la obtención de todos los fondos para el proyecto de RLE conforme a este programa es un proceso de varias etapas que tomará varios años. Dependiendo de la disponibilidad de fondos y las aprobaciones federales, lo más temprano que se anticipa que comience la construcción del proyecto de RLE es en el 2022. Se anticipa que el servicio comenzará en el 2026. Nuevamente, CTA no tiene previsto hacer gestiones para adquirir propiedades privadas para el proyecto de RLE hasta que termine la revisión ambiental y se obtengan los fondos para el proyecto.

¿A quién debo llamar si tengo más preguntas sobre la posible adquisición de propiedades?
Comuníquese con el departamento de servicio al cliente de CTA por teléfono al 1-888-YOUR-CTA (1-888-968-7282) o por correo electrónico a RedExtension@transitchicago.com.

¿Cómo puedo obtener más información sobre el proyecto de RLE?
Puede obtener más información sobre el proyecto de RLE y encontrar actualizaciones sobre la situación del proceso en nuestra página web: www.transitchicago.com/RedEIS. Para unirse a la lista de contactos del proyecto y recibir actualizaciones sobre el proyecto de RLE, audiencias públicas y la situación de las revisiones ambientales, envíe un correo electrónico a RedExtension@transitchicago.com.

More Relocation Information

Business

A business that is relocated as a result of the project may be entitled to benefits such as:

1. *Moving and Related Costs*
2. *Reestablishment Costs*
3. *Fixed Payment*

Statements applicable to all categories and benefits listed

Please keep in mind that there are specific benefit requirements that must be met to receive any of the funds mentioned above. Your assigned relocation agent will assist you to fully understand the payments and requirements.

No one may be displaced until adequate housing has been made available to them.

All persons required to move personal property, their home, or business must be given at least 90 days to vacate.

Your Local Transit Agency will establish an appeal process should you be aggrieved by a denial of benefits or if you feel the benefits are inadequate.

A message from the FTA and your local transit agency

It is sometimes necessary to acquire private property and displace persons and businesses in order to build a transit facility that will benefit the entire community. However, we will work with you to minimize the inevitable disruption that this causes. Please feel free to contact the agency and person listed below should you have any further questions.

Revised rules for the Uniform Act were published in the Federal Register on January 4, 2005. The rules are reprinted each year in the Code of Federal Regulations, Title 49, Part 24. All Federal, State and local government agencies, as well as others receiving Federal financial assistance for public programs and projects, that require the acquisition of real property, must comply with the policies and provisions set forth in the Uniform Act and the regulation.

FEDERAL TRANSIT
ADMINISTRATION

GENERAL ACQUISITION & RELOCATION INFORMATION

FTA
U.S. DEPARTMENT OF TRANSPORTATION
FEDERAL TRANSIT ADMINISTRATION

SEE THE BACK PANEL OF THIS BROCHURE FOR INFORMATION ON CONTACTING YOUR LOCAL AGENCY.

GENERAL INFORMATION

Your local transit agency may need to purchase property from you with funding from the Federal Transit Administration (FTA) in order to benefit the general public. To assure fair and consistent treatment of all persons, the FTA will require your local transit agency to follow the Uniform Relocation Assistance and Real Property Policies Act of 1970, as amended. The Uniform Act is a law passed by Congress to promote uniformity and fairness when a local transit agency must acquire property or displace persons. There are two main parts of this process:

1. *Acquisition, which is the purchase of your real estate.*
2. *Relocation which offers additional benefits should you or your business be displaced.*

Acquisition of Real Property

The purchase of real estate by a transit agency begins with the appraisal of your property. An appraiser will inspect your property to determine the value. The property owner should accompany the appraiser while making this inspection. A second appraiser will then review and approve the work of the first appraiser and will recommend a value to the local transit agency.

You should then receive a written offer to purchase your property. You will have sufficient time to consider the offer or make any counter offers that you believe is fair.

If you elect to sell your property to the local transit agency, you will be paid the full amount less any encumbrances (mortgage, lien, etc.) owed on that property. Possession of vacant property may be taken the day of closing by the local transit agency; possession of occupied property will be at an agreed future date.

Relocation

Advisory Assistance will be offered to every displaced person. A Relocation Agent will visit you to explain all of the benefits and services that you may be eligible to receive.

Below is a very brief outline of the various types of financial benefits available if you or your business are required to move.

Residential Homeowner Occupants, are those that have owned and occupied their home for at least 180 days. Typical benefits include:

1. *Moving Costs*
2. *Price Differential Payment*
3. *Increased Mortgage Interest*
4. *Incidental Closing Costs*

90 day Occupant or Tenant, is either a tenant or a homeowner that has occupied their home for less than 180 days but at least 90 days. Relocation benefits include:

1. *Moving Costs*
2. *Rental Assistance Payment/Down Payment*

[MAILING NAME]
[MAILING ADDRESS]
[MAILING CITY], [MAILING STATE] [MAILING ZIP]

Dear Property Owner:

In October 2016 we sent you a letter about the Chicago Transit Authority (CTA) project known as the Red Line Extension (RLE) Project and the possibility of CTA needing to acquire the property referenced below for the construction of the RLE Project. Based on additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment that **would likely require the acquisition of the property referenced below for the RLE Project**:

Owner of Record: [OWNER NAME]
Property Address: [PARCEL ADDRESS]
Property Identification Number (PIN): [PIN]
CTA Parcel ID: [NEW ID]

At this time, CTA does not plan to pursue acquisition of private property for the RLE Project until all environmental reviews are complete and project funding is secured. This is expected to be a multiyear process, and it may also be possible to further minimize property impacts with additional future engineering.

This letter is not a formal action to acquire your property, nor a letter of intent or offer to purchase your property. The information in this letter is not intended to affect your present ownership, management, or control of your property in any way.

Property owners and tenants who would be affected by acquisition and relocation will be protected under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, along with state regulations. CTA will treat property owners and tenants fairly and will seek cooperative settlements of property acquisitions. In addition, CTA will provide financial assistance and relocation services for property owners as well as commercial and residential occupants who must move because of the RLE Project.

The Preferred Alignment selected by CTA is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options. This Preferred Alignment would capture the benefits and minimize the impacts of either option and it also incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next 5 years for RLE Project. This investment will allow CTA to complete the Final EIS and preliminary engineering over the next few years. Depending on funding availability and federal approvals, the earliest that the RLE Project is expected to begin construction would be in 2022, and service is anticipated to start in 2026. You can learn more about the RLE Project and find updates on the status of the process here: transitchicago.com/RedEIS. Again, CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured.

CTA is committed to working with the community, elected officials, affected property owners and tenants, and keeping you informed. CTA will continue to communicate with affected property owners and tenants to answer questions and update them as timelines for property acquisition become known. Once environmental reviews are complete and funding is secured for the project, CTA will notify property owners and tenants of their intent to purchase property.

The relocation liaison for CTA will be in your neighborhood visiting potentially affected properties to discuss the relocation process and answer questions starting January 24, 2018. CTA will be conducting community meetings with property owners and tenants affected by the Preferred Alignment on Tuesday, February 6 from 5:30-7:30 at Fenger Academy High School (11220 S. Wallace Avenue, Chicago), and on Thursday, February 8 from 5:30-7:30 at Palmer Park (201 E. 111th Street, Chicago). You are invited to attend either one of the community meetings to discuss the RLE Project and what it could mean for your property. Additionally, a public open house is scheduled for Tuesday, February 13, 2018 from 6-8pm at Gwendolyn Brooks College Preparatory Academy in the Main Gym (250 W. 111th Street, Chicago). You will receive additional information about the open house in a separate mailing.

CTA looks forward to working with you on this exciting project, which will be a great benefit to the community, surrounding neighborhoods, and the City of Chicago. Please contact CTA customer service at 1-888-YOUR-CTA (888) 968-7282 or RedExtension@transitchicago.com if you have any questions or would like to discuss this project further.

Sincerely,

Carole Morey

[MAILING NAME]
[MAILING ADDRESS]
[MAILING CITY], [MAILING STATE] [MAILING ZIP]

Estimado dueño de propiedad:

En octubre de 2016 le enviamos una carta sobre el proyecto de Chicago Transit Authority (CTA), conocido como el proyecto de expansión de la Línea Roja (RLE), y la posibilidad de que CTA tenga que adquirir la propiedad que se describe a continuación para construir el proyecto de RLE. Basándose en la planificación de proyecto y trabajo de ingeniería adicional realizado en el pasado año, CTA ha elegido un alineamiento preferido que **probablemente requerirá la adquisición de la propiedad que actualmente usted ocupa en la dirección a continuación:**

Dueño según el registro: [OWNER NAME]
Dirección de la propiedad: [PARCEL ADDRESS]
Número de identificación de la propiedad (PIN): [PIN]
Código de parcela de CTA: [NEW ID]

En este momento, CTA no tiene previsto hacer gestiones para adquirir propiedades privadas para el proyecto de RLE hasta que termine todas las revisiones ambientales y se obtengan los fondos para el proyecto. Se espera que sea un proceso de varios años. También es posible que se minimicen los impactos sobre la propiedad con trabajos de ingeniería adicionales.

Esta carta no constituye una medida formal para adquirir su propiedad ni una carta de intención u oferta para comprar su propiedad. El propósito de la información en esta carta no es afectar la titularidad, administración o control actual de su propiedad de ninguna manera.

Los dueños de propiedades e inquilinos que serían afectados por la adquisición y reubicación estarán protegidos por la Ley Uniforme de Asistencia para la Reubicación y Políticas de Adquisición de Propiedad Inmueble de 1970, según enmendada, y los reglamentos del estado. CTA tratará a los dueños de propiedades e inquilinos de manera justa e intentará llegar a acuerdos conjuntos para la adquisición de las propiedades. Además, CTA tiene que proporcionar asistencia financiera y servicios de reubicación a los dueños de propiedades, así como los inquilinos comerciales y residenciales que tengan que mudarse debido al proyecto de RLE.

El alineamiento preferido elegido por CTA es una combinación de las opciones este y oeste de Union Pacific Railroad (Union Pacific Railroad, UPRR) presentadas anteriormente. Este alineamiento preferido capturaría los beneficios y minimizaría los impactos de cualquiera de las opciones. Además, incorpora los comentarios del público y de la agencia sobre el borrador de la Declaración de Impacto Ambiental (DIA). El alineamiento preferido tendría menos impactos que con las opciones este u oeste. Afectaría menos residencias que con la opción este y menos negocios y empleos que con la opción oeste. Los impactos de ruido y vibración no serían mayores que los anticipados con la opción este u oeste.

El 27 de noviembre de 2016, el alcalde Emanuel y CTA anunciaron la aprobación de fondos por la cantidad de $75 millones durante los próximos 5 años para el proyecto de RLE. Esta inversión le permitirá a CTA terminar el DIA final y los estudios de ingeniería preliminares durante los próximos años. Dependiendo de la disponibilidad de fondos y las aprobaciones federales, lo más temprano que se anticipa que comience la construcción del proyecto de RLE es en el 2022. Se anticipa que el servicio comenzará en el 2026. Puede obtener más información sobre el proyecto de RLE y encontrar actualizaciones sobre la situación del proceso aquí: transitchicago.com/RedEIS. Nuevamente, CTA no tiene previsto hacer gestiones para adquirir propiedades privadas para el proyecto de RLE hasta que termine la revisión ambiental y se obtengan los fondos para el proyecto.

CTA está comprometida en trabajar con la comunidad, funcionarios electos y dueños de propiedades e inquilinos afectados, así como con mantenerlo informado. CTA seguirá comunicándose con los dueños de propiedades e inquilinos afectados para responder a sus preguntas y proporcionar información actualizada, a medida que se conozcan los plazos para la adquisición de las propiedades. Cuando se terminen todas las revisiones ambientales y se obtengan los fondos para el proyecto, CTA notificará a los dueños de las propiedades y sus inquilinos sobre su intención de comprar la propiedad.

El enlace de reubicación de CTA estará en su comunidad visitando las propiedades que posiblemente se verán afectadas para hablar sobre el proceso de reubicación y responder a sus preguntas, a partir del 24 de enero de 2018. CTA llevará a cabo reuniones comunitarias con los dueños e inquilinos de propiedades afectados por el alineamiento preferido el martes 6 de febrero de 5:30 a 7:30 p.m. en Fenger Academy High School (11220 S. Wallace Avenue, Chicago), y el jueves 8 de febrero de 5:30 a 7:30 p.m. en Palmer Park (201 E. 111th Street, Chicago). Usted está invitado a asistir a cualquiera de las reuniones de la comunidad para discutir el proyecto RLE y lo que podría significar para su propiedad. Además, se programó una casa abierta pública el martes 13 de febrero de 2018 de 6:00 a 8:00 p.m. en el gimnasio principal de Gwendolyn Brooks College Preparatory Academy (250 W. 111th Street, Chicago). Usted recibirá información adicional sobre la casa abierta en un correo por separado.

CTA espera trabajar con usted en este proyecto emocionante, el cual beneficiará grandemente a la comunidad, vecindarios cercanos y la ciudad de Chicago. Por favor comuníquese con servicio al cliente de CTA al 1-888-YOUR-CTA (888) 968-7282 o por correo electrónico a RedExtension@transitchicago.com si tiene alguna pregunta o le gustaría hablar más sobre este proyecto.

Los dueños de propiedades e inquilinos que serían afectados por la adquisición y reubicación estarán protegidos por la Ley Uniforme de Asistencia para la Reubicación y Políticas de Adquisición de Propiedad Inmueble de 1970, según enmendada, y los reglamentos del estado. CTA tratará a los dueños de propiedades e inquilinos de manera justa e intentará llegar a acuerdos conjuntos para la adquisición de las propiedades. Además, CTA tiene que proporcionar asistencia financiera y servicios de reubicación a los dueños de propiedades, así como los inquilinos comerciales y residenciales que tengan que mudarse debido al proyecto de RLE.

El alineamiento preferido elegido por CTA es una combinación de las opciones este y oeste de Union Pacific Railroad (Union Pacific Railroad, UPRR) presentadas anteriormente. Este alineamiento preferido capturaría los beneficios y minimizaría los impactos de cualquiera de las opciones. Además, incorpora los comentarios del público y de la agencia sobre el borrador de la Declaración de Impacto Ambiental (DIA). El alineamiento preferido tendría menos impactos que con las opciones este u oeste. Afectaría menos residencias que con la opción este y menos negocios y empleos que con la opción oeste. Los impactos de ruido y vibración no serían mayores que los anticipados con la opción este u oeste.

El 27 de noviembre de 2016, el alcalde Emanuel y CTA anunciaron la aprobación de fondos por la cantidad de $75 millones durante los próximos 5 años para el proyecto de RLE. Esta inversión le permitirá a CTA terminar el DIA final y los estudios de ingeniería preliminares durante los próximos años. Dependiendo de la disponibilidad de fondos y las aprobaciones federales, lo más temprano que se anticipa que comience la construcción del proyecto de RLE es en el 2022. Se anticipa que el servicio comenzará en el 2026. Puede obtener más información sobre el proyecto de RLE y encontrar actualizaciones sobre la situación del proceso aquí: transitchicago.com/RedEIS. Nuevamente, CTA no tiene previsto hacer gestiones para adquirir propiedades privadas para el proyecto de RLE hasta que termine la revisión ambiental y se obtengan los fondos para el proyecto.

CTA está comprometida en trabajar con la comunidad, funcionarios electos y dueños de propiedades e inquilinos afectados, así como con mantenerlo informado. CTA seguirá comunicándose con los dueños de propiedades e inquilinos afectados para responder a sus preguntas y proporcionar información actualizada, a medida que se conozcan los plazos para la adquisición de las propiedades. Cuando se terminen todas las revisiones ambientales y se obtengan los fondos para el proyecto, CTA notificará a los dueños de las propiedades y sus inquilinos sobre su intención de comprar la propiedad.

El enlace de reubicación de CTA estará en su comunidad visitando las propiedades que posiblemente se verán afectadas para hablar sobre el proceso de reubicación y responder a sus preguntas, a partir del 24 de enero de 2018. CTA llevará a cabo reuniones comunitarias con los dueños e inquilinos de propiedades afectados por el alineamiento preferido el martes 6 de febrero de 5:30 a 7:30 p.m. en Fenger Academy High School (11220 S. Wallace Avenue, Chicago), y el jueves 8 de febrero de 5:30 a 7:30 p.m. en Palmer Park (201 E. 111th Street, Chicago). Usted está invitado a asistir a cualquiera de las reuniones de la comunidad para discutir el proyecto RLE y lo que podría significar para su propiedad. Además, se programó una casa abierta pública el martes 13 de febrero de 2018 de 6:00 a 8:00 p.m. en el gimnasio principal de Gwendolyn Brooks College Preparatory Academy (250 W. 111th Street, Chicago). Usted recibirá información adicional sobre la casa abierta en un correo por separado.

CTA espera trabajar con usted en este proyecto emocionante, el cual beneficiará grandemente a la comunidad, vecindarios cercanos y la ciudad de Chicago. Por favor comuníquese con servicio al cliente de CTA al 1-888-YOUR-CTA (888) 968-7282 o por correo electrónico a RedExtension@transitchicago.com si tiene alguna pregunta o le gustaría hablar más sobre este proyecto.

Dear Property Owner:

In October 2016 we sent you a letter about the Chicago Transit Authority (CTA) project known as the Red Line Extension (RLE) Project and the possibility of CTA needing to acquire the property referenced below for the construction of the RLE Project. Based on additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment and **will not need to acquire the property referenced below for the RLE Project**.

Owner of Record: [OWNER NAME]
Property Address: [PARCEL ADDRESS]
Property Identification Number (PIN): [PIN]
CTA Parcel ID: [NEW ID]

The Preferred Alignment selected by CTA is a combination of the previously presented Union Pacific Railroad (UPRR) East and West Options. This Preferred Alignment would capture the benefits and minimize the impacts of either option and it also incorporates the public and agency feedback received on the Draft Environmental Impact Statement (EIS). The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next 5 years for RLE Project. This investment will allow CTA to complete the Final EIS and preliminary engineering over the next few years. Depending on funding availability and federal approvals, the earliest that the RLE Project is expected to begin construction would be in 2022, and service is anticipated to start in 2026. You can learn more about the RLE Project and find updates on the status of the process here: transitchicago.com/RedEIS.

CTA is committed to working with the community, elected officials, affected property owners and tenants, and keeping you informed. The CTA relocation liaison will be in your neighborhood starting January 24, 2018 visiting all properties that were contacted in October 2016 to answer questions. CTA will host a public open house on Tuesday, February 13, 2018 from 6-8pm at Gwendolyn Brooks College Preparatory Academy in the Main Gym (250 W. 111th Street, Chicago) to provide additional information about the Preferred Alignment. You will receive additional information about the open house in a separate mailing.

CTA looks forward to working with you on this exciting project, which will be a great benefit to the community, surrounding neighborhoods, and the City of Chicago. Please contact CTA customer service at 1-888-YOUR-CTA (888) 968-7282 or via email at RedExtension@transitchicago.com if you have any questions or would like to discuss this project further.

Sincerely,

Carole Morey

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to UP-Owned Properties

Dear Mr. Bristol:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning and as detailed in the attached tables, CTA has determined that the Preferred Alignment would affect 14 UP parcels; the Preferred Alignment would affect fewer UP-owned parcels than the East Option as presented in 2016, which would have affected 18 UP-owned parcels. The West Option would have affected 35 UP-owned parcels.

The Preferred Alignment would cross over the first three UP parcels in the table below on an aerial structure, although the tracks and operations would not be affected. The Preferred Alignment would cross over the first two parcels at approximately 99th Street, and would cross over the third parcel at approximately 108th Place. An RLE substation would be located on the eighth parcel in the table below (property identification number 25-21-406-030-0000 at 11524 S. Lafayette Avenue), although the substation would be located at least 25 feet from the proposed UPRR property line and UPRR operations would not be affected. The RLE structure would be located on the remaining 10 UP parcels, although a clearance of at least 50 feet (track centerline to track centerline) from existing and potential future UPRR tracks would be maintained and UPRR tracks and operations would not be affected. CTA has met with Mark Bristol and Adrian Guerrero on May 3, 2017 and December 13, 2017.

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to Omega-Owned Properties

Dear Ms. Williams:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would affect one parcel that is owned by the Illinois Indiana Development Company, managed by Omega Rail Management, and operated on by the Northern Indiana Commuter Transportation District (NICTD) Chicago South Shore & South Bend Railroad (property identification number 25-27-503-001-0000 at 12320 S. Cottage Grove Avenue), although the NICTD tracks and operations would not be permanently affected. The impact to NICTD tracks is because CTA would need to relocate an existing at-grade Metropolitan Water Reclamation District access road across NICTD property. CTA is proposing to provide a grade-separated road to minimize impacts on both NICTD and MWRD operations. **There would be no change in the number of parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.**

CTA has previously disclosed potential property impacts to you and coordinated with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to Omega-Owned Properties

Dear Ms. Williams:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would affect one parcel that is owned by the Illinois Indiana Development Company, managed by Omega Rail Management, and operated on by the Northern Indiana Commuter Transportation District (NICTD) Chicago South Shore & South Bend Railroad (property identification number 25-27-503-001-0000 at 12320 S. Cottage Grove Avenue), although the NICTD tracks and operations would not be permanently affected. The impact to NICTD tracks is because CTA would need to relocate an existing at-grade Metropolitan Water Reclamation District access road across NICTD property. CTA is proposing to provide a grade-separated road to minimize impacts on both NICTD and MWRD operations. **There would be no change in the number of parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.**

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to NS-Owned Properties

Dear Mr. Edwards:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would affect six Norfolk Southern parcels. The RLE structure, as well as the proposed yard and shop and 130th Street station, would be located on Norfolk Southern property. Specifically, the spur track along parcel 25-22-401-034-0000, on which IHB currently operates 1–2 trains a week to serve a scrap metal/recycling facility, would need to be realigned to run parallel to RLE and Northern Indiana Commuter Transportation District (NICTD) tracks to allow for the RLE yard and shop. CTA would also need to relocate an existing at-grade Metropolitan Water Reclamation District access road across Norfolk Southern property (property identification number 25-27-400-002-0000 at 12600 S. Cottage Grove Avenue). CTA met with Norfolk Southern staff on June 13, 2017 and November 9, 2017 to discuss potential impacts to Norfolk Southern property and realignment of the spur track. An agreement between CTA and Norfolk Southern has been executed to review engineering and real estate for the RLE Project.

Parcel Identification Number	Address
25-22-400-027-0000	11600 S. Cottage Grove Avenue
25-27-108-009-0000	11900 S. Cottage Grove Avenue
25-22-401-034-0000	1355 E. 121st Street
25-27-200-009-0000	12256 S. Cottage Grove Avenue
25-27-502-001-0000	12330 S. Cottage Grove Avenue
25-27-400-002-0000	12600 S. Cottage Grove Avenue

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to NS-Owned Properties

Dear Mr. Edwards:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would affect six Norfolk Southern parcels. The RLE structure, as well as the proposed yard and shop and 130th Street station, would be located on Norfolk Southern property. Specifically, the spur track along parcel 25-22-401-034-0000, on which IHB currently operates 1–2 trains a week to serve a scrap metal/recycling facility, would need to be realigned to run parallel to RLE and Northern Indiana Commuter Transportation District (NICTD) tracks to allow for the RLE yard and shop. CTA would also need to relocate an existing at-grade Metropolitan Water Reclamation District access road across Norfolk Southern property (property identification number 25-27-400-002-0000 at 12600 S. Cottage Grove Avenue). CTA met with Norfolk Southern staff on June 13, 2017 and November 9, 2017 to discuss potential impacts to Norfolk Southern property and realignment of the spur track. An agreement between CTA and Norfolk Southern has been executed to review engineering and real estate for the RLE Project.

Parcel Identification Number	Address
25-22-400-027-0000	11600 S. Cottage Grove Avenue
25-27-108-009-0000	11900 S. Cottage Grove Avenue
25-22-401-034-0000	1355 E. 121st Street
25-27-200-009-0000	12256 S. Cottage Grove Avenue
25-27-502-001-0000	12330 S. Cottage Grove Avenue
25-27-400-002-0000	12600 S. Cottage Grove Avenue

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to Metra-Owned Properties

Dear Mr. Derwinski:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would cross over one Metra parcel (property identification number 25-22-317-035-0000 at 11800 S. Front Avenue) on an aerial structure, although the Metra tracks and operations would not be affected. The RLE piers may be located on the parcel in the table below. The proposed minimum vertical clearance will be developed in future coordination with Metra to take into account the overhead contact system. The vertical clearance would not be less than the adjacent clearance over CN tracks. **There would be no change in the number of Metra-owned parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.** CTA met with Lynnette Ciavarella, Scott Presslak, and David Kralik on October 13, 2017 to discuss potential impacts to Metra property.

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to Conrail-Owned Properties

Dear Ms. Hill:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would affect two Conrail parcels. At-grade RLE tracks would be located on those two Conrail parcels, although the Conrail tracks and operations would not be permanently affected. **There would be no change in the number of Conrail-owned parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.**

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to CN-Owned Properties

Dear Mr. Kvedaras:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment would cross over two CN parcels on an aerial structure, although the tracks and operations would not be affected. The RLE piers could be located on the first parcel in the table below. **There would be no change in the number of CN-owned parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.** The proposed minimum vertical clearance would meet CN standards. CTA met with Jim Kvedaras, Deanna McCollian, Art Spiros, and Paul Chojenski on June 27, 2017 to discuss potential impacts to CN property.

Property Identification Number	Address
25-22-501-005-0000	360 E. 119th Street
25-22-325-001-0000	370 E. 119th Street

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to MWRD-Owned Properties

Dear Mr. St. Pierre:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning and as detailed in the attached table, CTA has determined that portions of 15 MWRD parcels at the Calumet Water Reclamation Plant would be affected to accommodate the 120th Street yard and shop and the 130th Street station. **There would be no change in the number of MWRD-owned parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.** The CTA structures would not affect MWRD operations at the plant. CTA met with David St. Pierre and MWRD staff on December 5, 2016 and July 31, 2017 to discuss potential impacts to MWRD property.

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to MWRD-Owned Properties

Dear Mr. St. Pierre:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning and as detailed in the attached table, CTA has determined that portions of 15 MWRD parcels at the Calumet Water Reclamation Plant would be affected to accommodate the 120th Street yard and shop and the 130th Street station. **There would be no change in the number of MWRD-owned parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.** The CTA structures would not affect MWRD operations at the plant. CTA met with David St. Pierre and MWRD staff on December 5, 2016 and July 31, 2017 to discuss potential impacts to MWRD property.

CTA has previously disclosed potential property impacts to you and met with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to City-Owned Properties

Dear Ms. Gorski:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning and as detailed in the attached tables, CTA has determined that 39 parcels would be affected by the Preferred Alignment; the Preferred Alignment would affect fewer City-owned parcels than the East Option as presented in 2016, which would have affected 41 City-owned parcels. The West Option would have affected 25 parcels. The Streets and Sanitation building at 11631 S. Indiana Avenue would be displaced to accommodate the aerial structure and piers.

CTA has previously disclosed potential property impacts to you and coordinated with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to County-Owned Properties

Dear Mr. Yonan:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of planning and as detailed in the attached table, CTA has determined that the Preferred Alignment would affect 22 Cook County parcels within the I-94 and I-57 right-of-way. **There would be no change in the number of County-owned parcels that would be affected by the Preferred Alignment as compared to the impacts for the East and West Options as identified by CTA in 2016.** The RLE aerial structure would be in the median of I-94 immediately south of 95th Street Terminal, then would run along the north side of I-57 until Eggleston Avenue. Piers would be placed within Cook County parcels. CTA has been coordinating with the Illinois Department of Transportation and the Federal Highway Administration regarding the project alignment and traffic impacts, including horizontal and vertical clearances from IDOT's right-of-way.

CTA has previously disclosed potential property impacts to you and coordinated with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to Chicago Park District Owned Properties

Dear Ms. White:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment track structure would run through Fernwood Parkway south of I-57 (property identification number 25-09-999-001-0000). Wendell Smith Park and Block Park would not be affected by the Preferred Alignment. CTA has been coordinating with Chicago Park District staff including Heather Gleason, Doreen O'Donnell, and Michael Lange, regarding impacts to parks in the project area through the Section 4(f) process and proposed mitigations.

CTA has previously disclosed potential property impacts to you and coordinated with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. The open house will be held at the time and location identified below and a flyer is enclosed for your information. Representatives from your agency are encouraged to attend.

Re: CTA Red Line Extension Project
Selection of Preferred Alignment and Project-Related Impacts to Chicago Park District Owned Properties

Dear Ms. White:

The Chicago Transit Authority (CTA), as project sponsor to the Federal Transit Administration (FTA), proposes to construct the Red Line Extension (RLE) Project. This project is a major initiative that would add new transit service on Chicago's Far South Side by extending the Red Line—CTA's busiest rail line—south by 5.3 miles from the 95th Street Terminal to 130th Street.

In fall 2016, in accordance with the federal requirements of the National Environmental Policy Act of 1969 (NEPA), CTA published a Draft Environmental Impact Statement (EIS) and held a public hearing to obtain comments on the benefits and impacts of the two options under consideration for RLE Project alignment: the Union Pacific Railroad (UPRR) East and West Options.

Based on public feedback and additional project planning and engineering work conducted over the last year, CTA has selected a Preferred Alignment. A map of the alignment is provided for your reference.

The Preferred Alignment is a combination of the previously presented UPRR East and West Options, as shown on the map at the end of this letter. The alignment would run south along I-94 from the 95th Street Terminal, then curve west along the north side of I-57 (within the I-57 right-of-way) for nearly ½ mile until reaching the UPRR corridor near Eggleston Avenue. The alignment would then turn south to follow the UPRR corridor. From I-57 south to approximately 108th Place the route would run along the west side of the UPRR tracks, and then the route would cross the UPRR tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street. This Preferred Alignment would capture the benefits and minimize the impacts of either option and incorporates the public and agency feedback received on the Draft EIS. The Preferred Alignment would have fewer impacts than either the East or West Options. It would affect fewer residences than the East Option, and fewer businesses and jobs than the West Option. Noise and vibration impacts would not be greater than those anticipated under either the East or West Option.

CTA has determined that properties owned by your agency would be affected by implementation of the Preferred Alignment. The table included with this letter provides information about the potentially affected properties.

At this stage of project planning, CTA has determined that the Preferred Alignment track structure would run through Fernwood Parkway south of I-57 (property identification number 25-09-999-001-0000). Wendell Smith Park and Block Park would not be affected by the Preferred Alignment. CTA has been coordinating with Chicago Park District staff including Heather Gleason, Doreen O'Donnell, and Michael Lange, regarding impacts to parks in the project area through the Section 4(f) process and proposed mitigations.

CTA has previously disclosed potential property impacts to you and coordinated with your agency over the last year to further discuss these impacts and next steps. The project is currently not funded and CTA will be pursuing federal New Starts funding for a portion of the project costs.

As the project moves forward, CTA will conduct additional engineering, which will allow CTA to further refine property needs and identify ways to minimize impacts to properties. CTA will continue to update and coordinate with your organization regarding potential project and property impacts and provide any additional information as the project progresses.

CTA will hold an open house meeting to present the Preferred Alignment to the public and obtain additional feedback. All interested parties are invited to attend this upcoming public open house. Welcome to the

Red Line Extension Project

Property Acquisition and Relocation Community Meeting

The purpose of this open house is to:

- Provide information about potential property displacements and what it means for your property
- Facilitate information about the property acquisition and relocation process
- Offer resources outlining the rights of property owners and tenants
- Share information on the Red Line Extension (RLE) Project

Please participate by discussing your questions or concerns with the representatives stationed around the boards and at the workstations. There will be no formal presentation.

If you would like to schedule a one-on-one meeting with CTA's relocation liaison, please let us know by noting it on the sign-in sheet or on a comment card.

You may leave your comments with us today, or send a comment card to this address:

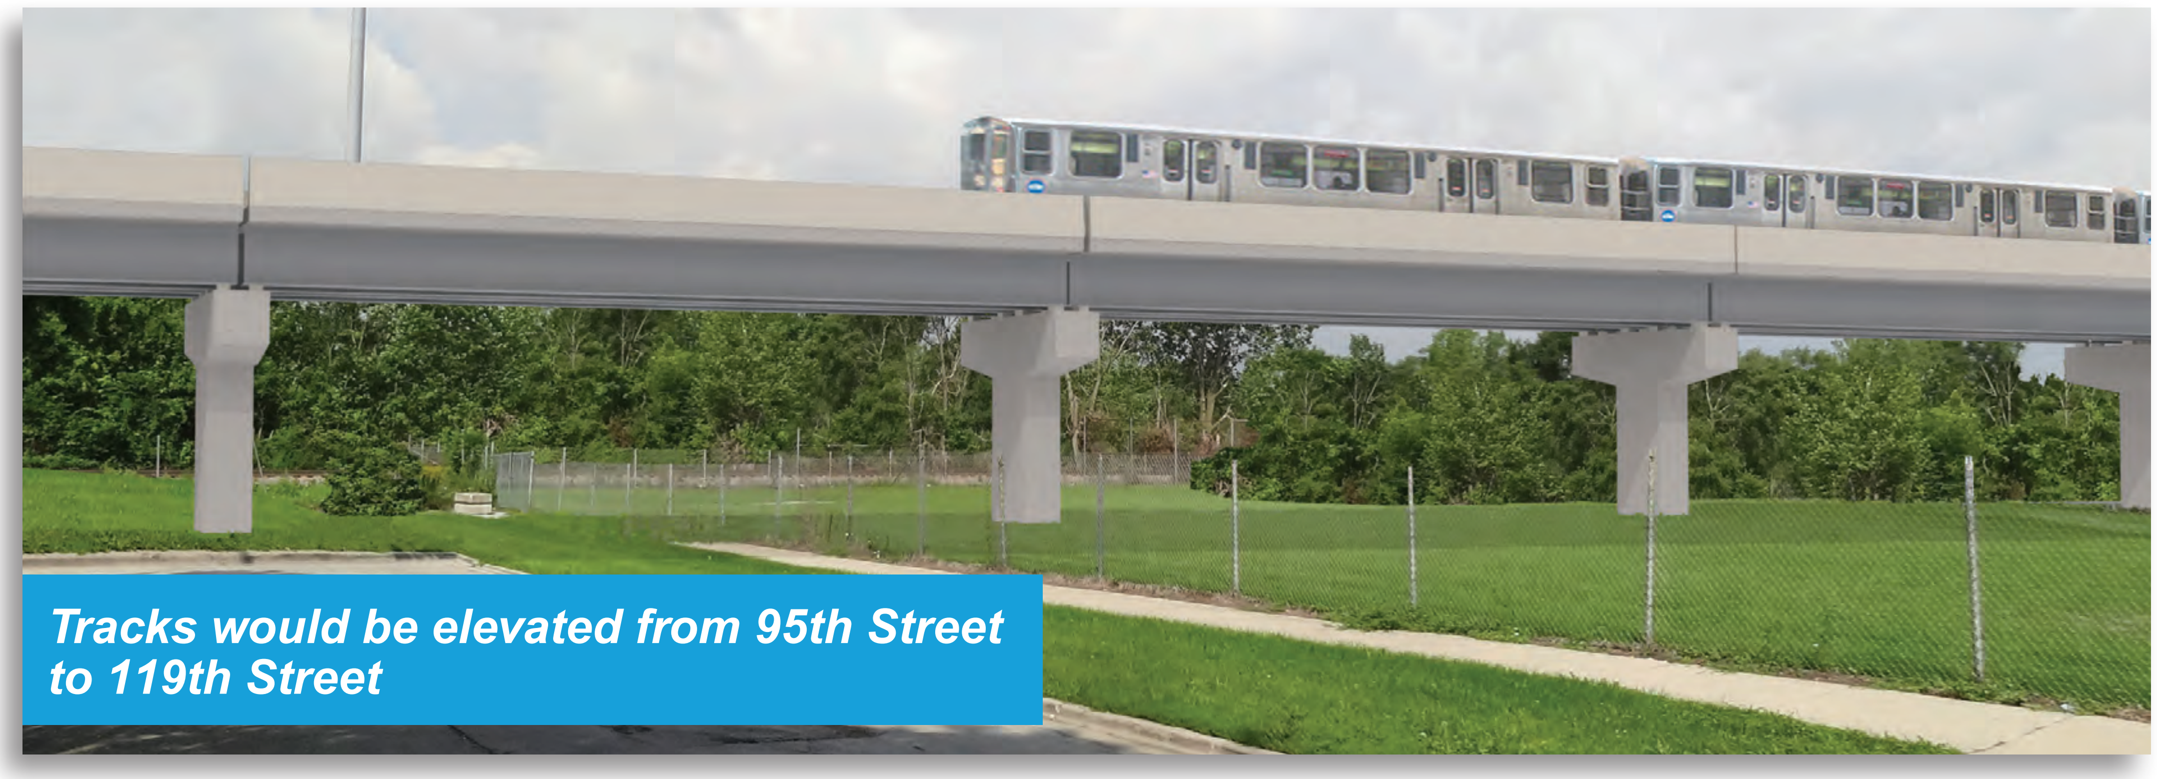
Preferred Alignment

Based on public feedback, technical analysis, and agency coordination, CTA has selected a route that would run along the west side of the Union Pacific Railroad tracks from I-57 south to approximately 108th Place, then would cross the Union Pacific Railroad tracks and run along the east side of the tracks until crossing the Metra Electric tracks near 119th Street and continuing south to 130th Street.

Project Benefits	East Option	West Option	Preferred Alignment
Minimizes Affected Parcels	☒	☑	☑
Minimizes Affected Residences	☒	☑	☑
Minimizes Affected Businesses	☑	☒	☑
Avoids Impact to Historic Roseland Pumping Station	☒	☑	☑
Maximizes Economic Development Opportunities	☑	☒	☑

The Preferred Alignment is a combination of the previously presented East and West Options. It would capture the benefits and minimize the impacts of either option, and it also incorporates feedback received on the Draft Environmental Impact Statement.



Tracks would be elevated from 95th Street to 119th Street

Note that appearance of project elements (such as parking structures, beams, columns, etc.) in visualizations is intended to show scale of project elements. Actual construction appearance may differ based on design decisions for colors, textures, finishes, and choice of specific design features.

Quick Facts about Acquisition and Relocation

The property acquisition and relocation process is governed by the federal Uniform Relocation Assistance and Real Property Policies Act of 1970 (also known as the "Uniform Act"), which outlines the rights of owners and tenants of business and residential properties.

The process includes two main parts:

Acquisition – The purchase of your real estate. Property owners would not be paid less than fair market value for their land and buildings. In some circumstances, if current appraisals are less than the original purchase price, an owner may be eligible for compensation equal to the original purchase price.

Relocation – Additional benefits offered should you or your business be displaced. CTA will provide a relocation agent to every displaced person to help navigate the benefits that are available. Residential homeowner financial benefits may include:

1. Moving and Related Expenses
2. Replacement Housing Payments
3. Incidental Closing Costs

CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured.

Moving Ahead to a Better Red

Red Line Extension

Next Steps and Timeline

Now that CTA has selected the Preferred Alignment, a Final Environmental Impact Statement will be prepared and preliminary engineering will be conducted. CTA and FTA will complete any additional analyses and respond to public comments on the Draft EIS as part of the Final EIS.

On November 27, 2016, Mayor Emanuel and CTA announced approval of $75 million in funding over the next 5 years for the RLE Project, which will allow for completion of these next steps.

CTA will apply to the Federal Transit Administration (FTA) for entry into the Project Development Phase of this project to pursue federal funding for construction of the project under the competitive federal "New Starts" program.

Project Development and full funding for the RLE Project under this program is a multiyear, multistep process.

CTA will continue to work with the community to complete this important project.

RED AHEAD Moving Ahead to a Better Red — Red Line Extension

Altgeld Temporary Advisory Committee
Meeting Minutes

Monday, December 16, 2019
10-11:30 a.m.
Altgeld CYC Building - 951 E. 132nd Street, Chicago, IL

Project Team Attendance:

- Leah Dawson Mooney, CTA
- Sonali Tandon, CTA
- Marlise Fratinardo, CTA
- Barbara Stubblefield, RLE Program Management Team
- Lilliane Webb, RLE Program Management Team

TAC Attendance:

- Cheryl Johnson
- Elizabeth
- Delores Lucas
- Bryan Bradley
- Patricia
- Lichelle, CHA
- Aubrey Jacobs

Summary

The Chicago Housing Authority (CHA) convened its Altgeld Temporary Advisory Committee to discuss a variety of topics on December 16, 2019. CTA's presentation on the Red Line Extension project was moved to the first item on the agenda following introductions. Ms. Fratinardo led the group through a presentation that covered project background, benefits, anticipated schedule, and recent progress. The presentation ended with new information regarding the location of the station at 130th Street. The primary purpose of CTA's attendance at the meeting was to present the new possibility of moving the station south of 130th Street and solicit input on whether the community agreed it is a good idea to explore further. Ms. Fratinardo emphasized the south of 130th Street option may be possible but still requires further coordination with CHA and other agencies to confirm. Topics discussed included impacts and mitigations, development opportunities, agency coordination, circulation and the Transit-Supportive Development (TSD) plan.

Discussion

Impacts and Mitigations

- Cheryl Johnson inquired about the wetlands near Altgeld Gardens.
  - Ms. Tandon replied that analysis by the U.S. Army Corps of Engineers confirmed the area nearby the proposed station is not officially classified as a wetland.
- Ms. Johnson asked if there are safety issues with the train running closer to the houses in Altgeld Gardens. Ms. Johnson stated she would look at some maps to get a better sense of the station location but was initially concerned about proximity to houses.
- Ms. Johnson asked if CTA is looking to purchase land from CHA.
  - CHA representatives clarified that discussions have not reached that point. There are a couple of options that could be explored including selling or swapping land.
- Ms. Johnson followed up to see if there will be benefits for the community in exchange for the land. Ms. Johnson believed CTA would be making money from parking.
  - CTA explained the agency doesn't make money off of its park and ride locations, but the TSD plan will look at amenities like where people will get their coffee on the

 - way to or from the station. There is more opportunity for community economic growth if the station is located south of 130th Street.

- CHA asked if moving the station location would delay the RLE project.
  - CTA explained it is hopeful it won't delay the project. Conversations are still happening with the State Historic Preservation Officer (SHPO) on the visual impacts of the station. The agency also needs to understand traffic impacts and mitigations so more coordination is still needed.

Development Opportunities

- CHA asked if there was less land for commercial development with the north option.
  - CTA noted that the north location near Metropolitan Reclamation District (MWRD) has some associated scents that would need to be mitigated to make the station more appealing. CTA responded MWRD has some land for commercial development as well.
- Ms. Johnson noted it would be great if MWRD didn't use sludge beds/waste basins at all and that they are supposed to build alternatives.
- CHA asked if there will be opportunities to work with the Altgeld and Riverdale communities on station design and amenities that people want. Ms. Johnson added that the community had previously provided that type of input at a meeting at St. John's church. CHA explained that community preferences may have changed since the previous input session.
  - CTA shared that the TSD study will address other factors beyond architecture. The study will figure out what people want, what the market will support and how to implement. It will serve as a roadmap.
- CHA requested clarification on whether TSD would study all four new stations.
  - CTA confirmed and stated that TSD community input sessions are expected to take place in fall 2020.
- Ms. Lucas asked if CTA's RLE community contacts, Barbara Stubblefield and Lilliane Webb, will assist.
  - CTA confirmed these two contacts will remain involved with the TSD study and Ms. Stubblefield is the primary community contact. A new hire is also being sought for transit-supportive development plan.

Circulation and Access

- Ms. Johnson also asked for clarification on whether an overpass was anticipated with the north option.
  - CTA noted the pedestrian walkway would be an underpass for the north option. The pathway CTA is exploring to move the station south would have the train going under 130th Street via underpass.
  - Ms. Fratinardo explained the station would be at-grade. CTA has been doing background work and the two options are early in the conception. CTA has looked at two options for traffic flow around the south station option. There needs to be coordination with Chicago Department of Transportation (CDOT) and the Cook County Forest Preserve District. One consideration is circulation of vehicle traffic. Logistics need to be further discussed.
- Ms. Lucas asked if CTA will use existing railroad tracks.
  - CTA replied that new tracks will be used.
- Ms. Johnson asked if the station would have a bus turnaround.
  - CTA confirmed it would. The station will also have all day parking.
- Brian Bradley asked about a connection to Carver Military Academy High School.
  - CTA noted that additional study of the school's needs will be needed.

- CHA reminded committee members to also consider the situation for residents and students if the station is located north of 130th Street to understand if it would be better or worse than the alternative. South presents a better CHA development opportunity. Given that CHA wants to develop the area anyway, the new station presents an opportunity. There will be impacts to neighbors no matter what development goes in the area.
    - Ms. Tandon stated CTA may need refine improvements and traffic patterns.
- It was noted that the traffic pattern would impact TCA Health the most. It was also noted there is not currently a crossing gate at 132nd Street.
    - CTA will plan to reach out to Carver High School and TCA Health. CTA will also coordinate with the existing railroads. Old 130th Street is closer to where CTA envisions tracks crossing. What happens to Old Doty would need to be worked through with CDOT.
- Mr. Bradley shared that parents dropping kids off at Carver High School mainly use Old 130th Street instead of 132nd Street to access Carver High School.
- CHA summarized the station location is a complex discussion but the south option seems like a better option than the north. The reason it wasn't explored in the initial planning phases for the Red Line Extension is because the buildings on Altgeld Blocks 11, 12 and 13 weren't demolished at that point.
- Ms. Lucas reminded the group to consider access for the western parts of the community that are further from the station. These residents would likely come from 130th Street or 131st Street. CDOT and IDOT should consider walking and biking plan for accessing the station. CHA said the bus would drop people off at the station and asserted the route for #34 bus would be the same.
    - CTA explained the #34 bus is still planned to serve as a circulator for the community. Some bus lines, including Pace, may go to other Red Line Extension stations. CDOT will provide input as well. CTA shared the TSD plan will look at multimodal access and the agency is currently undergoing service planning for the bus routes.
- CHA asked if the committee was generally in favor of exploring the south option. All in the group expressed agreement. A third option for the station configuration was also requested.

Existing Mobility Concerns

- Ms. Lucas asked CTA to alleviate bus damage to median at 130th/Everheart and noted the buses are tearing up the streets. Ms. Lucas noted that all of 130th Street needs to be assessed. She also noted that 131st Street is serving as the main street for the bus. Trains crossing existing railroads block traffic causing traffic on other streets. Altgeld Gardens was built for residential, not commercial use. The community will need quality materials that will last for a long time with increased activity. Ms. Lucas stated that she is already connected to Jason Meter at CTA.
    - CTA's RLE team shared that they will discuss the longer-term issues that Ms. Lucas brought up with the team.
- CHA requested that CTA ensure planning isn't focused on outsiders. The immediate community is large and needs good ways to get to the station.
- Ms. Lucas added if it still takes 30 minutes to get from the west side of the community to the station, time savings won't be achieved for those residents. She would like the Pace bus to stop at 130th Street before the RLE is built as another transportation option to 95th Street. She explained residents need an express bus and more than one way out of the Riverdale community.
    - Ms. Mooney asked what Pace has said to the community's request.

- Ms. Lucas stated Pace had listened but hadn't said much. CHA added that many transportation modes pass by the community, but they aren't accessible to residents.
    - CTA offered to inquire about the issue with their colleagues at Pace. Ms. Mooney added that the Riverdale Multimodal Plan is compatible with RLE.
- Ms. Lucas noted a lack of bus shelters in the communities of Riverdale.
    - CTA stated bus shelters fall under CDOT's authority with coordination form the aldermen. Bus shelters are paid for by advertising revenue and CTA can assist by providing ridership information.

Committee members were instructed to reach out to Ms. Stubblefield if they had further inquiries. The CTA RLE team exited the meeting around 11 a.m. as the committee proceeded to other business on their agenda.

Action Items

- CTA to reach out to Carver High School and TCA Health.
- CTA coordinate with railroads near 130th Station.
- CTA to discuss service in Riverdale communities with Pace.
- CTA to provide ridership information to assist in securing bus shelters.
- CTA to discuss existing concerns about CTA bus service in Riverdale.

Carver Military Academy High School Board of Governors Meeting Minutes

RED AHEAD Moving Ahead to a Better Red
Red Line Extension

Carver Military Academy High School Governing Board
Meeting Minutes

Monday, February 3, 2020
5:30-6:30 p.m.
13100 S. Doty Avenue, Chicago, IL 60827

Project Team Attendance:

- Leah Dawson Mooney, CTA
- Sonali Tandon, CTA
- Barbara Stubblefield, RLE Program Management Team
- Lilliane Webb, RLE Program Management Team

Governing Board Attendance:

- Major Steven Rouse, principal
- Derovic Coleman, Senior Military Instructor
- M. Striverson
- J. Ramirez
- Jaote Wawatu, teacher
- Tom Shepard, community member
- Maria Amezcua-Garcia, parent
- Antonette Slater, parent
- Traci Gamble, parent
- S. Davis
- V. Durrah
- K. Alderson, teacher

Summary

Carver Military Academy High School Governing Board invited CTA's Red Line Extension project team to share a 15-minute project update during its February 3, 2020 meeting. The project team passed out a short slide deck, along with the most recent project fact sheet and newsletter. Boards displaying information about station locations for north of 130th Street and south of 130th Street were set up at the front of the room. Ms. Mooney led the introduction of the team and walked the group through the slide deck. Questions and concerns discussed during the meeting are summarized below.

Discussion

- Governing Board: Will there be any CTA buses from 130th Street station to Hegewisch? Or going west towards Indiana Avenue?
    - Ms. Tandon replied CTA will look at how buses will serve new stations. Ms. Mooney added the CTA is also working with Pace on service to new stations.
- Major Rouse asked when the extension would be open for operation.
    - Ms. Mooney explained the last schedule had the opening in 2026, which would require an aggressive workplan to reach that opening date now. There is at least four years of construction after the two years of project development that CTA is just now preparing to enter.
- Governing Board: Where will 130th station be located?
    - Ms. Tandon explained the north option and south option using exhibit boards for reference. The RLE team still needs to figure out the station layout and park-and-ride. Students could walk to school along 132nd Street. CTA is coordinating with the City of Chicago, Chicago Housing Authority (CHA), State Historic Preservation Offices (SHPO), Illinois Department of Transportation (IDOT) and the Cook County Forest Preserve District (CCFPD). The south option would mean closing off 130th Street and people driving to Carver High School would be rerouted.

- Governing Board: Would we be cut off at 130th Street? People turn down 130th Street from Ellis Avenue to reach Carver High School.
    - Ms. Mooney noted that it is a challenge with the north station option to get people coming from south of 130th Street across 130th Street.
- It was noted that there is no exit ramp coming north on I-94 other than 130th Street. Further south on Doty Avenue, there is an exit ramp from the southbound lanes and a ramp from Doty Avenue to the northbound lanes.
- Governing Board: Do you find that business blooms around station area? Like Dunkin Donuts and Starbucks?
    - Yes, there are businesses that will naturally develop and others can be incentivized through Neighborhood Opportunity Funds and other sources. This will be explored in the Transit Supportive Development (TSD) plan.
- Governing Board: One person asked for clarification on the timing.
    - Ms. Mooney reiterated there is an old timeline estimate that needs to be reevaluated.
- Major Rouse shared that most people who drive turn left from Ellis Avenue to access Carver from 130th Street, including staff. Major Rouse noted it is difficult for students to access Carver High School from parts of the city, such as near 55th Street or 79th Street and Jeffery Avenue, so students from those areas currently don't enroll at Carver High School.
- It was noted Carver High School would be the only Chicago Public School (CPS)with one entrance and exit with the proposed plan closing 130th Street. This would be a concern for emergency access.
- Ms. Alderson explained she is more concerned about the pedestrian underpass if the station were located north of 130th Street. Ms. Alderson referenced the underpass in Homewood as an example of what doesn't feel safe and should be avoided.
- Mr. Shepard noted it's still a long walk from the north side of 130th Street to Altgeld Gardens. He has been involved in other meetings on the project and this is his first time seeing this layout. There is no place where access is as bad as this campus. The station has to be located on the south side. People shouldn't be left on the north side of 130th Street after the Red Line is extended with over a mile to walk and contend with rocks and coyotes. My Shepard emphasized the station has to go on the south side of the street and there also has to be connections at 130th Street for Carver High School too.
- One attendee explained the Red Line Extension will be beneficial to youth who commute to the University of Illinois at Chicago on the Blue Line. To transfer from the Blue Line to the Red Line and be able to take the train this far south would be beneficial.
    - Ms. Mooney stated CTA is excited that the south station is an option but more study is required. CTA President Dorval R. Carter, Jr. will make an informed decision on the station location. Traffic patterns and the impact on schools will be considered. There will be opportunity to create mitigations to solve issues that may be identified with additional study.
- Mr. Shepard suggested the new stations should be connected with bike racks and Divvy bikes. He noted Active Transportation Alliance is working on a trail in the area. He requested that the bike racks at new stations should be better than those available at 95th.
    - Ms. Mooney explained that CTA is giving thought to access beyond traveling by car.

Golden Gate Homeowners' Association
Meeting Minutes

Tuesday, February 11, 2020
11:30 a.m. - 12:00 p.m.
Carver Park (Children's Building), 939 E. 132nd Street

Stakeholder Attendance:
- Fatimah Alnurrion Harris, Golden Gate Homeowners' Association
- Deloris Lucas, Golden Gate Homeowners' Association
- Michelle Adams, Golden Gate Homeowners' Association
- Doris Martin, Golden Gate Homeowners' Association
- Kendrea Rodriguez, Golden Gate Homeowners' Association
- Loretta Lee, Golden Gate Homeowners' Association
- Jessica Becker
- Larry Nettles

Project Team Attendance
- Sonali Tandon, CTA
- Marlise Fratinardo, CTA
- Barbara Stubblefield, RLE Program Management Team
- Kira Baltutis, RLE Program Management Team

Overview:
The 130th Street station presentation at the Golden Gate Homeowners' Association meeting began at approximately 11:30 a.m. with attendees and the RLE Program Management team exchanging introductions. The team passed out the project benefits fact sheets and newsletter. Ms. Fratinardo provided a brief overview of the Red Line Extension (RLE) project. Ms. Fratinardo also noted that the previous day, February 10, was a milestone for the RLE project due to the Chicago Transit Board's approval of funding for the consultant team that would support the project's Final Environmental Impact Statement. The attendees in the room clapped in recognition of this step in the project's progress.

Two boards displaying information about station locations for north of 130th Street and south of 130th Street were set up at the front of the room. Ms. Fratinardo led the discussion regarding the proposed north and south station scenarios. Questions and concerns discussed during the meeting are summarized below.

Discussion
- Ms. Lucas stated that the south station layout shown on the exhibit board appears to show the 130th station on the two blocks within Altgeld Gardens that are now open space. The train would terminate within Altgeld Gardens' boundaries. She observed that the south station option was positive for the residents of Altgeld Gardens, who would not have to cross the street to get to the station, and that the train would come straight to the neighborhood.
- A Golden Gate member asked if the station would have a marketplace where people can get food and snacks.
    - Ms. Fratinardo stated that CTA is exploring the concept of relocating the station and the Park-n-Ride. There is a more room at this south station location and the

potential to encourage future developments such as a coffee shop and/or grocery store. The south station location opens up possibilities.

- A Golden Gate member asked if the consultants working on the RLE project would be advised to include these suggestions of a coffee shop or grocery store as part of the final plan for the station.
  - Ms. Tandon noted that the CTA is also developing a Transit-Supportive Development (TSD) plan that would provide a blueprint for potential development around the new four stations. This plan will include visions for these stations, which could include suggestions for amenities near the station.
- A Golden Gate member asked what the deadline was for finalizing the location and layout for the 130th Street station.
  - Ms. Fratinardo stated that the expected deadline was to complete this by the end of 2022 (completion of Final EIS and ROD).
- Ms. Alnurrion asked if there would be a connection for Golden Gate residents to access the 130th Street station easily within Altgeld Gardens. She stated that the residents already deal with divisions between the two communities based on who gets what and it would be preferable if there was somewhere that Golden Gate residents would have an entryway.
  - Ms. Fratinardo asked if Ms. Alnurrion's comment was about connectivity through Altgeld Gardens.
  - Ms. Alnurrion responded that she takes the Red Line but would still have to walk to Golden Gate from the 130th Street station. She wants to highlight safety as an important concept to consider for residents of Golden Gate after exiting the Red Line at 130th Street. Ms. Alnurrion noted that it would be good to have a corridor or a designated way of getting back to Golden Gate.
- A Golden Gate member asked if CTA has considered rerouting the #34 bus for residents to travel between the train stations and their homes.
  - Ms. Fratinardo noted that, since CTA is building stations and tracks that have never existed previously, CTA would need to discuss how different bus routes and transportation details would be coordinated and enhanced to meet the needs that would arise with the new station locations.
- A Golden Gate member inquired about the potential of working with Pace and having the bus stop at Walmart. The member noted that the village of Riverdale connects with Pace, and that the Golden Gate residents want to connect with Pace as well.
- A Golden Gate member asked if homes would have to be removed along the train route between the 95th/Dan Ryan station and the 130th Street station.
  - Another Golden Gate member responded by stating the impacted homes are north of 130th Street.
- A Golden Gate member noted that they've had a history of properties being burned. The member noted that the local area is very meaningful to minorities. The member inquired if architects would design the area near the station so that it incorporates the history in a meaningful way and connects to the minorities living there. The member noted that the Underground Railroad should be recognized.
  - Ms. Tandon noted that the TSD plan would include input from the local neighborhoods. She noted that there were many details to consider that would go into the overall plan and these things would be important to incorporate.
- A Golden Gate member inquired about the chances that the contracts for this project would be awarded to minority organizations and how minority organizations could benefit from the construction work that would be needed.

  - Ms. Tandon and Ms. Fratinardo both explained that the RLE project has Disadvantaged Business Enterprise requirements, which is set at 26% of this project's contracts.
  - Ms. Stubblefield also explained that she is working on a workforce development plan. Ms. Stubblefield explained that both CTA and she as an individual were seriously committed to diversity within this project and providing opportunities to minority organizations. She explained that CTA's president, Dorval R. Carter, Jr., is also very committed to diversity.
- A Golden Gate member inquired about what properties would be demolished past 95th Street.
  - Ms. Fratinardo explained that there are properties along the Red Line Extension Preferred Alignment where land is needed. She noted that there were several parcels that were not occupied, although some were. Ms. Fratinardo explained that a significant part of the planning process is evaluating what alignment would minimize impacts, to avoid impacting a high number of properties.
  - Ms. Lucas noted that she works with the 95th community and can share the newsletter and update the group on the project's progress and the process of acquiring property. She noted that some of the background questions people were asking about are items that the CTA has already been working on.
  - Ms. Tandon noted that all of the parcel information of the properties that would potentially be impacted is also on CTA's RLE website.
- A Golden Gate member asked if somebody parked their car near the station, how far that person would have to walk to the train.
  - Ms. Fratinardo explained that in the 130th Street south station plan, the distance to the station from the parking lot could be measured in feet since they were close to each other. She noted that CTA now needed to right-size the parking lots and refine the number of spaces and size of the lot so that it accommodates all riders but is not too large.
- A Golden Gate member inquired if riders could park their car on the north side of 130th Street, even if the station was on the south side.
  - Ms. Fratinardo explained that CTA thinks that the parking on the same side of the train station was the best option and would make the most sense. She noted that at this point, CTA is investigating parking options closest to the train station for rider convenience.
- A Golden Gate member asked about the decision to move the station to the south side of 130th Street. The member noted that this plan had been in process for over 20 years when President Obama was a state representative and spoke with their community. The member noted that people designed surveys and the plan was to put the station on the north side so that it would be easy for people to connect to it, including people coming from Indiana and Michigan. The member noted that there wouldn't be too many people in Altgeld Gardens using this line and at that time, Altgeld Gardens was not a place that people would want to park their cars. The discussion at that time was to utilize the property near the 130th Street station to build stores and have a bank nearby. The member noted that having the 130th Street station on the north side of the street would make it more accessible and safer, and that there would be more parking on that side. The north location would likely be better for the CTA. The south location option doesn't accommodate the revenue that the community is trying to bring in, and the north location would provide an accessible option for many people to utilize amenities such as stores or a bank

before getting back on the expressway. In addition, if there was more space on the north side, the #34 bus could drop off near the station.

- Ms. Fratinardo explained that at this time, the south station location was an opportunity that was being explored but had not yet been decided.
- The Golden Gate member responded that the community and the CTA explored four different alternatives previously, including some near Halsted Street, because of safety issues. The member noted that this project has been in several stages over the years and that the alignment that was the most convenient was the option that followed the old rail line.
- Ms. Tandon noted that the Preferred Alignment follows the old railroad line as well.

Closing Remarks

The presentation ended with Ms. Fratinardo explaining that there would be a public meeting where CTA would hear more feedback from the community on the proposed relocation of the 130th Street station, as well as other stakeholder meetings in February. She and Ms. Tandon both noted that there was a CTA RLE email address where the team could receive comments and feedback from the community. Ms. Tandon noted that the CTA had done an initial layout of the station size and it appears there is space to construct the station. The CTA had done a fatal flaw analysis regarding space and traffic impacts before the CTA RLE team came today, and that the CTA saw this new proposal for a 130th Street station location on the south side of 130th Street as a positive change.

Red Line Extension

Carver Park Advisory Council (CPAC)
Thursday, February 13, 2020
6:30 – 7:00 p.m.
Carver Park (Children's Building), 939 E. 132nd Street

Stakeholder Attendance:

- Marguerite Jacobs, Carver Park Advisory Council
- Deborah Lewis, Carver Park Advisory Council
- Nichelle Herron, Carver Park Advisory Council

Project Team Attendance

- Sonali Tandon, Chicago Transit Authority (CTA)
- Barbara Stubblefield, RLE Program Management team
- Kira Baltutis, RLE Program Management team

Overview:

The 130th Street station presentation to the Carver Park Advisory Council meeting began at approximately 6:30 p.m. with attendees and CTA's Red Line Extension representatives exchanging introductions. The team passed out the most recent project fact sheet and newsletter and Ms. Tandon provided a brief overview of the Red Line Extension (RLE) project. Ms. Tandon noted that the existing 2016 Draft Environmental Impact Statement (EIS) would soon be updated through an additional engineering analysis over the next two years. This analysis would result in a Final EIS.

Two boards displaying information about station locations for north of 130th Street and south of 130th Street were set up at the front of the room. Ms. Tandon led the discussion regarding the proposed north and south station scenarios. Each of the community members walked up to the board throughout the presentation to examine the labels and ask clarifying questions about the layout of the station and available parking. Ms. Tandon also explained that a Transit-Supportive Development (TSD) study will be performed alongside the Final EIS, noting that the TSD study would incorporate the visioning process that would gather input from communities located near the RLE project. She also noted that the parking plan would be finalized as further analysis was performed.

Questions and concerns discussed during the meeting are summarized below.

Discussion

- Ms. Jacobs mentioned the CTA's recent commitment of $310 million and asked why more money is needed for the RLE project.
    - Ms. Tandon replied that the funding the agency currently has is for the upcoming environmental and engineering analysis.
- Ms. Jacobs asked if another party, such as a foreign country, was investing in the RLE project.
    - Ms. Tandon and Ms. Stubblefield replied that the RLE is a public project and that all funding for the project would come from the government. Approximately fifty percent of funding for the RLE project is anticipated to come from local, state and CTA funds, and fifty percent is anticipated to come from the federal government.

- Ms. Jacobs inquired if the existing farming/gardening plot that is located close to the proposed 130th Street south station entrance would be built over.
    - Ms. Tandon replied that the garden plot is south of the proposed station entrance and would not be built over.
- Ms. Jacobs noted that the median at the main entrance on Ellis Avenue and 130th Street was challenging to drive around. Ms. Jacobs asked if the median would be removed or modified.
    - Ms. Tandon replied that the CTA would be performing additional traffic analysis that would potentially address this issue.
    - Ms. Jacobs replied that the traffic is heavy near that intersection especially around 8 a.m. on weekdays until about 1 p.m. when children are in school. Ms. Jacobs noted there is a bus that transports the children but would like to see an additional Pace stop at Ellis Avenue and 130th Street. Ms. Jacobs also noted that Riverdale residents need more connections because they have even fewer bus connections or stops than Altgeld Gardens residents.
- Ms. Jacobs noted that the Altgeld Gardens community has asked for stores to be built off of 130th Street near the Metropolitan Water Reclamation District in 2012 when visioning exercises were being conducted by the CTA for the RLE project.
- Ms. Jacobs noted that the community is currently exploring a bike path on the north side of 130th Street but it still needs to be determined to where the bike path would lead.
- Ms. Jacobs noted that the Altgeld Gardens community's dreams had died when the community didn't hear about any progress on the RLE project following the visioning process that took place several years ago. Ms. Jacobs noted that seeing all of the media coverage of the RLE project brought the vision back to life for the community. She noted that there is substantial construction training taking place on a local level to prepare the community for construction jobs that may become available. Ms. Jacobs noted that people in the area were training in areas such as carpentry and electrical work to prepare for employment.
- A Carver Park Advisory Council member inquired if there would be a bus depot at the 130th Street station?
    - Ms. Tandon replied that current bus lines that service the area would be examined to serve the proposed new stations, there would be a bus terminal for the 130th Street station.
- Ms. Jacobs asked if there would be retail stores, a coffee shop or something similar to a Dunkin Donuts next to the station or across the street.
    - Ms. Tandon replied that any potential development of retail stores is possible. The TSD analysis would help define the community's vision and market potential for development. The CTA would be working hand-in-hand with the city on the TSD study.
- Ms. Jacobs asked how the Forest Preserve District of Cook County (FPDCC) would fit into the planning process for the 130th Street station. Ms. Jacobs noted that the Altgeld Gardens community recently received $75,000 from the FPDCC to utilize open space near Little Calumet.
    - Ms. Tandon replied that a FPDCC owned parcel would be needed for the station. Ms. Tandon noted that the CTA has spoken with the FPDCC and the agency is supportive of the RLE project because they see the benefits it would provide to the local community and region and for transit access to the Forest Preserve.
- Ms. Jacobs noted that it would be beneficial to have an activity or park nearby for kids to go to.

- A Carver Park Advisory Council member inquired if the RLE project would continue through Illinois to Indiana. The member had heard a rumor that this might be a possibility.
    - Ms. Tandon replied that the project will not be extending beyond 130th Street station at this point.

Closing Remarks

The presentation ended with Ms. Tandon explaining that there would be a public meeting later in 2020 where CTA would hear more feedback from the community as well as other stakeholder meetings throughout February. The Carver Park Advisory Council members agreed that the station location south of 130th Street would be a great location and expressed excitement for the development of the station. Ms. Jacobs stated that she had a broad network to continue communicating and promoting the RLE project, especially the 130th Street station.

Red Line Extension

People for Community Recovery
Meeting Minutes

Thursday, February 20, 2020
5:30 – 7 p.m.
Carver Park (Children's Building), 939 E. 132nd Street

Stakeholder Attendance:

- Cheryl Johnson, Executive Director, People for Community Recovery (PCR)
- Michael, resident and past student at Carver Military Academy
- Alicia, resident of 121st and LaSalle
- Vivian Mills, Facilities Manager, TCA Health
- Veronica E. Clarke, President & Chief Executive Officer, TCA Health
- Sabrina Holmes, resident
- Leslie Berihill, TCA Health employee, resident, LAC treasurer
- Camille,
- Missed it - Block 17 resident
- Renee
- Juwaun – Kenwood Oakland Community Organization
- Sharon Quid - resident

Project Team Attendance

- Marlise Fratinardo, Chicago Transit Authority (CTA)
- Barbara Stubblefield, RLE Program Management team
- Lilliane Webb, RLE Program Management team

Overview:

CTA's Red Line Extension project representatives attended a portion of People for Community Recovery's monthly community meeting on February 20, 2020. While the overall focus of the meeting was housing, Ms. Cheryl Johnson introduced CTA and allotted some time on the agenda to discuss the Red Line Extension (RLE) project. In her introduction Ms. Johnson noted that the CTA was also invited to dispel notions that housing would be impacted within the Altgeld Gardens by the RLE project. Ms. Fratinardo provided an introduction, explained the project background, and noted recent momentum in progressing through the federal funding process. Ms. Fratinardo used two exhibit boards displaying potential station layouts north and south of 130th Street to describe the 130th St. station location opportunities. Ms. Fratinardo shared CTA's main goal in attending the meeting was to request input regarding these locations.

Representatives from TCA Health, a clinic with its main location at 1029 E. 130th Street, were also present after communication with Ms. Stubblefield regarding CTA's desire to solicit input on the 130th St. station location. The TCA Health staff continued a brief discussion with RLE project team members in the hallway after the presentation. They emphasized possibilities the new station could provide for their business including better access for staff and patients traveling from different areas. They noted the possibility of adding additional medical services, should transportation to their location improve. The TCA staff members explained their concerns are different than local residents but look forward to further communication with CTA.

Additional questions and concerns discussed during the meeting are summarized below.

Discussion

Transportation to the Station

- Ms. Quid inquired if residents would still have to catch buses from the 130th Street station to get back to their homes in Altgeld Gardens, noting that she lives near 133rd Street in Block 17 of Altgeld Gardens.
    - Ms. Fratinardo noted that future changes to bus service will likely occur as a result of RLE, the details are currently not known. .
- A PCR stakeholder attendee inquired if the 130th Street north station location would cost more money.
    - Ms. Fratinardo replied that the north station location is within the projected budget.
- Mr. Michael pointed out the south station option removes the need for pedestrians to travel under the roadway.
- Ms. Johnson reiterated that PCR is 100 percent supportive of the RLE project because the area lacks transit options with only one bus serving the community. PCR is willing to work with the CTA to ensure the new 130th station is a just transition for community.

Environmental Impacts

- Ms. Johnson has met with Chicago's chief sustainability officer. During her discussion with the chief sustainability officer, she explained she wants CTA to electrify buses for environmental reasons. Ms. Johnson explained that the area is compromised environmentally so she does not want buses to exacerbate environmental issues. She has asked for the area to become a demonstration zone for electric buses. The community could have access to power sources at station to charge non-CTA electric vehicles as well.
- Ms. Johnson noted the proximity of the station location north of 130th Street to Metropolitan Water Reclamation District's (MWRD's) sludge beds. Ms. Johnson used the exhibit board showing the north station location to explain the layout of MWRD properties and water digesters to the group. She explained there are ten football field-long water digesters that are 100 feet deep on the MWRD property now. There are also water digesters on Indiana Avenue. Ms. Johnson shared MWRD has goals to add more digesters.
- Ms. Sharon Quid asked if the digesters improve air quality and whether the outlook is to obtain more digesters.
    - Ms. Johnson suggested tabling the discussion on MWRD and noted that community members interested in continuing that conversation could indicate their interest on the meeting sign-in sheet. Ms. Johnson added that the object that looks like solar panel near 111th Street is actually an air quality monitor and more air quality monitors are on the way.

Property Impacts

- Ms. Clarke asked about proximity of the station to TCA Health's parking lot. She stated that plans always change with construction and the current exhibit shows the station outline near the health center's rear gate. Ms. Clarke inquired about the proximity of the station to TCA Health.
    - Ms. Stubblefield and Ms. Fratinardo noted concepts depicted on exhibit boards are not final and there is room for further refinement.
    - Community members noted there is already a fence up around the demolished blocks. Ms. Fratinardo noted that this fencing is not affiliated with CTA.

Economic Opportunities

- Ms. Johnson shared that PCR is supportive of the RLE project but has concerns about equity impacts. The Altgeld Gardens community has lost housing that previously was located on the plot now proposed for the 130th Street station location. Ms. Johnson expressed a desire to see an equity tradeoff for the land. Ms. Johnson expressed an interest what the community will receive in exchange for giving up housing on Altgeld Gardens' blocks 11-13.

- Ms. Johnson explained that commercial strips are often located near transit stations so PCR hopes to work with CTA on development near the 130th Street station.
- Ms. Mills asked about employment for community residents. Ms. Clarke added if the station is brought into the community, there has to be opportunities.
- Ms. Johnson shared that there should be contracting opportunities as well as jobs. She explained a desire for community ownership of business around and providing services to the station. Ms. Johnson expressed that business ownership is more sustainable than jobs. She inquired if there will be opportunities for contracts on maintenance to the station. Ms. Johnson stated the community's needs to be planning with CTA. Ms. Johnson stated at the end of the day, there will be jobs but the community wants more than jobs. Ms. Johnson indicated she does not want an influx for big box stores. Ms. Johnson suggested to the group that they develop a committee that will work with CTA.
    - Ms. Fratinardo discussed the Transit-Supportive Development study and shared that the study will seek information on what the community wants in terms of development near the four new RLE stations.
- Ms. Johnson asked if CTA will purchase land from Chicago Housing Authority.
    - Ms. Fratinardo shared that many options are being discussed regarding the land but the CTA is focused on determining if the130th Street south station option is feasible at the moment.
- A community member asked how the community could become involved with the RLE.
    - The CTA RLE staff noted there will be additional opportunities for the project team to come to community meetings like the one today. The project team passed out the Fall 2019 newsletter and benefits sheets, noting the project website and contact information for the RLE project. Participants were also invited to join the email list.

Action Items

- CTA to coordinate with TCA Health regarding impacts to their facilities.

Note: ***Per Cheryl Johnson, she does not share the orgs sign-in sheets without prior approval of the committee; note for next meeting w/this group is to get their permission before or immediately following any presentation we deliver.***

Local Advisory Council (LAC) Altgeld Murray and TCA Health Meeting Minutes

February 25, 2020

RED AHEAD
Moving Ahead to a Better Red
Red Line Extension

Altgeld-Murray Local Advisory Council (LAC)

Tuesday, February 25, 2020
12:30 - 1:15 p.m.
Youth Center, 951 E. 132nd Place

Stakeholder Attendance

(8 people on leadership board, 7 residents/members in attendance outside of leadership)

- N. Momas, TCA Health
- D. Reep, TCA Health
- Marguerite Jacobs, Carver Park Advisory Council
- Bernadette Williams, Local Advisory Council
- Carrie Pullie, Metropolitan Family Services
- Synetta Brown,
- Lakisha Hanson, Metropolitan Family Services
- Veronica Clarke, TCA Health

Project Team Attendance:

- Marlise Fratinardo, Chicago Transit Authority (CTA)
- Ashley Walker, Chicago Transit Authority (CTA)
- Barbara Stubblefield, RLE Program Management team
- Kira Baltutis, RLE Program Management team

Overview

The 130th Street station presentation to the LAC (Local Advisory Council) of Altgeld-Murray began at approximately 12:45 p.m. following the meeting's initial prayer time and roll call. Ms. Stubblefield first introduced herself and Ms. Fratinardo, the primary presenter for the Red Line Extension (RLE) Chicago Transit Authority (CTA) staff and Program Management (PM) team, followed by introductions of Ms. Walker and Ms. Baltutis. Ms. Fratinardo first inquired if the meeting attendees had general knowledge of the RLE project, of which most of the room responded with head nods or a verbal acknowledge that they had some understanding of the RLE project. Ms. Fratinardo provided a general overview of the overall RLE project, and then discussed the proposed north and south 130th Street station locations using two boards displaying information about station locations at the front of the room.

Questions and concerns discussed during the meeting are summarized below.

Discussion

- Ms. Williams inquired if the 130th Street station presentation was being done to meet CTA compliance requirements since the station location was potentially moving from the north side of 130th Street to the south side of 130th Street.
  - Ms. Fratinardo replied that this was correct. The CTA has been performing briefings with the Altgeld Gardens community, local organizations and relevant agencies so that all parties were aware of RLE project updates as they occur.
- Ms. Williams inquired if the newly proposed plan for the 130th Street station was to locate the station on the south side of 130th Street.

  - Ms. Fratinardo replied that the CTA is in the process of proposing a new location on the south side of 130th Street but there has not yet been a decision regarding the location of the 130th Street station location. Ms. Fratinardo emphasized that the CTA would first study the south location through an engineering analysis to determine if the south location is the better location to move forward. Ms. Fratinardo noted the south location's proximity to Altgeld Gardens' residents as a significant benefit.
- A LAC member inquired about a former plan to construct the 130th Street station near the expressway, similar to the 95th/Dan Ryan station on the overpass.
  - Ms. Fratinardo explained that the previously proposed 130th Street station location on the north side of 130th Street was part of a former plan presented to the public. She noted that the station would not span over any roadway, as the new 95th/Dan Ryan station does. She noted that the north location was the best available option during the Draft EIS but is more isolated and closer to the Metropolitan Water Reclamation District (MWRD) water treatment plant-meaning less desirable for riders- while the south location is closer to the population center of Altgeld Gardens residents.
- Ms. Williams commented that she felt like the CTA was selling a dream to the LAC that hadn't manifested yet. She commented that she felt like the plan may not be a possibility or wouldn't ultimately be implemented. Ms. Williams commented that she knew the CTA would need to discuss the 130th Street station.
  - Ms. Fratinardo responded that CTA is deeply committed to the project and recently committed $310M in its 2020 budget.
- A LAC member inquired if the proposal for the station on the south side of 130th Street implied that there would be another stop in addition to the four main stations that are part of the RLE.
  - Ms. Fratinardo replied that the 130th Street south station location would be the fourth and final stop, not an additional stop on the RLE.
- A LAC member commented that the station graphics on the board presentation should be more visible so that the overall proposal to move the 130th Street station location is clear to the audience. The LAC member commented that she was thinking of the overpass as the new station location but after hearing part of the presentation, the 130th Street station will not be similar to the 95th/Dan Ryan station regarding its location and layout.
  - Ms. Fratinardo acknowledged that the boards were difficult to see; the boards were carried around the room to help attendees see them.
- A LAC member inquired if the 130th Street station would be comparable to stations such as the 87th Street station, in terms of the size, layout, and access points.
  - Ms. Fratinardo replied that the 130th Street station would have basic station characteristics similar to the 87th Street station but that no design currently exists for the 130th Street station, which would be a terminal station. Ms. Fratinardo referred to the rendering in the RLE Fall 2019 newsletter, which Ms. Stubblefield passed out to the meeting attendees. Ms. Fratinardo noted that the tracks leading up to the 130th Street station would be at-grade – unlike the rendering- so that access to the 130th Street station would also be at the street level.
- Ms. Stubblefield commented that the 130th Street south station location was a proposal. She noted that initially the north station location was part of the original plan but recently, the CTA discovered that blocks 11-13 in Altgeld Gardens had become available.
  - Ms. Williams commented that she believed the Chicago Housing Authority had intentions on giving the land to CTA, but the land isn't to be donated to CTA, per CHA's own policy.

- A LAC member commented that having the 130th Street station location on the east side of Altgeld Gardens was not convenient for people living on the west end, as residents on the opposite side of Altgeld Gardens would have to travel to the 130th Street station.
  - Ms. Fratinardo noted that this observation was a good point. She noted that the CTA will plan to enhance bus service as needed to ensure that all stations for the RLE have appropriate accessibility and good bus connections.
- A LAC member inquired if the entire RLE was elevated.
  - Ms. Fratinardo replied that the RLE will be elevated from the 95th/Dan Ryan station to 119th Street and at-grade from 119th Street to the 130th Street station.
- A LAC member commented that the RLE project was difficult to understand and receive updates about the project because the Altgeld Gardens community is out of the CTA's way (in terms of how far the community is from Loop). The member commented that because of how far away the Altgeld Gardens community is, the community doesn't hear information about the RLE as much.
  - Ms. Fratinardo replied that during this meeting and other community meetings and open houses, the CTA RLE team would be disseminating information and collecting comments and feedback from the community to ensure their voices are heard. Ms. Fratinardo explained that the upcoming Transit-Supportive Development (TSD) study will also capture community feedback on the RLE stations during public outreach meetings and will collect comments on what types of development the community members would like to see near the stations.
  - Ms. Stubblefield noted that if the attendees wanted to receive updates on the RLE, she could collect contact information from those who wanted to give her their email address, or they could reach out to her with their contact information. Ms. Stubblefield provided her email address for those attendees that preferred to reach out to her directly.
- A LAC member asked if the CTA RLE team could alert the LAC to other meetings that were being held in the near future.
  - Ms. Fratinardo replied that this meeting was the last meeting scheduled in Altgeld Gardens for the time being to discuss the proposed 130th Street south station location but that the CTA RLE team would be happy to schedule future meetings if requested.
- A LAC member noted that the group would like to have more information on the RLE and potentially speak further about the project and the 130th Street station.
  - Ms. Fratinardo noted that an overall RLE PowerPoint was available for the attendees to view as well as other project materials were available on the RLE website, including the newsletter and fact sheet. The Benefits Sheets distributed today are also information to be used. She also noted that Ms. Stubblefield is providing oversight on the workforce development component of the RLE.
- Ms. Williams inquired about workforce development for the RLE and how the CTA planned to receive applications for jobs and contractors.
  - Ms. Stubblefield replied that there would be a Disadvantaged Business Enterprise (DBE) program as part of the CTA's process of identifying firms and partners to contract with. Ms. Stubblefield noted that she had created a draft of a comprehensive workforce development plan to address any and all barriers that would arise regarding jobs and careers for this project. Ms. Stubblefield noted that she was working with O-H Community Partners who will be taking the plan and improving it, to ensure the plan will address workforce for RLE and that there would be numerous careers with the RLE.
- Ms. Williams inquired if these jobs with the RLE would be union jobs.

  - Ms. Stubblefield replied that there would be a variety of positions with the RLE, and while some of the jobs would be construction-related, not everyone would be seeking construction positions.
- A LAC member inquired if there would be staff positions with the CTA available to residents.
  - Ms. Stubblefield replied that there potentially would be staff positions available at the CTA. She noted that the workforce development component of the RLE would seek to train people for a variety of positions so that they could be trained to perform work for other projects beyond the RLE.
- A LAC member noted that they wanted the CTA to be a community partner with Altgeld Gardens and to utilize the community partners that were already working with Altgeld Gardens. The member noted that Altgeld Gardens was partnering with Metropolitan Family Services on various initiatives.
  - Ms. Stubblefield and Ms. Fratinardo replied that the CTA is seeking community partners.
  - Ms. Williams commented that the CTA has to work with community partners.
  - Ms. Fratinardo replied that CTA plans to work with community partners.
- A LAC member (and representative of Metropolitan Family Services) inquired about the time savings from the 130th Street station in Altgeld Gardens to downtown Chicago.
  - Ms. Fratinardo noted that the time savings would be approximately 20 minutes from Altgeld Gardens to downtown Chicago.

Closing Remarks

The presentation wrapped up with Ms. Fratinardo explaining the information presented on the RLE Benefits Sheets. Ms. Fratinardo noted that the CTA was set to begin the next phase of the project, during the next two years that would include preparing the Final EIS and engineering drawings. The CTA would move onto the next phase of the project following that process. Ms. Fratinardo thanked the attendees for their time and attention and asked for anyone to email Ms. Stubblefield or the general RLE email address with concerns or follow-up questions.

Action Items:

- CTA is open to meeting with Ms. Williams & the LAC regarding RLE and the location of the 130th Street station.

Welcome to CTA's Red Line Extension (RLE) community engagement site!

We're glad you're here. Please use this page to provide feedback, ask questions, and interact with your fellow community members about the ongoing RLE project initiatives!

If you're new to the RLE Project, we encourage you to click here to learn more.

At this time, we're currently seeking your input on the following two RLE initiatives:

Transit-Supportive Development Plan

Now through summer 2021, we're developing a Comprehensive Plan to help guide future development around the four new RLE rail stations. The Plan's development will rely on **YOUR** input as a community member to help determine the needs and priorities of the project area.

The project team learned about the community's vision at four station area meetings in January & February, and we presented the next steps in the process at the community meetings in May. Be on the lookout for more information on this website, or you can click here to be added to the RLE contact list for email updates!

Not familiar with the plan? Click here to learn more. Share your thoughts and ideas on the TSD Plan using any of the feedback options listed below.

Visioning Survey - Transit Supportive Development Plan

Thank you for participating in this survey! Your responses will help us, the CTA project team, to understand the existing conditions and future potential regarding development in the Red Line Extension (RLE) community area - what's going well now, what's needed, and what you prioritize in your vision for the future. We will use the results of this survey to inform the RLE Transit-Supportive Development (TSD) Plan.

The RLE Transit-Supportive Development (TSD) Plan will identify options to:

- Encourage economic development along the transit corridor
- Engage private sector investment
- Identify infrastructure needs
- Foster multimodal connectivity and bike/pedestrian access
- Ensure continued affordability

The TSD Plan covers approximately 20 square miles and 100,000 people. The plan touches on eight community areas including portions of Washington Heights, Roseland, Pullman, Morgan Park, West Pullman, Riverdale, South Deering, Hegewisch, and the Village of Calumet Park.

Click here to learn more about the TSD Plan.

TSD Plan Study Area

Visioning Survey

References to "the community" generally include the area of the Far South Side described above and shown on the map. **The survey should take about 5-10 minutes to complete. All responses will be kept confidential.**

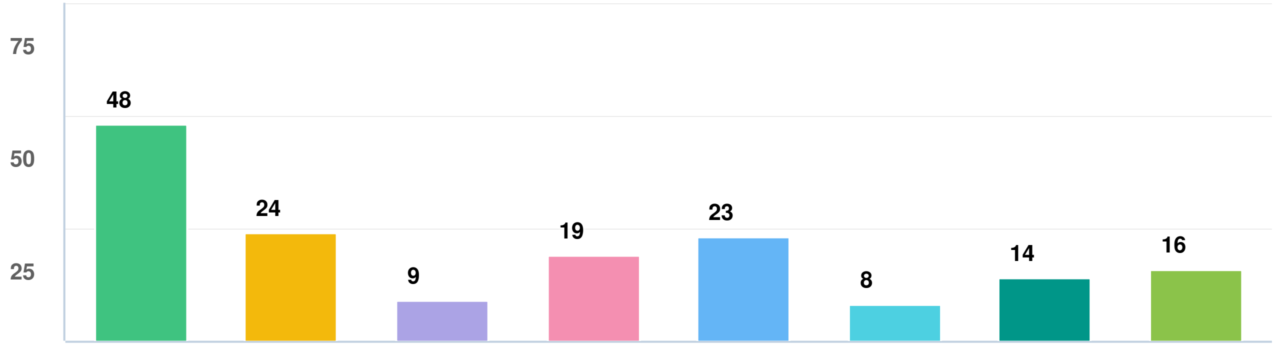
What is your relationship to the Red Line Extension community area described above? (choose all that apply)



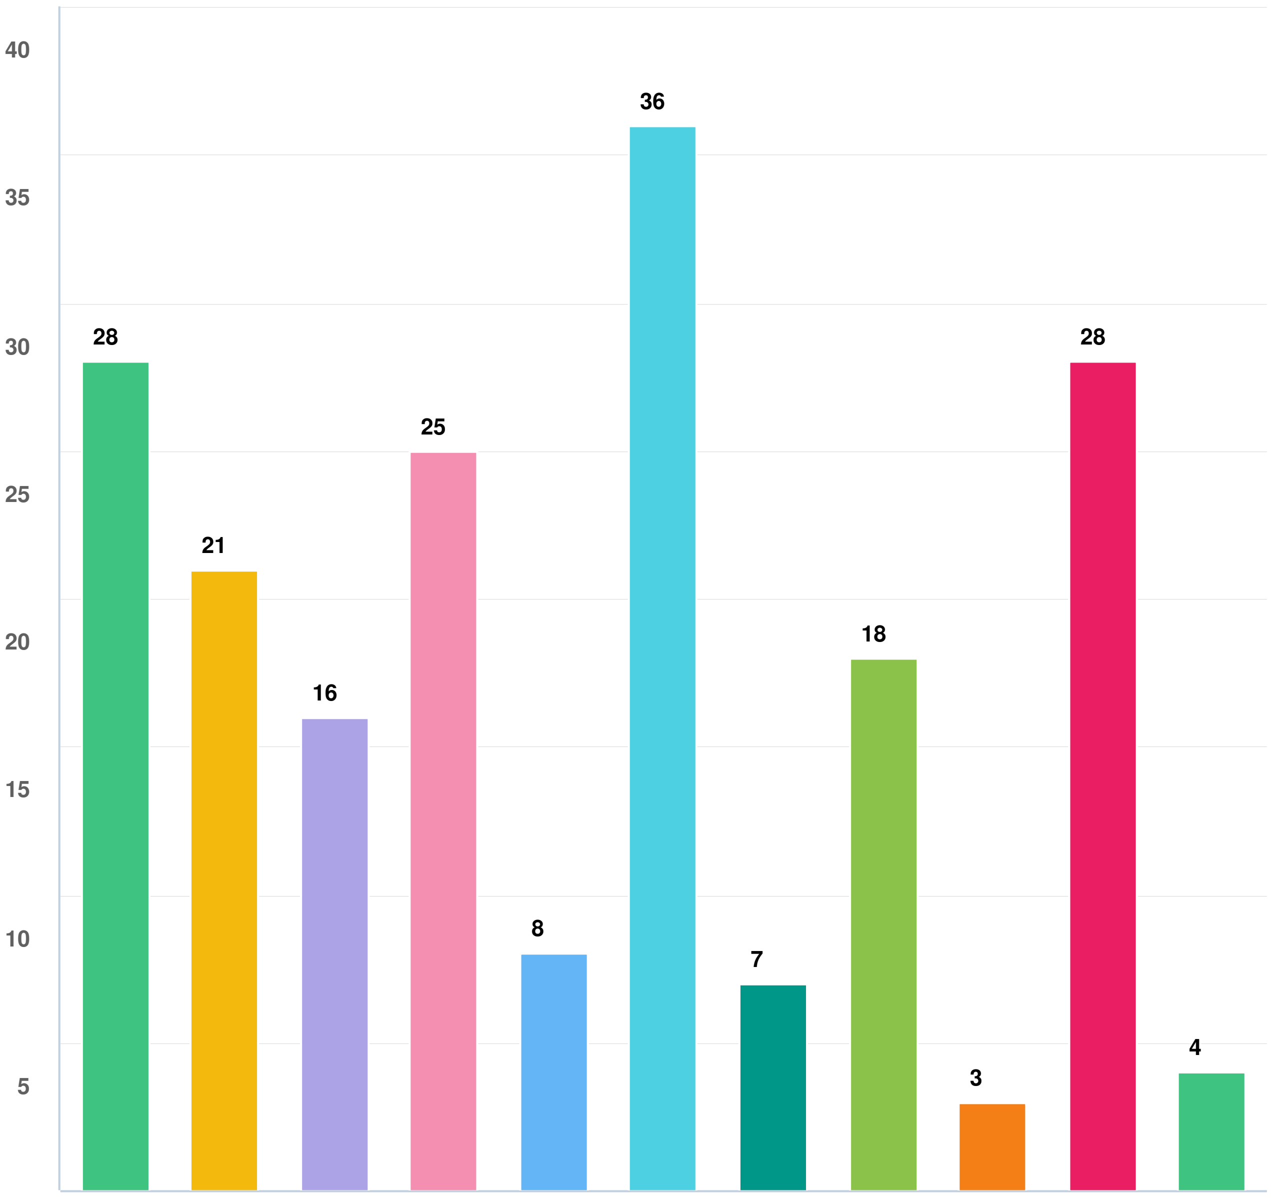
Question options

- ● I live in the area
- ● My family lives in the area
- ● I or a family member works in the area
- ● My family shops in the area
- ● My family enjoys the parks and recreation in the area
- ● My family attends school in the area
- ● I represent a public agency or non-profit whose mission or scope impacts the Red Line Extension community
- ● I do not have a direct connection to the study area, but I care about the success of Chicago’s Far South communities

Mandatory Question (74 response(s))

Question type: Checkbox Question

What are the community’s greatest strengths? (pick up to 3)



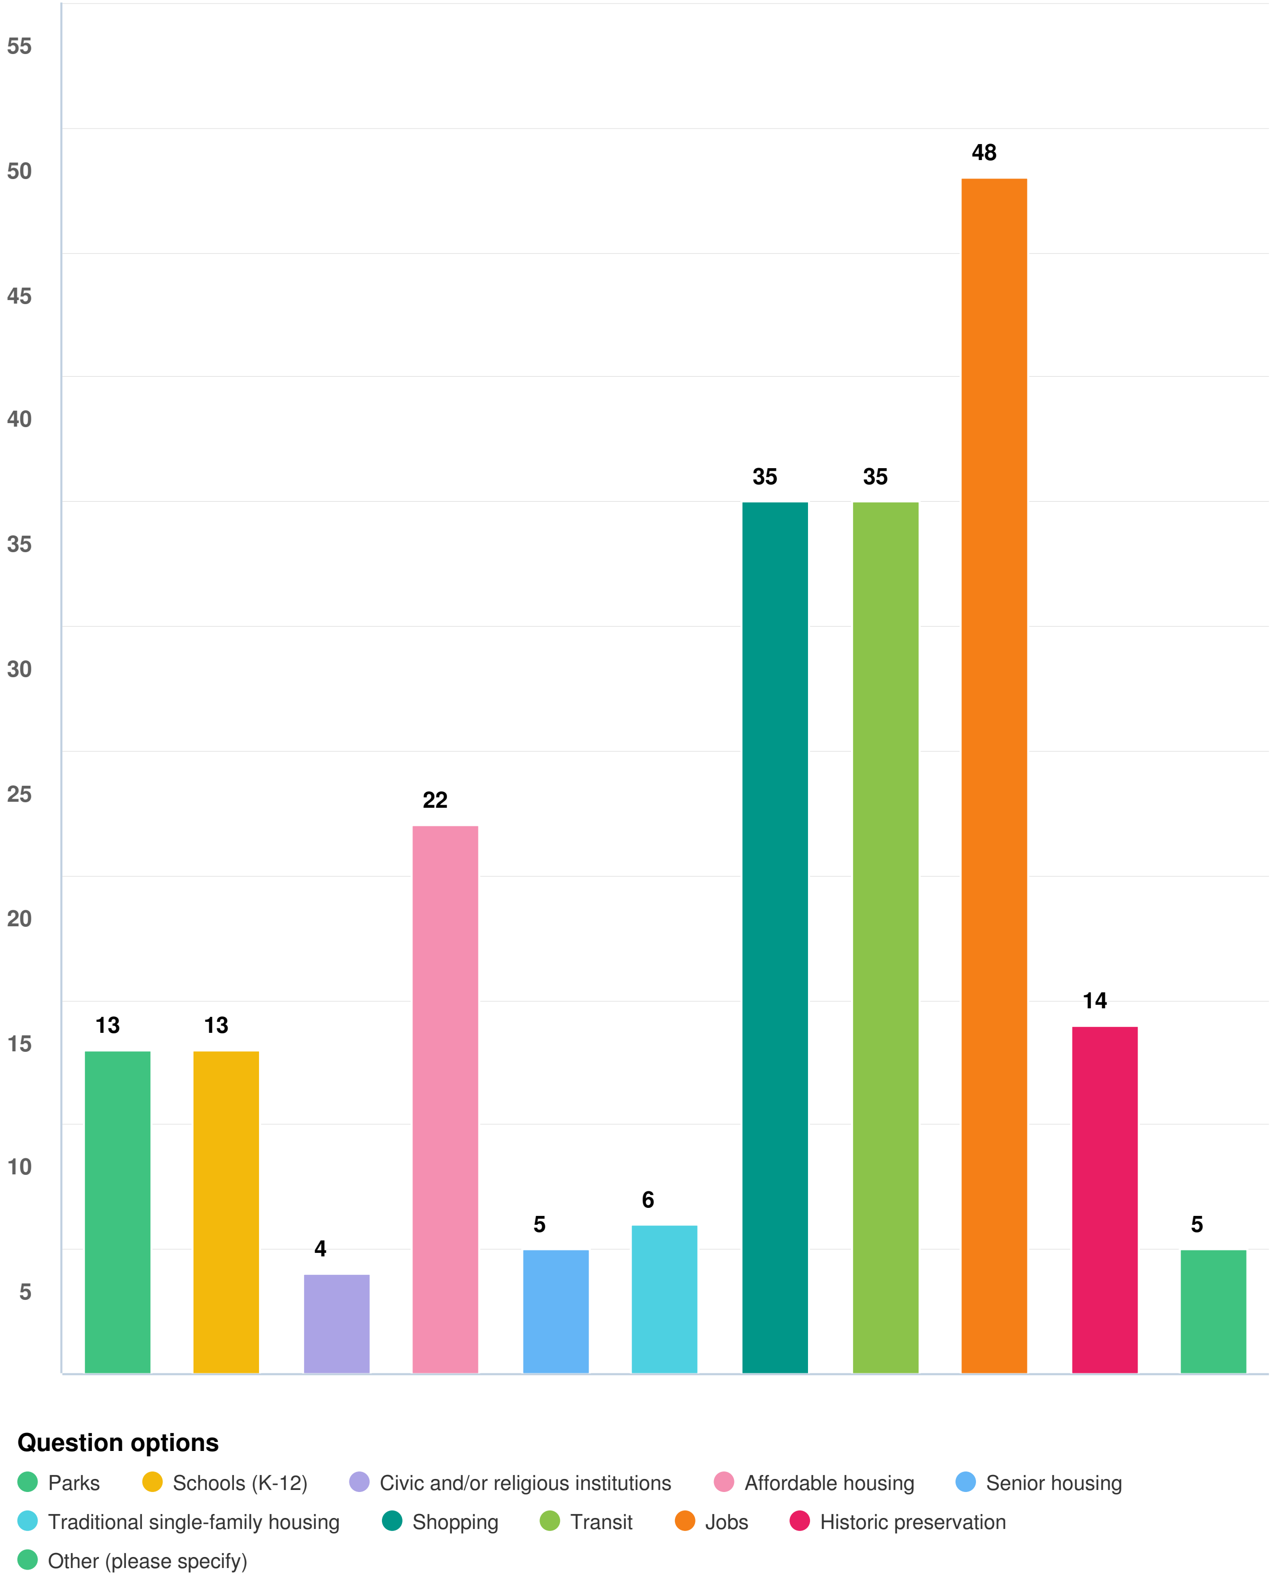
Question options

- Parks
- Schools (K-12)
- Civic and/or religious institutions
- Affordable housing
- Senior housing
- Traditional single-family housing
- Shopping
- Transit
- Jobs
- Historic buildings
- Other (please specify)

Optional question (74 response(s), 0 skipped)

Question type: Checkbox Question

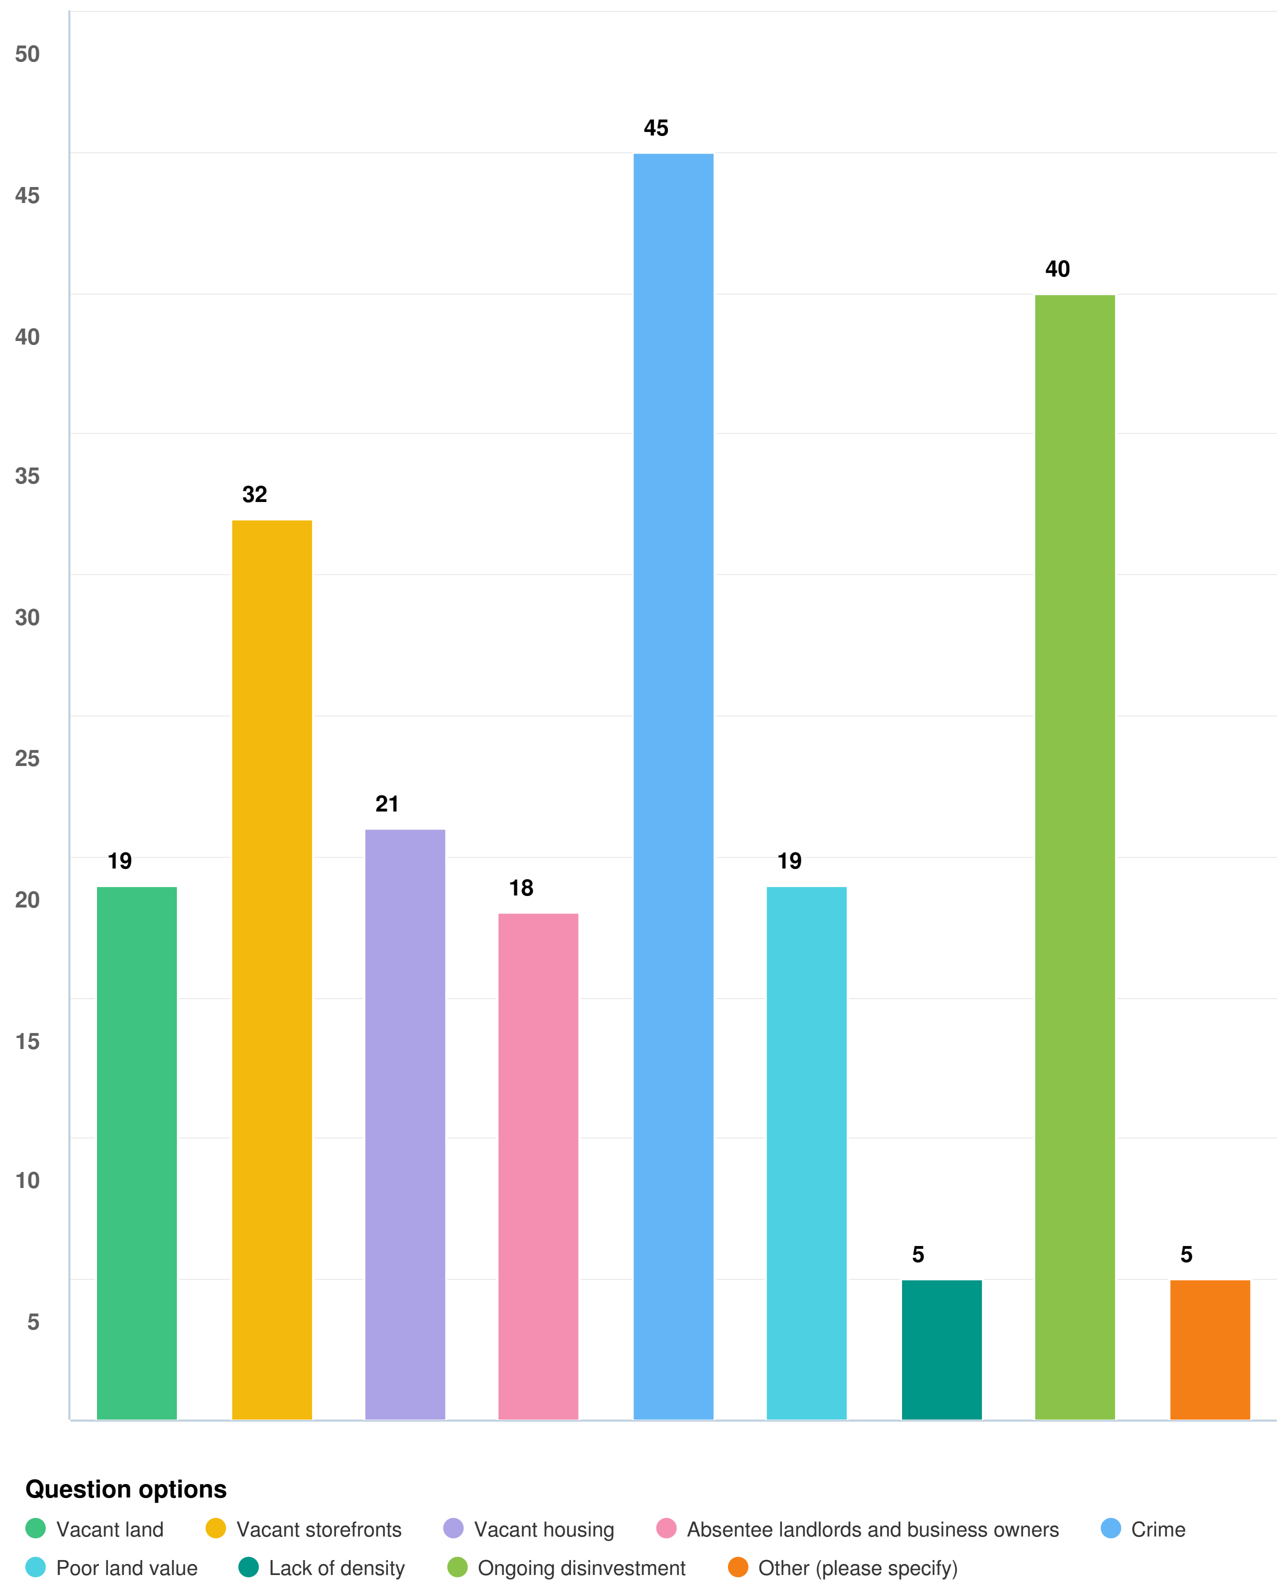
What do you see as the community's greatest development needs? (pick up to 3)



Optional question (72 response(s), 2 skipped)

Question type: Checkbox Question

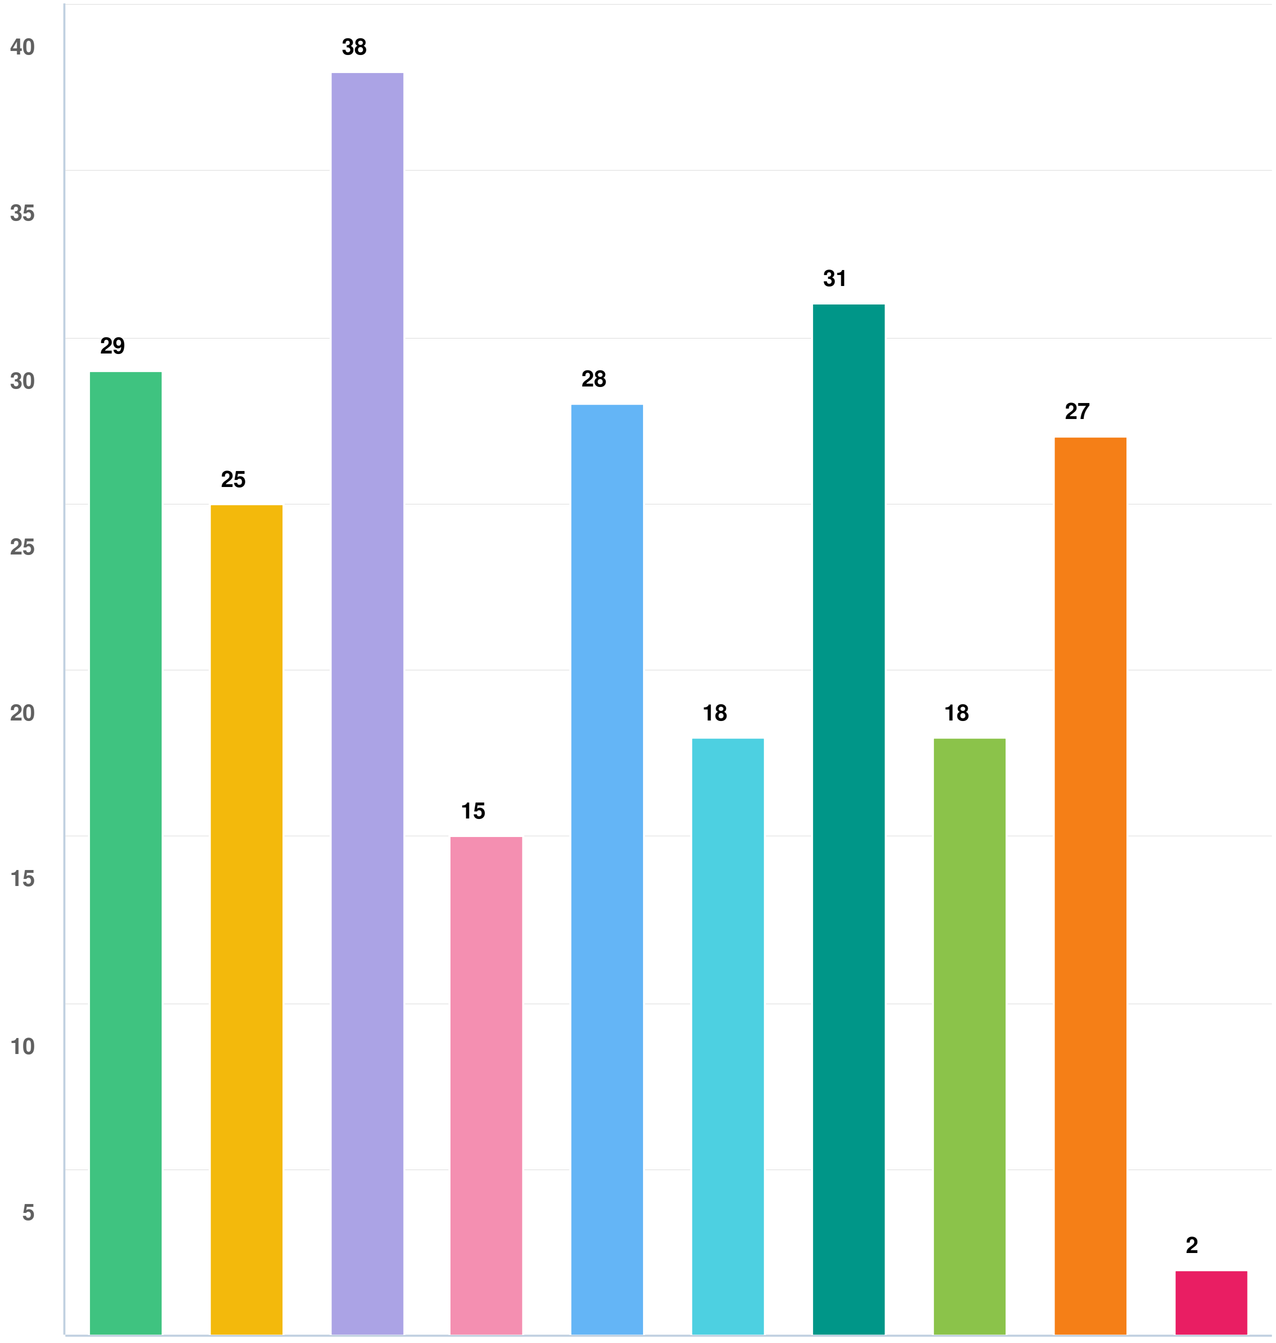
What do you think discourages development in the community? (pick up to 3)



Optional question (73 response(s), 1 skipped)

Question type: Checkbox Question

What can help attract new investment and encourage development? (pick up to 3)



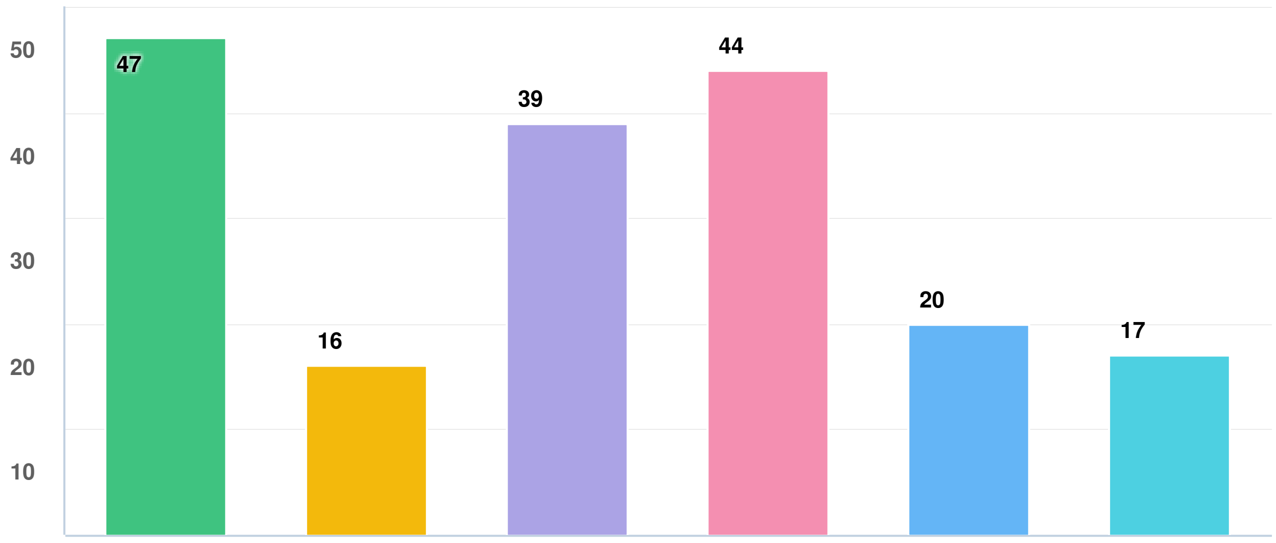
Question options

- ● Private investment from outside the community
- ● Local investment from within the community
- ● Grants and/or public funding
- ● More affordable housing
- ● Better (more, different) planning efforts
- ● Leadership
- ● Transit expansion
- ● Demolition of abandoned and unsafe buildings
- ● New homes on vacant lots
- ● Other (please specify)

Optional question (74 response(s), 0 skipped)

Question type: Checkbox Question

What type of additional housing is most needed? (pick up to 3)



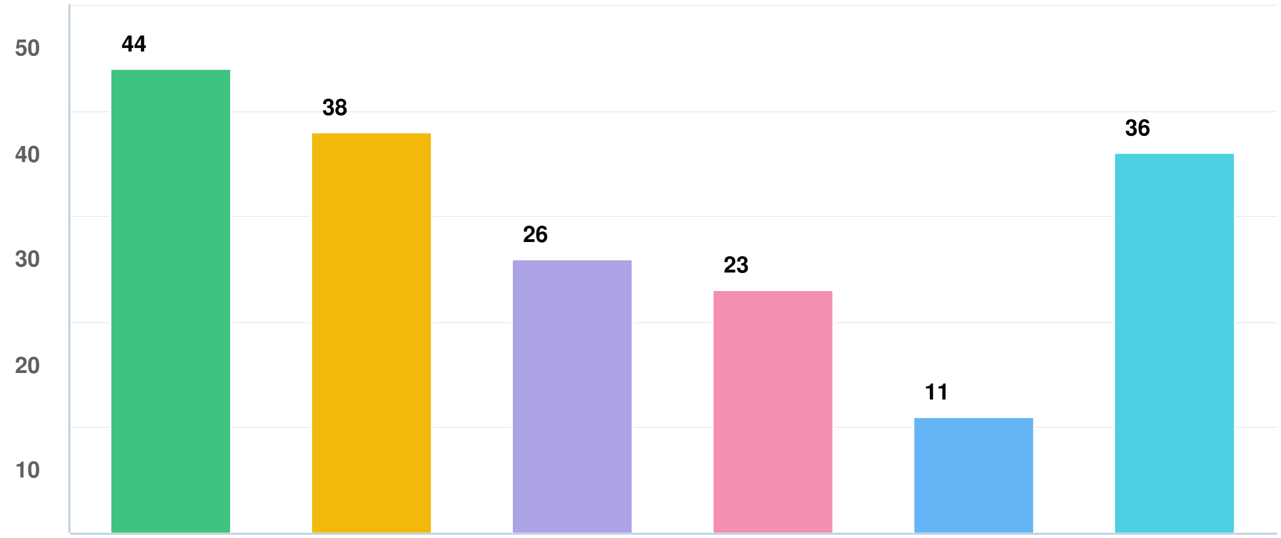
Question options

● Owner-occupied housing ● Rental housing ● Affordable housing ● Mixed-income ● Senior housing ● Veterans housing

Optional question (71 response(s), 3 skipped)

Question type: Checkbox Question

What scale of additional housing is most desired? (pick up to 3)



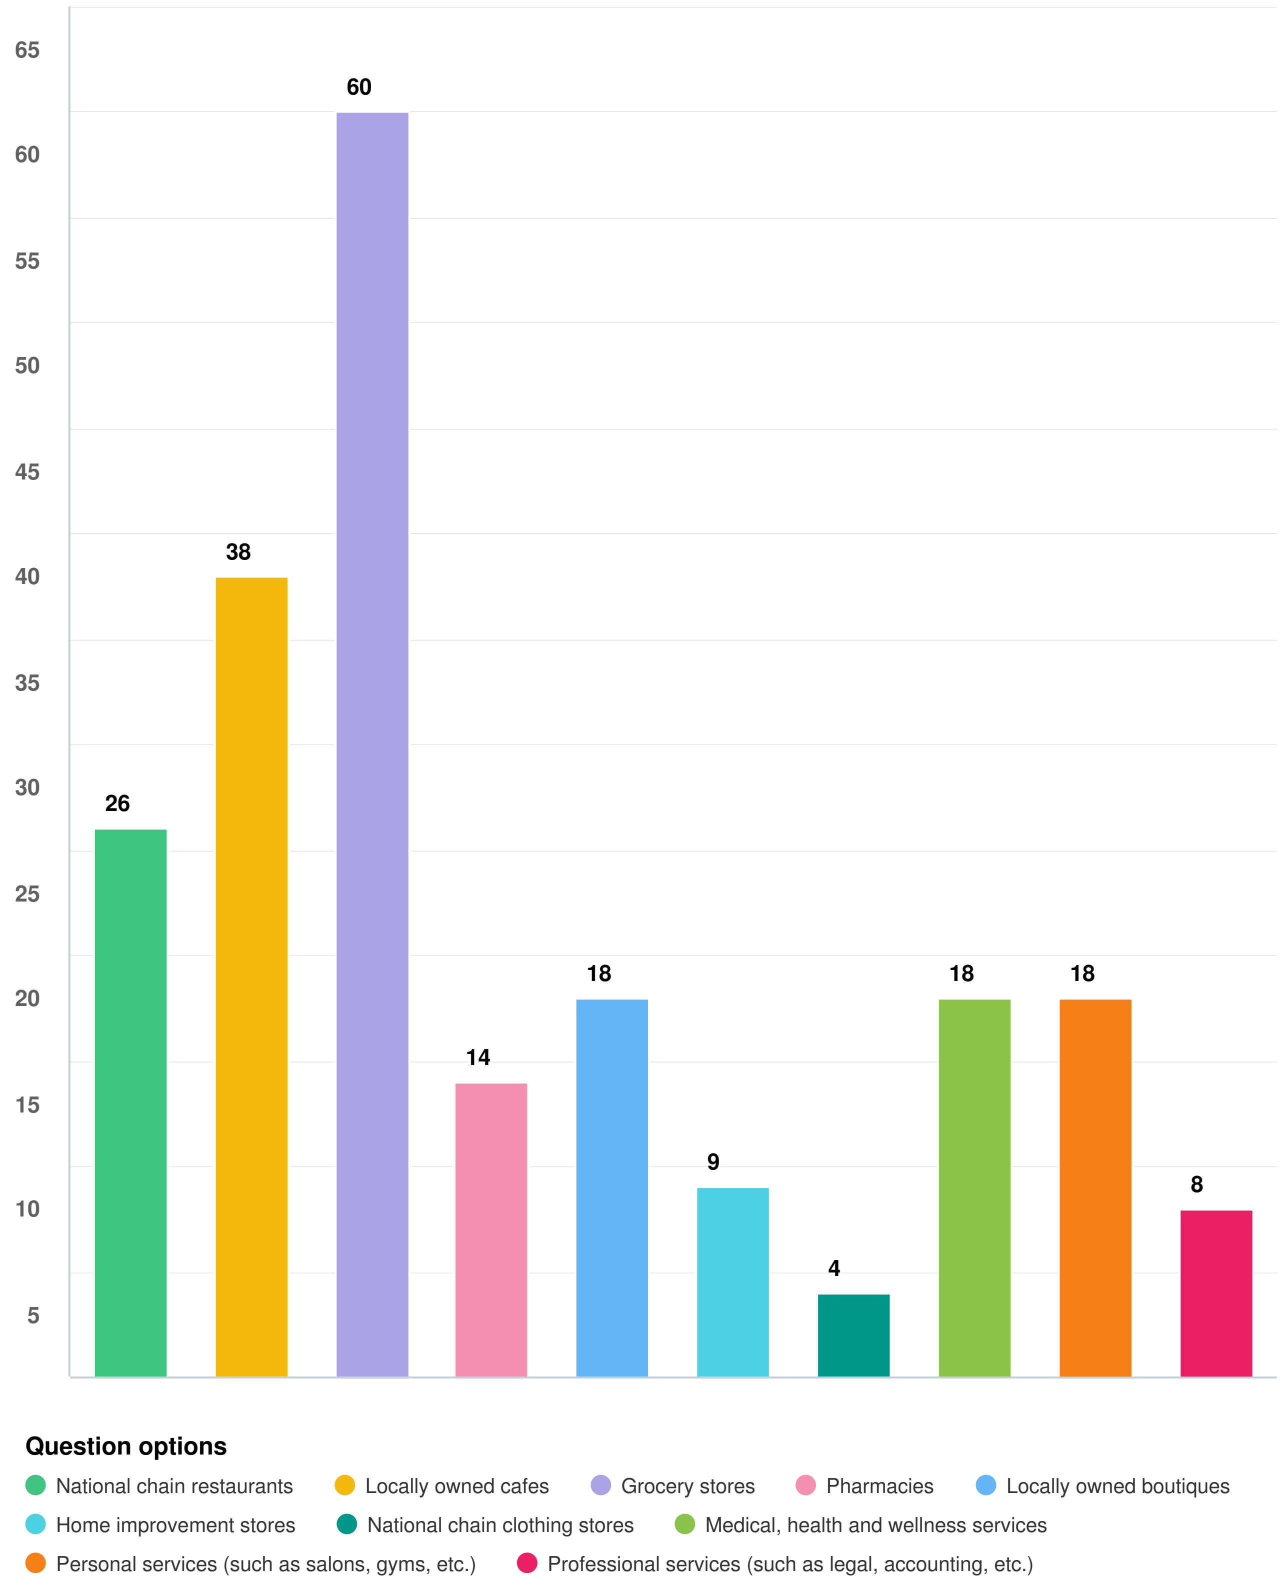
Question options

- ● Single-family homes
- ● Townhomes
- ● Two-flats and three-flats
- ● Small four-to-six unit buildings
- ● Mid-rise multi-family (up to 8 stories)
- ● Residential with ground floor commercial businesses

Optional question (73 response(s), 1 skipped)

Question type: Checkbox Question

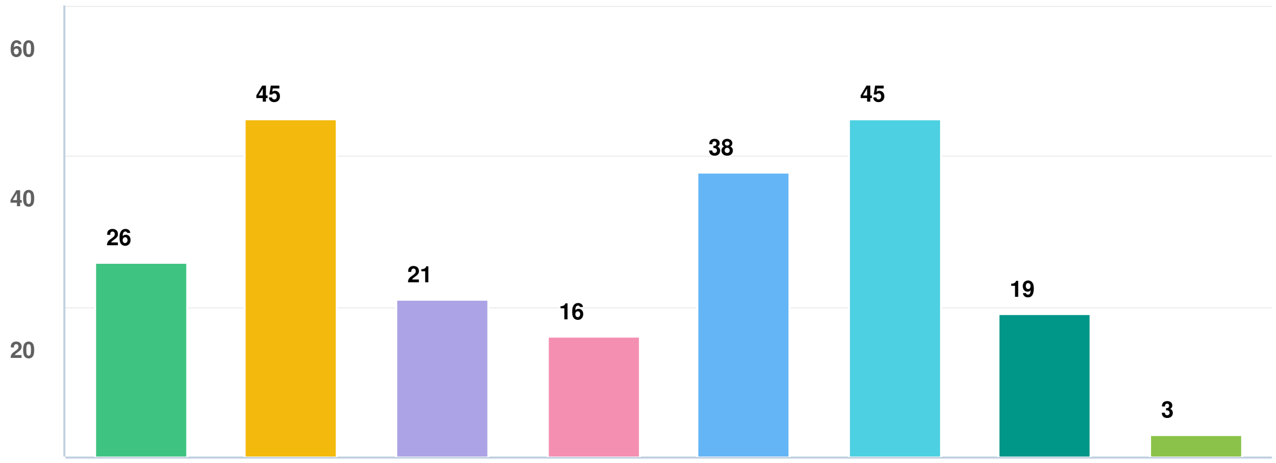
What types of retail/commercial business would you most like to see in this community? (pick up to 3)



Optional question (74 response(s), 0 skipped)

Question type: Checkbox Question

Which of the following cultural and civic elements would be desirable? (pick up to 3)



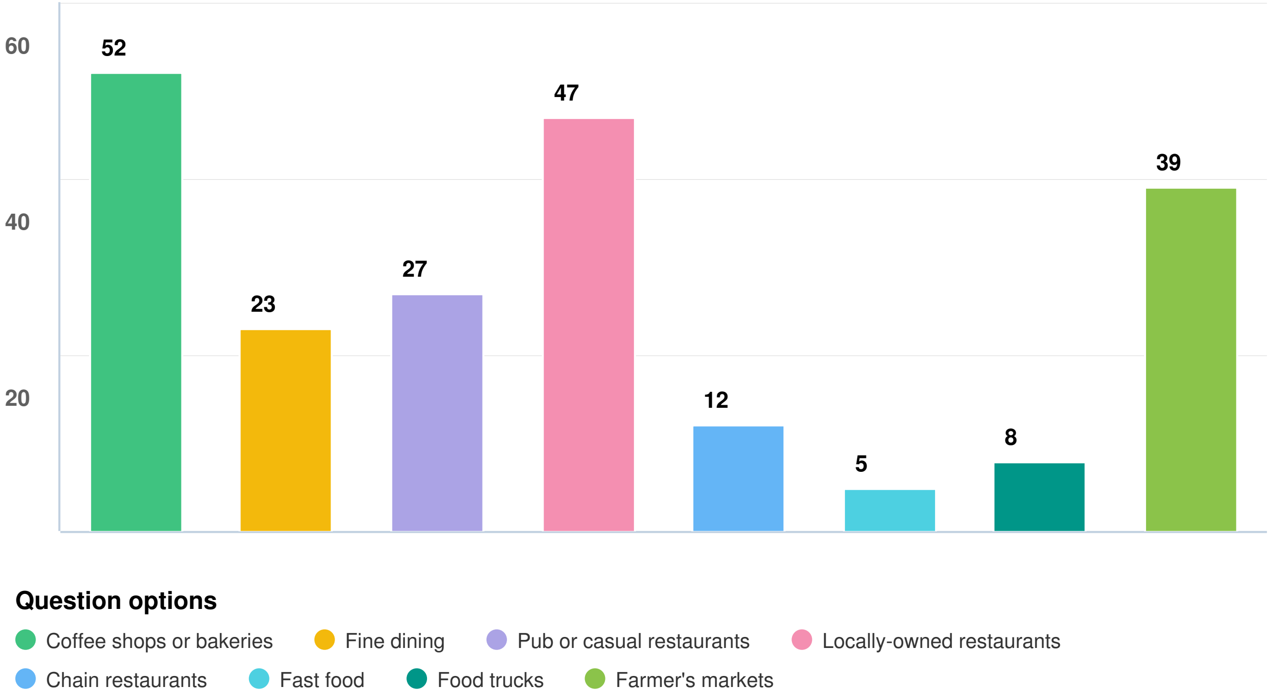
Question options

- ● Fine and performing arts venue
- ● Music venue or movie theater
- ● Library or community center
- ● Sports and recreation
- ● Cultural or educational center (such as a museum)
- ● Health hub (focused on wellness, inclusive of community health, resources for local entrupreneurs, healthy food sources, and the like)
- ● Support space for artists such as "maker space" artist studios and/or artist housing
- ● Other (please specify)

Optional question (73 response(s), 1 skipped)

Question type: Checkbox Question

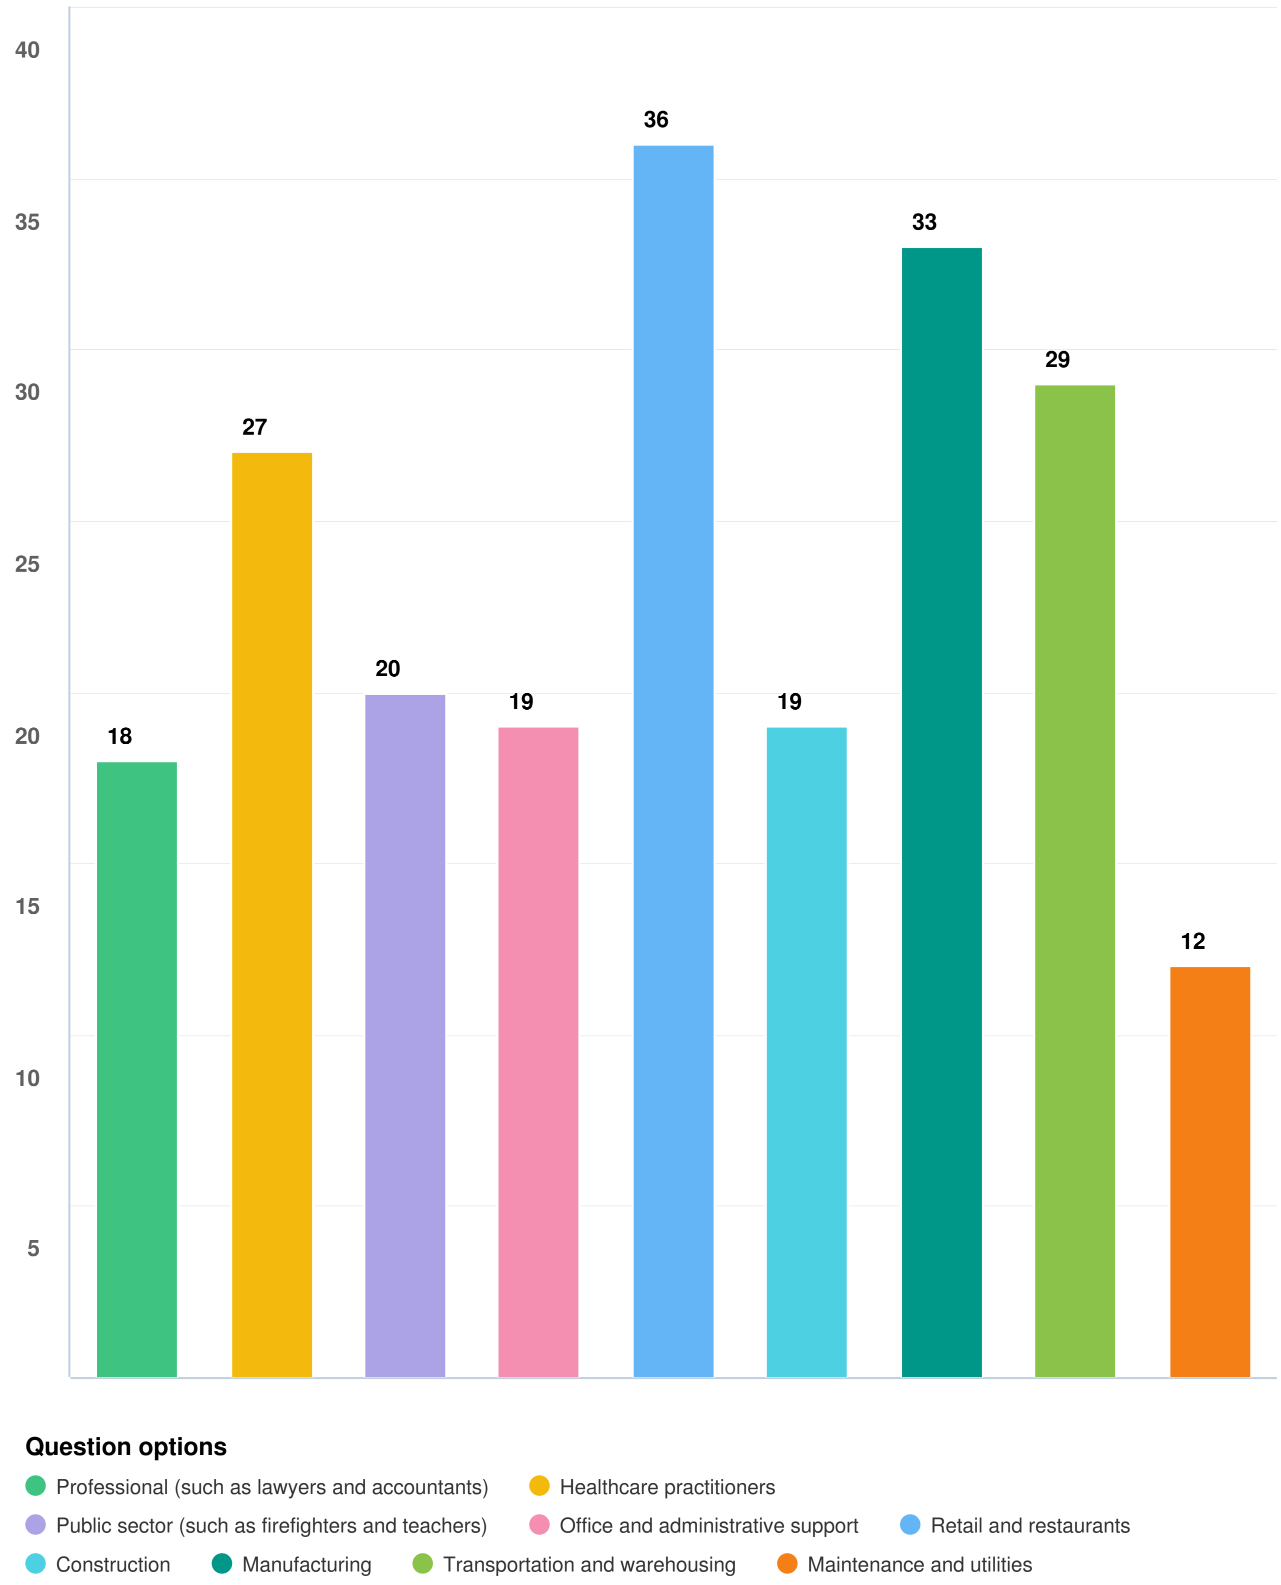
Which of the following restaurant and dining options would be most desirable? (pick up to 3)



Optional question (74 response(s), 0 skipped)

Question type: Checkbox Question

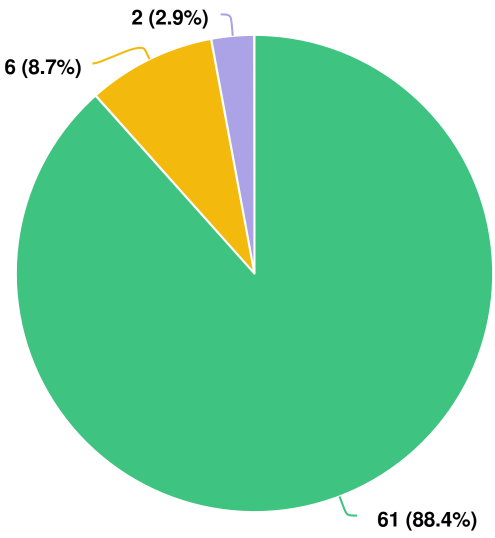
Which types of jobs would most benefit the community? (pick up to 3)



Optional question (72 response(s), 2 skipped)

Question type: Checkbox Question

Where do you live?



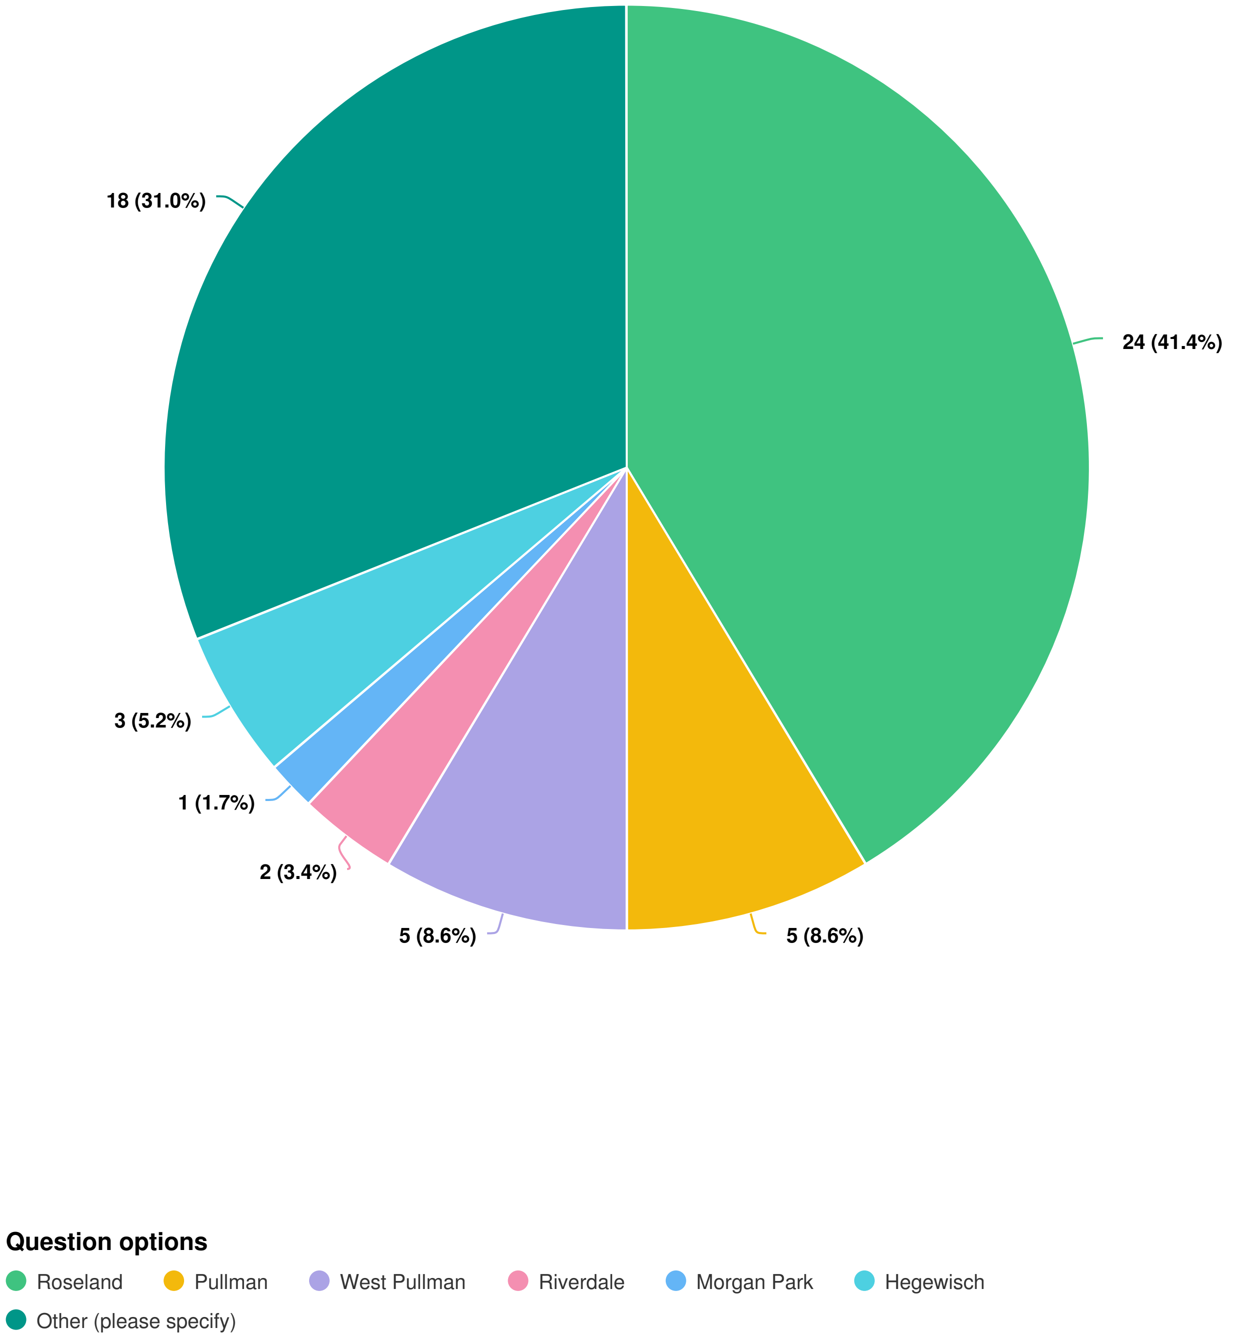
Question options

● City of Chicago ● Chicago Region/Chicago Suburbs ● Outside the Chicago Region

Mandatory Question (69 response(s))

Question type: Dropdown Question

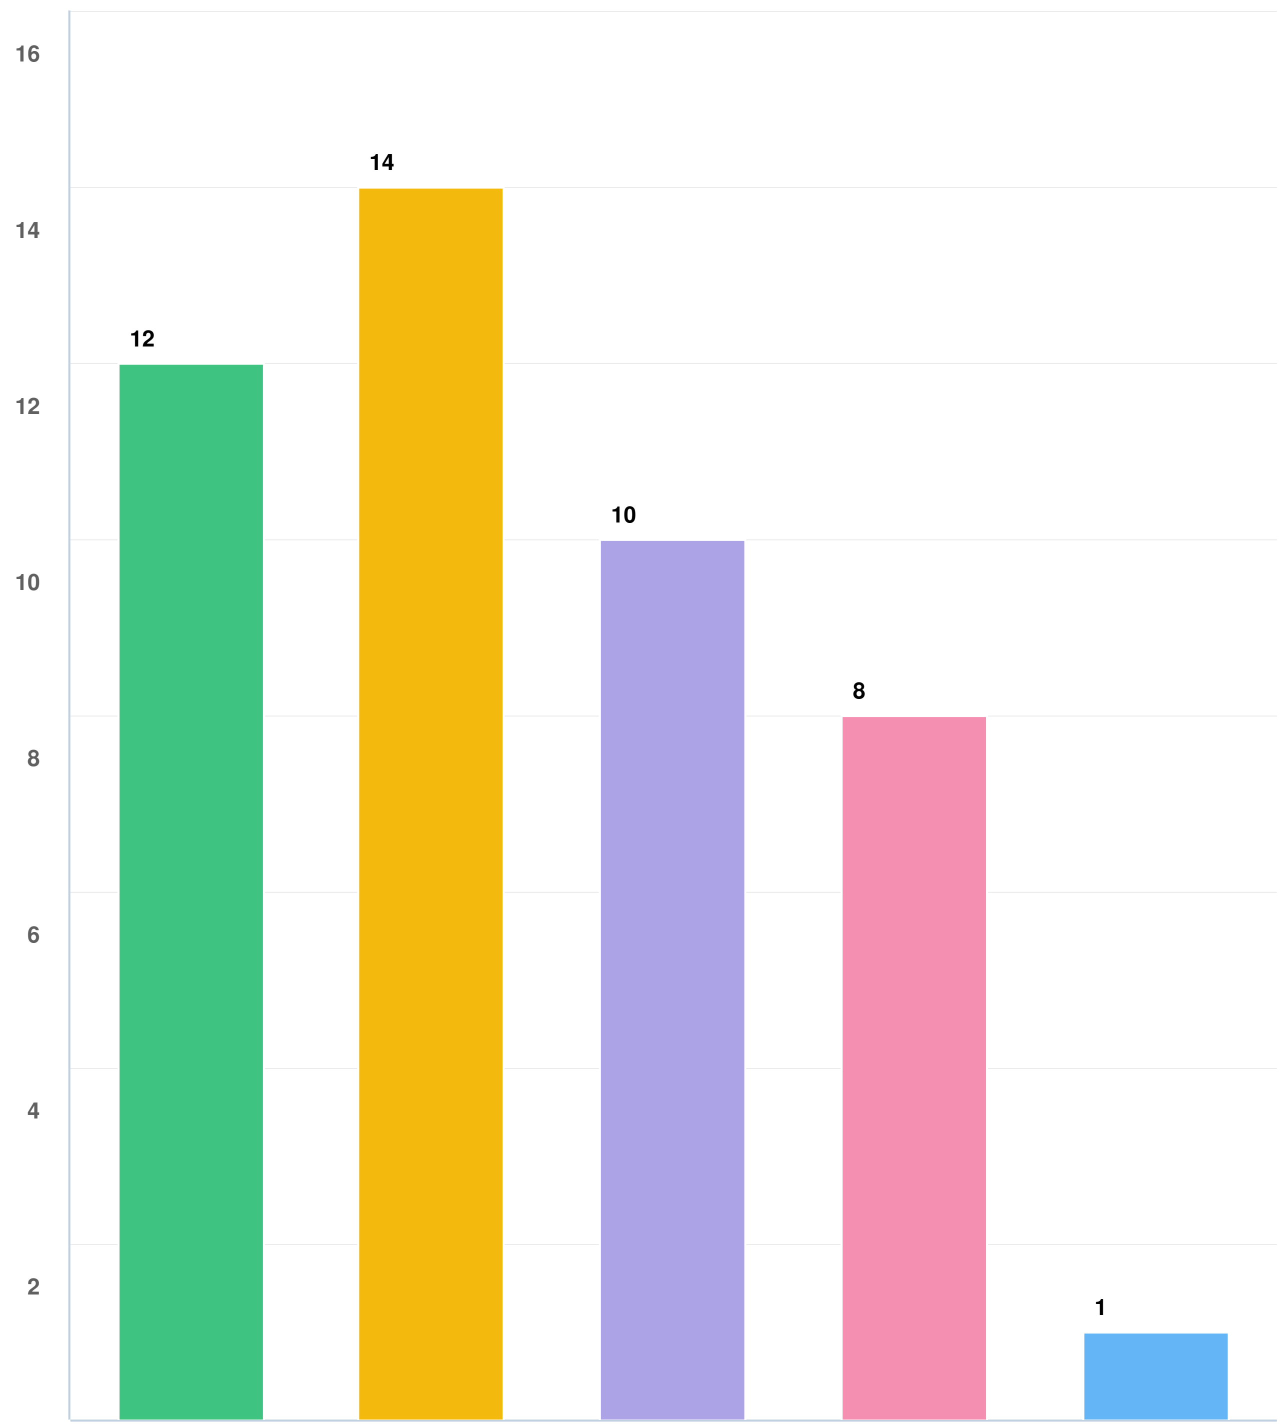
Which Chicago neighborhood do you live in?



Mandatory Question (58 response(s))

Question type: Dropdown Question

Which RLE station do you live closest to?



Question options

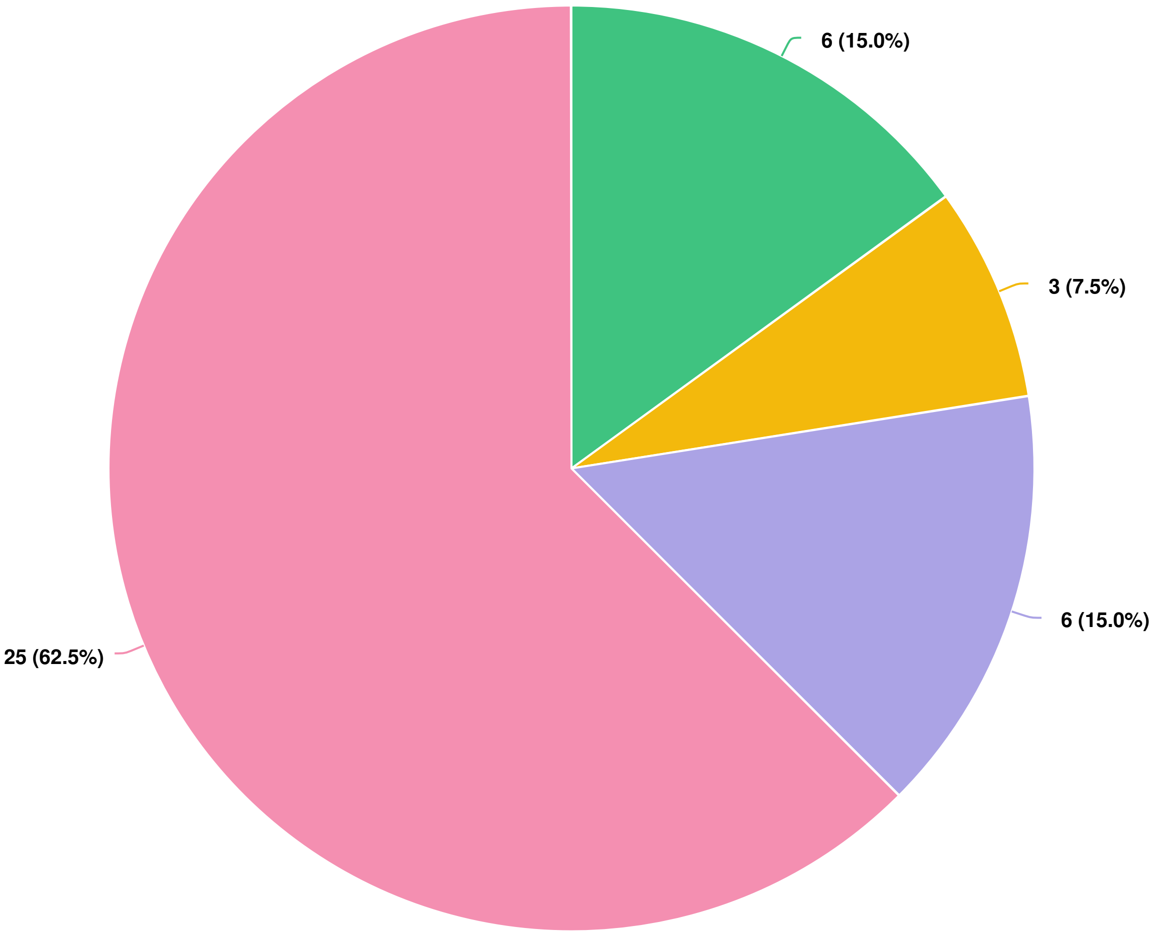
🟢 103rd Street station 🟡 111th Street station 🟣 Michigan Avenue station 🔴 130th Street station

🔵 I don't live near an RLE station

Mandatory Question (40 response(s))

Question type: Checkbox Question

How long have you lived there? (optional)



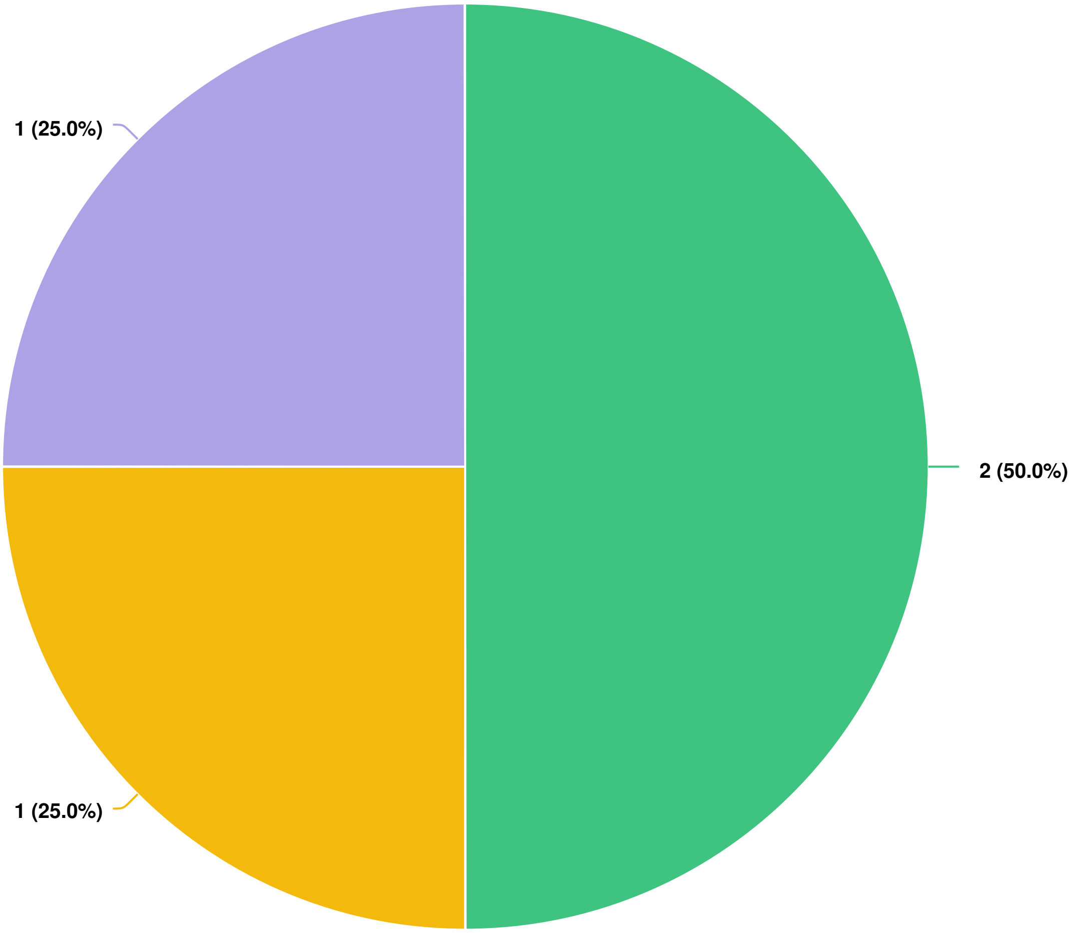
Question options

🟩 0-5 years 🟨 6-0 years 🟪 11-20 years 🟥 More than 20 years

Optional question (40 response(s), 34 skipped)

Question type: Dropdown Question

Which county do you live in? (optional)



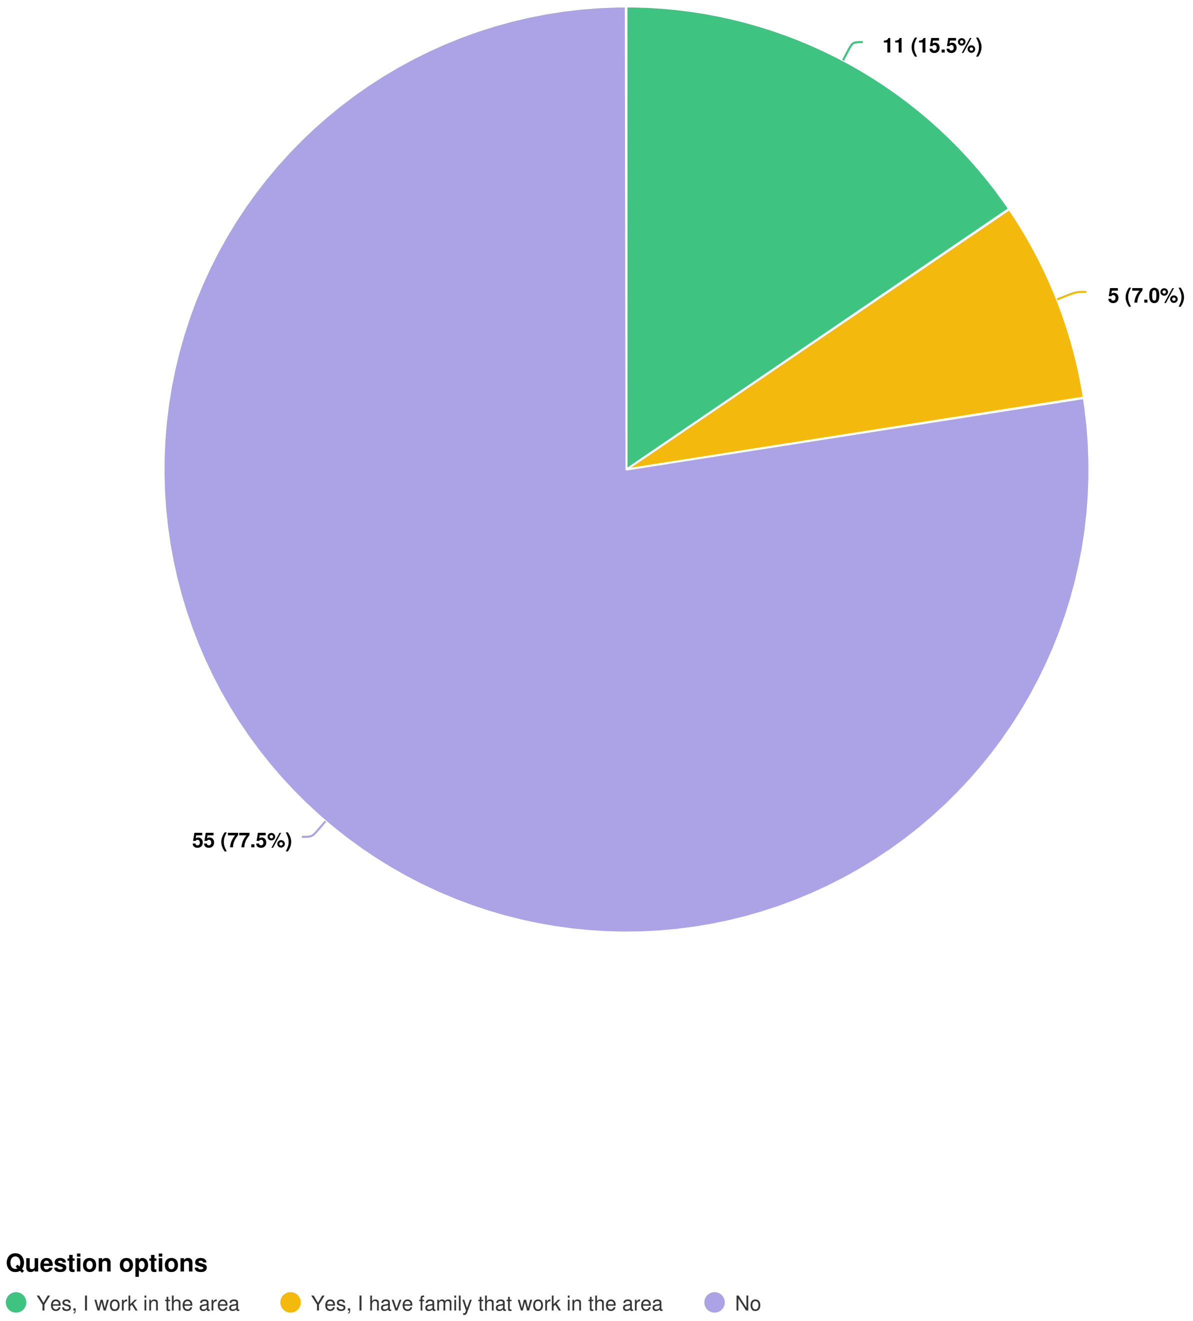
Question options

● Suburban Cook County ● Will County ● Other (please specify)

Optional question (4 response(s), 70 skipped)

Question type: Dropdown Question

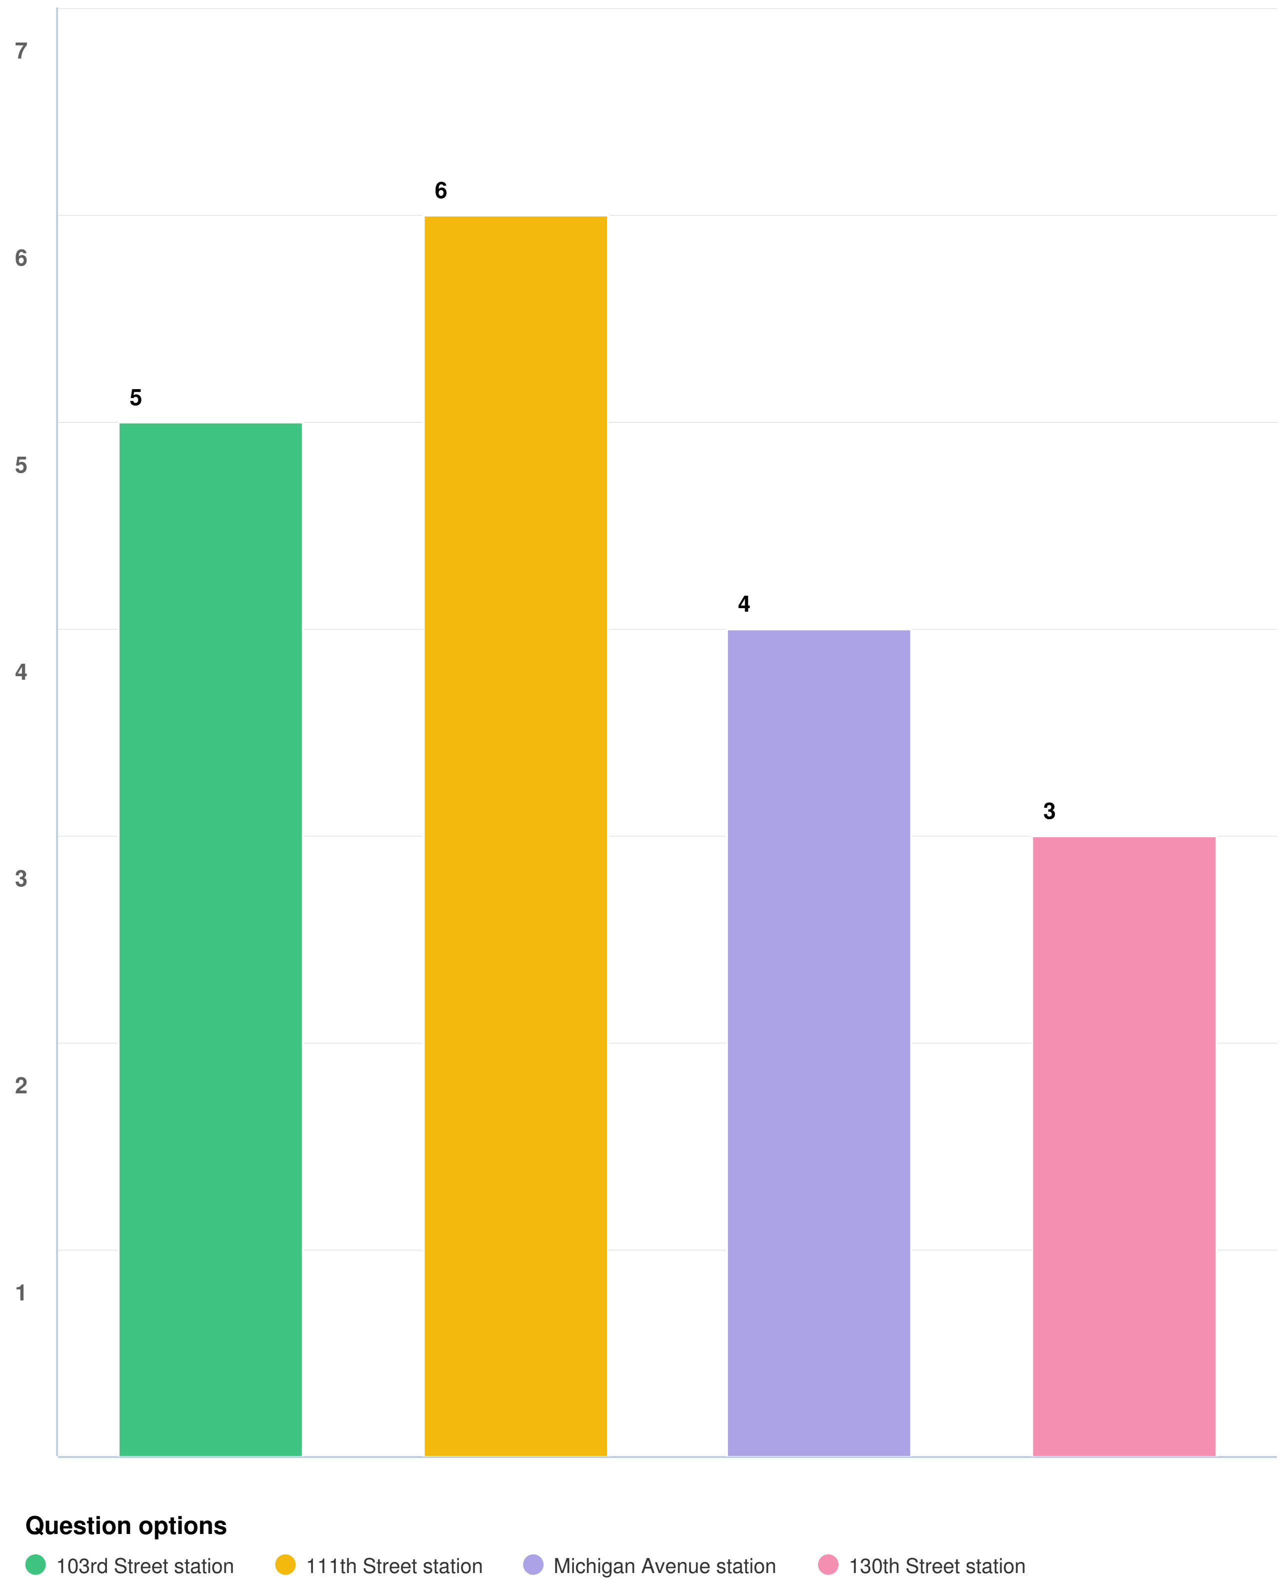
Do you or your family member(s) work in the Red Line Extension community area?



Mandatory Question (71 response(s))

Question type: Dropdown Question

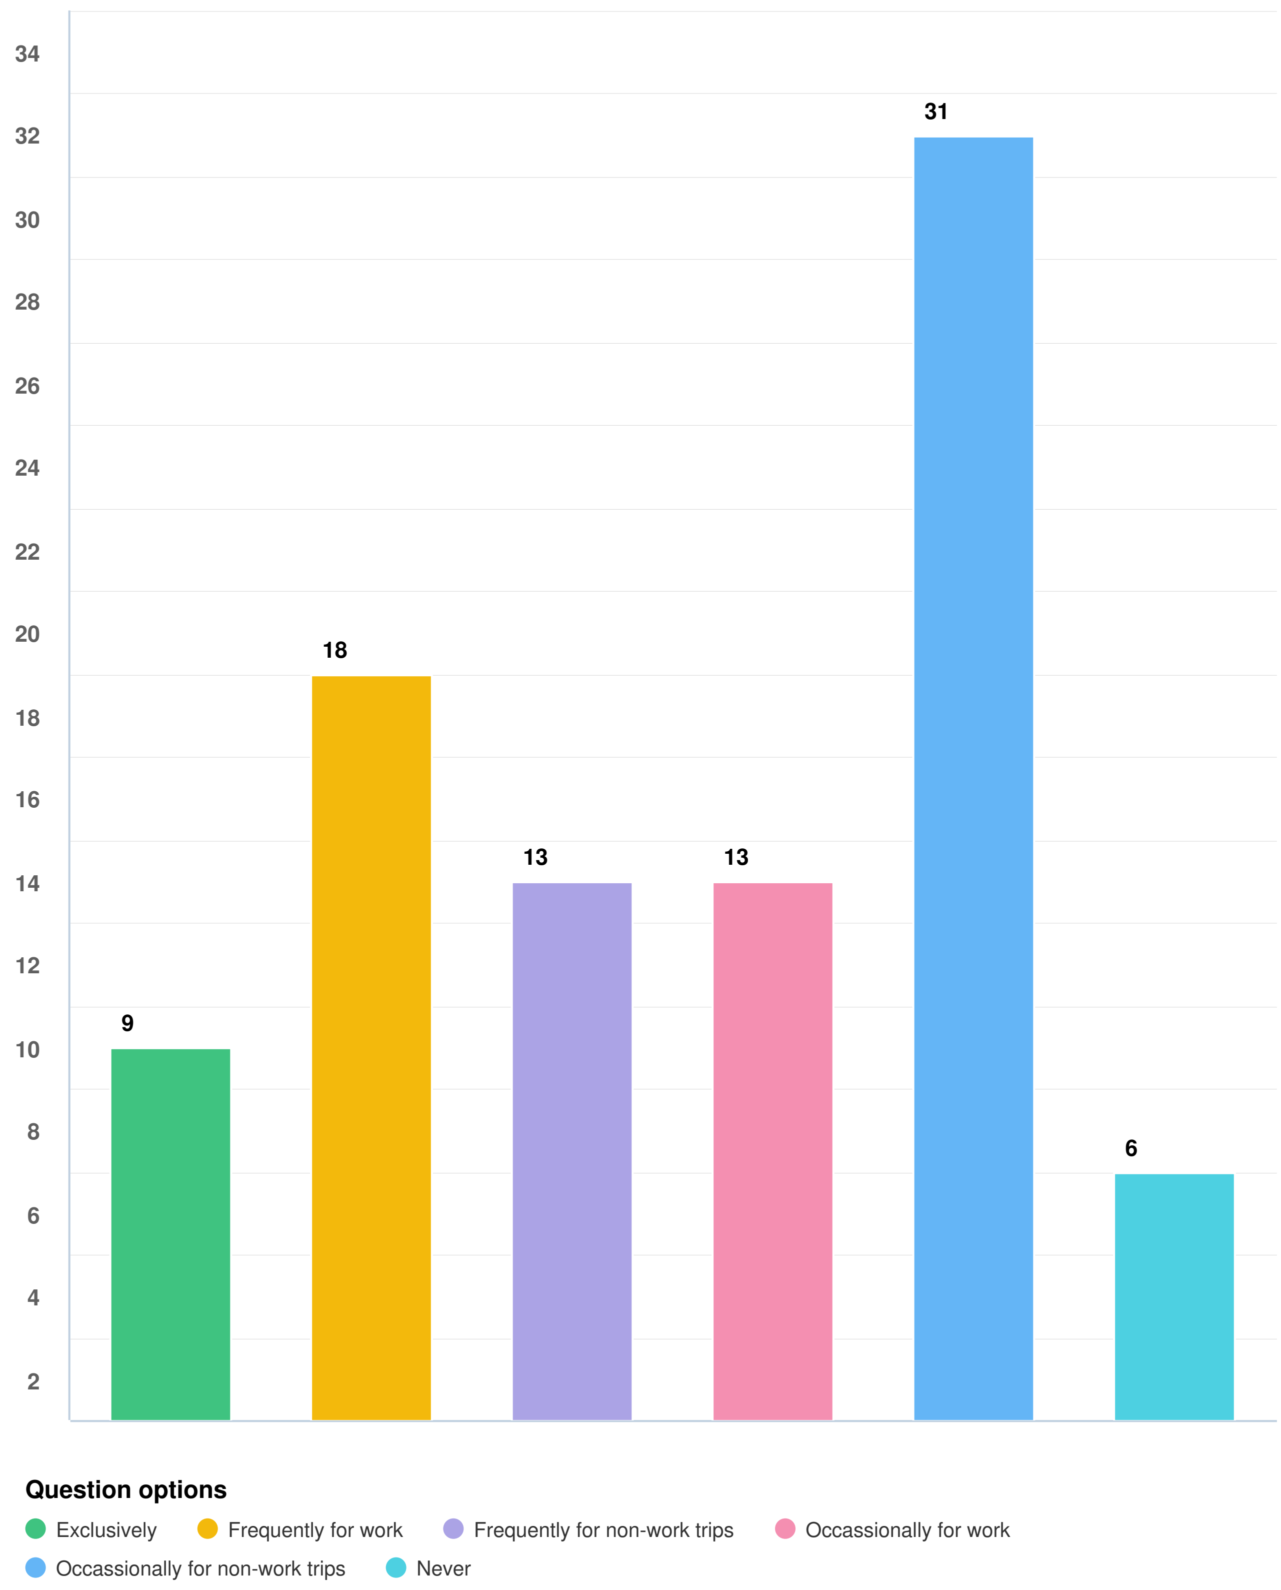
Which RLE station do you or your family member(s) work closest to?



Mandatory Question (16 response(s))

Question type: Checkbox Question

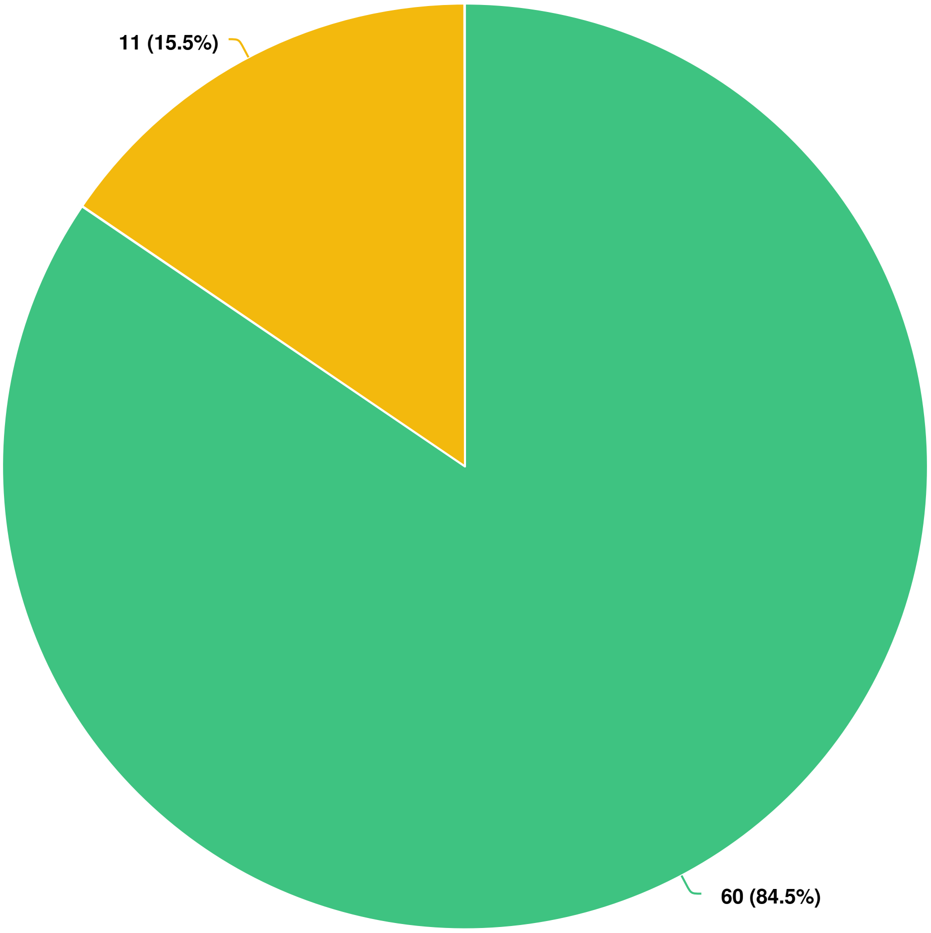
How often do you use public transit? (optional - select all that apply)



Optional question (69 response(s), 5 skipped)

Question type: Checkbox Question

Do you own a car, or is one available to your household? (optional)



Question options

● Yes ● No

Optional question (71 response(s), 3 skipped)

Question type: Radio Button Question

What modes of transportation do you use most frequently? (optional - rank your top 3)

OPTIONS	AVG. RANK
Personal car	1.42
CTA bus	2.33
CTA 'L' train	2.50
Metra rail	2.56
Walk	2.60
Ride-hail (Lyft, Uber) or taxi	2.72

Section 1
Introduction

The CTA is proposing to extend the Red Line from the existing terminal at 95th/Dan Ryan to 130th Street, subject to the availability of funding. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include Park & Ride facilities and bus connections.

After announcing the project's Preferred Alignment, an opportunity presented itself to potentially relocate the proposed 130th station from the north side of the street – near the Metropolitan Water Reclamation District (MWRD) – to the south side of 130th Street adjacent to Altgeld Gardens. As a result, a Supplemental Environmental Assessment (EA) was needed to investigate the impacts of this potential change to the project. The CTA had discussed this change with several groups representing residents in the immediate area by early 2020 and had received positive feedback as the new station location would position Red Line riders closer to homes, schools, and recreational opportunities and farther away from the industrial land uses, truck traffic, and the MWRD treatment. The CTA sought additional feedback from communities as part of the Supplemental EA process.

CTA also received a grant through the Federal Transit Administration (FTA) pilot program to prepare a Transit-Supportive Development Comprehensive Plan. The grant is being used to incorporate the community's vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. Community engagement and ownership by residents and stakeholders from the surrounding neighborhoods were anticipated to be vital to the development of the plan.

In December 2020, the CTA hosted two identical virtual community meetings to share updates on the Red Line Extension (RLE) project, including the new opportunity for the site of 130th station, and to introduce the RLE Transit-Supportive Development (TSD) Plan. Additionally, the CTA introduced its new RLE engagement website (www.transitchicago.com/rle/engage) during these meetings.

Section 2
Virtual Community Meetings

CTA hosted two identical virtual community meetings to provide an update on project progress, including the proposed change in location of the 130th station, and to present the Transit-Supportive Development (TSD) Plan. The virtual community meetings provided the public with an opportunity to ask questions about the TSD Plan and other project details utilizing the Zoom webinar platform. The two meetings were also broadcasted on Facebook Live. The team solicited input and provided two-way communication through polling questions, a chat window, and a Question-and-Answer window. The virtual community meetings were held:

Date:	Tuesday, December 8, 2020
Time:	6:00 p.m. – 7:30 p.m.
Location:	Zoom & Facebook Live

Date:	Wednesday, December 9, 2020
Time:	1:30 p.m. – 3:00 p.m.
Location:	Zoom & Facebook Live

The community meetings were made accessible to people with disabilities by the use of American Sign Language interpretation and closed captioning. The community meetings were held online with a telephone dial-in option due to COVID-19 public health guidance. The virtual community meetings were publicized by flyer, postcard notice, eBlasts (mass emails), customer alerts, and on the project website (see Section 3 for more details about promotion). To provide the greatest opportunity for community participation, the virtual community meetings were scheduled on a weekday evening and an afternoon. Spanish interpretation was available for meeting attendees throughout the entirety of the meetings.

2.1 Virtual Community Meetings Format

The virtual community meetings provided attendees opportunities to learn about the overview and benefits of the Red Line Extension project, introduced the Transit-Supportive Development (TSD) Plan, reviewed potential environmental and property impacts as well as previous and upcoming community touchpoints. The community touchpoints discussed included outreach to potentially impacted tenants and property owners, newsletters, in-person outreach at events, the project's Facebook page, new informational video, workforce development planning efforts, and the engagement website. Near the end of each meeting, a project team member completed a demonstration of how to access the engagement website and use the tools to provide input. The virtual community meetings' format also included polling questions, chat, and Q&A allowing the public to provide feedback, ask questions, and discuss concerns directly with project staff. Digital methods for the public to ask questions included the RLE Facebook page and project team email. Non-digital methods included the CTA's customer service phone number.

2.2 Virtual Community Meetings Materials

The CTA prepared PowerPoints to supplement the project team's verbal presentation during the meetings. The virtual community meetings' presentation slides and recordings were made available via the project website after the meetings concluded. The recordings were available in both English and Spanish.

2.3 Input Received

CTA invited virtual community meeting attendees to submit comments to CTA during and after the meetings. CTA staff provided live responses to selected comments received through the Zoom meeting platform during the meeting and subsequently provided written responses on the CTA website to all comments received through the Zoom meeting platform as well as questions received as of December 10, 2020 in the comments section of the Facebook Live broadcasts. Comments could also be submitted via email or U.S. mail. Emailed comments could be sent to a project-specific email address (RedExtension@transitchicago.com). This email address was available on the project website, within the community meeting presentation, and on all meeting notification materials.

Main themes from the questions included:

- Project funding questions
- Alternate transit options for the area in substitution or in addition to the Red Line extension
- Frequency of bus service following project completion
- Requests for more information about displacement and property acquisition
- Concerns about parking lot locations, spaces and need
- Concerns about noise and vibration and other potential inconveniences to the community resulting from construction and revenue service
- Requests for the project to employ community members
- Incorporating community designs/artistic expression opportunities into the project
- Potential for transit-oriented development

Input was also solicited during virtual station meetings through Zoom polls and instruction by the speaker to answer specific questions in the Zoom chat. Additional input received was received through the engagement website.

2.4 Virtual Community Meeting Attendees

The public was offered a variety of methods to participate in the virtual station meetings. Each meeting had people listening by phone, joining online through the Zoom meeting platform, and others watching on Facebook Live (**Table 1**). The number of participants watching on Facebook Live fluctuated throughout each meeting and the number of unique participants for Facebook Live could not be determined. The December 8, 2020 community meeting garnered attendance of eighty-three, sixty-eight of whom were community members (who shared that they live in the community areas around the project) and other interested stakeholders (who indicated they lived outside of the project area). Of these eighty-three attendees, approximately fifteen participated in the meeting via Facebook Live. The December 9, 2020 community meeting garnered attendance of ninety community members and stakeholders, including approximately twenty-one via Facebook Live. Seventeen members of the project team led both virtual meetings and nine of these team members served as speakers sharing information about the project with the public. Six additional people comprised the external support team providing interpretation and captioning support. Project team members operated the meeting platform and polling, and assisted in preparing responses to questions. Several other project team members and CTA staff attended as observers.

Table 1: Meeting Attendance

Meeting	Community Member Attendance
December 8, 2020	68 (Zoom) 15 (Facebook Live)
December 9, 2020	69 (Zoom) 21 (Facebook Live)

Section 3
Virtual Community Meeting Notifications

CTA used a variety of outreach and notification methods to announce the RLE Transit-Supportive Development (TSD) Plan and invite interested parties to participate in the December 2020 public virtual community meetings.

CTA performed the following as part of the announcement of the RLE Transit-Supportive Development (TSD) Plan and public virtual community meetings:

- Released Fall 2020 newsletter

- Published advertisements in five regional and local newspapers, including two digital placements for online news publications
- Updated the project website's main page and created a dedicated landing page to include TSD plan details
- Sent postcards to all mailing addresses for impacted properties
- Sent eBlasts to all email addresses on the project contact list
- Posted a customer alert at all Red Line stations
- Delivered hard copy flyers to community locations
- Utilized social media to send announcements
- Media briefing

3.1 Informational Materials and Newsletter

CTA produced a variety of materials to inform the public about the RLE Project announcement of the Transit-Supportive Development (TSD) Plan and public virtual community meetings. The Fall 2020 newsletter was published on November 30, 2020 with information regarding the TSD plan in relation to future development along the Red Line Extension. The newsletter also provided a brief overview of the December public virtual community meetings, dates and times and how to attend the meetings.

3.2 Newspaper Ads

CTA prepared newspaper ads announcing the Transit-Supportive Development (TSD) Plan and the public virtual community meetings. Newspaper ads were published in several local and regional publications (see **Table 2**). The publications include traditional and digital news outlets, local community publications, and a Spanish language publication.

Table 2: Newspaper Ads Announcing Virtual Community Meetings

Publication Date	Media Outlet
November 24, 2020	Chicago Sun-Times (print and digital)
November 28, 2020	Chicago Crusader (print)
December 1, 2020	Chicago Defender (digital only)
December 2, 2020	Citizen Chatham, Chicago Weekend, Hyde Park and South End (print)
December 3, 2020	Lawndale Bilingual News (print)

3.3 Project Website

CTA updated the RLE Project website in advance of the meetings. The website provides general information about the RLE Project, archived materials from public hearings, and updated information on the Transit-Supportive Development (TSD) Plan. A dedicated landing page for the TSD plan (www.transitchicago.com/redext/tsd/) was created and includes an overview and timeline. The website's Frequently Asked Questions were also updated along with images and documents with relevant plan information.

3.4 Postcard Notifications

CTA mailed postcards with information on the upcoming community meeting Transit-Supportive Development (TSD) Plan and invited community members to the public virtual community meetings. The postcards were mailed to approximately 201 addresses of property owners that CTA had contacted in the past in regard to land acquisition. The postcard provided details about the public virtual community meetings, including how to virtually attend meetings and contact information to request assistance at the virtual community meetings. The postcard also included an offer of additional interpretation services in Spanish or sign language with advance notice.

3.5 eBlast Notifications

CTA sent an email (eBlast) to the approximately 1,200 email addresses on the RLE Project contact list on November 23, 2020. The eBlast included information on the project, TSD Plan overview and information about the virtual community meetings with appropriate links to the project website. CTA sent a second eBlast was sent on December 1, 2020 reminding recipients of the upcoming virtual community meetings. CTA sent a third eblast on December 9, 2020 reminding recipients of the second virtual meeting occurrence.

3.6 Customer Alerts

CTA created customer alerts promoting the public virtual community meetings and included information regarding when the meetings would be held, the importance of community engagement and how to attend the meetings. The customer alerts were posted at all Red Line stations.

3.7 Direct and Delivery Mailing

CTA sent hard copies of the meeting announcement and newsletter to aldermen's offices and libraries. These locations were contacted in advance to confirm that they were open, receiving foot traffic, and would accept the handouts. Fifty newsletters as well as 150 meeting announcements were distributed in this manner. Spanish copies of the newsletter and meeting announcement were included in these deliveries.

3.8 Social Media Announcements

CTA utilized the Red Line Extension Facebook page to announce the December virtual community meetings in feed posts as well as through the creation of Facebook events for the two meeting occurrences. On November 23, 2020 CTA Red Line Extension Facebook page published a save the date post with meeting information including dates, times and reasons the public should attend. On December 3, 2020 CTA Red Line Extension Facebook page published individual event pages for the December 8 and December 9, 2020 meetings. Both meetings were also hosted on Facebook Live and posts were published on each meeting date to announce that the meetings were live and available for public attendance.

Additionally, notice of the meetings were posted on CTA's main Facebook page (Facebook.com/thecta), Twitter page, and Instagram story.

3.9 Media Briefing

CTA held a media briefing on December 8, 2020 to answer media questions prior to the public virtual community meetings. WTTW attended the briefing; the article "CTA Awaiting Federal Approval for Next Phase of Red Line Extension" by Nick Blumberg was published to wttw.com on December 8, 2020 at 12:20 pm.

RED AHEAD
Moving Ahead to a Better Red

Red Line Extension

Fall 2020 Newsletter

Guiding Future Development Along the Red Line Extension Through the Transit-Supportive Development Plan

The CTA is beginning development of a Transit-Supportive Development (TSD) Plan, in partnership with the Department of Planning & Development (DPD). The TSD Plan will incorporate the community's vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. The TSD plan will utilize an equitable Transit-Oriented Development (eTOD) planning approach. eTOD planning seeks to promote development without the displacement of existing residents and achieve community-focused

fordable housing, local economic development, and environmental sustainability. It can be a driver for more vibrant, prosperous, and resilient neighborhoods that put people of color and lower- and moderate-income residents at the center. A vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

plan, and they have brought together a strong and diverse team, including experienced planning and

December Public Virtual Community Meetings

Join us for a virtual community meeting on **Tuesday, December 8 (6-7:30 p.m.) or Wednesday, December 9 (1:30-3 p.m.)**
We'll be sharing updates on the project and discussing ways you can get involved in 2021, including future community meetings that discuss the TSD Plan.

Find out more about this meeting and how to join by visiting **Transitchicago.com/RLE/whats-new**

To learn more about the TSD plan, visit **Transitchicago.com/RLE/TSD**

RLE Progresses on Environmental Studies and Preliminary Engineering

The CTA continues to advance environmental studies and prepare preliminary engineering documents to complete the Final Environmental Impact Statement (EIS). Since announcing the project's Preferred Alignment, an opportunity has presented itself to potentially relocate the proposed 130th station from the north side of the street – near the Metropolitan Water Reclamation District (MWRD) – to the south side of 130th Street adjacent to Altgeld Gardens.

As a result, a Supplemental Environmental Assessment is underway that will focus on investigating the impacts

access, and other topics. The CTA has already discussed this change with several groups representing residents in the immediate area and has received positive feedback as the new station location would position Red Line riders closer to homes, schools and recreational opportunities and farther away from the industrial land uses,

A welcomes additional input on the 130th station location change in upcoming community meetings.

The Red Line Extension will provide many benefits, including:

- **Equity**
- **Connectivity and access**
- **Economic opportunity**
- **Frequent rail service**
- **Sustainable transportation**

Noticiero de otoño 2020

Guiando el desarrollo futuro por la expansión de la Línea Roja por medio del Plan de Desarrollo de Apoyo al Tránsito

CTA está comenzando el desarrollo de un Plan de Apoyo al Tránsito (TSD), en asociación con el Departamento de Planeamiento y Desarrollo (DPD). El propósito del Plan TSD es incorporar la visión de la comunidad de desarrollo futuro en el corredor RLE.
T
para permitir el desarrollo de uso mixto y aumentar la vitalidad económica, conectividad multimodal y el ambiente peatonal. El plan TSD utilizará una estrategia de planeamiento TOD equitativa (eTOD). Planeamiento eTOD busca promover el desarrollo sin desplazar a los residentes existentes y lograr

vivienda económica, desarrollo económico local y sostenibilidad ambiental. Puede ser un impulso para vecindarios más vibrantes, prósperos y resistentes que colocan a las personas de color y residentes de ingresos bajos y moderados en el centro. Una parte vital de este plan será un proceso de participación comunitaria que incorpora y aprecia la visión de los residentes y miembros de los vecindarios adyacentes durante el desarrollo del plan.

La empresa Solomon Cordwell Buenz está dirigiendo el plan y han formado un equipo fuerte y diverso, incluyendo empresas experimentadas de planeamiento y arquitectura y varias Empresas en Desventaja (DBEs).

Para aprender más acerca del plan TSD, visite: **Transitchicago.com/RLE/TSD**

¡Reunión comunitaria pública virtual en diciembre!

¡Acompáñenos para una reunión comunitaria virtual el martes, 8 de diciembre (6-7:30 p.m.) y miércoles, 9 de diciembre (1:30-3 p.m.)! Estaremos compartiendo actualizaciones sobre el proyecto y discutiendo maneras en las que se puede involucrar en 2021, incluyendo futuras reuniones comunitarias que discutirán el Plan TSD.

103RD STREET
CONCEPTUAL RENDERING

Resumen del proyecto de expansión de la Línea Roja

CTA está proponiendo extender la Línea Roja desde la terminal existente en 95th/Dan Ryan a 130th Street, sujeto a la disponibilidad de fondos. La extensión propuesta de 5.6 millas incluiría cuatro estaciones nuevas cerca de 103rd Street, 111th Street, Michigan Avenue y 130th Street. Cada estación nueva incluiría instalaciones de estacionamiento y autobús. En 2018, CTA eligió la Alineación Preferida ilustrada en el mapa.

Lowest COVID-19 positivity rate in weeks, but Pritzker and Ezike worry about holiday ‘super-spreader events’

BY RACHEL HINTON, POLITICAL REPORTER
rhinton@suntimes.com | @rrhinton

State public health officials reported 8,322 new confirmed and probable cases of COVID-19 Monday as well as 47 additional deaths.

As of Sunday night, 6,171 people with the virus were reported to be in the hospital, 1,206 patients were in intensive care units, and 635 patients with COVID-19 were on ventilators.

The 8,322-daily caseload, while still higher than in previous months, was the lowest since Nov. 4 and only the seventh time this month that the daily figure was below 10,000.

And the latest cases were detected among almost 91,562 tests, lowering the statewide average testing positivity rate to 10.9%, the lowest it’s been since Nov. 8.

As part of the state’s tier three resurgence mitigations, Gov. J.B. Pritzker asked people who work in office settings to work from home if possible, and he followed his own guidance Monday, allowing his employees to work from home and appearing virtually for his daily briefing on the virus.

Pritzker said he is “concerned” people aren’t following the mitigations he put in place last week and worried that could lead to an uptick in coronavirus cases after the Thanksgiving holiday in Illinois, which is already seeing rising numbers of infections, people in intensive care units and on ventilators.

Dr. Ngozi Ezike said it wasn’t too late for state residents to change their minds about their plans.

“Thanksgiving hasn’t happened yet, people can still change their plans and change the outcome,” Ezike, the head of the state’s public health department, said. “We don’t have to have super-spreader events at homes. ... Please reconsider your plans and see if we can be part of the solution to decrease infections, instead of part of the plan to increase them.”

RED AHEAD
Moving Ahead to a Better Red
Red Line Extension

Red Line Extension Virtual Community Meetings:
Tuesday, December 8 (6:00 p.m. - 7:30 p.m.) and
Wednesday, December 9 (1:30 p.m. - 3:00 p.m.)

The CTA is hosting virtual community meetings to share updates on the Red Line Extension (RLE) project and to introduce the RLE Transit-Supportive Development (TSD) Plan. The TSD Plan will incorporate the community’s vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. For more information about the TSD Plan, please visit **www.transitchicago.com/RLE/TSD.**

A vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

Join us to learn more about the RLE project and the TSD Plan. Community members are invited to ask questions and provide their feedback to CTA, while also learning about ongoing opportunities to stay involved. Due to COVID-19 restrictions, this community meeting will be conducted virtually on Zoom.

To join online, visit: tiny.cc/CTARLEMeeting
To join by phone, dial: 1-312-626-6799; Webinar ID: 856 0888 2260
You can also watch live on Facebook at **www.Facebook.com/CTARedExt.**

***Presentation audio available in Spanish if joining through Zoom. Closed captioning and sign language interpretation also available for the hearing impaired. ***

The same information will be presented at both meetings, so please attend the meeting that works best for your schedule! Afterwards, the meeting will be recorded and posted online at **www.transitchicago.com/RLE/whats-new**.

For questions about the RLE project and/or the TSD Plan, please contact the project team at **RedExtension@transitchicago.com**.

Do you require assistance?
Sign language interpretation and captioning will be available during the virtual presentation. If you require other reasonable accommodations to participate, please contact Amy Serpe, ADA Compliance Programs Manager, by December 2 at 312-350-2301 or aserpe@transitchicago.com.

Granderson and Mariano's Give Away One Thousand Bags of Food

By J. Coyden Palmer

If you were out shopping last Sunday at the Mariano's in Bronzeville, your eyes were not deceiving you. That was former Major League Baseball player and Chicago native Curtis Granderson handing out free food.

Granderson was at Mariano's as part of "Grand Giving," a partnership between the grocery store chain and Granderson's charity, "Grand Kids." Granderson said his organization and Mariano's handed out more than a thousand bags of food. He explained during these chaotic times, we must all remember those who are in the greatest need of basic necessities in life, like food.

"As everything continues to shut down, get closed, you still stay hungry," Granderson said. "That's something that doesn't go away."

According to Feeding America's Map the Meal Gap Study, one in seven people in Cook County will experience food insecurity this year. Food insecurity varies greatly across the county. In some communities, more than half of all residents are food insecure. Food insecurity is usually episodic and often cyclical.

Many food insecure households do not qualify for federal nutrition assistance programs. Making tradeoff decisions between paying for food and other basic needs such as medical bills and housing is also common, according to those who feed the hungry,

Granderson said we can all do something to help fight hunger in Chicago. He spoke of a program people can donate to that leads to actually putting food on people's tables.

"Come to any Mariano's location when you're getting a chance to check-out. They say, 'Hey, would you like to donate a $1, $5, $10, or any amount?' Those proceeds are going to Grand Giving which is then going to help the Chicago Greater Food Depository," Granderson said.

During the pandemic, officials say food requests from families are surging, just as the virus is in Chicago. Kelli O'Connell, CEO of the Lakeview Food Pantry, said there has been a 45 percent increase from this time last year on food requests. She noted that amounts to roughly 2,000 people a week her food pantry is feeding. She said there are a wide-range of people using the pantry but one demographic that is really concerning is that of those seeking her service for the first time.

"We have a lot of people who have lost their jobs and have never been in this situation before," O'Connell said. "They are understandably scared and uncertain about the future. Knowing they will have access to food helps to take away some of the anxiety."

And it's not just those who are unemployed who are struggling. Many people who are employed are also struggling, according to Lee Hodges Jr., who was at the event at Mariano's on Sunday.

"At my job they are cutting back hours big time," he began. "That is putting a dent in my wallet. And the reality is you have to keep a roof over your head, clothes on your back and food on your table. So, this giveaway for me is providing me with a lifeline."

Order your groceries online. Pick up curbside at store.

DISTORTIONS, DISTRACTIONS AND . . .

(Continued from page 6)

Joe Biden is about as moderate as they come. He has not yet said that he supports "Medicare for all," but he supports protections for those with pre-existing conditions, just like 70 percent of all Americans do.

VP-elect Harris has been so frequently mischaracterized that refuting baseless claims is futile. Here is what we know – she is a savvy attorney who has increasing responsibility in the Democratic Party. She brings enthusiasm and energy (not to mention diversity) to the ticket. The attempts to disparage her are at best mean-spirited and anti-Black (attack her on the issues, don't call her a "monster").

Warnock has described Loeffler's attacks on him as "division and distraction." I might add "delusional" to the alliteration. Extracting a passage from a sermon in which Warnock reminded us that God comes first, Loeffler attempted to spin his sermon into an attack on the military. The Bible verse Warnock was quoting, Matthew 6:24, reminds us that God comes first and should gain our allegiance above money or the military. This is basic Christian doctrine. Many of us believe in the omnipotence of God. Warnock did not attack the military; he asserted that our primary obligation is to God.

But words like "socialist" and "left-wing radical" are inflammatory terms, even if those who use them don't know quite what they mean. If feeding the hungry is socialist, then so was Jesus. If clothing the naked is socialist, so is our Lord. If healing the ill is a socialist initiative, then, of course, Raphael Warnock seems like a socialist to the woman who is worth at least $520 million and can afford all the health care she needs. Warnock advocates for expanding the Affordable Care Act, a move anathema to conservatives who want to maximize the profit they can extract from sick people.

Reverend Raphael Warnock, like Dr. Martin Luther King, Jr., is a Morehouse man. There is an adage – you can always tell a Morehouse man, but you can't tell him much. Warnock would like us to tell him that we have his back in a pivotal race that may determine how effective President-elect Biden can be. Ignore the racist rhetoric and check out this powerful preacher and civic leader.

Dr. Julianne Malveaux is an economist and author.

Red Line Extension

Red Line Extension Virtual Community Meetings:
Tuesday, December 8 (6:00 p.m. - 7:30 p.m.) and
Wednesday, December 9 (1:30 p.m. - 3:00 p.m.)

The CTA is hosting virtual community meetings to share updates on the Red Line Extension (RLE) project and to introduce the RLE Transit-Supportive Development (TSD) Plan. The TSD Plan will incorporate the community's vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. For more information about the TSD Plan, please visit **www.transitchicago.com/RLE/TSD.**

A vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

Join us to learn more about the RLE project and the TSD Plan. Community members are invited to ask questions and provide their feedback to CTA, while also learning about ongoing opportunities to stay involved. Due to COVID-19 restrictions, this community meeting will be conducted virtually on Zoom.

To join online, visit: tiny.cc/CTARLEMeeting
To join by phone, dial: 1-312-626-6799; Webinar ID: 856 0888 2260
You can also watch live on Facebook at **www.Facebook.com/CTARedExt.**

Presentation audio available in Spanish if joining through Zoom. Closed captioning and sign language interpretation also available for the hearing impaired. **

The same information will be presented at both meetings, so please attend the meeting that works best for your schedule! Afterwards, the meeting will be recorded and posted online at **www.transitchicago.com/RLE/whats-new**.

For questions about the RLE project and/or the TSD Plan, please contact the project team at **RedExtension@transitchicago.com**.

NEWS

For K-12 educators who are designing instructional resources that align with the needs of today's remote- and hybrid-teaching realities, a new emergency fund can potentially aid their efforts.

Supporting Teachers on the Frontlines of COVID-19

StatePoint - Educators are among the many on the frontlines of COVID-19. During a time of immense disruption, they are quickly adapting their teaching methods, testing new skills, and discovering solutions to advance learning in profound new ways.

For K-12 educators who are designing instructional resources that align with the needs of today's remote- and hybrid-teaching realities, a new emergency fund can potentially aid their efforts. Launched by the National Geographic Society, the fund aims to directly support at least 50 teaching professionals, including formal and informal classroom educators, with grants ranging from $1,000–8,000. In an effort to support as many teachers and students as possible, the resources created by grant recipients will become freely available on the National Geographic Society education website, and within the National Geographic education communities on Twitter and Facebook.

"The role of teachers has never been more important as they work tirelessly to engage and inspire their students in a socially distant world," says Vicki Phillips, chief education officer at the National Geographic Society. "Our goal is to equip educators with the resources and support they need to continue creating, innovating and pioneering new ways of teaching so their peers and their students can continue growing."

The fund places particular emphasis on remote- and hybrid-learning resources, methodologies and practices that use the power of science, social studies and geography to help students understand the significance of current and complex challenges, such as a global pandemic. Other priorities include instructional resources that help students bridge their personal experiences to a more global perspective on critical issues such as sustainability and social justice.

In an effort to identify, support and elevate a range of educator voices, perspectives and communities, priority will be given to those working in communities that have been particularly hard hit by the pandemic and who have not previously received National Geographic funding. Applicants can apply individually, in collaboration with other educators or with National Geographic Explorers. To learn more, visit NatGeoEd.org/covidgrants. To provide additional guidance during the application process, the Society is offering weekly virtual "Design Labs." Educators can also ask questions by visiting @NatGeoEducation on Twitter.

During an unusual school year, new avenues of support and funding are emerging. Leveraging these resources can help educators continue their mission of preparing young people to confront the challenges of a rapidly changing world.

new approaches that will address health disparities in priority populations – Black, Latinx, and low-income Chicagoans – including HIV and sexually transmitted infections (STI). Among all people in Chicago living with HIV in 2019, 66 percent accessed care and 42 percent were retained in medical care. Forty-nine percent of people living with HIV in Chicago achieved viral suppression in 2019, a slight decrease when compared to 2018 data (52%). HIV new diagnosis data has been calculated using a methodology that aligns with the National HIV/AIDS Strategy (NHAS).

This year proved quite a challenge under the COVID-19 pandemic, as such the CDPH increased funding to support the HIV Resource Coordination Hub, which is a one-of-a-kind program that is a single source of information, referrals, and linkages for persons living with HIV and vulnerable to HIV who are in need; expanded emergency financial assistance, providing more than $600,000 to people living with and vulnerable to HIV, which included funds to support food/basic needs, utilities, internet/cell phone, medical expenses, and rent/mortgage; launched a new housing project – Hotel to Home – for people living with HIV who are experiencing homelessness.

SIDA...

Viene de la página 3

de Chicago que vivió con VIH en el 2019, 66 por ciento tuvieron acceso a cuidado y 42 por ciento fueron retenidos en cuidado médico. Cuarenta y nueve por ciento de la gente que vive con VIH en Chicago logró la supresión viral en el 2019, una ligera disminución comparada con los datos del 2018 (52%) Los datos de nuevos diagnósticos del VIH han sido calculados utilizando una metodología alineada con la Estrategia Nacional de VIH/SIDA (NHAS).

Este año resultó un verdadero reto bajo la pandemia del COVID-19 y como tal, el CDPH aumentó los fondos para apoyar el Centro de Coordinación de Recursos sobre el VIH, que es un programa único en su clase, y fuente única de información, referencias y enlaces para personas que viven con el VIH y son vulnerables a él y que lo necesitan; se amplió la asistencia financiera de emergencias, brindando más de $600,000 a personas que viven y son vulnerables al VIH, lo que incluye fondos para apoyar las necesidades básicas/de alimentos, utilidades, internet/teléfonos celulares, gastos médicos y renta/hipoteca y lanzaron un nuevo proyecto de vivienda – Hotel to Home – para personas que viven con el VIH y experimentan desamparo.

RED AHEAD

Red Line Extension

Hello Stakeholder,

You are receiving this email because CTA has contacted you in the past about your property near the proposed Red Line Extension (RLE) project area. The CTA will be hosting a virtual community meeting to share general updates about the RLE project and to introduce the new RLE Transit-Supportive Development (TSD) plan. Community members are invited to ask questions and provide their feedback to CTA, while also learning about ongoing opportunities to stay involved.

The virtual community meeting will have limited time to address land acquisition topics and questions about individual properties will not be addressed at the community meeting for privacy reasons. If you have questions about your property, please email us (**redextension@transitchicago.com**) with your address, name and contact information and a property specialist will

. You may also contact CTA's Customer Service hotline at: 1-888-968-7282, Hearing Impaired/TTY 1-888-282-8891, or 711 (relay).

Thank you,

Red Line Extension Project Team

Hola Interesado,

Usted está recibiendo este correo electrónico porque CTA le ha contactado en el pasado acerca de su propiedad cerca de la Extensión propuesta de la Línea Roja (RLE). La CTA estará patrocinando una reunión comunitaria virtual para compartir actualizaciones generales acerca del proyecto RLE y presentar el plan de Desarrollo de Apoyo al Tránsito RLE (TSD). Los miembros de la comunidad son invitados a hacer preguntas y proporcionar sus opiniones a CTA, mientras también aprenden de oportunidades en curso para mantenerse involucrado.

La reunión comunitaria virtual tendrá tiempo limitado para discutir temas temas de adquisición de terreno y preguntas acerca de propiedades individuales no serán discutidas en la reunión comunitaria por razones de privacidad. Si tiene preguntas acerca de su propiedad, favor de mandar un correo electrónico a **redextension@transitchicago.com** con su dirección, nombre e información de contacto y un especialista de propiedad le contactará individualmente para hablar de

También puede llamar Servicio a Clientes de la CTA: 1-888-YOUR-CTA (1-888-968-7282) TTY: 1-888-CTA-TTY1.

Gracias,

El Equipo del Proyecto de la Expansión de la Línea Roja

Red Line Extension Virtual Community Meetings

The CTA is hosting **virtual community meetings** to share updates **on the Red Line Extension (RLE)** project and to introduce the RLE Transit-Supportive Development (TSD) Plan on:

Tuesday, December 8, 2020 (6pm - 7:30pm) and **Wednesday, December 9 (1:30 pm - 3pm)**.

A vital part of the TSD Plan will will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods along the RLE corridor throughout the development of the plan. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. For more information about the TSD Plan, please visit **transitchicago.com/RLE/TSD**.

Join us to learn more about the RLE project and the TSD Plan. Community members are invited to ask questions and provide their feedback to CTA, while also learning about ongoing opportunities to stay involved. Due to COVID-19 restrictions, this community meeting will be conducted virtually on Zoom.

- **TO JOIN ONLINE, VISIT: tiny.cc/CTARLEMeeting**

Note: *This will provide a direct link to the Zoom meetings. Presentation audio will be available in Spanish if joining through Zoom. Closed captioning and sign language interpretation will also be available for the hearing impaired.*

- **TO JOIN BY PHONE, DIAL:**
  1-312-626-6799; Webinar ID: 856 0888 2260
- **TO WATCH ON FACEBOOK LIVE, VISIT:**
  Facebook.com/CTARedExt

The same information will be presented at both meetings, so please attend the meeting that works best for your schedule! Afterwards, the meeting will be recorded and posted online at **transitchicago.com/RLE/whats-new**.

For questions about the RLE project and/or the TSD Plan, please contact the project team at RedExtension@transitchicago.com.

DO YOU REQUIRE ASSISTANCE?
Sign language interpretation and captioning will be available during the virtual presentation. If you require other reasonable accommodations to participate, please contact **Amy Serpe, ADA Compliance Programs Manager, by December 2 at 312-350-2301 or aserpe@transitchicago.com.**

About the Transit-Supportive Development Plan

Overview

The RLE Transit-Supportive Development (TSD) Plan is a Chicago Transit Authority (CTA) led project in partnership with the City of Chicago's Department of Planning and Development and the Cook County Land Bank Authority. The Plan will act as a guide for future development in communities located near the RLE project area. Your participation and feedback as a community member are important to ensure that the voices of the community are heard and included in the plan.

We encourage you to **register for the community station-area meetings** in January & February 2021 and explore the website to provide feedback on the plan's development. The website will be updated throughout the plan's development over the next year, so be sure to visit again! Better yet, **create an account** to get updates about future engagement opportunities.

TSD Plan Timeline

At the heart of the TSD plan will be the community's vision for future development along the RLE corridor. The plan will identify the approach and resources needed to increase economic development and mobility in the project area. The project team is committed to a collaborative community engagement process that focuses on positive local development and does not result in displacement.

Information collected during the TSD plan will help the CTA secure funding for the RLE project through the federal New Starts program, which will help move the project forward into the next phase closer to implementation. More specifically, the plan will be used to provide information on future plans for the use of land and economic development following the completion of project work to extend the Red Line.

Transit-Supportive Development Plan

Conceptual rendering of area redevelopment near 103rd Street station.

Transit-Supportive Development Plan Overview

The Red Line Extension is about much more than providing new access to transit – it's also about promoting opportunity and development for communities and residents along the extension.

The RLE Transit-Supportive Development (TSD) Plan is a proactive effort to create a guide for future development in communities located near the RLE project area. The TSD Plan is being led by the CTA and in partnership with the City of Chicago's Department of Planning and Development and the Cook County Land Bank Authority. Funding for this initiative comes from a grant the CTA received from the

Federal Transit Administration’s (FTA) Pilot Program for Transit-Oriented Development (TOD) Planning. This program provides funding to FTA grantees to integrate land use and transportation planning with a new transit capital investment.

At the heart of the TSD Plan will be the community’s vision for future development along the RLE corridor. This Plan will identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment.

Importantly, the TSD Plan will utilize an equitable Transit Oriented Development (eTOD) planning approach. In short, eTOD planning seeks to promote development without the displacement of existing residents and achieve community-focused benefits, such as affordable housing, local economic development and environmental sustainability. It can be a driver for more vibrant, prosperous, and resilient neighborhoods that put people of color and lower- and moderate-income residents at the center. In order to achieve this, a vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

Information collected during the TSD Plan will help the CTA secure funding for the RLE project through the federal New Starts program. More specifically, the plan will be used to provide information on future plans for the use of land and economic development criteria following the completion of project work to extend the Red Line.

What will the Transit-Supportive Development Plan entail?

Creation of the TSD Plan will be a one year project that includes the following components: an Existing Conditions Report; an Inventory, Market Analysis, Land Use and Zoning Analysis; an Economic Development Plan; and a Final Report. Community outreach will occur throughout the project.

Transit-Supportive Development Plan Frequently Asked Questions

For frequently asked questions about the TSD plan and RLE, visit our FAQ page here.

Community Involvement

The CTA is involving local communities, elected officials and regional stakeholders to share information on the project and gather feedback and input for the plan. Visit this section in the future to learn more about past and upcoming meetings.

RLE Virtual Station Meetings

The CTA is hosting a series of virtual public meetings to discuss project progress and YOUR VISION for the
area around the four proposed stations for the Red Line Extension (RLE) project. Your input as a community
member will help determine the needs and priorities for future development around each station area.

130th Street | Wednesday, January 27 (6:00 p.m. – 7:30 p.m.)
111th Street | Tuesday, February 2 (6:00 p.m. – 7:30 p.m.)
103rd Street | Tuesday, February 9 (6:00 p.m. – 7:30 p.m.)
Michigan Avenue | Tuesday, February 16 (6:00 p.m. – 7:30 p.m.)

Due to COVID-19 restrictions, these meetings will be conducted virtually via Zoom and broadcasted on Facebook Live.

Registration is required to attend these meetings
Please register at: transitchicago.com/RLE/engage
Attendees will receive information to join via Zoom or telephone

If you require assistance to register, call us at 1-888-968-7282
at least three [3] days before the meeting you plan to attend

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt

*** Presentation audio in Spanish, American Sign Language interpretation and captioning will be available at each meeting for those joining online through Zoom only ***

After each meeting, a recording and meeting materials will be posted on this page.

Meeting 1: Goals, Objectives, and Vision - Winter 2020

The CTA hosted virtual community meetings on Tuesday, December 8, 2020, and Wednesday, December 9, 2020 for updates on the Red Line Extension (RLE) project and an introduction to the new TSD plan. Community members were able to participate in polling activities, provide comments, and ask questions.

New! RLE community engagement website

The CTA also announced its new RLE community engagement website, which can be accessed at transitchicago.com/RLE/engage. Using this new platform, community members can provide feedback, ask questions, and collaborate with others to help shape the TSD plan. A variety of interactive and easy to use activities are provided, such as the ideas wall, the mapping tool, and a short survey.

- Anuncio (.pdf)

Who is leading the transit-supportive development plan effort?

The CTA is leading this effort in partnership with the City of Chicago's Department of Planning and Development and the Cook County Land Bank Authority. Solomon Cordwell Buenz was selected as the prime consultant for the TSD Plan. The TSD consultant team also includes six disadvantaged business enterprises (DBEs), comprising 40.11% of the overall contract value.

RLE will bring ***access, equity,*** *and* ***economic opportunity*** *to the Far South Side by* ***connecting*** *people to direct and* ***sustainable*** *rail transit.*

Welcome to CTA's Red Line Extension (RLE) community engagement site!

We're glad you're here. Please use this page to provide feedback, ask questions, and interact with your fellow community members about the ongoing RLE project initiatives!

If you're new to the RLE Project, we encourage you to click here to learn more.

At this time, we're currently your seeking input on the following two RLE initiatives:

Transit-Supportive Development Plan

Now through summer 2021, we're developing a Comprehensive Plan to help guide future development around the four new RLE rail stations. The Plan's development will rely on **YOUR** input as a community member to help determine the needs and priorities of the project area.

Not familiar with the plan? Click here to learn more. Share your thoughts and ideas on the TSD Plan using any of the feedback options listed below.

Environmental Analysis

At the same time, we're also completing the next phase of the RLE environmental review process, a Supplemental Environmental Assessment (EA). To learn more about the environmental review process and Supplemental EA, click here.

You can learn about both of these initiatives during our upcoming **station area meetings in January & February 2021**. Be sure to sign up by clicking on the meeting date links on this page! If you have a comment or question regarding the Supplemental EA, please submit using *only* the Send Us A Message or Ask Us A Question options below.

Your voice is important, and we look forward to hearing from you!

Transit-Oriented Development

- TOD places housing, businesses, and amenities, close to transit to create walkable communities and reduce reliance on cars.

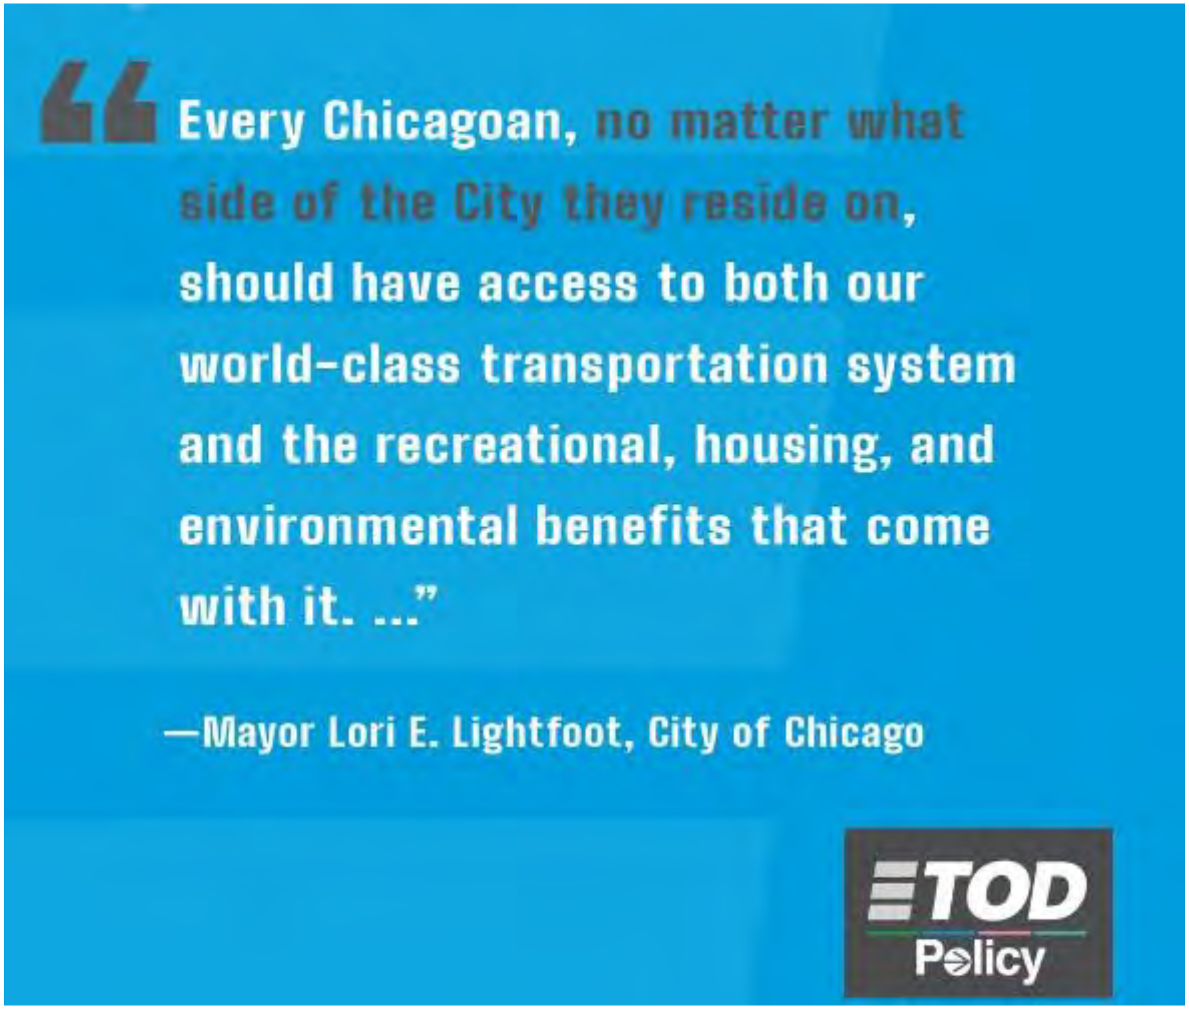
What is *equitable* Transit-Oriented Development

- Ensures that a more vibrant, prosperous, healthy, and resilient community may be enjoyed by all residents, and in particular, those in disinvested communities.

Transit-Supportive Development

- Broader in scope and geographic area than TOD. Includes developing a vision for the whole project area to encourage development as part of a transit investment.

City of Chicago eTOD Plan



“Every Chicagoan, no matter what side of the City they reside on, should have access to both our world-class transportation system and the recreational, housing, and environmental benefits that come with it. ...”

Transit-Supportive Development Plan Mini-Agenda

- Plan’s goals and objectives
- Interactive polling questions.
- Four question on strengths, weakness, opportunities and constraints.
- Four questions on housing, commercial, retail, and jobs.
- Introduce the four “station areas”

Transit-Supportive Development

138th Street

The Plan will identify opportunities to:

- Encourage economic development
- Ensure continued affordability
- Engage private sector investment
- Foster multimodal connectivity and bike/pedestrian access

Transit-Supportive Development

RED AHEAD

Red Line Extension

Outcomes of the Plan

- Create a community vision for redevelopment
- Identify potential funding sources and tools for future development
- Develop policy recommendations in collaboration with City of Chicago agencies (Planning and Development, Housing, Transportation, and others)
- Support a stronger ask for federal funding for the transit project

Transit-Supportive Development

The planning process will include significant and continuous stakeholder engagement and public outreach in partnership with Department of Planning and Development

Station Areas

In mid to late January the CTA will host individual public meetings for each station area. These meetings will be open to the public. Individuals with vested interest in the areas will be strongly encouraged to attend and agenda for each meeting will be clear, that topics will focus on the specific station are.

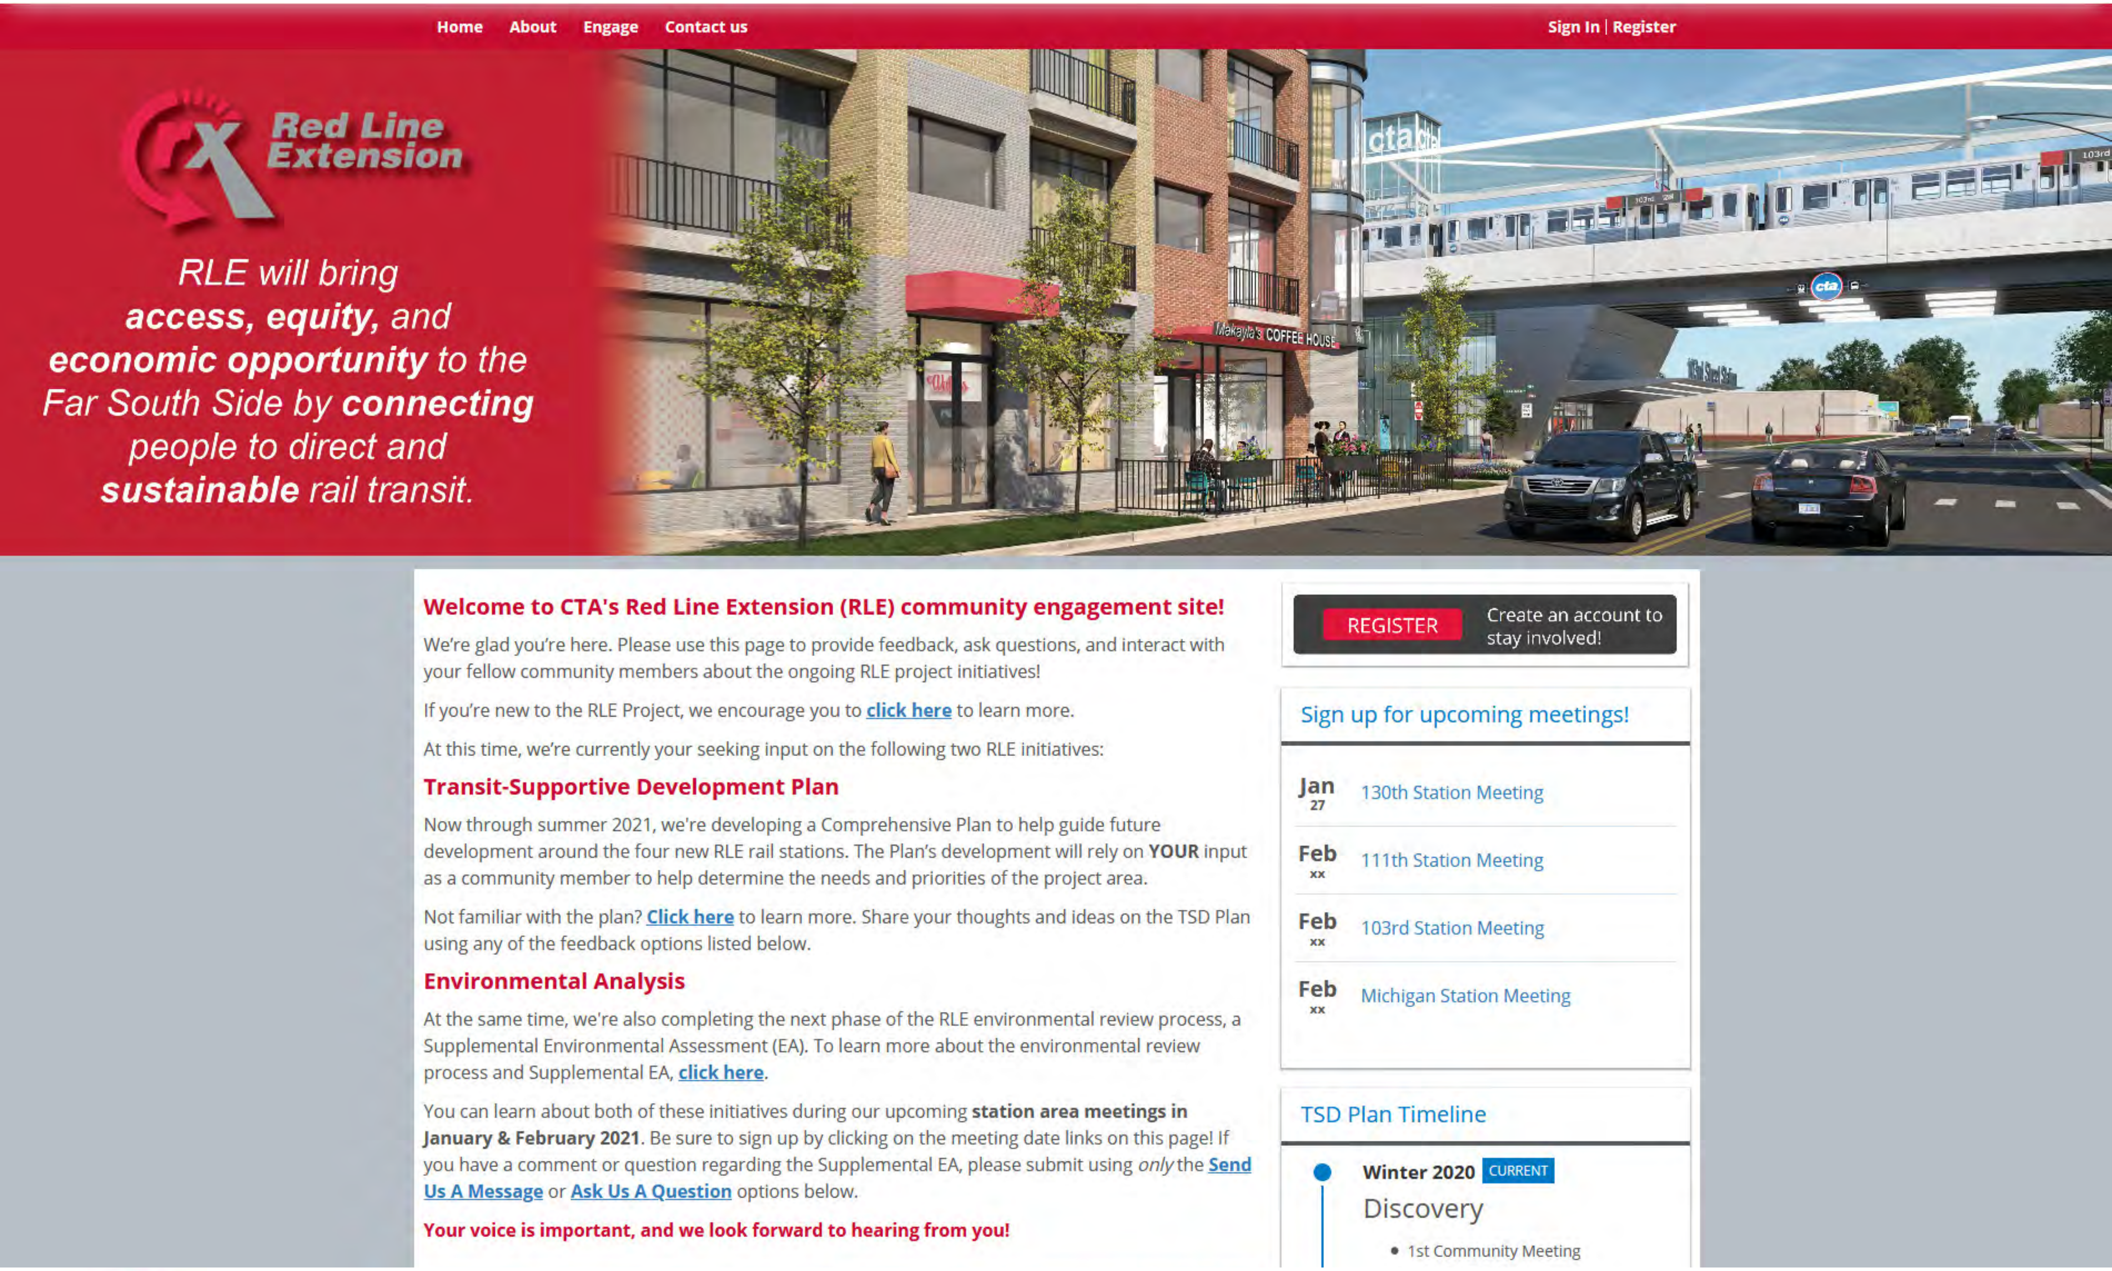
New Engagement Site



RLE will bring **access, equity,** and **economic opportunity** to the Far South Side by **connecting** people to direct and **sustainable** rail transit.

Welcome to CTA's Red Line Extension (RLE) community engagement site!

We're glad you're here. Please use this page to provide feedback, ask questions, and interact with your fellow community members about the ongoing RLE project initiatives!

If you're new to the RLE Project, we encourage you to click here to learn more.

At this time, we're currently your seeking input on the following two RLE initiatives:

Transit-Supportive Development Plan

Now through summer 2021, we're developing a Comprehensive Plan to help guide future development around the four new RLE rail stations. The Plan's development will rely on **YOUR** input as a community member to help determine the needs and priorities of the project area.

Not familiar with the plan? Click here to learn more. Share your thoughts and ideas on the TSD Plan using any of the feedback options listed below.

Environmental Analysis

At the same time, we're also completing the next phase of the RLE environmental review process, a Supplemental Environmental Assessment (EA). To learn more about the environmental review process and Supplemental EA, click here.

You can learn about both of these initiatives during our upcoming **station area meetings in January & February 2021**. Be sure to sign up by clicking on the meeting date links on this page! If you have a comment or question regarding the Supplemental EA, please submit using *only* the Send Us A Message or Ask Us A Question options below.

Your voice is important, and we look forward to hearing from you!

CTA Awaiting Federal Approval for Next Phase of Red Line Extension

Nick Blumberg (/stories-by-author/Nick Blumberg) | December 8, 2020 12:20 pm

(WTTW News)

The Chicago Transit Authority hopes to learn in the coming weeks whether it's received federal approval to move into the next phase of its massive Red Line Extension project (https://www.transitchicago.com/rle/), which would extend the city's busiest train line to Chicago's southern border.

Thanks to our sponsors:

View all sponsors (/sponsors)

The $2.3 billion project would be the largest in the agency's history (https://news.wttw.com/2020/11/09/cta-hopes-start-next-phase-red-line-extension-planning-very-soon). The CTA hopes to secure about 50% of the funding from a Federal Transit Administration grant program (https://www.transit.dot.gov/CIG). In order to get that money, transit agencies must go through a two-year project development phase as part of the grant process. CTA requested entry into that phase in November, and anticipates learning this month or next whether it can move forward.

By the end of the two-year project development phase, the CTA has to identify the local funding sources that will make up the other half of the cost. Project development is followed by an engineering process the CTA says could take one to two years, meaning the Red Line Extension is still several years from federal funding approval and construction. But CTA leaders and staff say the project is one of the agency's top priorities and are excited about the significant progress made to date.

The CTA is hosting virtual community meetings Tuesday evening and Wednesday afternoon (https://www.transitchicago.com/rle/whats-new/) to give an update on the project and to kick off community engagement for its Transit-Supportive Development (https://www.transitchicago.com/redext/tsd/) (TSD) plan tied to the extension. It's a broader effort than Transit-Oriented Development, which encourages homes and businesses near transit. The CTA says its TSD plan will cover a broad swath of the Far South Side rather than just the immediate area around the four proposed stations that make up the Red Line Extension – from 95th Street to 138th Street, and from Ashland Avenue to Stony Island Avenue.

The effort is meant to boost economic development, keep the area affordable, attract private sector money, and make it easier for people to get around using many forms of transportation, including walking and biking.

Community engagement is critical to the plan, the CTA says. In addition to this week’s meetings, the agency is planning to hold a series of public meetings early next year focused on the areas near each of the four proposed stations. And it’s launching a new engagement website for people to stay up to date on the project and offer their feedback.

The development plan is being created with the help of a $1.48 million federal grant. The goal is to have a final report on the Transit-Supportive Development plan by late 2021. In addition to benefiting the Far South Side, the CTA also hopes the development plan will boost its odds of securing federal money.

Find out how you can join the virtual public meetings here. (https://www.transitchicago.com/rle/whats-new/)

Altgeld Temporary Advisory Committee
Meeting Minutes

Monday, January 25, 2021
10:00 AM – 11:30 AM
via Teams Meeting

Summary

The Chicago Housing Authority (CHA) convened its Altgeld Temporary Advisory Committee (TAC), which typically meets on a monthly basis, to discuss a variety of topics on January 25, 2021. Following introductions and a short CHA update, the Chicago Transit Authority's (CTA) presented information to the TAC relative to the 130th Street station and solicited their input.

Ms. Stubblefield started off the presentation by covering the agenda and presenters. Ms. Fratinardo led the group through the project overview, benefits, progress in 2020, and recent public outreach efforts, including the availability of the interactive project website transitchicago.com/RLE/engage, specifically for engaging the community. Ms. Tandon presented Environmental Review process updates and shared details regarding the Supplemental Environmental Assessment (EA). Ms. Tandon described some of the resource analyses underway for the Supplemental EA (traffic and access, historic and cultural resources, noise and vibration, visual and aesthetics, and public parks and recreation area) for which impacts may be of particular interest in relation to the 130th Street station.

Next, Ms. Fourcher presented on the Red Line Extension (RLE) Transit-Supportive Development (TSD) Plan, covering the definition of the TSD Plan, timeline, and recent planning efforts. Ms. Fourcher led a series of interactive polling questions to gauge participants' ideas and recommendations for future development along the RLE corridor (polling questions and results are documented on pages 3-5 of this summary). Finally, Ms. Stubblefield concluded the presentation by opening up the meeting for discussion; discussion talking points are documented on pages 5-6. Ms. Mooney and Ms. Littrell addressed participants' comments and questions to wrap up the meeting.

TAC Attendance

1. Kevin Hall, *CHA*
2. Carlos Campos, *CHA*

TAC Members' Questions & Comments – Teams Chat Feedback

Unless otherwise noted, the following questions, comments, and responses reflect the meeting chat transcription with minor grammatical and spelling corrections. Verbal responses are paraphrased by the meeting note taker. Responses were provided in the chat by the RLE Project team for all attendees who joined the meeting via Zoom to see. Attendees who joined via phone did not have visibility of the Teams chat questions, comments, and responses.

Development Near 130th Station

- Cheryl Johnson: We are a completely deserted area on 130th. What transit-supportive development outside the new station construction, will be developed in this area? Is CTA creating space within this development area for sustainable business opportunities?
    - Leah Mooney (verbal response): From a high-level perspective, the TSD Plan is that analysis – really to gauge public temperature on initiatives and begin to incorporate them into plan. Putting the station in this area does create development for new markets which is part of the thinking here.

Environmental Review Process

- Cheryl Johnson: How much construction costs were reduced from the 1st development and now what is the new costs for the 2nd development in Altgeld?
    - Leah Mooney: Ms. Johnson, can you please clarify what you mean by the question above, "How much construction costs were reduced from the 1st development and now what is the new costs for the 2nd development in Altgeld Gardens. Which developments do you mean? Or are you talking about change in construction costs from the new station location?
    - Leah Mooney: Regarding change in cost from moving station location, we are still analyzing. Additional track footage increases costs, but marginally. The scope is generally consistent with the earlier concept. The parking garage will be smaller than what was forecast in the Draft Environmental Impact Statement (EIS).
- Cheryl Johnson: Will buses be electrified and if not, how are you going to manage diesel fuels and emissions?

- Leah Mooney (verbal response): CTA is currently conducting an electric bus study. Both CTA and Pace buses are included, but we are not sure which routes will overlap and will require additional analysis. Newer fleets for CTA do have regenerative breaking. Sustainable design concepts are on the table and we will address renewable options once further into the design process.
- Cheryl Johnson: If federal funds are supported for this project, is CTA required to conduct an Environmental Justice Impact Statement under USEPA policy?
    - Patrick Dunn (verbal response): The NEPA environmental umbrella will be included in that process.
- Cheryl Johnson: Is this report published? *(in reference to Environmental Review Process)*
- Cheryl Johnson: Has CTA taken into consideration the deep tunnel mining that is constant further east on 130th by the Metropolitan Water Reclamation District (MWRD)?

Description of Favorite CTA Station

- Ann McKenzie: Wilson. It is large and modern.
- Tracy Sanchez: State of IL Boulevard; underground and warm in the winter.
- Julie Brown: I like the indoor lobby at Western on the Brown Line that allows people to wait indoors for buses and trains in bad weather.

Polling Questions & Responses

Responses in italics are additional comments beyond the direct responses to the polling choices.

1. What kinds of open spaces or public spaces would you like more of?

Total Attendees Responding to Questions: 6

Top Results: Farmers market/local kiosk (6 votes), Walking/biking trails (3 votes), Plazas and other gathering spaces (2 votes)

- Synetta Brown: Farmers market/local food kiosk
- Bryan Bradley: Farmers market/local food kiosk and walking/biking trails
- Tracy Sanchez: Farmers market/local food kiosk
- Veronica Clarke: Farmers market/local food kiosk, plazas and other gathering spaces, walking/biking trails
- Carrie Pullie: Farmers market/local food kiosk, plazas and other gathering spaces, walking/biking trails
- Denise Saunders: Local food kiosk, performance/public art, fishing

2. What are the community's greatest strengths from a development perspective?

Total Attendees Responding to Questions: 4

Top Results: Affordable housing (3 votes), Schools (2 votes), Parks and open space (2 votes)

- Synetta Brown: Parks and open space, schools, affordable housing
- Cheryl Johnson: Affordable housing, shopping, transit
- Veronica Clarke: Schools – the rest are aspirational
- Denise Saunders: Affordable housing, parks and open space, historic buildings

3. What are the community's greatest needs from a development perspective?

Total Attendees Responding to Questions: 7

Top Results: Shopping (5 votes), Transit (3 votes), Affordable housing (2 votes)

- Synetta Brown: Shopping
- Ann McKenzie: Shopping
- Carrie Pullie: High school, shopping, transit
- Tracy Sanchez: Shopping, transit
- Denise Saunders: High school, shopping, senior housing
- Bryan Bradley: Affordable housing
- Cheryl Johnson: Affordable housing, shopping, transit
- Cheryl Johnson: *Having jobs on here should not be an item, any developments in this area are going to create jobs and access to jobs.*

4. What types of businesses would you like to see?

Total Attendees Responding to Questions: 8

Top Results: Grocery stores (6 votes), Locally owned boutique (3 votes), Locally owned café/professional services/ pharmacy (2 votes)

- Ann McKenzie: Grocery store
- Cheryl Johnson: Locally owned café, locally owned boutique, professional services
- Denise Saunders: Grocery store
- Tracy Sanchez: Grocery store, pharmacy
- Synetta Brown: National chain restaurants, grocery store, personal services
- Carrie Pullie: Grocery store, locally owned boutique, pharmacy
- Veronica Clarke: Locally owned café, locally owned boutique, professional services
- Nichelle Glover: Grocery store

5. What types of jobs are needed nearby?

Total Attendees Responding to Questions: 4

Top Results: Office and administrative support/ Retail and restaurants (3 votes) Healthcare works (2 votes)

- Cheryl Johnson: Maintenance and utilities, office and administrative support, professional
- Tracy Sanchez: Retail and restaurants, transportation and warehousing
- Veronica Clarke: Healthcare workers, office and administrative support, retail and restaurants
- Carrie Pullie: Healthcare workers, office and administrative support, retail and restaurants
- Synetta Brown: *That's a tough one as I would like to see all the choices offered to the residents.*

6. What type of housing is most needed?

Total Attendees Responding to Questions: 7

Top Results: Senior housing (4 votes), All the above (3 votes), Home ownership (2 votes)

- Carrie Pullie: Senior housing
- Denise Saunders: All the above
- Tracy Sanchez: Home ownership, senior housing

- Veronica Clarke: All the above
- Synetta Brown: Home ownership, senior housing
- Julie Brown: Senior housing, mixed income
- Cheryl Johnson: *Affordable housing can be all the above.*

7. What scale of housing is desired?

Total Attendees Responding to Questions: 5

Top Results: Single-family (5 votes), Townhomes/Multi-family housing with ground floor commercial (3 votes)

- Cheryl Johnson: Single-family, townhomes, two-flats and three-flats
- Synetta Brown: Single-family, townhomes, multi-family housing with ground floor commercial
- Denise Saunders: Single-family, multi-housing with ground floor commercial
- Veronica Clarke: Single-family, townhomes, small four-to-six-unit buildings
- Carrie Pullie: Single-family, multi-housing with ground floor commercial
- Julie Brown: *Why are these housing questions part of this, given the context?*

Additional Discussion

The following documents a combination of attendees' responses verbatim and paraphrased responses provided by the meeting note taker.

- Cheryl Johnson: It would be great if CTA can use Jamboard as it is interactive.
- Cheryl Johnson: We need to do presentations with the schools. They need some sort of buy in.
  - Leah Mooney: We agree and are looking into initiatives for youth engagement.
- Tracy Sanchez: Can you put up a site plan during the discussion?
  - *The project team returned the presentation to slide 34, the draft station concept for the duration of the discussion following this request.*
- Veronica Clarke: I agree with Cheryl about having more community residents participate in these discussions.
- Julie Brown: Will Pace stop at the terminal? Will there be bicycle parking at the terminal?
  - Sonali Tandon: We are looking at an updated bus service plan for RLE so proposed stations feed into them. It is very likely that some of the Pace bus routes will be routed to the 130th terminal.
  - Sonali Tandon: Bicycle parking will likely be part of the station design; we are considering multi-modal options.
- Tracy Sanchez: Will the station be open 24 hours a day and will security be on site 24 hours a day?
  - Sonali Tandon: We are looking at safety and security measures for all stations which will be further defined as we move forward with preliminary engineering. Stations will be open 24 hours.

Presentation Chat Box Accessibility

Some participants had issues accessing the Zoom chat feature throughout the presentation – the project team included an email address for participants who could not access the feature to send questions directly to project team following the meeting. Barbara Stubblefield added comments to the chat with the RLE email address, redextension@transitchicago.com, project Facebook page, Facebook.com/CTARedExt, and project engagement website, transitchicago.com/RLE/engage.

Committee members were instructed to reach out to Ms. Stubblefield or Ms. Mooney if they had further inquiries. The CTA RLE Project team left the meeting around 11:30 AM as the committee proceeded to other business on their agenda.

Red Line Extension 130th Street Station Virtual Meeting Minutes

Wednesday, January 27, 2021
6:00 PM – 7:30 PM
via Zoom & Facebook Live

Meeting Presenters

Marlise Fratinardo, *Chicago Transit Authority (CTA) Planning*
Ammar Elmajdoub, *Chicago Transit Authority (CTA) Planning*
Sonali Tandon, *Chicago Transit Authority (CTA) Planning*
Barbara Stubblefield, *Red Line Extension Program Management Team*
Teresa Fourcher, *Transit-Supportive Development (TSD) Plan*
Mark Payne, *Transit-Supportive Development (TSD) Plan*

Attendees

Public via Zoom: 68
CTA staff, support and consultants via Zoom: 52
Facebook Live: 12 (20 at peak viewing time)
Total public: ~80

Meeting Materials

Presentation is attached.

Summary

CTA hosted the 130th Street Station virtual community meeting on Wednesday, January 27, 2021. The 130th Street Station meeting was the first of a series of meetings for the four proposed station areas along the Red Line Extension corridor. The meeting was held through Zoom and also broadcast simultaneously on the project's Facebook page. Captioning as well as American Sign Language and Spanish interpretation were available for meeting attendees, including during breakout rooms. Attendees were asked to register in advance and were provided with the link and meeting ID to join via Zoom. Registration was available on the project's interactive engagement website, transitchicago.com/RLE/engage, which is hosted on the Bang the Table (BTT) platform. The engagement website provides general information about the RLE Project and Transit-Supportive Development (TSD) Plan plus interactive tools such as an Ideas Wall, project survey, and project map to engage the public and solicit their feedback regarding the project.

Ms. Stubblefield started off the presentation by covering the agenda and presenters. Ms. Stubblefield also covered how attendees can ask questions throughout the meeting. Questions and comments submitted during the meeting are documented on page 3. Ms. Fratinardo led the group through the RLE Project overview, benefits, and recent progress. Mr. Elmajdoub then presented engagement opportunities, including the engagement website transitchicago.com/RLE/engage and recent public outreach efforts. Ms. Tandon presented Environmental Review process updates and shared details regarding the Supplemental Environmental Assessment (EA). Ms. Tandon explained that the project team is studying the implications of locating the station south of 130th Street and working through potential plan development for station layout, parking, and bus facilities. Ms. Tandon described some of the resource analyses underway for the Supplemental EA (traffic and access, historic and cultural resources, noise and vibration, visual and aesthetics, and public parks and recreation area) for which impacts may be of particular interest in relation to the 130th Street station. These presenters asked attendees to respond to two direct questions via chat; responses to these questions are documented on page 4.

Next, Ms. Fourcher presented on the TSD Plan, covering the overview, timeline, and current, as well as past aligned planning efforts. After, Mr. Payne led a series of interactive polling questions to gauge participants' ideas and recommendations for future development along the Red Line Extension corridor (questions and polling results are documented on pages 5-6 of this summary). Mr. Payne read the polling questions and answers out loud and they were also displayed on individual presentation slides for attendees who had joined online to see. Following the interactive polling questions, attendees were separated into small groups for a breakout session led by a moderator and one to two other project team members. On average, there were five to six attendees in each breakout group. A set of general questions were displayed on a presentation slide to solicit input and encourage discussions. Community members were offered the opportunity to share their ideas on the vision for the community to inform the TSD effort. Breakout summaries were compiled for each group and the compilations of comments received are documented on pages 7-13.

After approximately 25 minutes, the breakout session concluded and attendees were brought back from individual breakout groups into one large group to finish the meeting. Each breakout group moderator presented a brief summary of their group's discussion and common ideas that were shared among group participants. Mr. Elmajdoub then presented information regarding the RLE engagement website transitchicago.com/RLE/engage, opportunities to stay involved/receive project updates, ways to contact the project team and details regarding how to be entered into the engagement site Visa gift card sweepstakes. The sweepstakes was implemented to encourage community members to provide feedback and promoted by the project team separate from the station meetings. Ms. Stubblefield then concluded the meeting by thanking all attendees for their participation, providing dates for the upcoming three station virtual meetings and methods, both digital and non-digital, to contact the project team with questions.

Attendee Questions & Comments – Zoom Chat Feedback

Unless otherwise noted, the following questions, comments, and responses documents the direct meeting chat transcription. Responses were provided in the chat by the RLE

Project team for all attendees who joined the meeting via Zoom to see. Attendees who joined via Facebook Live or phone did not have visibility of the Zoom chat questions, comments, and responses.

- **Question 1: Did she say that 30 percent of the CTA riders board the system at 95th?**
  - **Response 1:** Hi Robert – Marlise [Fratinardo] pointed out that fewer than 30 percent of riders who board at the 95th/Dan Ryan station end their trips in the Loop. Most riders (more than 70 percent) are going other places throughout the city, including other South Side destinations.
- **Q2: This has been very engaging so far, thanks so much for the questions!**
  - **R2:** Thanks for your input, Louie!
- **Q3: In a short, timed survey, respondents might feel pressured and might be more inclined to select options in the order they appear. You might consider leaving the surveys for after the meeting to allow adequate time for consideration without the few second response time as a restraint.**
  - **R3:** Thank you for this suggestion, Mr. Garner! If anyone wants to provide this input with a little more time to think, they can go to transitchicago.com/RLE/engage. Click on, Take Our Survey and you'll find all of these questions (and more).
- **Q4: Got to check out for another meeting. I would love to be considered to join the team.** afgarner@theblackinkgroup.com.
- **Q5: How can the 19-year-olds to 30 of age join the landscape?**
  - **R5:** Hi Ms. Jacobs - We recognize the importance of youth and young adults from the RLE footprint. CTA will be looking at ways to engage and inform this population through targeted outreach such as hosting construction careers seminars, creating an internship program, and the possibility of creating a youth advisory committee. We are open to any suggestions you may have!
- **Q6: How is the feedback given in the survey?**
  - **R6:** Hi Ms. Deloris - The survey asks a variety of questions, including the ones you saw today. Most are multiple choice; some are open ended.
- **Q7: While this is going on, PLEASE let the community join the jobs.**
  - **R7:** Thanks Ms. Jacobs - As a part of the RLE Project, the CTA is seeking to address barriers to sustainable employment for residents within the project area and people from economically disadvantaged zip codes. The CTA is establishing partnerships with community organizations, educational institutions and trade organizations to promote workforce opportunities on the project and in the broader construction industry. As always, we're open to your suggestions!
- **Q8:** Do not forgot the Riverdale Multimodal Transportation Plan through CDOT & CMAP

Presentation Engagement Questions – Zoom Chat Feedback

These questions were posed by the presenters during the large group presentation. The following documents the attendee responses that were typed in the Zoom chat.

- **Question 1: How will the Red Line Extension benefit you and your neighborhood?**
  - **Responses 1:**
    - Hopeful
    - Love the idea
    - Benefit Hegewisch more with a bus connection
    - Better transit options
    - Long overdue
    - Jobs
    - Number of Divvys increasing
    - Faster access to communities far south
    - Economic development opportunities
    - Economic/neighborhood vitality
    - TOD
    - Better chance for seating
    - Less travel time to train
    - Uplifting the community while redevelopment of the neighborhood
    - The road repairs

- **Q2: What is your favorite CTA Station and what about that station do you like most?**
  - **R2:**
    - A Pink Line stop near Pilsen. Plenty of artwork along the walls.
    - 95th Street
    - Windows/glass to make less dark (Morgan Street) OR the historic ones like Quincy
    - Vendor opportunities at all stops is good
    - 95th Street – is outside of neighborhood and therefore does not impact residents negatively
    - The Amazon boxes on 95th Street
    - Cameras
    - The electronic charging stations
    - The retail at Roosevelt (e.g., Dunkin Donuts)
    - High visibility, clean, art, landscape vegetation, lighting, seating, safety measures, some business life… in stations with a specific touch of creative design to the surrounding neighborhood

Presentation Polling Results

Attendees joining the meeting through Zoom could answer the poll in real time. Polling was not available to attendees who joined the meeting through Facebook Live or by phone. Those attendees were informed that polling questions were available on the RLE engagement website as an alternate way to participate and provide their responses. Polling questions were typically open for more than 45 seconds.

Response Options	Votes Received
1. What neighborhood do you reside in? *Total Attendees Responding to Question: 33*	
Other	**22**
Altgeld Gardens	**3**
Pullman	**3**
Hegewisch	2
Roseland	2
Riverdale	1
2. How will you likely travel to the proposed 130th Street station? *Total Attendees Responding to Question: 28*	
Drive	**9**
Bus	**7**
Walk	**6**
Train	3
Bike	2
Other	1
3. What kinds of open space or public places would you like more of? (Pick up to 3) *Total Attendees Responding to Question: 32*	
Farmers market or local food kiosk	**21**
Walking and biking trails	**15**
Plazas and other gathering spaces	**14**
Increased access and recreational opportunities along the Little Calumet River	12
Spaces dedicated to nature and ecological restoration	11
Performance or public art spaces	8
Places for exercise	7
Sports and active recreation	1
4. What are the community's greatest strengths from a development perspective? (Pick up to 3) *Total Attendees Responding to Question: 22*	
Parks	**10**
Affordable housing	**8**
Schools	**8**
Single-family housing	**8**
Civic and religious institutions	7
Transit	6
Shopping	4
Historic buildings	2
Jobs	2
Senior housing	1

5. What are the community's greatest needs from a development perspective? (Pick up to 3) *Total Attendees Responding to Question: 28*	
Jobs	**21**
Shopping	**18**
Transit	**15**
Affordable housing	6
Historic preservation	6
Single-family housing	5
Parks	3
Schools	3
Senior housing	3
Civic and religious institutions	1

6. What types of businesses would you like to see? (Pick up to 3) *Total Attendees Responding to Question: 30*	
Grocery stores	**24**
Locally owned cafés	**18**
Medical, health & wellness services	**10**
Pharmacy	9
National chain restaurants	7
Locally owned boutiques	6
Professional services	5
Personal services	4
Home improvement stores	3
National brand clothing stores	2

7. What types of jobs are needed nearby? (Pick up to 3) *Total Attendees Responding to Question: 24*	
Healthcare workers	**12**
Retail and restaurants	**11**
Transportation or warehousing	**10**
Construction	8
Maintenance and utilities	7
Professional services	7
Manufacturing	6
Office and administrative support	5
Public Sector	5

8. What type of housing is most needed? (Pick up to 3) *Total Attendees Responding to Question: 27*	
Home ownership	**20**
Affordable housing	**19**
Senior housing	**15**
Mixed-income	14
Veterans housing	6
Rental	5

9. What scale of housing is desired? (Pick up to 3) *Total Attendees Responding to Question: 23*	
Single-family	**19**
Townhomes	**14**
Two-flats and three-flats	**12**
Multi-family housing with ground floor commercial	6
Small four-to-six-unit building	5
Mid-rise multi-family (up to 8 stories)	3

Breakout Session Groups

Group 1

Moderator: Erin Cabonargi *(TSD Plan)*
RLE Project Members: Marlise Fratinardo *(CTA Planning)* & Mandi Jennings *(RLE Program Management Team)*

Group 2

Moderator: Mark Payne *(TSD Plan)*
RLE Project Members: Sonali Tandon *(CTA Planning)* & Michael Schuch *(RLE Program Management Team)*

Group 3

Moderator: Teresa Fourcher *(TSD Plan)*
RLE Project Members: Ammar Elmajdoub *(CTA Planning)* & David Warren *(RLE Program Management Team)*

Group 4

Moderator: Christine Carlyle *(TSD Plan)*
RLE Project Members: Jasmine Gunn *(Chicago Department of Planning and Development)* & Lilliane Webb *(RLE Program Management Team)*

Group 5

Moderator: Sarah Ware *(TSD Plan)*
RLE Project Members: Barbara Stubblefield *(RLE Program Management Team)* & Kristen Robinson *(RLE Program Management Team)*

Group 6 – Non-RLE Consultants

Moderator: Cindy Fish *(TSD Plan)*
RLE Project Members: Keith Spencer *(RLE Program Management Team)* & Joanna Littrell *(CTA Planning)*

Breakout Session Questions & Group Responses

The following section documents a combination of attendees' verbatim and paraphrased responses provided by the breakout group moderators. Individual breakout groups may not have responses listed for each question due to groups spending more time discussing other questions or moderators not receiving any feedback from attendees on those prompts. Moderators for Group 6 had an alternate prompt for Question 3 because the participants in this group were mainly industry professionals rather than community stakeholders; the alternate question is noted as such.

Question 1: What do you imagine for the future of your neighborhood?

- **Group 1 Responses:**
  - Transportation will be a wonderful link for individuals by creating new and more accessible modes of travel to get to jobs and visit family using the CTA network
  - I admire the 95th station at the end of the line because it has its own energy. Things that work there that could be applied to 130th are art from Theater Gates and live music (pre-COVID-19).
  - More horticulture and lush greenery with a two-year maintenance plan for upkeep would help address all the psychological effects/air quality issues.
  - Continuing design efforts of stations' uniqueness to the neighborhood they are located in. Whether using a local artist or muralist to incorporate some of those touches into the design.
  - Transition from elderly population to retaining new young families for the future of Altgeld by having amenities that make Altgeld a desirable Chicago Housing Authority (CHA) destination despite distance from downtown.
  - Station as a garden to buffer from surrounding industrial uses to north and east
- **Group 2 Response:**
  - It's important for community to feel safe. Hopefully, this project does not turn back on the community. Hopeful for opportunities like boutique stores. Access to the Red Line and to other parts of community will be available. Really assessing true needs of the community. Would like to see everything coming into the community that is walkable (e.g., big box grocery stores, financial institutions like a bank or credit union).
- **Group 3 Response:**
  - Highly visible notification boards are key! Next train/bus departures and system updates/outages. Having these outside of the station would be great.
- **Group 4 Responses:**
  - One of the things I really want to see is the revitalization of the area. It has been so forgotten for so many decades that the only way that the community can go now is up. What I imagine the future to be is totally revitalized with a lot of new amenities and structures to sustain itself. I'd like to see new businesses created in the area. We have a lot of open space and land. I want to one day be able to dock my boat off of Beaubien Woods. That's what I look forward to.
  - The most important thing is transportation in this area and I want it to be safe. I don't want any new entity to come into the area and continue to pollute and degrade the area. I'd like to see green technology and development in this area because we've borne the burden for so long and we need to shift the paradigm when it comes to that now.

  - I agree we don't need anything else toxic out here. Hopefully there will be better schools for the kids and a grocery store. We need a grocery store badly. We need transportation, as well.
  - I'm as far from Altgeld Gardens as one can get, living in Evanston so, I will defer to other people to talk about this.
  - In addition to new development that is needed, a grocery store is clearly a need. I'd like to see aesthetics, flowers, shrubbery, a nice environment to drive down and view. Will improve morale of neighborhood and new development would be a big plus.
  - Not from the area but, if you ask everyone, needing a grocery store as number one is very telling. If you are going to develop the area and not provide that, that's unacceptable. Adding to what was previously said, landscaping and there are lots of spaces throughout that are open and there's an opportunity to bring nature in and improve the overall feel of the area.
- **Group 5 Responses:**
  - More than anything, transportation is a make or break for the opportunities available to people. From a personal experience I've been riding the CTA bus as a kid and my mom and grandma took the bus from Roseland to downtown. My vision around Altgeld is to provide access opportunities for Black Chicago – the same experiences that are available to the suburbs and other areas of the city should be extended the same to communities everywhere in the city.
  - I hope it's not a setback but an opportunity for our community. Will the people in Altgeld Gardens be in jeopardy of losing some of the housing?
- **Group 6 Responses:**
  - Accessibility for those in the community to the greater Chicagoland area through the CTA lines is monumental. To be able to extend the lines further south into the South Side communities is long overdue.
  - I am very interested in mega developments by CTA. For example, how these projects are looking at the overall impact on the community and the people that live there now and in the next decade to ensure they're accounting for their needs and making sure they can take advantage of the robust construction developments to hopefully improve their lives and attract others to allow the community to continue to thrive and thrive even more.

Q2: Based on what you heard today, what else do you think is important for CTA to understand this station location?

- **Group 1 Responses:**
  - The current issue at 130th Street with the smell of garbage from the water plant.

  - It's great that along the Red Line there are educational institutions where people can actually go all the way from kindergarten to PhD, like I did. This will only help that.
  - It needs more landscaping along the drive to provide views. This would help morale in the community.
  - There are concerns about diesel bus fumes.
  - I live by the 95th Street station and worked at Carver High School for some time in the past and I worked on projects throughout the city. So, this is a long time coming and an interesting and exciting opportunity.
- **Group 2 Response:**
  - The community has majority of seniors and those that are less able to get around. Make sure everything is easily accessible (for those with wheelchairs, etc.).
- **Group 3 Responses:**
  - Lots of concerns. One is that impact statement has very little commercial development in the plan.
- **Group 4 Responses:**
  - I'm not from Altgeld and live in the east side neighborhood. I know about a group member and the EJ movement. I agree with other group members that there should not be more pollution. Also like the question earlier in the meeting that noted better access to the river and ecological restoration. I would like to see more of that in this part of the city. We can't get enough of that.
  - I'm from the 9th ward service office and live in Pullman area, so I've spoken to a lot of people in this breakout room when answering the phones at the service office. I want to piggyback off what was said already of neighbors knowing each other. It's nice to come out and say hello, not being afraid of your neighbors. People come together, seniors, and youth. Most of the complaints I hear are referencing the grocery store, so this will help with that development coming to that area. As well as pride with the community, cleaning up, and other group efforts. Bring more access to that area.
  - It would be great to see a larger uptick of people from the area participating in these sessions but understand it's difficult due to COVID-19 restrictions.
- **Group 6 Response:**
  - Maintaining the integrity and strength of diversity within the community and having the project benefit the community as a whole. Bring in more opportunities like jobs, healthcare/wellness services to surrounding communities with the prospect of bringing 130th Street station to the area.
  - The project needs to be a "boots on the ground," approach and conducting more of these meetings would be helpful. I like the Visa gift card incentive for participating. Those things ultimately do help, in addition to painting the picture for the public. At the end of the day, you're trying to figure out

what's the best approach, what to incorporate in the design, and what's ultimately going to help members in the community by finding out exactly what the community needs.

Q3: What are your community's greatest assets? What is missing?

- **Group 1 Response:**
    - Envision 130th Street station as a new future hub along that corridor like the INVEST South/West project.

- **Group 2 Response:**
    - Assets are the community schools (elementary). What is missing is concentration to GED and special trainings. Opportunity for adult education is needed. Altgeld Gardens has a large population of children. Engaging the youth is key. What is also missing is service opportunities for teens in that area (as well as job opportunity for teens). Also, more job training and internships for teens.
- **Group 4 Response:**
    - Our greatest asset, and I think a lot of people don't talk about it, is the people in the community – to be comfortable and able to walk out the door and say, "how are you doing," to my neighbor. I would like to see better housing and safer houses.

Alternate Q3: Are there any programs or initiatives that you are working on in the area that the TSD team should be aware of?

- **Group 6 Response:**
    - In relation to this station area, not so much. In the past, I've been involved with INVEST South/West. As the project comes together, it's important to consider how everything synergizes together. How are we looking at it holistically from quality-of-life perspective, from an education perspective, a health perspective? Black Chicago should be at the forefront like I mentioned earlier and promote job opportunities. Lakeside Alliance from the Obama Foundation is an initiative that should be considered for this project or initiatives to encourage people to get into the trades.

Q4: How do you see the new station being integrated into the community?

- **Group 2 Response:**
    - Integration of this station will be unique. To be part of this community is hard to grasp. How can CTA welcome the community? Does CTA have anything special for the community? How will the community feel a part of this project? Economic development will help to a certain extent. Good to know that community will be directly affected by this project. Having this station could act as a hub that will bring better access to busing, better roads for walking and biking. How do we make people from all walks of life

feel a part of this process? How do we get the neighborhoods to get to the station (i.e., those at Indiana Avenue)?

Q5: Do you have any specific thoughts or ideas about economic development in the area?

- **Group 1 Responses:**
    - Food access is of the highest priority, higher than jobs once RLE is finished because the nearest Red Line adjacent grocery store is at 87th Street.
    - A grocery store is the number one priority and agree that more nature should be brought in.
    - There's a need for more trades jobs and career path opportunities.
    - Desire for a local coffee shop and jobs incubator
    - Incorporation of some amenities like coffee shops or restaurants or some type of life that can activate this space and give a sense of safety and security too. Also respite. Something people need to refresh themselves on the journey and now this being an end of the trip, if you will with the Red Line on that end.
    - Connecting to the bike trails. One of my colleagues works with the Metropolitan Development Corporation and worked on that prong and others in the community too have done so. Those things will be nice and be able to be highlighted and look at healthy modes of transportation, even though that's still challenging in the city to stress bikes and cars together. I'm still adjusting to that.
- **Group 3 Responses:**
    - Needs commercial development, especially for food. What plans are there for 130th?
    - No Ventra machines in Altgeld Gardens and have to visit another stop for Ventra card. Maybe something at the library.
    - Areas for green and sustainable development
- **Group 4 Responses:**
    - I'm part of RLE Coalition Board (RLEC) and moved into the Roseland area in 1972. In terms of having investment in the community, I've seen the transition. When I moved here, it was the beginning of the integration of Roseland. So, I've seen the community transition and being a part of RLEC we are advocates for RLE Project and for TOD for the Greater Roseland community, which includes the 130th Street terminal. My position is for the entire project because I've seen the change and disinvestment that has occurred throughout the years. Whereas it once was thriving and now there is blight. Basically, neighborhood vitality, economic vitality and TOD around all the development.
    - Everyone is not college bound. One concern is that I saw construction as an employment category but not trades. In the future, I plan to recruit and expose people in the community to trades and alternatives to college.

- **Group 5 Response:**
    - The food/grocery/medical desert is a top priority. I would love to see a shopping center or family center with amenities like food, medical services, and educational opportunities. For education opportunities, not necessarily a college but a trade school or offering trainings to community members such as home remodeling or how to start a business—things of that nature. The ‘triangle around the airport,’ for example, it would be great if some of that development came out to the South Side of Chicago.
- **Group 6 Responses:**
    - Integrate the historical aspects of the community into the station design
    - Incorporating nature, more trails, and promoting healthy lifestyles in the community whether it’s integrating some type of park or recreational space, in addition to enhancing the nature already in the area.
    - For the area to feel like a step away or escape from the city hub, more local businesses and open areas would draw me into the area. Not big chain businesses, similar to the polling answers, a lot of preference towards local entities and programs available to families.

RED AHEAD Moving Ahead to a Better Red | rx Red Line Extension

Red Line Extension 111th Street Station Virtual Meeting Minutes

Tuesday, February 2, 2021
6:00 PM – 7:30 PM
via Zoom & Facebook Live

Meeting Presenters

Marlise Fratinardo, *Chicago Transit Authority (CTA) Planning*
Ammar Elmajdoub, *Chicago Transit Authority (CTA) Planning*
Sonali Tandon, *Chicago Transit Authority (CTA) Planning*
Barbara Stubblefield, *Red Line Extension Program Management Team*
Melody Carvajal, *Red Line Extension Program Management Team*
Teresa Fourcher, *Transit-Supportive Development (TSD) Plan*
Mark Payne, *Transit-Supportive Development (TSD) Plan*

Attendees

Public via Zoom: 65
CTA staff, support and consultants via Zoom: 48
Facebook Live: 14
Total public: ~78

Meeting Materials

Presentation is attached.

Summary

CTA hosted the 111th Street Station virtual community meeting on Tuesday, February 2, 2021. The 111th Street Station meeting was the second of a series of meetings for the four proposed station areas along the Red Line Extension corridor. The meeting was held through Zoom and also broadcast on the project's Facebook page. Captioning as well as American Sign Language (ASL) and Spanish interpretation were available for meeting attendees, including during breakout rooms. A comment with the Zoom meeting information was also posted on the Facebook Live stream so individuals could join to participate in the interactive presentation portions and receive any required accommodations. Attendees were asked to register in advance and were provided with the link and meeting ID to join via Zoom. Registration was available on the project's interactive engagement website, transitchicago.com/RLE/engage, which is hosted on the Bang the Table (BTT) platform. The engagement website provides general information about the RLE Project and Transit-Supportive Development (TSD) Plan plus interactive tools such as an Ideas Wall, project survey, and project map to engage the public and solicit their feedback regarding the project.

Ms. Stubblefield started off the presentation by covering the agenda and presenters. Ms. Stubblefield also covered how attendees can ask questions throughout the meeting. Questions and comments submitted during the meeting are documented on pages 3-6.

Ms. Fratinardo led the group through the RLE Project overview, benefits, and recent progress. Ms. Stubblefield and Ms. Fratinardo asked attendees to respond to three direct questions via chat; responses to these questions are documented on pages 6-7. Next, Ms. Carvajal shared information regarding potential property impacts and provided a variety of contact methods and resources for additional information and follow up. Mr. Elmajdoub then presented engagement opportunities, including the website transitchicago.com/RLE/engage and recent public outreach efforts. Ms. Tandon then presented Environmental Review process updates and described some of the resource analyses being undertaken (traffic and access, noise and vibration, visual and aesthetics, and community resources) for which impacts may be of particular interest in relation to the 111th Street station. Ms. Tandon also shared specific details regarding the Supplemental Environmental Assessment (EA), including the cross-over located at approximately 108th Place which was not disclosed in the Draft Environmental Impact Statement (EIS). The 108th Place cross-over is where the Preferred Alignment crosses-over from the west side to the east side of the Union Pacific Railroad (UPRR).

Next, Ms. Fourcher presented on the TSD Plan, covering the overview, timeline, and current as well as past aligned planning efforts. Ms. Fourcher also shared information regarding community assets/resources and the 111th Street station corridor existing land use in relation to the TSD Plan. After, Mr. Payne led a series of interactive polling questions to gauge participants' ideas and recommendations for future development along the Red Line Extension corridor (questions and polling results are documented on pages 7-9 of this summary). Mr. Payne read the polling questions and answers out loud and they were also displayed on individual presentation slides for attendees to see. Following the interactive polling questions, attendees were separated into small groups for a breakout session led by a moderator and one to two other project team members. On average, there were five to six attendees in each breakout group. A set of general questions were displayed on a presentation slide to solicit input and encourage discussions. Community members were offered the opportunity to share their ideas on the vision for the community to inform the TSD effort. Breakout summaries were compiled for each group and the compilations of comments received are documented on pages 10-16.

After approximately 25 minutes, the breakout session concluded and attendees were brought back from individual breakout groups into one large group to finish the meeting. Each breakout group moderator presented a brief summary of their group's discussion and common ideas that were shared among group participants. Next, Mr. Elmajdoub presented information regarding the RLE interactive engagement website, opportunities to stay involved, how to receive project updates, ways to contact the project team and details regarding entry for the engagement site Visa gift card sweepstakes. Ms. Stubblefield then concluded the meeting by thanking all attendees for their participation, providing dates for the two upcoming station virtual meetings and methods, both digital and non-digital, to contact the project team with questions.

Attendee Questions & Comments – Zoom Chat Feedback

Unless otherwise noted, the following questions, comments, and responses documents the direct meeting chat transcription. Responses were provided in the chat by the RLE project team for all attendees who joined the meeting via Zoom to see. Attendees who joined via Facebook Live or phone did not have visibility of the Zoom chat questions, comments, and responses.

- **Question 1: Elevated trains in our neighborhood is a horrible idea and it will hurt our property values.**
  - **Response 1:** Thanks for your question, Mosea. You may want to check out *"Transit Means Business"*, a study by the Metropolitan Planning Council: chi.streetsblog.org/2018/11/12/mpc-study-highlights-importance-of-transit-for-attracting-businesses-employees/.
- **Q2: Why isn't the 111th Street station--named or called the Medical District station/stop? This would bring more value to the station & what the community can best recognize.**
  - **R2:** Thank you for your suggestion on the station name, Ms. Deloris! CTA has not selected names for the RLE stations, but we would love to hear your ideas! The best way to do that would be to head to our engagement website at transitchicago.com/RLE/engage.
- **Q3: Will there be space for parking at the stations?**
  - **R3:** Thanks for your question, Monique! Yes, park & ride facilities are planned at each of the four RLE stations. Using travel demand modeling, the CTA has estimates of the parking demand needed along the Preferred Alignment. The CTA is currently conducting additional analysis and review of parking needs near stations and as part of the ongoing project development and engineering studies.
- **Q4: I [am] happy to see it coming into being I hope very soon. What is the timeline?**
  - **R4**: Thank you for your question regarding the timeline, Pat. With the RLE Project's acceptance into the Federal Transit Administration's (FTA) Project Development phase in December 2020, CTA now estimates the start of construction in 2025 and service beginning in 2029. However, the timing of construction and start of service is dependent on federal approvals and securing project funding.
- **Q5: Is it possible that the start of construction can start much earlier than 2025?**
  - Thanks for your question, Jocilyn. The anticipated construction date is dependent on a number of factors, including federal funding and approvals, further engineering and design, completion of environmental review, and

procurement of construction contracts. We believe that 2025 is a realistic timeline based on the steps involved with delivering a mega-project like the Red Line Extension. We know the community is anxious to see this project happen - we are too and we're working hard to make sure it does!

- **Q6: 2025? We have been waiting to make it happen for years.**
- **Q7: Closed deck structure works best.**
- **Q8: How will you maintain safety within the residential area and how can residents maintain parking near their homes? I.e., how will the traffic be controlled around our houses?**
  - **R8:** Thank you, Reverend Calloway. A project-specific safety and security plan for the Red Line Extension is being developed during Preliminary Engineering and security measures will be consistent with that of the entire CTA system. A number of steps have been taken to improve your safety and security while on CTA. To learn more about these steps, please visit: transitchicago.com/security. Park & ride facilities are planned at each of the four RLE stations. Using travel demand modeling, the CTA has estimates of the parking demand needed along the Preferred Alignment. The CTA is currently conducting additional analysis and review of parking needs near stations and as part of the ongoing project development and engineering studies. Rev. Calloway, we are also studying traffic impacts as part of the environmental analysis.
- **Q9: Regarding Workforce and Economic Development Potential – What are the opportunities for potential employment during the planning and construction phases? How can local candidates access training that will prepare them for potential employment in all phases of this project? Will there be a jobs pipeline for those from the impacted community to access employment?**
  - **R9:** Good questions, Dallas! As a part of the RLE Project, the CTA is seeking to address barriers to sustainable employment for residents within the project area and people from economically disadvantaged zip codes. The CTA is establishing partnerships with community organizations, educational institutions, and trade organizations to promote workforce opportunities on the project and in the broader construction industry.
- **Q10: Will a portion of the cost of RLE be absorbed by increasing property taxes?**
  - **R10:** Hi Cynthia - The CTA is pursuing a wide range of federal, state, and local funding sources, including the FTA's Capital Investment Grant (CIG) Program. A category of CIG funds known as, New Starts, is available for projects that expand rail service into an area that is not within the current transit footprint and therefore entail a relatively longer environmental and

planning process. The CTA must compete with other New Starts projects across the country that are also seeking funding from the program. Once the Project Development phase is complete, CTA will have a more precise understanding of the overall timeline of receiving federal New Starts funding. Local funds are also needed to "match" the federal New Starts funds and local funds demonstrate the commitment to the project. The CTA is considering a number of options at this time for this that include a special transit-only tax-increment financing district, authorized by the General Assembly in June 2016, which could provide a portion of the local funding needed for the RLE Project.

- **Q11: Stop blocking the terp**
    - *This comment was made with regard to ASL interpretation. Project team members checked that interpreters remained visible and no technical issues were found.*
- **Q12: The proposed station will eliminate all parking for the Agape Center.**
    - **R12:** Thank you for your comment, Brad. CTA would like to continue the conversations we have had with the Agape Center about how to minimize impacts to your organization.
    - **Brad** – We would appreciate that direct, intentional conversation from the RLE.
- **Q13: Roseland LISC is inclusive of the Far South Chicago Coalition. Please allow more input from the Coalition which has a Workforce Development Committee and Economic Development Committee.**
    - **R13:** Thank you for the suggestion, Rev. Calloway!
- **Q14: Had RLE work with various disabilities especially deaf and hard of hearing seeking feedback? organization?**
    - **Participant Response (R14):** Mr. Woodson, you can learn more about the Agape Center at chicago.cru.org/innercity.
- **Q15: The problem is most the single-family housing needs to be seriously remodeled or replaced.**
    - **R15:** Thanks for that point, Brad. We are also looking into the condition of housing stock as part of the TSD Plan.
- **Q16: No Little Calumet near 111th**
    - *Comment in reference to an error on one of the polling questions carried over from the 130th meeting.*
- **Q17: When we say shopping, more for daily necessities not leisure/grocery stores.**
    - *In reference to polling question 4.*
- **Q18: Speak for yourself… no one knows what one desires in terms of shopping…**

- *In reference to above comment on polling question 4.*

- **Q19: Keep in mind, Greater Roseland represents the Chicago city limits. It offers the opportunity to represent the City of Chicago as a city that works for every community from the Far South Side to the Far North Side; from I-57 on the west to Bishop Ford on the east!**
  - **Participant Response (R19):** Yes, it does Pat. It is also the area that the Far South Chicago Coalition (FSCC) is working in for the Quality-of-Life Plan with Local Initiatives Support Corporation (LISC)!
- **Q20: As president of Chicagoland Black Deaf Advocates, I would love to work with many people in community.**

Presentation Engagement Questions – Zoom Chat Feedback

These questions were posed by the presenters during the large group presentation. The following documents the attendee responses that were typed in the Zoom chat.

- **Question 1: What neighborhood do you reside in?** *(Responses listed in order of most common to least)*
  - **Responses 1:**
    - Roseland
    - Roseland Heights
    - Washington Heights
    - Cal City
    - Chatham
    - West Chesterfield
    - Riverdale/Golden Gate
    - West Pullman
    - Pullman
    - Hyde Park
    - Hazel Crest

- **Q2: What is your favorite CTA Station and what about that station do you like most?**
  - **R2:**
    - Art in the stations
    - Updated technology
    - Glad you mentioned medical district/111th Street
    - It will bring economic growth for small businesses
    - I like the 95th Street station. Also, art and info screens should be included.
    - 35th Street because the tunnel keeps the noise down. Also 95th because it does not impede the residents.
    - Safety when you get on and off

        - Security, please
        - Access to elevators
        - Staffing plans to ensure quality station and grounds' cleanliness
        - Transit turnaround with shuttle to and from Roseland Hospital

- **Q3: How will the Red Line Extension benefit you and your neighborhood?**
    - **R3:**
        - Hoping it will give our neighbors access to downtown
        - Jobs
        - Hoping it will lead to economic development in our community
        - Benefits
        - Creates TOD, economic and neighborhood vitality
        - Access to employment opportunities in other areas
        - Potential opportunities immediately in the area for local community
        - Construction jobs for the same!
        - It definitely will put ease to mobility for those who rely solely on public (train) transportation.
        - Concerned about the extra unwanted traffic it will bring to my neighborhood
        - I agree with person that is happy to see the service coming to our area
        - Chicago's public transportation system is a benchmark. It is inevitable that routes will come to or near your neighborhood.

Presentation Polling Results

Attendees joining the meeting through Zoom could answer the poll in real time. Polling was not available to attendees who joined the meeting through Facebook Live or by phone. Those attendees were informed that polling questions were available on the RLE engagement website as an alternate way to participate and provide their responses. Polling questions were typically open for more than 45 seconds.

Response Options	**Votes Received**
1. What would be your mode of transportation to the 111th Street station? *Total Attendees Responding to Question: 30*	
Drive	12
Walk	8
Bus	7
Other	2
Bike	1
2. What kinds of open space or public places would you like more of? (Pick up to 3) *Total Attendees Responding to Question: 32*	
Farmers market or local food kiosk	19
Walking and biking trails	14
Plazas and other gathering spaces	13
Performance or public art spaces	12

Spaces dedicated to nature and ecological restoration	11
Places for exercise	7
Sports and active recreation	6

3. What are the community’s greatest strengths from a development perspective? (Pick up to 3)
Total Attendees Responding to Question: 34

Single-family housing	**17**
Transit	**12**
Civic and religious institutions	**11**
Historic preservation	**11**
Schools	10
Affordable housing	9
Senior housing	8
Jobs	6
Parks	6
Shopping	6

4. What are the community’s greatest needs from a development perspective? (Pick up to 3)
Total Attendees Responding to Question: 33

Shopping	**23**
Jobs	**20**
Transit	**15**
Affordable housing	12
Single-family housing	8
Schools	7
Senior housing	6
Historic preservation	3
Parks	3
Civic and religious institutions	2

5. What types of businesses would you like to see? (Pick up to 3)
Total Attendees Responding to Question: 33

Grocery stores	**24**
Locally owned cafés	**21**
Medical, health & wellness services	**12**
Professional services	11
Home improvement stores	10
National chain restaurants	9
National brand clothing stores	6
Pharmacy	6
Locally owned boutiques	4
Personal services	2

6. What types of jobs are needed nearby? (Pick up to 3)
Total Attendees Responding to Question: 30

Construction	**14**
Public sector	**13**
Manufacturing	**13**
Retail and restaurants	12
Healthcare workers	10
Transportation and warehousing	9
Maintenance and utilities	8
Professional services	8
Office and administrative support	3

7. What type of housing is most needed? (Pick up to 3) *Total Attendees Responding to Question: 30*	
Home ownership	**23**
Affordable housing	**17**
Mixed-income	**17**
Senior housing	15
Veterans housing	11
Rental	3
8. What scale of housing is desired? (Pick up to 3) *Total Attendees Responding to Question: 32*	
Single-family	**30**
Two-flats and three-flats	**24**
Townhomes	**21**
Small four-to-six-unit building	7
Multi-family housing with ground floor commercial	4

Breakout Session Groups

Group 1
Moderator: Erin Cabonargi *(TSD Plan)*
RLE Project Members: Marlise Fratinardo *(CTA Planning)*, Leah Mooney *(CTA Planning),* & Mandi Jennings *(RLE Program Management Team)*

Group 2
Moderator: Mark Payne *(TSD Plan)*
RLE Project Members: Sonali Tandon *(CTA Planning)* & Michael Schuch *(RLE Program Management Team)*

Group 3
Moderator: Teresa Fourcher *(TSD Plan)*
RLE Project Members: Ammar Elmajdoub *(CTA Planning)* & Jenn Pisano *(TSD Plan)*

Group 4
Moderator: Christine Carlyle *(TSD Plan)*
RLE Project Members: Jasmine Gunn *(Chicago Department of Planning and Development)* & Jackie Davis *(TSD Plan)*

Group 5
Moderator: Barbara Stubblefield *(RLE Program Management Team)*
RLE Project Members: Drew Williams-Clark *(TSD Plan)* & Kristen Robinson *(RLE Program Management Team)*

Group 6
Moderator: Jacob Peters *(TSD Plan)*
RLE Project Members: Patrick Dunn *(RLE Program Management Team)* & Elbert Whitfield *(TSD Plan)*

Breakout Session Questions & Group Responses

The following documents a combination of attendees' verbatim and paraphrased responses provided by the breakout group moderators. Individual breakout groups may not have responses listed for each question due to groups spending more time discussing other questions or moderators not receiving any feedback from attendees on those prompts.

Question 1: What are three words you would use to describe your vision for the neighborhood?

- **Group 1 Responses:**
  - Access to jobs
  - Positive economic impact
  - Positive identity for the neighborhood
- **Group 2 Responses:**
  - Comparable to north side
  - Economic vitality
  - Revitalization of greater Roseland community
  - Vibrancy
  - Community feeling
  - Families
- **Group 4 Responses:**
  - Vibrant, community, family
  - Aesthetically pleasing and economically productive
  - Layered, hidden, connected
  - Safe, family-oriented, vibrant
- **Group 5 Responses:**
  - Food desert, greater access to quality food, grocery shopping, and safe/quality recreational activities for children
  - Quality education, bike trails, senior housing—we have a lot of seniors in the community
  - Lively, growth-oriented, diverse
  - Safe, vibrant, walkable
- **Group 6 Reponses:**
  - Need employment opportunities
  - Growth, restoration, access
  - Healthy, safe, prosperous

Q2: What is important for us to understand about your community?

- **Group 1 Response:**
  - The new stop may bring safety and security concerns to the neighborhood. I would like to have more intentional conversations with CTA about Agape

parking concerns. Agape Center would be happy to be involved and to be a resource within the community.

- **Group 2 Responses:**
    - Greater Roseland was once a thriving community. Hopefully, TSD will bring the community beyond where it was.
    - A lot of seniors in this community
    - A lot of younger people living here due to the lack of affordable rentals.
- **Group 3 Responses:**
    - Safety is a major concern, especially around the medical district.
    - Safety concerns, due to vacant buildings, is a deterrent.
    - There are too many vacant lots and vacant houses which can be used as an opportunity for redevelopment.
    - New development and renovations should not meet code minimums but should be developed to a higher standard.
    - The community is supportive of development and there needs to be more community vision integrated into the plans. As a matter of fact, the 2001 TIF was a result of a community led initiative that started in 1997.
    - The goal is to bring people back to the community and provide them with the amenities they need so they don't have to go outside of it to access basic services and shopping.
    - Property lots are larger than average and provide an opportunity for developing larger homes.
    - The community does not need any more standalone subsidized housing; however mixed-income development would be welcomed.
    - 103rd and 111th Streets used to be strong commercial corridors
- **Group 4 Responses:**
    - Lots of seniors in the neighborhood and young families with nothing for them to do
    - They have good educational institutions that need to be promoted by the city to attract more students.
    - 111th Street is a major corridor that can link to Pullman Monument.
    - Has seen the deterioration of the neighborhood over time
    - Lots of seniors – need outreach for programming given that they don't have all the technology and resources for information if they don't have young people in their lives to show them (especially since they are scared to come out of their houses).
    - Nothing to do in the community
    - Roseland had its own theater 20-30 years ago.
- **Group 5 Responses:**
    - It's important for the team to understand we need jobs and economic development. There are businesses here, but only fast food and we need healthier food options, to that point. We have a lot of young people who

  - aren't working due to the lack of jobs. Safety is also a big concern; I don't feel safe walking in my community.
  - A lot of the small businesses are owned by foreigners who don't have an investment in our community so there's no economic responsibility within our community.
  - There has been historic disparity that's continuous and is common to other inner-city communities. There's also historic pride for those families who purchased their first homes in this community. Roseland means a community of hope for those to come back. People need to understand we've been overlooked and cast in a negative shadow.
  - Safety is a concern, there are a lot of people who hang around the corners and it's not safe for seniors to walk alone or kids going to school. We're not able to enjoy the community because of this concern and need more protective services.
- **Group 6 Responses:**
  - A lot of returning citizens (formerly incarcerated individuals), single parents, homeless, and others that are looking for employment opportunities.
  - Residents are worried about not being able to park right outside their homes due to concerns about walking home at night.
  - This area has some of the highest rates of unemployment and returning citizens of any zip code. Workforce development and job growth have to go hand in hand.
  - Safety improvements have to precede the start of RLE service, otherwise ridership will be depressed by those who don't feel comfortable walking to the station. Safety improvements are tied to economic opportunities for young residents.

Q3: What are your community's greatest assets? What is missing?

- **Group 1 Responses:**
  - Missing workforce plans – the community could get training to qualify our residents for the jobs (Union training)
  - The neighborhood is unique and those raised in the area claim their elementary school not their high schools as their geography.
  - Generational ownership in the area ("lifers") and the unique history of a formerly Dutch neighborhood.
  - CTA should consider making the stations more accessible for the deaf/hard of hearing. If there is a re-route or a train is delayed, they often do not hear the messages that are being broadcast over the intercom. CTA should consider having visuals available for re-route maps and any announcements.

- **Group 2 Responses:**
    - Missing is that young people do not know what resources to utilize to establish income or what resources are available to them. The opportunities are so spread out, and transportation costs have gone up so much it may be hard to access all of those opportunities.
    - The people are the greatest assets. Responsibility and sense of community is not translated to the next generation.
    - What is missing is the community's involvement. People hope that during this transition that there is a way to educate young people on how to participate economically in this transition. There may be a level of dissatisfaction without this.
- **Group 3 Responses:**
    - The medical district is an asset.
    - There is a desire for more commercial development on Michigan Avenue.
    - Small clinics could be moved off Michigan Avenue and into the medical district.
    - New restaurants and grocery stores are needed.
    - Schools need the newer technology and resources that are missing in Roseland but are in other communities.
    - New construction is welcome
    - Multi-unit building development and single-family homes are both needed.
    - There is enough senior housing
    - Pullman and Halsted have national retailers, Michigan Avenue retail development is different – desire to retain the existing small businesses and to bring more local business, such as men's clothing stores and restaurants.
- **Group 4 Responses:**
    - Need a Boys & Girls Club
    - Would love activities like arts & crafts and provide transit to those activities
    - Need a Department of Aging for the community
    - Need affordable activities for young people like the Kroc Center in Morgan Park on 115th Street which is hard to get to from Roseland.
    - Desire for mom-and-pop stores, grocery stores, affordable housing, and single-family homes
    - Only positive assets are the Major Taylor Bike Trail and Monument Park
    - Want walkable mom-and-pop stores
    - An asset is we have lots of riders
    - Missing reliable, efficient, and quick transportation to cut commute time
    - Assets are people and potential for growth
- **Group 5 Responses:**
    - Our individual homeowners take a lot of pride in the neighborhood. We're missing block clubs; some areas have them but not all. They act as a resource to be able to come together and help residents in need.

  - We have lots of homes in the community as opposed to multi-residential buildings. We're missing recreational opportunities and walking trails. I see trails on the north side but not the south. There are a lot of health issues such as obesity due to the lack of resources. Economic development is also missing.
  - Diversity of people within the neighborhood, ranging in ages. Different demographics of people allow for us to come together and develop great ideas. To echo other's thoughts, we need economic development and jobs that are sustainable for all class/community groups, with or without degrees, such as jobs in the trades because a lot of people aren't working.
  - An asset is our civic and religious institutions. People should have institution options in the neighborhood where they live and serve. Concerned there's been trades missing for some time in our community. Not everyone is cut out to be behind a desk. There are a lot of businesses in the neighborhood that don't last long. People need plumbers, electricians, etc. and I shouldn't have to go outside of my community to hire those services.
- **Group 6 Responses:**
  - Need permit parking as part of station implementation
  - Safe street design and safety personnel on main streets for pedestrians traveling to/from transit
  - Jobs pipeline is needed for non-union jobs as well as integration into the US Employment Plan and existing regional workforce development initiatives. Like those that Rev. Calloway and Dallas Gordon are involved with for T.R.E.A.D., Washington Heights Workforce Center, and Members of Far South Chicago Coalition. As well as the asset of the Rock Enterprises Development Corporation.
  - Food, transit, and jobs desert. The other two deserts need to be addressed for this to be as successful as possible.
  - Greatest asset are the people in the community, especially unlocked potential of the youth.
  - Need the reduce commute times this project will bring but also need to start work before the service starts so that community is prepared for and engaged in change rather than displaced by it. Especially related to safety and employment.
  - Missing greater access to education and entertainment that exists in other communities, as well as increased spending within Roseland by visitors from other communities that could restore retail corridors.
  - Biggest assets are young people and young leaders in additional to the rich spiritual heritage and one of the highest concentrations of houses of worship in the city.
  - The Rock Enterprises and Development (T.R.E.A.D) Corporation is an asset.

Q4: How do you see the new station benefitting your community?

- **Group 1 Responses:**
    - Bringing more positive identity for the neighborhood because today it is not all positive as there are issues like rioting and looting
    - Having better access will help those without a car
    - Would the 111th bus become a 24-hour bus?
        - *Project team response:* CTA is looking at bus service plans but not at that level of detail yet
- **Group 2 Responses:**
    - It will give people better opportunities.
    - Development. National brand developers will note this is a major transit spot and will likely open up a business here. Entire corridor can attest national brand stores again, which used to be on Michigan Avenue. The whole project (all 5.6 miles) will transform greater Roseland area and help revitalize other areas.
    - It will get people back into the community via home ownership. This will also enable people to buy property and eventually increase property values.
    - Would like to see the neighborhood voted dry and get rid of liquor stores and have landlords maintain quality of tenets.
- **Group 3 Responses:**
    - New job development
    - Increased safety
    - Opportunity for access to jobs outside of the community to earn a living wage
    - Access to transportation, the hospital, and shopping
    - The community can look to the changes made in Bronzeville as an example for the Far South Side community – bringing new homes and education opportunities within their own neighborhoods.
    - Goal to save this district because it is the only commercial/shopping district in the community from 111th to 115th Streets, as well as on 111th Street.
- **Group 4 Responses:**
    - Ultimately want to walk in freedom
    - Halsted (from 110th – 199th) is a major corridor with lots of economic resources and we need to connect it to the station.
    - Adding this station will allow for other stops along people's commutes as well as shopping.
    - Not sure, concerned about safety and believe adding more jobs and education could help with that.
    - New station will bring new people to the neighborhood and more home ownership.
    - Desire it to be a safe space, like a village

- **Group 5 Responses:**
  - All analysis that has been said about transit station – I've lived in the neighborhood for 40 years and we've been waiting for this to happen. Eminent domain is going to affect people which scares me, and some people will miss out so to speak.
  - Aesthetically. Allowing job training and opportunities for people to be trained and things that they're going to be utilizing in the new station. I would love to see those jobs made available with priority to community residents.
  - Young urban professionals will want to move out this way because it's easy access to city jobs which would allow the community to become mixed-income and businesses would want to develop/be established in our community. Almost a Soho economic development if you will, because our area has been so overlooked (between Halsted and Michigan).
  - Save money for peoples' commutes, won't have to take cars to 95th and then the subway. It would be more convenient.
  - Strong emphasis on economic development. More diverse and options for economic development. That the project will produce what they're saying it will.
- **Group 6 Responses:**
  - Greater connection to jobs not just downtown but throughout the city.
  - Each station can be the economic engine and cultural node expressing the soul of the neighborhood through jobs, as well as art.
  - If the 111 & 111A buses were merged then 111th could be a healthcare node along a corridor between the Blue Cross Blue Shield locations at Pullman & Marshfield Plaza, as well as the Roseland Medical District.
  - Provide greater access to the east/west bus routes on main streets in the area
  - This project can create a healthier community if it means growth in food access, a safer neighborhood through more eyes on the street, and a more prosperous community not only through increased access to jobs but also jobs here that can be accessed from other neighborhoods.
  - Greater access to educational services and entertainment amenities. It can also increase visitation to Roseland from other Chicago community areas that currently don't have easy access. Improvements in crime mitigation will also hopefully precede the start of RLE service.

Moving Ahead to a Better Red
Red Line Extension

Red Line Extension 103rd Street Station Virtual Meeting Minutes

Tuesday, February 9, 2021
6:00 PM – 7:30 PM
via Zoom & Facebook Live

Meeting Presenters

Marlise Fratinardo, *Chicago Transit Authority (CTA) Planning*
Ammar Elmajdoub, *Chicago Transit Authority (CTA) Planning*
Sonali Tandon, *Chicago Transit Authority (CTA) Planning*
Barbara Stubblefield, *Red Line Extension Program Management Team*
Melody Carvajal, *Red Line Extension Program Management Team*
Teresa Fourcher, *Transit-Supportive Development (TSD) Plan*
Mark Payne, *Transit-Supportive Development (TSD) Plan*

Attendees

Public via Zoom: 68
CTA staff, support and consultants via Zoom: 44
Facebook Live: 8
Total public: ~76

Meeting Materials

Presentation is attached.

Summary

CTA hosted the 103rd Street Station virtual community meeting on Tuesday, February 9, 2021. The 103rd Street Station meeting was the third of a series of meetings for the four proposed station areas along the Red Line Extension corridor. The meeting was held through Zoom and also broadcast on the project's Facebook page. Captioning as well as American Sign Language and Spanish interpretation were available for meeting attendees, including during breakout rooms. A comment with the Zoom meeting information was also posted on the Facebook Live stream so individuals could join to participate in the interactive presentation portions and receive any required accommodations. Attendees were asked to register in advance and were provided with the link and meeting ID to join via Zoom. Registration was available on the project's interactive engagement website, transitchicago.com/RLE/engage, which is hosted on the Bang the Table (BTT) platform. The engagement website provides general information about the RLE Project and Transit-Supportive Development (TSD) Plan plus interactive tools such as an Ideas Wall, project survey, and project map to engage the public and solicit their feedback regarding the project.

Ms. Stubblefield started off the presentation by covering the agenda and presenters. Ms. Stubblefield also covered how attendees can ask questions throughout the meeting. Questions and comments submitted during the meeting are documented on pages 3-6.

Ms. Fratinardo led the group through the RLE Project overview, benefits, and recent progress. Ms. Stubblefield and Ms. Fratinardo asked attendees to respond to three direct questions via chat; responses to these questions are documented on pages 6-7. Next, Mr. Elmajdoub presented engagement opportunities, including the engagement website, transitchicago.com/RLE/engage and recent public outreach efforts. Ms. Carvajal then shared information regarding potential property impacts and provided a variety of contact methods and resources for additional information and follow up. Ms. Tandon explained that there have been no major changes to the 103rd Street station since the Draft Environmental Impact Statement (EIS). Ms. Tandon described some of the resource analyses underway for the Supplemental Environmental Assessment (EA) (traffic and access, historic and cultural resources, noise and vibration, visual and aesthetics, and public parks and recreation area) for which impacts may be of particular interest in relation to the 103rd Street station.

Next, Ms. Fourcher presented on the TSD Plan, covering the overview, timeline, and current as well as past aligned planning efforts. Ms. Fourcher also shared information regarding community assets/resources and the 103rd Street station corridor existing land use areas in relation to the TSD Plan. After, Mr. Payne led a series of interactive polling questions to gauge participants' ideas and recommendations for future development along the Red Line Extension corridor (questions and polling results are documented on pages 7-9 of this summary). Mr. Payne read the polling questions and answers out loud and they were also displayed on individual presentation slides for attendees to see. Following the interactive polling questions, attendees were separated into small groups for a breakout session led by one to two other project team members. On average, there were five to six attendees in each breakout group. A set of general questions were displayed on a presentation slide to solicit input and encourage discussions. Community members were offered the opportunity to share their ideas on the vision for the community to inform the TSD effort. Breakout summaries were compiled for each group and the compilations of comments received are documented on pages 10-17.

After approximately 20 minutes, the breakout session concluded and attendees were brought back from individual breakout groups into one large group to finish the meeting. Each breakout group moderator presented a brief summary of their group's discussion and common ideas that were shared among group participants. Next, Mr. Elmajdoub presented information regarding the RLE interactive engagement website, opportunities to stay involved, how to receive project updates, ways to contact the project team, and details regarding entry for the engagement site Visa gift card sweepstakes. Ms. Stubblefield then concluded the meeting by thanking all attendees for their participation, providing information for the final upcoming station virtual meeting and methods, both digital and non-digital, to contact the project team with questions.

Attendee Questions & Comments – Zoom Chat Feedback

Unless otherwise noted, the following questions, comments, and responses documents the direct meeting chat transcription. Responses were provided in the chat by the RLE Project team for all attendees who joined the meeting via Zoom to see. Attendees who joined via Facebook Live or phone did not have visibility of the Zoom chat questions, comments, and responses.

- **Question 1: Will all the new stations be able to handle 10 car trains?**
  - **Response 1:** Thank you for your question, Allan! Yes, all four proposed RLE stations will be designed to accommodate 10-car trains.
- **Q2: Will the 103rd Street bus still terminate at 95th Street after the new station opens?**
  - **R2:** Thanks for the question, Michael! Since the CTA is building stations and tracks that have never existed previously, CTA will need to determine how different bus routes and transportation details would be coordinated and enhanced to meet the needs that would arise with the new station locations. CTA is in the process of developing a service plan for the RLE Project, which may include adjustments to existing bus routes to complement the new high-capacity transit service.
- **Q3: Related to Michael's question, it would be great if the 103rd Street bus was one continuous route after 103rd Street station is open.**
  - **R3:** Thanks for your suggestion, Anne! We will consider that when developing the service plan.
- **Q4**: **So, the track is going to cross above the Wentworth bridge at 99th? How high up is that?**
  - **R4:** Hi Hillary - Yes, the RLE track would cross over Wentworth Avenue north of 99th Street. The project is currently being designed and we do not have an exact structure height defined quite yet.
- **Q5: Will the project be built in phases?**
  - Thanks for the question, Allan. CTA is planning to build the RLE as one project.
- **Q6: What will happen to the trees and park area along Eggleston, between the road and the current freight tracks? Are you going to tear it all out?**
  - **R6:** Thanks for your question, Hillary! CTA does anticipate needing to remove some trees to make room for the RLE Project. A tree survey is being conducted that will give us a better idea of the impacts to trees along Eggleston Avenue, as well as other areas of the project.
    - **Follow up comment from same attendee**: But it will not be "some" trees, you will take out the entire historical avenue of trees.
- **Q7: Will construction of the extension begin on 95th? Are there any plans to improve conditions at the 95th station and its surroundings?** *(Question 7 and*

responses were communicated in Spanish during the meeting; this description is an English translation of that exchange)

  - **R7a:** Thank you for your question, Roberto. Please accept our apologies but we are unable to answer questions in Spanish during this live meeting, however, please email us at RedExtension@transitchicago.com and we will respond to you as soon as possible.
    - **Follow up comment from same attendee**: Thanks for answering. I will use the email. I invite you to continue working so that Spanish speakers can fully participate and interact in real time.
  - **R7b:** Roberto, thanks for the invitation! We continue to make efforts to better serve all communities. For the 95th station area, CTA is currently involved in several preliminary discussions about how to best support development in that area.
- **Q8: Will there be permit parking in the area?**
  - **R8:** Thank you for your question, Cheena. Per Chicago Municipal Code, residential parking zones are introduced by Aldermen and established by City Council. To be eligible, the proposed parking zone must meet certain requirements including demonstration of need as determined by a parking study, among other things. CTA will be coordinating with the Chicago Department of Transportation (CDOT) on issues related to parking availability.
- **Q9: How much will the project cost and what will be the federal share?**
  - **R9:** Hi Allan - CTA estimates that the RLE Project will cost approximately $2.3 billion. We anticipate a Federal share of approximately 49 percent.
- **Q10: How does permit parking work for our family members? There are a lot of seniors whose children visit regularly to check on parents.**
  - **R10:** Park & ride facilities are planned at each of the four RLE stations. Using travel demand modeling, the CTA has estimates of the parking demand needed along the Preferred Alignment. The CTA is currently conducting additional analysis and review of parking needs near stations and as part of the ongoing project development and engineering studies.
- **Q11: Awesome! Transportation should be affordable, accessible, equitable and seamless. Rapid transit provides an opportunity for people to get to work and return home in a timely fashion allowing families to have more time to spend with their children/family.**
- **Q12: Can this be done in tangent with the project or will we have to wait?**
  - *No response provided during the meeting.*
- **Q13: Will the extension lead to more frequent train service south of the loop? It was a common joke with my peers as we watched a ratio of almost 3:1 trains from the north to the loop in the morning and the reverse in the evenings at Lawrence and Wilson stations. In other words, we waited three times as long as commuters travelling in the opposite direction from us.**

The lack of equity was very apparent, especially when we looked at the racial demographic difference seen with the service.

  - **R13:** Thanks for your comment, Dallas. The RLE service plan is still under development. CTA is committed to promoting equity and environmental justice throughout our service area and the RLE Project is a major component of CTA's efforts to improve transit service on the South Side of Chicago.

- **Q14: Will the trains be cleaner and safer than they are now? I am a shift worker, commuting at 5:30am, and I honestly cannot remember the last time I rode a train that was not dirty and full of people smoking. It has gotten a lot worse since the pandemic, nobody seems to care.**
  - **R14:** Thank you for your comment, Hillary. The project-specific safety and security plan for the Red Line Extension is being developed during Preliminary Engineering, and security measures will be consistent with that of the entire CTA system. A number of steps have been taken to improve your safety and security while on CTA. To learn more about these steps, please visit: transitchicago.com/security.
- **Q15: I understand about direct property impact, what about surrounding area... within a one or two block radius?**
- **Q16: Agree with Cheena about the property impact. Instead of a park full of trees. Eggleston residents will have noise and vibration every 10 minutes or so, and the trees will be replaced by a metal structure.**
  - **R15 & 16:** Thanks for your questions and comments, Cheena and Hillary. You may want to check out "Transit Means Business", a study by the Metropolitan Planning Council about the impacts of transit on properties in the surrounding areas: chi.streetsblog.org/2018/11/12/mpc-study-highlights-importance-of-transit-for-attracting-businesses-employees.
- **Q17: What are the right now economic and employment opportunities for those that live in the impacted areas?**
  - **R17:** Hi Dallas - The RLE workforce development plan is under development and will be coordinated with CTA-wide plans to increase workforce and career opportunities. In the meantime, please check out CTA's Workforce Opportunities page to see what's available now: transitchicago.com/rpm/workforce-opportunities/.
    - **Follow up comment from same attendee**: Thank you for your response. I am pleased to see the Workforce Innovation and Opportunity Act (WIOA) reference. We are one of the local WIOA locations in the community. Even with all of our partners, there is a tremendous need to be able to provide our services. Hopefully, this will lead to increased capacity to serve.
- **Q18: Top was local food source** *(in reference to an accidental omission in reporting the top polling results for polling question 3)*

- **Q19: By a lot! Makes me think of possible food deserts in the area** *(in reference to above correction regarding the top polling results for polling question 3)*
- **Q20: Agreed, the food kiosk and farmers market were 82 percent. Why did they ignore that?***(in reference to an accidental omission in reporting the top polling results for polling question 3)*
    - **R18-20:** Thank you for catching that, Rev. Calloway. We caught that as well! Mark [Payne] must have forgotten to scroll all the way through the options as he was reading. The actual response rates will be reflected in our summary of the meeting.
- **Q21: I did not see STEM or tech on that list** *(in reference to response options for question polling question 7)*
- **Q22: Re: Ask Sign Language Interpreter [to] remove label -- the interpreter's hands are blocked. I have sign language skills. Thank you. D. L. Truss. Red Line Extension Coalition.**
    - **R22:** Thanks, D.L.! We will work on that for our next meetings!
- **Q23: On 100th Street [where] is the train tracks? Will [it] be in the park?**
    - *Question identified after the meeting (without question marks) upon review of the transcript. Question was asked and addressed verbally in a breakout group and commenter planned to send email to RedExtension@transitchicago.com to ensure it was received.*

Presentation Engagement Questions – Zoom Chat Feedback

These questions were posed by the presenters during the large group presentation. The following documents the attendee responses that were typed in the Zoom chat.

- **Question 1: What neighborhood do you reside in?** *(Responses listed in order of most common to least)*
    - **Responses 1:**
        - Roseland
        - Rosemoor
        - Washington Heights
        - Fernwood
        - West Pullman
        - Beverly
        - West Chesterfield

- **Q2: What is your favorite CTA Station and what about that station do you like most?**
    - **R2:**
        - Cermak to 22nd Street is well lit
        - It is a tie between Morgan (Pink and Green lines) and Cermak (Green Line). I appreciate the accessibility and views.
        - No real favorite. The Wilson station redesign was done nicely.

        - I am near 95th station, it is convenient
        - I like area by IIT, the covered dome
        - Easy accessibility, protection from the weather, good wayfinding at Washington/Wabash
        - Jackson Red Line because there are always musicians (*This comment is an English translation of a response that was communicated in Spanish)*
        - The new Belmont Blue Line, cool design
        - Lake, very airy and big
        - I do not have a favorite as I only use the Red Line from Roosevelt to 95th and they are not nice. I think there are some nicer stations on the other lines, but these are all dirty and lacking security.

- **Q3: How will the Red Line Extension benefit you and your neighborhood?**
    - **R3:**
        - Easier access for bike/train combo trips
        - More access to jobs
        - Equity and connection with the whole city (*This comment is an English translation of a response that was communicated in Spanish)*
        - Building a wonderful workforce from the communities
        - Jobs
        - Faster to get downtown and other connecting CTA services
        - Quicker access than going to 95th via bus
        - Honestly, not seeing it as a benefit. Property value and safety concerns
        - I live at 102nd, so it would be super easy to go north to south for baseball games and downtown using one train
        - Access to jobs and the loop. I used to work on the northside but live in the south suburbs. I had to take both Metra and CTA to get to work. Extending to 130th would change that commute.
        - I live right by the 103rd site, so it would reduce the need to get to 95th.

Presentation Polling Results

Attendees joining the meeting through Zoom could answer the poll in real time. Polling was not available to attendees who joined the meeting through Facebook Live or by phone. Those attendees were informed that polling questions were available on the RLE engagement website as an alternate way to participate and provide their responses. Polling questions were typically open for more than 45 seconds.

Response Options	Votes Received
1. How did you learn about tonight's meeting? *Total Attendees Responding to Question: 23*	
Email from CTA	**14**
Facebook, Twitter or Instagram	**3**
Postcard in the mail	**3**
Word of mouth	2
Flyer	1
2. What would be your mode of transportation to the 103rd Street station? *Total Attendees Responding to Question: 26*	
Drive	**11**
Walk	**8**
Bike	**3**
Bus	2
Other	2
3. What kinds of open space or public places would you like more of? (Pick up to 3) *Total Attendees Responding to Question: 28*	
Farmers market or local food kiosk	**23**
Walking and biking trails	**13**
Performance or public art spaces	**11**
Increased access and recreational opportunities	**11**
Plazas and other gathering spaces	10
Spaces dedicated to nature and ecological restoration	10
Places for exercise	5
Sports and active recreation	4
4. What are the community's greatest strengths from a development perspective? (Pick up to 3) *Total Attendees Responding to Question: 27*	
Single-family housing	**17**
Affordable housing	**12**
Parks	**10**
Schools	7
Shopping	7
Civic and religious institutions	6
Historic preservation	6
Senior housing	6
Jobs	4
Transit	2
5. What are the community's greatest needs from a development perspective? (Pick up to 3) *Total Attendees Responding to Question: 29*	
Jobs	**22**
Shopping	**18**
Affordable housing	**13**
Transit	11
Single-family housing	8
Senior housing	6
Historic preservation	3
Schools	3
Parks	2

Civic and religious institutions	1
6. What types of businesses would you like to see? (Pick up to 3) *Total Attendees Responding to Question: 28*	
Grocery stores	**22**
Locally owned cafés	**16**
Medical, health & wellness services	**14**
Pharmacy	8
Locally owned boutiques	7
National chain restaurants	6
Professional services	4
Clothing	2
Home improvement stores	2
Personal services	1
7. What types of jobs are needed nearby? (Pick up to 3) *Total Attendees Responding to Question: 28*	
Healthcare	**14**
Manufacturing	**12**
Construction	**11**
Office and administrative support	9
Professional services	9
Maintenance and utilities	9
Retail and restaurants	9
Public sector	7
Transportation and warehousing	4
8. What type of housing is most needed? (Pick up to 3) *Total Attendees Responding to Question: 29*	
Affordable housing	**22**
Home ownership	**20**
Mixed-Income	**18**
Senior housing	12
Rental	8
Veterans housing	7
9. What scale of housing is desired? (Pick up to 3) *Total Attendees Responding to Question: 28*	
Single-family	**20**
Two-flats and three-flats	**20**
Townhomes	**17**
Small four-to-six-unit building	11
Multi-family housing with ground floor commercial	11
Mid-rise multi-family (up to 8 stories)	4

Breakout Session Groups

Group 1
Moderator: Teresa Fourcher *(TSD Plan)*
RLE Project Members: Marlise Fratinardo *(CTA Planning)* & Sarah Wilson *(TSD Plan)*

Group 2
Moderator: Mark Payne *(TSD Plan)*

RLE Project Members: Sonali Tandon *(CTA Planning)* & Michael Schuch *(RLE Program Management Team)*

Group 3
Moderator: Erin Cabonargi *(TSD Plan)*
RLE Project Members: Ammar Elmajdoub *(CTA Planning)*, Jenn Pisano *(TSD Plan)*, & Leah Mooney *(CTA Planning)*

Group 4
Moderator: Christine Carlyle *(TSD Plan)*
RLE Project Members: Jasmine Gunn *(Chicago Department of Planning and Development)* & Christen Hayes *(TSD Plan)*

Group 5
Moderator: Sarah Ware *(TSD Plan)*
RLE Project Members: Barbara Stubblefield *(RLE Program Management Team)* & Kristen Robinson *(RLE Program Management Team)*

Group 6
Moderator: Jacob Peters *(TSD Plan)*
RLE Project Members: Patrick Dunn *(RLE Program Management Team)* & Elbert Whitfield *(TSD Plan)*

Breakout Session Questions & Group Responses

The following documents a combination of attendees' responses verbatim and paraphrased responses provided by the breakout group moderators. Individual breakout groups may not have responses listed for each question due to groups spending more time discussing other questions or moderators not receiving any feedback from attendees on those prompts.

Question 1: What are three words you would use to describe your vision for the neighborhood?

- **Group 1 Responses:**
    - Robust, vibrant, transformed
    - Transformed is a good word. Beauty. Excitement. Envision it with stores, jobs, right now everything looks ugly and closed. There's lots of vacant lots and want to see more development, more beautiful and aesthetically pleasing amenities.
    - Roseland was considered a jewel at one time, everyone wanted to be in Roseland. It can be that again. Just need to clean up a little bit. A group member highlighted a new campaign/effort, Roses for Roseland. Conversations with an artist sparked an idea about transforming vacant lots and creating an environment that would

create positive loitering for the community. Imagine a rose garden where people could sit and have a smoothie, a pop-up kiosk, fresh produce, sip-and-savor type of environment. Just enjoy the ambiance of the rose garden.

- **Group 2 Responses:**
    - Progressive
    - Energized
    - Engaging
    - Maintained
    - Growth
    - Universal (development without displacement)
    - Job opportunities
    - Renewal of greatness of Greater Roseland area
- **Group 3 Responses:**
    - Energetic, active, cohesive
    - Placemaking by way of activities - having a central place, like a plaza for example that everyone knows exists and it fosters community interaction and connections.
- **Group 4 Responses:**
    - Family-friendly community, used to have lots of activities for families and children, with decent schools and parent participation. I would like to see those things come back!
    - 103rd Street corridor, especially in Eggleston area, is mostly private single-family homes. When envisioning what to go around 103rd Street, not sure what considered enhancements would include besides being more accessible to nearby residents to get around in the city.
- **Group 5 Responses:**
    - Safe, beautiful, friendly
    - Safety is a top concern. 103rd needs a lot of regeneration. Riots took out local businesses, many of which haven't recovered. The area needs confidence, investment, support, and jobs.
- **Group 6 Responses:**
    - Developed, safe, nurturing
    - Better transportation, easier access
    - True community input (on development). It would be great if through the TSD Study engagement process we can reach an agreement between community stakeholders and their municipal representatives/aldermen.
    - Economic development, new business (especially along 103rd Street).

Q2: What is important for us to understand about your community?

- **Group 1 Responses:**
    - I do know that the center would be closer to 111th street and would be nice to have some jobs closer to the area. We need a lot to make 103rd and 111th Streets better.

  - In relation to the density of the residential area, the preference is to keep it small, two to three flats. I don't want to see any real large buildings, unless they're more senior-oriented. I'm more comfortable with smaller size properties since it is already residential.
- **Group 2 Responses:**
  - A lot of strong hard-working people in this community. With new amenities coming into the area, would like to take advantage for those in this area (prop up the areas) with those already in the community (maintaining).
  - A lot of mixed generations in this area. Remember the economic development in the community will be something that keeps people engaged, but make sure seniors' lives are still relevant/engaging. Engage the entire community.
  - So much has been taken out of the community in regard to economic development. Instead, look to have locally owned business drive economy rather than outside (keep the flow of money in the community).
  - This project is a lot about the City of Chicago, not just the surrounding neighborhoods.
- **Group 3 Responses:**
  - COVID-19 has brought to light the disparities of the South Side neighborhoods. It has interrupted our lives forever. CTA stations can be used as leverage to help the South Side neighborhoods rebound from COVID-19.
  - Desires for growth and investments. This community has been denied resources to grow historically, such as economic and education resources. The community needs to see the changes coming so they can adapt properly and prepare for the development.
- **Group 4 Responses:**
  - Family-friendly! Long term residents now are older with children that have grown up and not returned. There are not many young families with children and would like to see more children and young families. Looking to bring the next generation of families to the area. Can raise a family here.
  - Roses for Roseland: I talked to an artist about a project which she put together a video for video to turn some of the vacant lots in Roseland into a rose and flower garden. The project aims to create community spaces with benches and pop-up kiosks with fresh food, produce and sip-and-savor amenities to enjoy the ambience of a rose garden in empty lot and strengthen the community.
  - Concerned about the location of the track and that parking space will be taken away and not be replaced.
  - Concerns about displacement from construction at the station

- **Group 5 Responses:**
    - Safety. I want to know the stations are safe. I'm a shift worker who regularly commutes at 5:30am and I wouldn't walk alone along that area right now (top end of 103rd Street). Will the stations be staffed? Will there be better lighting? It's a desert. There's a dollar store on one corner and a Hines on the other and then it's a desert.
    - I see the station bringing new jobs, but the area lacks guidance and a sense of security. We want to feel safe. The area has a lot of potential, but the lack of security and bad reputation scares people away.
- **Group 6 Responses:**
    - There is a lot of development needed on 103rd, particularly places for seniors, among others, to buy medical supplies along the corridor. There are very few lucrative businesses along the 103rd Street corridor.
    - Few communities of color have necessary and desired commercial establishments or cultural institutions within walking distance.
    - This is a food desert. There is no full-service grocery store in the area.

Q3: What are your community's greatest assets? What is missing?

- **Group 1 Responses:**
    - Greatest assets would be Gwendolyn Brooks [College Prep Academy] along 111th Street corridor and Palmer Park, which is a beautiful park. There are lots of historic buildings along Michigan Avenue. Preservation Chicago did a study and identified over 100 buildings that have historical significance. Placing historical markers that speak to the history of the properties. For example, even though Gately's department store is no longer there, a marker could be placed to detail its' story. We should draw tourists from Pullman who would find Michigan Avenue as a destination place.
    - We need more stores that you can go shopping at when you get off at the station. If you were to get off on 103rd right now, you'd have to go quite far to get to another store.
- **Group 2 Responses:**
    - The people are the greatest asset. There are a lot of skilled and talented individuals who are marginalized because of things that have happened in past.
    - What's missing is challenging employers to give these people a greater opportunity.
    - Faith-based churches are a great asset. Create comfort in community. I would like to see more economic development. Current options for businesses are not meeting people's needs. Establishments (like coffee shops) for people in the community to meet and converse.
- **Group 3 Responses:**
    - Public resources need to be deployed, such as INVEST South/West, to jumpstart the process of development. Overall, the community is not

  prepared for growth due to lack of existing resources for the community and small business owners.
  - Education system needs to be strengthened on the South Side.
  - Job creation for working class people in this community is needed. Services and jobs for the CTA stations themselves are desired. This is an opportunity for business development and individuals re-entering to the workforce. Livable wages are necessary. Long term careers are desired.
  - Spread the wealth and spread the risk within the community. RFP programs from CTA should break down the work into smaller workloads so that many community residents can participate in the work. For example, diverse prime consultants to help grow their businesses.
  - Education needs to be brought up to par. Eliminate disparities that exist; community kids on the South Side do not have the same quality of education as there are in other communities.
- **Group 4 Responses:**
  - Many of the storefronts near 103rd are churches now, not much retail, shops, or cafés.
  - Main issue in Roseland is the vacant lots. The greatest asset is the people.
  - Strong block clubs in greater Roseland area and strong communities are an asset. Another asset is great educational opportunities, students can go from kindergarten to Ph.D. due to the good schools in the area.
  - Not as friendly to retail or shopping centers due to it being a mostly residential area. The parking at station is a great asset.
  - Gwendolyn Brooks [College Prep Academy] at 111th Street corridor and Palmer Park and many historic properties on Michigan Avenue corridor are assets.
- **Group 5 Responses:**
  - There's nothing here. No grocery store or retail. I have to go to 115th to get groceries. It comes down to confidence and investment in our community. If there was a grocery store or maybe a library for kids, entities like that would help bring people to the area.
  - Our community area lacks places for children to be kids. It's also missing something as simple as neighborly bonds and knowing who belongs where. An asset is quick access to the major highways going in all different directions.
- **Group 6 Responses:**
  - The people are the greatest asset. Also, Langston Hughes Elementary School and the accessible park/field that allows for special needs programming. There are lots of unused or underused buildings along the corridor like the CVS near Halsted Street that could be assets. Metropolitan Family Services is also a great community asset, though it is not within walking distance of the proposed station.

  - There are a few good small businesses located east of Michigan Avenue that are assets, but there is almost nothing in the way of successful commercial development west of the Michigan Avenue corridor. Prior to the COVID-19 pandemic, there had been mention of some progress in the way of economic development at aldermanic meetings. That needs to continue and resume.

Q4: How do you see the new station benefitting your community?

- **Group 1 Responses:**
  - It'll be a faster commute with faster transit time and that's really important. Also, better connection to services. It takes such a long time to get to 95th Street.
  - Right on 103rd Street is a great opportunity for more mixed-use buildings, retail on the bottom level with affordable dwellings on the top level. Something where people, especially families, can get off the bus or train and go right into their buildings. A group member discussed the importance of people having access to fresh produce. For example, to potentially stop in the lobby of their building and get fresh produce and meat without having to go to a large grocery store or even a coffee shop. To have that amenity in the building where residents could sit and read the paper or meet with members of the community would be invaluable. Right now, the older men in the community sit at McDonald's, "kicking the breeze." The community needs a place where you can engage in conversation with your neighbor.
  - Importance of job readiness. People in the community need to know what types of jobs and skillsets CTA is going to require for this project. Programs that address this will transform the community.
- **Group 2 Responses:**
  - People getting off the train and using local parking spaces. Will locals feel as safe as they do now with larger influx of people coming through the community?
  - How will this affect local property value?
  - How will this impact individuals in the community?
- **Group 3 Responses:**
  - How can we leverage the real estate at these stations to educate and promote technology and learning? For example, at each new station, create a smaller scale 1871 type of space with technology training to promote STEM education. Younger community members can come to this staffed hub to learn programming and real skills. It could be a satellite of the City Colleges or Chicago State University. Virtual STEM learning could be used in parallel with this also.
  - Similar to Amazon Future Engineers Program (referenced commercial).
  - Ignite Technologies are doing a similar program.

- Google' has a similar program as well.
- Challenge to think differently about what the stations can be. These stations should not be a repeat of the 95th/Dan Ryan station. They need to be using their real estate differently so it can have an impact over the next 20 years.

- **Group 4 Responses:**
  - Close proximity to where I live and travel to Wrigley. Would love to cut travel time in half and take one train instead of a bus. The conduct of people at the station and on trains is concerning, sometimes I will walk home instead of riding the bus.
  - Too far west for frequent use but believe it will improve the neighborhood and provide options for folks living further out to get back and forth to the city.
  - The new station should feel like a safe haven. It needs good business neighbors that participate in the community by keeping properties and windows clean, sufficient lighting, community-oriented surveillance system (that keeps whole street safe), safety kiosks, and security guards.
  - Beautification or utilization of vacant lots would be beneficial.
  - Pushing for historic landmarking of the corridor and to put plaques on historic buildings. Preservation Chicago completed a study on Michigan Avenue corridor and over 106 buildings had historic presence.
  - More than 300,000 tourists come to the area to see Pullman and I want them to be able to find Michigan Avenue to enjoy the rich history there, as well.
  - One important thing for each new station is how would you "brand" each station, for example around the 95th Street people want to call it "University Village /95th." It would be beneficial if perception was strengthened by each station based on their assets and decided by the community how they want them to be branded, for example: 103rd – not sure yet what this station area would be; 111th – Roseland Medical District; Michigan Avenue – Magnificent Mile South; 130th Street – Culturally rich area, underground railroad, Beaubien Woods, port.
- **Group 5 Responses:**
  - Hard to picture. If there's no jobs, no one will live here. It would be nice to have a basic Aldi. Somewhere to buy fruits and vegetables. We only have a Walgreens, which lacks variety of fresh produce. A grocery store would work in favor of attracting new people to the area.
  - With jobs and shorter commutes. A small local grocery store would be great as long as it offers reasonable prices and a variety.
- **Group 6 Responses:**

  - Anything that would provide financial impact to the community, especially in the form of development. This would aid longtime homeowners. Creating a farmers market (as a regular recurring activity or getting a quality grocery store as a permanent fixture) would be helpful. You could use Block Park for this function or for cultural activities every weekend. Having this in proximity to the station could draw people from other parts of the city.
  - A benefit would be providing the neighborhood with a "shot in the arm," as far as economic development is concerned. We want to see the kind of development you see around stations in further north neighborhoods (e.g., grocery stores, pharmacies, restaurants).
  - A farmers market would be a great start.

Red Line Extension Michigan Avenue Station Virtual Meeting Minutes

Tuesday, February 16, 2021
6:00 PM – 7:30 PM
via Zoom & Facebook Live

Meeting Presenters

Marlise Fratinardo, *Chicago Transit Authority (CTA) Planning*
Ammar Elmajdoub, *Chicago Transit Authority (CTA) Planning*
Sonali Tandon, *Chicago Transit Authority (CTA) Planning*
Barbara Stubblefield, *Red Line Extension Program Management Team*
Melody Carvajal, *Red Line Extension Program Management Team*
Teresa Fourcher, *Transit-Supportive Development (TSD) Plan*
Mark Payne, *Transit-Supportive Development (TSD) Plan*

Attendees

Public via Zoom: 69
CTA staff, support and consultants via Zoom: 46
Facebook Live: 12
Total: ~81

Meeting Materials

Presentation is attached.

Summary

CTA hosted the Michigan Avenue Station virtual community meeting on Tuesday, February 16, 2021. The Michigan Avenue Station meeting was the final of a series of meetings for the four proposed station areas along the Red Line Extension corridor The meeting was held through Zoom and also broadcast on the project's Facebook page. Captioning as well as American Sign Language and Spanish interpretation were available for meeting attendees, including during breakout out rooms. A comment with the Zoom meeting information was also posted on the Facebook Live stream so individuals could join to participate in the interactive presentation portions and receive any required accommodations. Attendees were asked to register in advance and were provided with the link and meeting ID to join via Zoom. Registration was available on the project's interactive engagement website, transitchicago.com/RLE/engage, which is hosted on the Bang the Table (BTT) platform. The engagement website provides general information about the RLE Project and Transit-Supportive Development (TSD) Plan plus interactive tools such as an Ideas Wall, project survey, and project map to engage the public and solicit their feedback regarding the project.

Ms. Stubblefield started off the presentation by covering the agenda and presenters. Ms. Stubblefield also covered how attendees can ask questions throughout the meeting. Questions and comments submitted during the meeting are documented on pages 3-5.

Ms. Fratinardo led the group through the RLE Project overview, benefits, and recent progress. Ms. Fratinardo described the Michigan Avenue station concept plan. She explained that the development project that was planned for the vacant site north of Union Pacific tracks and Michigan Avenue station had not moved forward. Therefore, CTA has an opportunity to potentially locate the parking and bus facilities needed for the station to this northern site, which could attract more development in the future. Ms. Fratinardo stressed that CTA has not yet determined the final station layout and the location of parking and bus facilities. Ms. Stubblefield and Ms. Fratinardo asked attendees to respond to three direct questions via chat; responses to these questions are documented on pages 5-7.

Mr. Elmajdoub then presented engagement opportunities, including the engagement website transitchicago.com/RLE/engage and recent public outreach efforts. Next, Ms. Carvajal shared information regarding potential property impacts and provided a variety of contact methods and resources for additional information and follow up. Ms. Tandon then presented Environmental Review process updates and described some of the resource analyses being undertaken (traffic and access, noise and vibration, visual and aesthetics, and historic and cultural resources) for which impacts may be of particular interest in relation to the Michigan Avenue station. Ms. Tandon also reiterated CTA has not finalized the location of the parking structure as options are being considered for the north and the south side of the station. She also stated that there had been no other major changes to the Michigan Avenue station since the Draft Environmental Impact Statement (EIS).

Next, Ms. Fourcher presented on the TSD Plan, covering the overview, timeline, and current as well as past aligned planning efforts. Ms. Fourcher also shared information regarding community assets/resources and the Michigan Avenue corridor existing land use in relation to the TSD Plan. After, Mr. Payne led a series of interactive polling questions to gauge participants' ideas and recommendations for future development along the Red Line Extension corridor (questions and polling results are documented on pages 7-9 of this summary). Mr. Payne read the polling questions and answers out loud and they were also displayed on individual presentation slides for attendees to see. Following the interactive polling questions, attendees were separated into small groups for a breakout out session led by a moderator and one to two other project team members. On average, there were five to six attendees in each breakout group. A set of general questions were displayed on a presentation slide to solicit input and encourage discussions. Community members were offered the opportunity to share their ideas on the vision for the community to inform the TSD effort. Breakout summaries were compiled for each group and the compilations of comments received are documented on pages 10-17.

After approximately 20 minutes, the breakout session concluded and attendees were brought back from individual breakout groups into one large group to finish the meeting.

Each breakout group moderator presented a brief summary of their group's discussion and common ideas that were shared among group participants. Next, Mr. Elmajdoub presented information regarding the RLE interactive engagement website, opportunities to stay involved, including the upcoming INVEST South/West visioning meeting scheduled for February 23, 2021, how to receive project updates, and details regarding entry for the engagement website Visa gift card sweepstakes. Ms. Stubblefield then concluded the meeting by thanking all attendees for their participation and providing methods, both digital and non-digital, to contact the project team with questions.

Attendee Questions & Comments – Zoom Chat Feedback

Unless otherwise noted, the following questions, comments, and responses documents the direct meeting chat transcription. Responses were provided in the chat by the RLE Project team for all attendees who joined the meeting via Zoom to see. Attendees who joined via Facebook Live or phone did not have visibility of the Zoom chat questions, comments, and responses.

- **Question 1: What is the unemployment rate east and west?**
    - **Response 1:** Hi Robert - thank you for your question about unemployment rates in the project area. CTA is including demographic analysis, including employment, in our environmental review process. The unemployment rate in Roseland, for example, is 22.4 percent as of the most recent Chicago Metropolitan Agency for Planning (CMAP) Community Area Planning Data Snapshots. Other communities and community areas are available on their website: cmap.illinois.gov/data/community-snapshots.
- **Q2: Will there be a new TIF like the RPM project?**
    - **R2:** Thanks for your question, Allan. The CTA is pursuing a wide range of federal, state and local funding sources, including the Federal Transit Administration's (FTA) New Starts Capital Investment Grant (CIG) program. Local funds are also needed to "match" the federal New Starts funds as local funds demonstrate the commitment to the project. The CTA is considering a number of options at this time for this that include a special transit-only tax-increment financing district, authorized by the General Assembly in June 2016, which could provide a portion of the local funding needed for the RLE Project.
- **Q3: Was the 4-story parking building on the north or south side of the station?**
    - **R3:** Hi Rev. Calloway, thank you for your question. CTA has not yet determined the final location of the parking and bus facilities, whether north or south of the station. The identification of the preferred location for parking and bus facilities at Michigan Avenue station will depend on results from the environmental review process, as well as the Department of Planning and Development's (DPD) process of reacquiring property on the northern site.

- **Q4: How many properties will have to be purchased and demolished for the extension? Are there any properties of historical value that could be saved/relocated?**
    - **R4**: Hi Butler, thanks for the question! Property impacts are based on conceptual engineering and represent the maximum impacts. As of Summer 2020, there may be up to 61 residential building displacements, 11 of which are unoccupied, and six businesses may be affected. 158 private parcels of land and 226 total parcels of land may be affected. Property impacts will be confirmed in the Final Environmental Impact Statement (EIS) after more detailed conceptual design.
    - And as Sonali is mentioning now, the Historic and Cultural Resources analysis is ongoing as part of our environmental review.
- **Q5: Intergovernmental collaborations sound good and community sound like an add on. #TransitEquity**
    - *In reference to slide 10, Project Overview.*
- **Q6: First floor of parking garages should be retail**
    - *In reference to slide 12, Michigan Avenue Station Concept Plan.*
- **Q7: New stations should have a WOW factor and be a unique architecturally interesting station**
    - *In reference to chat question 3, Favorite CTA Station.*
- **Q8: What about fuel emissions?**
- **Q9: Also consider policing and parking permits for residents within a 3-4 block radius**
    - **R8 & R9:** Thanks for your question and comments, Rev. Calloway. Air Quality is one of the environmental resource categories being assessed as part of the Final EIS. Regarding policing and parking permits, CTA will be coordinating with the Chicago Department of Transportation (CDOT) on issues related to parking availability and with the Chicago Police Department on issues related to public safety.
- **Q10: Please consider a mall connected with grocery store, small business, medical facilities, dental and eye care. As for all stations, security should be a big part of the facilities. This would add to the business district that Roseland was famous for.**
    - *In reference to polling question 6.*
- **Q11: I want you to remember diversity when evaluating these institutions as social vendors. We need to eat off the beginning as well: ipce.uic.edu/wp-content/uploads/sites/Roseland-Civic-Engagement-Study.pdf**
    - **R11**: Thank you for providing your study, Robert!
        - **Participant Response:** Thanks, Mr. Douglas for that link to the study.
- **Q12: Plaza Hardware/True Value moved to 118th Street and Michigan Avenue.**
    - *In response to polling question 6.*

- **Q13: We also need the types of jobs that are far west of the city in our community. We transport to those other areas, because of the opportunity those communities have for us. Retail and restaurant jobs are great, but we also need more professional careers/jobs to be attracted to the area.**
    - **R13:** Thank you for your comment, Marcus. Are there any particular types of jobs you have in mind that you find in the far west side?
        - **Follow up comment from same attendee:** Professional services, medical (which the medical district will be able to help), hospitality careers
- **Q14: Live work and play and LEARN how to craft each and every one's future**
- **Q15: Happy to contribute years of commitment to communities focused on redevelopment**
    - **R14 & R15:** Thank you for your input, Diane!
- **Q16: These stations will become the hubs of the community just as schools were. This understanding needs to be incorporated... growth, community connectivity, in addition to education expansion.**
    - **R16:** Good point, Kenneth, thank you!
- **Q17: As we clean up and restore our business community with better choices, crime will decrease. People are a product of their environment, when you change the environment, the riff raff will leave because it will no longer be attractive to them.**
- **Q18: At some point we need a percentage probability that the RLE will occur.**
    - **R18:** Hi Kenneth - we understand the community wants assurance that the RLE Project will be built. While we can't put a percentage on it, the project entered the Project Development phase in December 2020. This commits CTA to completing 30 percent design and finalizing the environmental analysis within two years. This phase is a key step in securing federal funding, which is one of the major milestones needed to make the RLE Project a reality.
- **Q19: How do we get involved in some of the other initiatives that were presented?**
    - **R19:** Hi Marcus - check out tinyurl.com/RoselandRFP for the INVEST South/West Visioning Meeting. You can email us at redextension@transitchicago.com to ask about any specific initiatives!

Presentation Engagement Questions – Zoom Chat Feedback

These questions were posed by the presenters during the large group presentation. The following documents the attendee responses that were typed in the Zoom chat.

- **Question 1: What neighborhood do you reside in?** *(Responses listed in order of most common to least)*
    - **Responses 1:**

        - Roseland
        - Golden Gate
        - Washington Heights
        - West Pullman
        - Pullman
        - Morgan Park
        - South Shore
        - West Chesterfield
        - Scottsdale
        - Roseland Heights

- **Q2: How will the Red Line Extension benefit you and your neighborhood?**
    - **R2:**
        - Opportunities
        - Collaborative economics
        - Currently on Kensington there are a couple of family stores, we really hope that it will bring in more economy so other families can open more stores and boost economies.
        - Transportation brings more people to purchase housing, schools and need for more stores.
        - Economic/neighborhood vitality
        - Equitable TOD
        - Economic development, time savings in travel access to Chicago
        - Accessibility for all
        - Benefits/opportunities/upgrading the neighborhood
        - Employment and transportation
        - Chances to explore areas of Chicago without driving
        - It would allow everyone access to transportation and an investment in the community.
        - It will help develop Michigan Avenue retail.
        - Accessible jobs and central business districts and opportunities for economic development.
        - Rapid transit to resources
        - Transit access to downtown
        - Revitalization of Roseland
        - TOD possibilities
        - Renewal of Michigan Avenue
        - Amen! Renewal of south Michigan Avenue in Roseland! Let us reinvest in the historic buildings as part of these concepts and development!
        - More development in the NEAR future

- **Q3: What is your favorite CTA Station and what about that station do you like most?**
  - **R3:**
    - IIT station - unimposing, noise reducing tunnel
    - Morgan station - colors, non-concrete style, very modern
    - IIT station and 22nd Street station
    - Harold Washington Library
    - Garfield Park station
    - Merchandise Mart
    - Central Park on Pink Line
    - O'Hare- safety, warmth, ease, proximity
    - Ashland/Lake because of architecture
    - IIT station - great design and sound control
    - Logan Square station - so much to do once you emerge from the underground station! Parks, housing, retail and people!
    - I agree Merchandise Mart
    - Quincy through Wells, for its scale and historic qualities. Could some of the historic buildings be integrated into these plans?
    - O'Hare Terminal
    - Harold Washington. What I appreciate most is the accessibility and its' central location.
    - 35th and State Street station with the stores connected
    - My favorite station has been Fullerton for the helpful staff as well as having tier offices and people available for any assistance.

Presentation Polling Results

Attendees joining the meeting through Zoom could answer the poll in real time. Polling was not available to attendees who joined the meeting through Facebook Live or by phone. Those attendees were informed that polling questions were available on the RLE engagement website as an alternate way to participate and provide their responses. Polling questions were typically open for more than 45 seconds.

Response Options	**Votes Received**
1. How did you learn about tonight's meeting? *Total Attendees Responding to Question: 36*	
Email from CTA	21
Other	5 (1 stated "St. Anthony's Church pamphlet" in the chat)
Word of mouth	3
INVEST South/West roundtable	2
Facebook, Twitter or Instagram	1
Postcard in the mail	1 (plus two mail responses via chat)

2. What would be your mode of transportation to the Michigan Avenue station? *Total Attendees Responding to Question: 32*	
Drive	**15**
Walk	**8**
Bus	**4**
Train	3
Bike	2
3. What kinds of open space or public places would you like more of? (Pick up to 3) *Total Attendees Responding to Question: 35*	
Farmers market or local food kiosk	**26**
Plazas and other gathering spaces	**20**
Walking and biking trails	**17**
Performance or public art spaces	15
Spaces dedicated to nature and ecological restoration	12
Sports and active recreation	7
Places for exercise	5
Increased access and recreational opportunities	4
4. What are the community's greatest strengths from a development perspective? (Pick up to 3) *Total Attendees Responding to Question: 38*	
Single-family housing	**19**
Historic preservation	**14**
Shopping	**12**
Civic and religious institutions	10
Parks	10
Affordable housing	9
Jobs	9
Senior housing	8
Schools	7
Transit	4
5. What are the community's greatest needs from a development perspective? (Pick up to 3) *Total Attendees Responding to Question: 38*	
Jobs	**25**
Shopping	**23**
Affordable housing	**15**
Transit	**15**
Single-family housing	10
Historic preservation	6
Parks	5
Schools	5
Senior housing	2
Civic and religious institutions	1
6. What types of businesses would you like to see? (Pick up to 3) *Total Attendees Responding to Question: 37*	
Grocery stores	**30**
Locally owned cafés	**27**
Medical, health & wellness services	**12**
Locally owned boutiques	9

Home improvement stores	7
National chain restaurants	6
National brand clothing stores	5
Pharmacy	5
Professional services	5
Personal services	4
7. What types of jobs are needed nearby? (Pick up to 3) *Total Attendees Responding to Question: 37*	
Construction	**19**
Manufacturing	**16**
Retail and restaurants	**15**
Professional	13
Healthcare workers	12
Office and administrative support	11
Transportation and warehousing	11
Public sector	10
Maintenance and utilities	8
8. What type of housing is most needed? (Pick up to 3) *Total Attendees Responding to Question: 34*	
Home ownership	**29**
Affordable housing	**17**
Mixed-income	**17**
Senior housing	**17**
Veterans housing	13
Rental	6
9. What scale of housing is desired? (Pick up to 3) *Total Attendees Responding to Question: 34*	
Single-family	**26**
Townhomes	**24**
Two-flats and three-flats	**20**
Multi-family housing with ground floor commercial	12
Small four-to-six-unit building	10
Mid-rise multi-family (up to 8 stories)	4

Breakout Session Groups

Group 1
Moderator: Erin Cabonargi *(TSD Plan)*
RLE Project Members: Marlise Fratinardo *(CTA Planning)*, Leah Mooney *(CTA Planning)*, & Sarah Wilson *(TSD Plan)*

Group 2
Moderator: Mark Payne *(TSD Plan)*
RLE Project Members: Sonali Tandon *(CTA Planning)* & Michael Schuch *(RLE Program Management Team)*

Group 3
Moderator: Christine Carlyle *(TSD Plan)*
RLE Project Members: Ammar Elmajdoub *(CTA Planning)* & Jenn Pisano *(TSD Plan)*

Group 4
Moderator: Teresa Fourcher *(TSD Plan)*
RLE Project Members: Jasmine Gunn *(Chicago Department of Planning and Development)* & Christen Hayes *(TSD Plan)*

Group 5
Moderator: Sarah Ware *(TSD Plan)*
RLE Project Members: Barbara Stubblefield *(RLE Program Management Team)* & Kristen Robinson *(RLE Program Management Team)*

Group 6
Moderator: Jacob Peters *(TSD Plan)*
RLE Project Members: Patrick Dunn *(RLE Program Management Team)* & Jackie Davis *(TSD Plan)*

Breakout Session Questions & Group Responses

The following documents a combination of attendees' verbatim and paraphrased responses provided by the breakout group moderators. Individual breakout groups may not have responses listed for each question due to groups spending more time discussing other questions or moderators not receiving any feedback from attendees on those prompts.

Question 1: What are three words you would use to describe your vision for the neighborhood?

- **Group 2 Responses:**
    - Scenic
    - Resourceful
    - Thriving
    - Economically friendly
    - Jobs
    - Educational
    - Food opportunities
    - Community help and hope for youth
    - Education
- **Group 3 Responses:**
    - Ambience, security, helpful businesses (e.g., grocery, eye doctor, dentist)
    - Investment, beauty
    - Community, safety, innovation
- **Group 4 Responses:**
    - Economic equity, diversity, jobs, opportunities for all community members
- **Group 5 Responses:**

  - Quiet, peaceful, clean
  - Safe, settled, upcoming
  - Progressive, economically sound, peaceful
- **Group 6 Reponses:**
  - Access, empowerment, investment
  - "Point of destination," rebranded as "Magnificent Mile – South," safety
  - Multi-generational

Q2: What is important for us to understand about your community?

- **Group 1 Responses:**
  - The area east of the proposed station is primarily Hispanic/Spanish speaking with locally, family-owned grocery stores and restaurants but people are leaving the neighborhood. I'm worried that people wouldn't want to explore around the side streets.
  - The Pullman area north of Kensington is primarily home ownership and we want to see more of that.
  - Michigan Avenue was listed as one of Chicago's most endangered areas in 2020.
  - The importance of the current architecture of the Roseland Theater further down Michigan Avenue. "Historic buildings are fabulous and need a shot in the arm."
  - It's important to not forget about Kensington to St. Anthony's.
  - Roseland was once called the "Jewel of the South Side."
  - Language is a potential barrier to making inroads with the businesses in the Kensington area.
  - A lot of the businesses around are family owned.
- **Group 2 Responses:**
  - Knowing the needs of the members in the community
  - To remember or know the history of Pullman area
- **Group 3 Responses:**
  - In its current state, Roseland is overlooked and underserved.
  - Michigan Avenue was a booming shopping corridor for South Side Chicago; clothes and food were available in Roseland, but it has declined over the past 30 years and stores have been destroyed in Roseland.
  - As a resident of the neighborhood since the 1970s, I want to bring back the "old" Roseland that had shopping, community services and energy.
  - The area around 115th/State to 115th/Kensington to Michigan Avenue used to be a mall with a grocery store, dry cleaners, drug store, ACE Hardware, Family Dollar, Church's Chicken, a restaurant (called the Coffee Pot), and it was a one-stop shop. People came there and did all their errands and socialization without having to leave Roseland.
  - There used to be a movie theater in Roseland, bringing this back could bring back people.

  - There needs to be initiatives to ensure the sustainability of the neighborhood.
- **Group 4 Responses:**
  - CTA needs to assure that there will be equity in this process that the community is involved and that economic development will occur in an equitable way. Possibly with a community benefits agreement, if not already in place.
  - Community members have been a part of this project since 2002 and want to be a part of continued development actions. Like being able to advise on best practices for design, development, and engagement.
  - Safety issues arise from the high unemployment rates so, there's a need to focus on job creation near the stations. CTA needs to be a more inclusive community partner that focuses on economic development and job creation.
  - Development activities should start now to prepare for the new stations and to set the foundation for future transit amenities. Many opportunities in the area, for example, the vacant school at 117th and Perry. Is a large building, no one so far has been able to utilize it since its closing, but see it as an opportunity with the RLE Project. I envision a workforce development center with a child day care or community center.
  - I'm skeptical that this project will become a reality.
  - Perhaps CTA should consider the model of the INVEST South/West in bringing forward more equitable development scenario.
  - Have a lot of work to do! Kudos to CTA and neighborhood participants to tackle issues important to the community.
- **Group 5 Responses:**
  - We are a historical community and I'd like that to be highlighted for people to understand we value our history and want to protect it.
  - It's a tale of two cities. It's about time we have the platform to enhance it from an equitable lens, one of which is long overdue. The talk of the RLE extends my life. So, with all the positivity and our hopes – the Captain Obvious are the disadvantages that we're stuck with and yet still overcome. Hardworking folks that contribute to the pot have not been recipients. It's long overdue.
  - Opportunities such as this and leadership. People can speak best if we have platforms that enable us to not only tell our stories but to fight for things that we desperately want, especially direct recipients to direct the economic impacts.
  - Some people like myself have lived in this community for 50+ years and have kept it maintained. People have planted themselves here. We want to be heard and understood. I never thought that we'd have a transit system. I came out to Roseland because it was open, it was like my suburban area, and is peaceful/pretty and now I'm going to be listening to trains going by

  my house every 20 minutes. Older people on my block are scared because all types of people are going to be walking in our community and I won't be able to allow my grandkids to play outside. It's frightening for those who have lived here a long time.
  - I've lived in Roseland since 1972 so I have seen the transformation of Roseland from when it was a little past the integration of the community. Roseland was a segregated community and desegregated about 1968-1969. When I moved there, I had white neighbors. Palmer Park used to have flowers and as the community transformed, they stopped putting flowers. We hold services to a standard. My mother would call and ask where the flowers are. Over the years they eventually disappeared. The community as a whole was a thriving community. King Drive had a reputation and it still does, but I think this project with the INVEST South/West collaboration and CTA will help the community to not only be restored to where it was, but to pass where it was to a greater extent. Property values are underwater and will help to restore property values and will also attract people to not be absent homeowners or landlords but to be occupied owners and landlords again. They will also attract better tenants who can just breathe. This entire project, being with the RLE and our entire mission is surrounding all of these stations that are involved.
- **Group 6 Responses:**
  - Used to be a historic corridor with a variety of retail (e.g., JC Penny, Gately's, suits, cigars, and hobbies)
  - Great housing stock (and a variety of housing types) to be admired.
  - Bring back character, filling in the voids left by anchors.
  - Urban, historic, and neighborhood feel, like the rebirth of Milwaukee Avenue.
  - It's important to be good business neighbors by hiring from within the community, keeping streets clean, bright visible storefronts, preventing loitering outside on streets, and living within and giving back or investing in the community.
  - Current issues relating to the maintenance and cleanliness of stations inside, out/land nearby (ex: at 95th Street station), especially concerning Illinois Department of Transportation (IDOT)/Chicago Department of Transportation (CDOT)/CTA jurisdiction disagreements. Same potential concerns with the adjacent rail corridor.

Q3: What are your community's greatest assets? What is missing?

- **Group 1 Responses:**
  - Something that's missing is support and incentives for those businesses and families that want to run their own business to get people to go beyond Michigan Avenue. A lot of the families in that area own their homes. More family ownership of the properties is a goal.

  - More locally owned restaurants, convenience stores, family-type establishments that people could visit are needed.
  - We need more bookstores and technology in the community.
  - What's missing is the need to support legacy businesses so they can be passed down in the family. "Give them all the tools they need to make it happen, make a sustainable business."
  - There should be support to help small family-owned businesses adapt when the new station comes. Like providing technical assistance to connect small family-owned businesses with someone to assist in business ownership transfers.
- **Group 2 Responses:**
  - Public transportation that is available (i.e., Metra Electric and bus line) is the greatest asset.
  - Sit down restaurants (i.e., café kind) are missing.
  - Amtrak transfer; this location is currently a transit desert.
- **Group 3 Responses:**
  - Job training is missing and desired in the community.
  - Access to healthy food or a farmers market is a big need.
  - Security is needed 24 hours a day. People are 'hanging out' and the community is afraid to walk down the street sometimes. A police presence is needed as well as cameras near the stores. People are even crawling on top of buildings and breaking into stores. The police need to gain control over the neighborhood again.
  - Job opportunities are missing, especially in the construction industry. Inclusion is an issue; we need to diversify jobs.
  - Roseland needs revitalization of the Michigan Avenue corridor with development of retail and restaurants.
  - Neighborhood used to be safer. There was a police station that is no longer there. Security is missing and needed desperately.
  - Safety is needed. There is no enforcement by police on Michigan Avenue. Ordinances are not being followed currently. For example, Michigan Avenue trash receptacles were taken away because businesses were using them as their dumpsters.
  - Community and local businesses need to clean up the corridor/street and bring back planters, benches, awnings, and facade updates through City programs.
- **Group 4 Responses:**
  - Missing measures that address extreme personal safety and security near the station, as well as cleanliness.
  - Safety is missing as a priority and needs to be made a priority near the station areas, especially near the Michigan Avenue station. It's very dark due to the Union Pacific rail line and needs implementable safety measures from street lighting to increased patrols.

  - We need the types of jobs that are far west of the City in our community. We transport to those other areas, because of the opportunity those communities have for us.
  - Retail and restaurant jobs are great, but we need more professional careers and jobs to be attracted to the area such as professional services, medical, and hospitality.
  - The greatest benefit for the area is the Michigan Avenue corridor. This area should be given landmark status because it is such a great asset that can benefit the whole area, including neighboring Pullman.
- **Group 5 Response:**
  - The community's greatest asset is the retail district, which is also our worst asset if that makes sense. We have this huge, massive space that once used to have vegetable markets, stores, bakeries, mom-and-pop shops, and pharmacies and we no longer have any of that.
- **Group 6 Responses:**
  - The great highway access is an asset.
  - People and block clubs are great assets.
  - There's lots of people who need help and resources.
  - Missing safety and ability to feel safe enough for our grandmothers to shop alone.
  - Need things to develop young people at different levels like arts and music, as well as non-academic avenues for growth and exploration.
  - Missing engagement opportunities for youth, like dance and music programs.
  - Need to develop workforce and places to work
  - Need entrepreneurs to restart economic engine and fill vacant spaces

Q4: How do you see the new station benefitting your community?

- **Group 1 Responses:**
  - The ability to live and work in the community – "live, work, play," idea.
  - Bringing more career opportunities to allow more professionals who live in the community to be able to work in the community.
  - Encouragement of reinvestment and a potential landmark district
  - The opportunity to really build on the connection to Pullman.
  - To increase the focus on local businesses and how to develop them. The Chamber is strengthening its workshops and increasing focus on improving financial literacy of business owners.
- **Group 2 Responses:**
  - The addition of accessibility
  - The newly built youth facility does not have good bus transportation and this project would help the problem.

- **Group 3 Responses:**
    - There is a lot of land near the station and it would be beneficial to the community if it was developed into grocery stores, shopping, and job development.
    - By offering jobs and transportation security
    - As more people use the new stations, this will bring more development to the area, but the development should be community-based businesses and locally owned.
    - A new development near 115th would be beneficial for senior citizens who live at 117th/State.
- **Group 4 Responses:**
    - Economic development will increase safety elements by adding jobs and these stations will become the hubs in each community just as schools were. This understanding needs to be incorporated … growth, community, connectivity, in addition to education expansion.
    - To bring about historic revitalization on Michigan Avenue to rebuild the corridor.
    - Creating a “work, live, play,” community and learn how to craft each and everyone’s future within the community.
    - Upgrading Michigan Avenue to see more resources near the station and an elevated station design that is better than some of the other stations along the Red Line. Envision this to be a nice and safe place to get on and off the train.
    - Would like to see this area partner with the Pullman National Monument and bring more people towards Michigan Avenue to enjoy the history of Michigan Avenue, including events and community gathering stations.
- **Group 5 Responses:**
    - We can’t go onto Michigan Avenue and enjoy coffee with a friend. If we extend the Red Line, why not bring some of those amenities back to the community? Get rid of terrible store owners who don’t care about or live in the community and put back in business owners who live in the community. Give them loans to survive and thrive in the community. I saw a news report about the donut store today and it was terrible. Where’s the money going to rebuild what our community should look like or used to look like? Now, I don’t want to go anywhere near Michigan Avenue. If you’re going to extend the line, bring everything that should go with it like bookstores, coffee shops, etc. by people who live in the community, believe in the community and strive to build up the community.
    - How can we bring back businesses for community members who want to open business but are scared to open businesses in the area? What can be done to stop the crime that goes on in Roseland? Why can’t people who actually live in the community be given opportunities to open businesses on Michigan Avenue/ in the area as opposed to those who don’t? Why aren’t

  we giving the opportunities and funding to those in the community as opposed to someone else?
  - Residents from this area should have special preferential selection to INVEST South/West – I strongly encourage we pay into this SSA component that's supposed to provide these services. In addition to everything that another group member mentioned, we want community members that are applying to have preferential selections. People from the outside should not get preference over our community members. Everyone falls victim to the crime but there are initiatives to work at that because there is money available and we pay into it. However, it only works if we actually invest into those that live here to become providers in our own community.
  - Underline SSA and policing. We only see police when crime happens.
- **Group 6 Responses:**
  - The creation of an accelerator or incubator with a retail and food focus, but still a relation to distribution and logistics.
  - Transit access to get people to the Loop and to jobs.
  - Access from transit to "Magnificent Mile South"
  - Transit-oriented development
  - Reduced travel times
  - Opportunities for growth and empowerment
  - Historic, revitalized, and centralized corridors
  - Access to opportunities for all ages (safety for all ages is part of access)

Red Line Extension Project

Virtual Station Meetings Summary

Section 1
Introduction

The Chicago Transit Authority (CTA) is proposing to extend the Red Line from the existing terminal at 95th/Dan Ryan to 130th Street, subject to the availability of funding. The proposed 5.6-mile extension would include four new stations near 103rd Street, 111th Street, Michigan Avenue, and 130th Street. Each new station would include park & ride facilities and bus connections.

Following two identical virtual community meetings held in early December 2020 to introduce the Supplemental Environmental Assessment (EA) and Transit-Supportive Development Comprehensive (TSD) Plan, the CTA received Federal Transit Administration (FTA) approval to enter the New Starts Project Development (PD) phase of the Capital Investment Grants (CIG) Program for the Red Line Extension (RLE) Project. The CIG Program requires the CTA to complete the RLE Project's Final Environmental Impact Statement (EIS) and preliminary engineering documents during the two-year PD phase to successfully meet the federal requirements. As a result, the project timeline was revised and now estimates the start of construction in 2025 and service beginning in 2029, all of which is dependent on securing project funding.

In January and February 2021, the CTA hosted a series of four virtual community meetings that focused on each of the proposed station areas to discuss details of the Supplemental EA, share the new project timeline, and gather input from community members on the needs and priorities for future development around each station for the TSD Plan. This Virtual Station Area Meetings Summary outlines the format, timing, attendance, topics covered, and outreach methods for all four meetings. Detailed summaries of topics and feedback from each individual meeting were also prepared.

Section 2
Virtual Station Meetings

The CTA hosted a series of four virtual community meetings specific to each proposed station area along the Red Line Extension corridor to discuss details in relation to each station, provide updates on RLE Project progress, and cover the TSD Plan overview, timeline, and planning efforts. The virtual station meetings provided the public with opportunities to ask questions about the station areas, provide input regarding the development they would like to see near the stations, and discuss other project details utilizing the Zoom meeting platform. The four meetings were also broadcasted simultaneously via Facebook Live on the RLE Project Facebook page. The project team solicited input and provided two-way communication opportunities through a series of polling and chat prompts, breakout sessions, and a message functionality via Zoom throughout the presentations' duration for questions and comments. Table 1 displays the subject, timing, and format for the virtual station meetings.

Table 1: Virtual Station Meetings Information

Station Meeting	Date and Time	Meeting Location
130th Street	January 27, 2021 6:00 - 7:30 PM	Zoom: online & telephone Facebook Live
111th Street	February 2, 2021 6:00 - 7:30 PM	Zoom: online & telephone Facebook Live
103rd Street	February 9, 2021 6:00 - 7:30 PM	Zoom: online & telephone Facebook Live
Michigan Avenue	February 16, 2021 6:00 - 7:30 PM	Zoom: online & telephone Facebook Live

The virtual community meetings were made accessible to people with disabilities by the use of American Sign Language interpretation and closed captioning. The virtual station meetings were held online with a telephone dial-in option due to COVID-19 public health guidelines. The virtual station meetings were publicized by flyer, postcard notices, eBlasts (mass emails), social media, and on the project website (see Section 3 for more details about promotion). Registration was promoted through the project engagement website, which is hosted on the Bang the Table platform. Community members who needed assistance registering were directed to contact the CTA's customer service phone number for help; four people were registered for the meeting by phone. The virtual station community meetings were scheduled on weekday evenings. Spanish interpretation was available for meeting attendees throughout the entirety of the meetings.

2.1 Virtual Station Meetings Format

The virtual station meetings provided attendees opportunities to learn about the RLE Project overview, benefits, and recent progress. The meeting presenters also reviewed station concept plans and potential environmental and property impacts of particular interest in relation to each station area. In addition, the Transit-Supportive Development (TSD) Plan overview and timeline were covered.

The format included two to three engaging chat questions (the project team added an additional question during later meetings), interactive polling questions related to the station areas, and a message functionality via the Zoom platform during the entirety of meetings to receive questions. The breakout out sessions allowed the public to provide feedback, ask questions, and discuss concerns directly with project team members. Following the breakout out sessions, breakout out group moderators presented a brief summary of their group's discussion and common ideas shared among group participants. Each virtual station meeting was concluded with information presented regarding the RLE Project's interactive engagement website, transitchicago.com/RLE/engage, opportunities to stay involved, details on how to sign up for project updates, and digital and non-digital methods to contact the project team with questions. Digital methods for the public to ask questions included the RLE Facebook page and project team email. Non-digital methods included the CTA's customer service phone number.

2.2 Virtual Station Meetings Materials

The CTA prepared PowerPoints to supplement the project team's verbal presentation during the meetings. Each virtual station meeting presentation slides and recordings were made available via the project website and RLE Facebook page after the meetings concluded. The recordings were available in both English and Spanish. An online survey was added to the engagement website, hosted by the Bang the Table platform, that matched the polling questions asked during the meetings so that people who were not able to participate live could still provide their input.

2.3 Input Received

The CTA invited virtual station meeting attendees to submit comments to CTA during and after the meetings. CTA staff provided responses via the Zoom chat functionality to selected comments received through the Zoom meeting platform during the meeting and subsequently provided written responses on the CTA website to all comments received through the Zoom meeting platform as well as questions received as of February 16, 2021 in the comments section of the Facebook Live broadcasts. After the meetings, comments could also be submitted via email or U.S. mail. Emailed comments could be sent to a project-specific email address (RedExtension@transitchicago.com). This email address was available on the interactive project website, within the station meeting presentations, and on all meeting notification materials.

Main themes from the questions and comments included:

- Station design, features, and access
- Alternate transit options for the area in substitution or in addition to the Red Line Extension
- Frequency of bus service following project completion

- Requests for more information about displacement and property acquisition
- Concerns about parking lot locations, spaces, parking need, and impacts to surrounding residents
- Concerns about environmental impacts, safety/security, and other potential inconveniences to the community resulting from construction and revenue service
- Requests for the project to employ community members
- Opportunities to incorporate community attributes, designs, and artistic expression into the project design
- Potential for transit-oriented development

Input was also solicited during virtual station meetings through Zoom polls and instruction by the speaker to answer specific questions in the Zoom chat. Polling and chat responses from each individual meeting can be found in their respective summaries. Additional input was received through the engagement website.

2.4 Virtual Station Meeting Attendees

The public was offered a variety of methods to participate in the virtual station meetings. Each meeting had people listening by phone, joining online through the Zoom meeting platform, and others watching on Facebook Live. Phone participants' numbers and Zoom participants' emails were captured by the virtual meeting software and used to determine approximate attendance. The number of participants watching on Facebook Live fluctuated throughout each meeting and the number of unique participants for Facebook Live could not be determined. Table 2 displays meeting attendance by community members and stakeholders. The stakeholder counts include RLE and TSD Project consultants, CTA staff, and interpretation and captioning support staff for each meeting. Six to seven project team members served as presenters, sharing information about the project with the meetings' attendees. Additional project team members operated the meeting platform and polling, responded to questions in real time, and supported note taking during the breakout out rooms.

Table 2: Meeting Attendance

Station Meeting	Community Member Attendance	Other Project Team and Stakeholder Attendance
130th Street	80	52
111th Street	78	48
103rd Street	76	44
Michigan Avenue	81	46

Section 3
Virtual Station Meetings Notifications

The CTA used a variety of outreach and notification methods to announce and promote participation in RLE's virtual station meetings in January and February 2021 to interested parties. The CTA performed the following actions:

- Updated the project website's main page and engagement website to include meeting information and registration details
- Sent postcards to all mailing addresses within ½ mile radius around each station
- Sent eBlasts to all email addresses on the project contact list
- Posted a customer alert on selected South Side bus routes and at 95th Street/Dan Ryan station serving the project area
- Contracted a community organization to deliver hard copy flyers to surrounding homes
- Utilized CTA's social media platforms and the RLE Facebook page to send announcements
- Delivered leaflets to impacted property owners and tenants for Michigan Avenue station
- Offered entry to $50 Visa gift card sweepstakes

3.1 Project Website

The CTA updated the RLE Project website and engagement website in advance of the meetings to include information on how to register and join. Additionally, the project website provides general information about the RLE Project, archived materials from public hearings, and information on the TSD Plan. Attendees were directed to register through a form on the engagement website. People could register for more than one meeting. The engagement website also included an opportunity to respond to the same polling questions as during the meeting. This enabled individuals who listened to the meeting by phone, those who wanted more time to respond, and people who listened to the recording to provide input to the project at a time that was convenient for them.

3.2 Postcard Notifications

The CTA mailed postcards in advance with information regarding the virtual station meetings to residential and business addresses within a 1/2 mile radius of each proposed station. The postcards were customized to highlight approximately 201 addresses. The postcards provided details about the public virtual community meetings, including how to virtually attend meetings, and contact information to request assistance at the virtual community meetings. The postcard also included information regarding the availability of additional interpretation services in Spanish or sign language with advance notice.

Table 3: Postcard Mailing Recipients and Dates

Station	Approximate Residences	Approximate Businesses
130th Street	2,200	57
111th Street	3108	103
103rd Street	1931	106
Michigan Avenue	2476	132

3.3 eBlast Notifications

The CTA sent emails (eBlasts) to the approximately 1,200 email addresses on the RLE Project contact list to notify interested parties about the virtual station meetings. The eBlasts included information on the purpose of the virtual station meetings, dates, how to register, accessibility information, and details about the Visa gift card sweepstakes. Instructions in Spanish were provided for recipients to access the meeting information in Spanish.

Table 4: eBlast Notification Dates

Topic	eBlast Date
Station Meetings Announcement	January 14, 2021
130th Street Meeting Reminder	January 25, 2021
111th Street Meeting Reminder	February 1, 2021
103rd Street Meeting Reminder	February 8, 2021
Michigan Avenue Meeting Reminder	February 15, 2021

3.4 Customer Alert

The CTA created a customer alert promoting the four virtual station meetings and included information regarding when the meetings would be held, the importance of community engagement, and how to register for and attend the meetings. The customer alerts were posted at the 95th/Dan Ryan station and all buses out of 103rd garage to heighten awareness among local residents using transit within the project area.

3.5 Direct and Delivery Mailing

The CTA contracted a local community-based organization to pass out meeting announcements to community members within the project area. The community organization, Chicago CRED, was provided 1,000 flyers with meetings information to pass out to houses nearby 103rd, 111th, and

Michigan Avenue proposed station areas. The team canvassed up to four blocks, approximately 20 homes per block, in all directions around the three proposed station areas.

An additional 100 copies of the meetings announcement were mailed to TCA Health, a local healthcare provider, to handout at in-person events they hosted.

3.6 Social Media Announcements

The CTA used the Red Line Extension Facebook page to announce and promote the virtual station meetings. Facebook events were created for all four station meetings. All station meetings were also available to watch via Facebook Live and posts were published on each meeting date at the meetings' start time to announce that the meetings were streaming for public viewing. People did not need to be logged in to watch the stream on Facebook. For the later three station meetings, a link to join the Zoom meeting was also added to the Facebook stream in order to facilitate access to interpretation, polling, and captioning for those who did not register for the meeting in advance. Part of the message posted on the stream was in Spanish.

Table 5: CTA RLE Facebook post dates

Topic	Date
Facebook events created for each meeting	January 8, 2021
Visa Sweepstakes Announcement	January 13, 2021
130th Station Meeting Reminder	January 15, 2021
111th Station Meeting Reminder	January 26, 2021
Live stream of 130th Station Meeting	January 27, 2021
Live stream of 111th Street Station Meeting	February 2, 2021
103rd Street Station Meeting Reminder	February 3, 2021
Michigan Avenue Meeting Reminder	February 9, 2021
Live stream of 103rd Street Station Meeting	February 9, 2021
Live stream of Michigan Avenue Station Meeting	February 16, 2021

Posts related to each virtual station meeting were also shared on the CTA's main social media pages including Facebook, Twitter, and Instagram. These pages aren't specific to the RLE Project and generally have a larger audience.

3.7 Impacted Property Owners and Tenants

In advance of the Michigan Avenue meeting, the CTA delivered notification leaflets to 30-35 properties (approximately 18-20 were thought to be inhabited) near the proposed Michigan Avenue station. In addition to information about how to participate in the Michigan Avenue virtual station meeting, this leaflet asked impacted property owners and tenants to get in touch with the CTA's property relocation liaison in advance of the meeting. The CTA desired to share new information about potential property impacts with property owners and tenants in the south location prior to the meeting. The leaflet was provided in English and Spanish.

3.8 Visa Sweepstakes

In advance of the virtual station meetings, the CTA offered and advertised the opportunity to win a $50 Visa gift card. To enter, community members were encouraged to share their project-related ideas on the Red Line Extension engagement website. Multiple prizes were available for those who participated. The sweepstakes was mentioned at each virtual station meeting, noted on the mailed postcards and meeting announcements, as well as advertised through dedicated Facebook posts. Up to three entries could be accrued after creating an account on transitchicago.com/RLE/engage, by filling out the survey (one entry), placing a pin on the map (one entry) and, adding a post to the ideas wall (one entry). 106 people participated by the deadline of February 19, 2021, and five winners were selected to each receive a $50 Visa gift card.

CTA Red Line Extension Virtual Station Meetings

The CTA is hosting a series of virtual public meetings to discuss project progress and YOUR VISION for the area around the four proposed stations for the Red Line Extension (RLE) project. Your input as a community member will help determine the needs and priorities for future development around each station area.

130th Street | Wednesday, January 27 (6:00 p.m. – 7:30 p.m.)

111th Street | Tuesday, February 2 (6:00 p.m. – 7:30 p.m.)

103rd Street | Tuesday, February 9 (6:00 p.m. – 7:30 p.m.)

Michigan Avenue | Tuesday, February 16 (6:00 p.m. – 7:30 p.m.)

Due to COVID-19 restrictions, these meetings will be conducted virtually via Zoom and broadcasted on Facebook Live.

Registration is required to attend these meetings.
Please register at: transitchicago.com/RLE/engage.

Attendees will receive information to join via Zoom or telephone.
If you require assistance to register, call us at 1-888-968-7282 at least three [3] days before the meeting you plan to attend.

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt.

Presentation audio in Spanish, American Sign Language interpretation and captioning will be available at each meeting for those joining online through Zoom only.

A recording will be posted online after each meeting at **transitchicago.com/RLE/whats-new**.

For questions about the RLE project, please contact the project team at **RedExtension@transitchicago.com**.

CTA WANTS
TO HEAR
FROM YOU!

Share your ideas to inform the Red Line Extension Transit-Supportive Development Plan for a chance to win a **$50 Visa gift card**! Multiple prizes are available for those who participate by February 7, 2021. Visit transitchicago.com/RLE/engage to earn up to three entries in the sweepstakes by creating an account and completing any of the following activities:

1. Fill out the survey (+1 entry)
2. Place a pin on the map (+1 entry)
3. Add a post to the ideas wall (+1 entry)

¡ACOMPÁÑENOS!

Reuniones virtuales sobre las estaciones de la Expansión de la Línea Roja de CTA

CTA tendrá una serie de reuniones públicas virtuales para discutir el progreso del proyecto y LA VISIÓN DE USTED para el área alrededor de las cuatro estaciones propuestas para el proyecto de Expansión de la Línea Roja (RLE). Sus opiniones como miembro de la comunidad ayudarán a determinar las necesidades y prioridades para el futuro desarrollo alrededor de cada estación.

130th Street | miércoles, 27 de enero (6:00 p.m. – 7:30 p.m.)

111th Street | martes, 2 de febrero (6:00 p.m. – 7:30 p.m.)

103rd Street | martes, 9 de febrero (6:00 p.m. – 7:30 p.m.)

Michigan Avenue | martes, 16 de febrero (6:00 p.m. – 7:30 p.m.)

Debido a las restricciones de COVID-19, estas reuniones serán realizadas virtualmente por medio de Zoom y transmitida simultáneamente por Facebook Live.

Se requiere su inscripción para participar en estas reuniones.
Favor de inscribirse en: transitchicago.com/RLE/engage.

Los participantes recibirán información para unirse por medio de Zoom o teléfono.
Si requiere ayuda para inscribirse, llámenos al 1-888-968-7282 por lo menos tres [3] días antes de la reunión que planea atender.
Cada reunión será transmitida simultáneamente por Facebook Live en facebook.com/CTARedExt.

Audio de la presentación en español, interpretación en lengua de señas y subtítulos estarán disponibles en cada reunión solamente para los que participan en la reunión en línea por medio de Zoom.

Se publicará una grabación en línea después de cada reunión en **transitchicago.com/RLE/whats-new**.

Para preguntas acerca del proyecto RLE, favor de contactar el equipo del proyecto en **RedExtension@transitchicago.com**.

¡CTA QUIERE ESCUCHAR DE USTED!

¡Comparta sus ideas para informar al Plan de Desarrollo de Apoyo al Tránsito de la Expansión de la Línea Roja para la oportunidad de ganar una **tarjeta de regalo Visa de $50**! Varios premios están disponibles para los que participan antes del 7 de febrero, 2021. Visite transitchicago.com/RLE/engage para hasta tres oportunidades de ganar en la rifa creando una cuenta y realizando cualquiera de las siguientes actividades:

1. Llenar la encuesta (+1 oportunidad)
2. Colocar una chincheta en el mapa (+1 oportunidad)
3. Agregar una entrada a la pared de ideas (+1 oportunidad)

CTA Red Line Extension Proposed 103rd Street Station Virtual Meeting
Tuesday, February 9 (6 p.m. – 7:30 p.m.)

The CTA will be hosting a virtual meeting to discuss your vision for the area around the proposed 103rd Street station for the Red Line Extension. Your input as a community member will help determine the needs and priorities for the station area.

Registration is required to attend this meeting. Please register at: **transitchicago.com/RLE/engage.**

Attendees will receive information to join by Zoom or telephone.

The meeting will also be broadcasted simultaneously on Facebook Live at **facebook.com/CTARedExt.**

Presentation audio in Spanish, sign language interpretation and captioning will be available for those joining online through Zoom only. If you require assistance to register, call us at 1-888-968-7282.

¡Reserve la fecha!

Reunión virtual sobre la estación propuesta de 111th Street como parte de la Expansión de la Línea Roja de CTA
Martes, 9 de febrero (6 p.m. – 7:30 p.m.)

CTA tendrá una reunión virtual para discutir la visión de usted para el área alrededor de la estación propuesta de 103rd Street como parte de la Expansión de la Línea Roja. Sus opiniones como miembro de la comunidad ayudarán a determinar las necesidades y prioridades para el área de la estación.

Se requiere inscripción para participar en esta reunión. Favor de inscribirse en: **transitchicago.com/RLE/engage.**

Los participantes recibirán la información necesaria para unirse por medio de Zoom o teléfono.

La reunión también será transmitida simultáneamente por Facebook Live en **facebook.com/CTARedExt.**

La presentación tendrá audio en Español, interpretación en lengua de señas y subtítulos estarán disponibles solamente para los que participen en la reunión en línea por medio de Zoom. Si necesita ayuda para registrarse, llámenos al 1-888-968-7282.

Mark your calendars! The CTA is hosting a series of virtual public meetings to discuss project progress and YOUR VISION for the area around the four proposed stations for the Red Line Extension (RLE) project. The meeting for the proposed 103rd Street station will be held on Tuesday, February 9th from 6:00 p.m. to 7:30 pm.

Haga clic aquí para más información en español:
https://www.transitchicago.com/.../RLE_station_mtg_flyer...

Your input as a community member will help determine the needs and priorities for future development around each station area.

Registration is required to attend. Please register at:
transitchicago.com/RLE/engage.
If you require assistance to register, call us at 1-888-968-7282 at least three [3] days before the meeting you plan to attend.
Attendees will receive information to join via Zoom or telephone.

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt.
** Presentation audio in Spanish, American Sign Language interpretation and captioning will be available at each meeting for those joining online through Zoom only.**

Transit-Supportive Development Plan

Makayla's COFFEE HOUSE
cta
103rd

Conceptual rendering of area redevelopment near 103rd Street station.

Transit-Supportive Development Plan Overview

The Red Line Extension is about much more than providing new access to transit – it's also about promoting opportunity and development for communities and residents along the extension.

The RLE Transit-Supportive Development (TSD) Plan is a proactive effort to create a guide for future development in communities located near the RLE project area. The TSD Plan is being led by the CTA and in partnership with the City of Chicago's Department of Planning and Development and the Cook County Land Bank Authority. Funding for this initiative comes from a grant the CTA received from the

Federal Transit Administration’s (FTA) Pilot Program for Transit-Oriented Development (TOD) Planning. This program provides funding to FTA grantees to integrate land use and transportation planning with a new transit capital investment.

At the heart of the TSD Plan will be the community’s vision for future development along the RLE corridor. This Plan will identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment.

Importantly, the TSD Plan will utilize an equitable Transit Oriented Development (eTOD) planning approach. In short, eTOD planning seeks to promote development without the displacement of existing residents and achieve community-focused benefits, such as affordable housing, local economic development and environmental sustainability. It can be a driver for more vibrant, prosperous, and resilient neighborhoods that put people of color and lower- and moderate-income residents at the center. In order to achieve this, a vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

Information collected during the TSD Plan will help the CTA secure funding for the RLE project through the federal New Starts program. More specifically, the plan will be used to provide information on future plans for the use of land and economic development criteria following the completion of project work to extend the Red Line.

What will the Transit-Supportive Development Plan entail?

Creation of the TSD Plan will be a one year project that includes the following components: an Existing Conditions Report; an Inventory, Market Analysis, Land Use and Zoning Analysis; an Economic Development Plan; and a Final Report. Community outreach will occur throughout the project.

Transit-Supportive Development Plan Frequently Asked Questions

For frequently asked questions about the TSD plan and RLE, visit our FAQ page here.

Community Involvement

The CTA is involving local communities, elected officials and regional stakeholders to share information on the project and gather feedback and input for the plan. Visit this section in the future to learn more about past and upcoming meetings.

RLE Virtual Station Meetings

The CTA is hosting a series of virtual public meetings to discuss project progress and YOUR VISION for the
area around the four proposed stations for the Red Line Extension (RLE) project. Your input as a community
member will help determine the needs and priorities for future development around each station area.

130th Street | Wednesday, January 27 (6:00 p.m. – 7:30 p.m.)
111th Street | Tuesday, February 2 (6:00 p.m. – 7:30 p.m.)
103rd Street | Tuesday, February 9 (6:00 p.m. – 7:30 p.m.)
Michigan Avenue | Tuesday, February 16 (6:00 p.m. – 7:30 p.m.)

Due to COVID-19 restrictions, these meetings will be conducted
virtually via Zoom and broadcasted on Facebook Live.

Registration is required to attend these meetings
Please register at: transitchicago.com/RLE/engage
Attendees will receive information to join via Zoom or telephone

If you require assistance to register, call us at 1-888-968-7282
at least three [3] days before the meeting you plan to attend

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt

*** Presentation audio in Spanish, American Sign Language interpretation and captioning
will be available at each meeting for those joining online through Zoom only ***

After each meeting, a recording and meeting materials will be posted on this page.

Meeting 1: Goals, Objectives, and Vision - Winter 2020

The CTA hosted virtual community meetings on Tuesday, December 8, 2020, and Wednesday, December 9, 2020 for updates on the Red Line Extension (RLE) project and an introduction to the new TSD plan. Community members were able to participate in polling activities, provide comments, and ask questions.

New! RLE community engagement website

The CTA also announced its new RLE community engagement website, which can be accessed at transitchicago.com/RLE/engage. Using this new platform, community members can provide feedback, ask questions, and collaborate with others to help shape the TSD plan. A variety of interactive and easy to use activities are provided, such as the ideas wall, the mapping tool, and a short survey.

- Announcement flyer (.pdf)
- Anuncio (.pdf)

Who is leading the transit-supportive development plan effort?

The CTA is leading this effort in partnership with the City of Chicago's Department of Planning and Development and the Cook County Land Bank Authority. Solomon Cordwell Buenz was selected as the prime consultant for the TSD Plan. The TSD consultant team also includes six disadvantaged business enterprises (DBEs), comprising 40.11% of the overall contract value.

Environmental Review Process Updates

Environmental Review Process

Draft Environmental Impact Statement (EIS)

- Completed in 2016

Supplemental Environmental Assessment (EA)

- Began in April 2020 to study new south location of the 130th station
- Completing additional data collection and environmental analysis
- Designing concepts and preliminary plans
- Assessing potential impacts and required mitigation measures

Public Hearing to present Supplemental EA

- Anticipated Fall 2021
- 30-day comment period

Final Environmental Impact Statement (EIS) and Record of Decision (ROD)

Environmental Review Process Updates

Supplemental Environmental Assessment

- **Traffic and Access Analysis**
- **Historic and Cultural Resources**
- **Visual and Aesthetics**
- **Public Parks and Recreational Areas**
- **Noise and Vibration**

Environmental studies will determine the potential impacts and facilitate consideration of measures to mitigate those impacts

Traffic and Access Analysis

- A Traffic Study will be completed for the 130th Street Station area to assess traffic flow and station access
- RLE supports objectives of earlier, current, and future plans for improving transportation options and access to jobs, services, and retail
  - INVEST South/West Initiative
  - Riverdale Multimodal Transportation Plan
  - CDOT and IDOT Complete Streets plans and policies
- Opportunities will be investigated to enhance multi-modal connections to Altgeld Gardens and Beaubien Woods and its amenities

Transit-Supportive Development

- Transit-Supportive Development creates a vision for economic development as integral to the development of the new transit infrastructure.

What is *equitable* Transit-Oriented Development

- Ensures that vibrant, prosperous, healthy, and resilient community that result from access to high quality transit may be enjoyed by all residents including those in historically underinvested communities.

111th Street | Tuesday, February 2 (6:00 p.m. – 7:30 p.m.)
103rd Street | Tuesday, February 9 (6:00 p.m. – 7:30 p.m.)
Michigan Avenue | Tuesday, February 16 (6:00 p.m. – 7:30 p.m.)

Due to COVID-19 restrictions, these meetings will be conducted virtually via Zoom and broadcasted on Facebook Live.

Registration is required to attend these meetings.
Please register at: transitchicago.com/RLE/engage.

Attendees will receive information to join via Zoom or telephone.
If you require assistance to register, call us at 1-888-968-7282 at least three [3] days before the meeting you plan to attend.

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt.

Presentation audio in Spanish, American Sign Language interpretation and captioning will be available at each meeting for those joining online through Zoom only.

A recording will be posted online after each meeting at **transitchicago.com/RLE/whats-new**.

For questions about the RLE project, please contact the project team at **RedExtension@transitchicago.com**.

CTA WANTS TO HEAR YOU!

Share your ideas to inform the Red Line Extension Transit-Supportive Development Plan for a chance to win a **$50 Visa gift card**! Multiple prizes are available for those who participate by February 7, 2021. Visit transitchicago.com/RLE/engage to earn up to three entries in the sweepstakes by creating an account and completing any of the following activities:

1. Fill out the survey (+1 entry)
2. Place a pin on the map (+1 entry)
3. Add a post to the ideas wall (+1 entry)

Terms and conditions apply. Visit ***tiny.cc/RLE-promotion*** *for more information.*

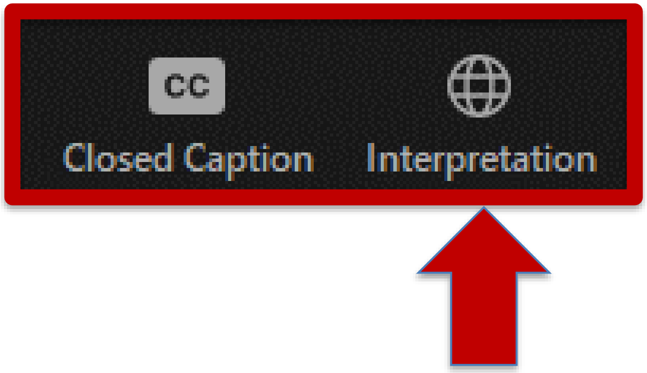
This meeting will be recorded and available online after the series of meetings at ***transitchicago.com/RLE*** *and* ***Facebook.com/CTARedExt***

To turn on captioning, click the icon in the Zoom toolbar:



Audio de la presentación disponible en español

1. Busque el icono de interpretación en la barra de webinar de Zoom. Le mostramos el icono en esta diapositiva para ayudar a reconocerlo.
2. Haga clic en el icono y seleccione “Spanish” para escuchar al intérprete en la reunión.

Para escuchar al intérprete en español usted debe ingresar a la reunión a través del webinar de Zoom, no a través de Facebook o por teléfono.

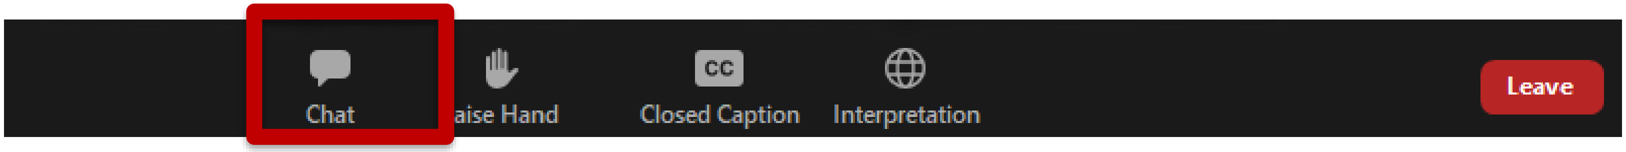
How to Ask a Question

Over Email:

- RedExtension@transitchicago.com

If Joining by Zoom, use chat:

- At the bottom of the window, click chat.
- When you click on chat, a window will appear where you can type a comments and questions and see others' questions/comments. A project team member will be recording questions comments and questions in the chat.



Questions left on Facebook will NOT be responded to directly. CTA will view them but if you want an official response, please use the project email or chat function.

Answers will be posted to transitchicago.com/RLE/whats-new following the series of Station Meetings.

and what about that station do you like the most?

Please type your response in the chat box.

Jackson – Red Line

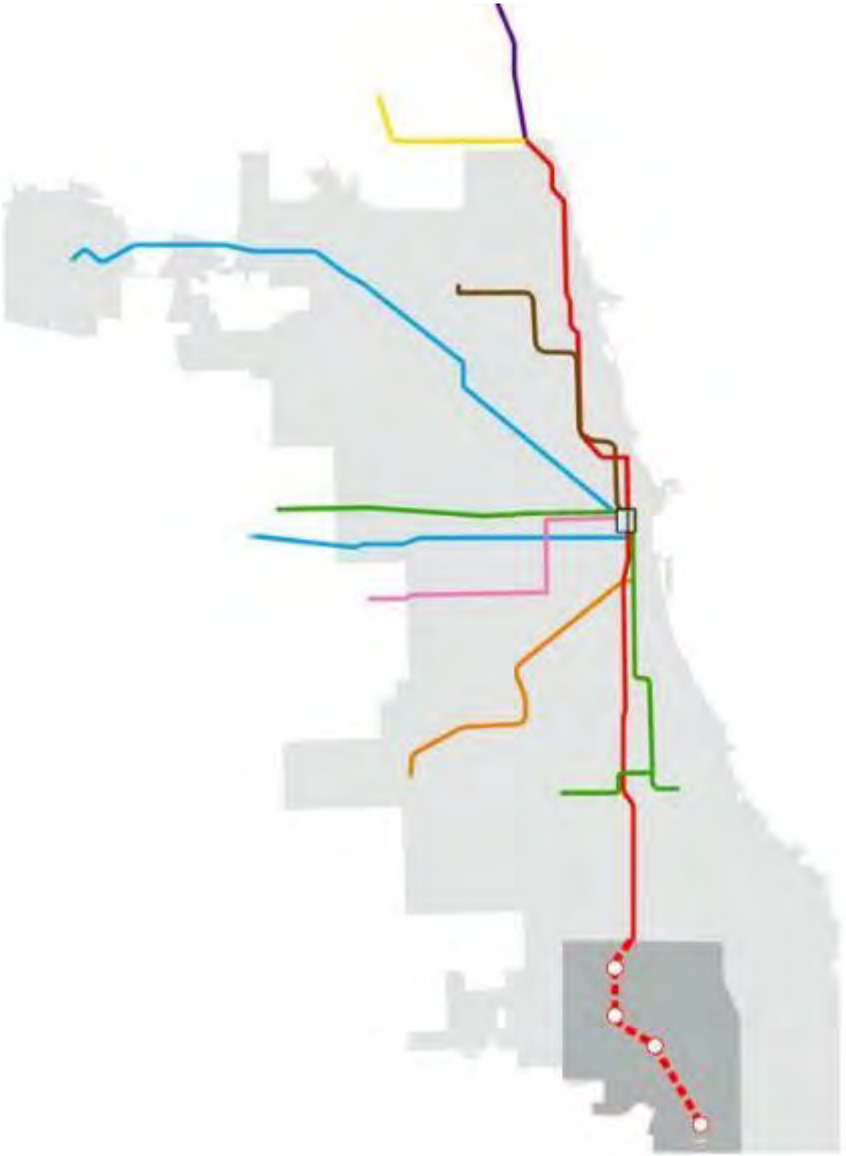
Morgan Station – Pink/Green Line

Project Benefits

Equity by providing affordable rapid transit to historically underserved communities and improving mobility for transit-dependent residents and people with disabilities.

Connectivity and access to the entire city via the CTA network.

Conceptual rendering of what a Red Line Extension elevated station could look like



Graphic of CTA's existing rail network along with four new proposed stations

Project Benefits

Makayla's COFFEE HOUSE
TRANSIT-ORIENTED DEVELOPMENT (TOD)
CONCEPTUAL RENDERING

Conceptual renderings of what the new elevated station could look like

Economic opportunity through connections to jobs, educational opportunities, housing and other services, as well as economic development on the City’s Far South Side.

Frequent rail service will reduce commute times.

Sustainable transportation that helps contribute to improved air quality, reduces greenhouse gas emissions, and saves energy.

Potential Property Impacts

Potentially impacted renters and property owners have already been contacted

- Impacted people can email RedExtension@transitchicago.com with name, address and phone number for individual follow up
- CTA does not plan to pursue acquisition of private property for the RLE Project until the environmental review is complete and project funding is secured

Fall 2020 Newsletter

Guiding Future Development Along the Red Line Extension Through the Transit-Supportive Development Plan

The CTA is beginning development of a Transit-Supportive Development (TSD) Plan, in partnership with the Department of Planning & Development (DPD). The TSD Plan will incorporate the community's vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. The TSD plan will utilize an equitable Transit-Oriented Development (eTOD) planning approach. eTOD planning seeks to promote development without the displacement of existing residents and achieve community-focused benefits such as affordable housing, local economic development, and environmental sustainability. It can be a driver for more vibrant, prosperous, and resilient neighborhoods that put people of color and lower- and moderate-income residents at the center. A vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

The firm Solomon Cordwell Buenz is leading the plan, and they have brought together a strong and diverse team, including experienced planning and architectural firms and multiple Disadvantaged Business Enterprises (DBEs).

To learn more about the TSD plan, visit **Transitchicago.com/RLE/TSD**

December Public Virtual Community Meetings

Join us for a virtual community meeting on
Tuesday, December 8 (6-7:30 p.m.) or
Wednesday, December 9 (1:30-3 p.m.)
We'll be sharing updates on the project and discussing ways you can get involved in 2021, including future community meetings that discuss the TSD Plan.

Find out more about this meeting and how to join by visiting **Transitchicago.com/RLE/whats-new**

RLE Progresses on Environmental Studies and Preliminary Engineering

The CTA continues to advance environmental studies and prepare preliminary engineering documents to complete the Final Environmental Impact Statement (EIS). Since announcing the project's Preferred Alignment, an opportunity has presented itself to potentially relocate the proposed 130th station from the north side of the street – near the Metropolitan Water Reclamation District (MWRD) – to the south side of 130th Street adjacent to Altgeld Gardens.

As a result, a Supplemental Environmental Assessment is underway that will focus on investigating the impacts of this potential change to the project. Studies are now being completed on noise and vibration, traffic flow and access, and other topics. The CTA has already discussed this change with several groups representing residents in the immediate area and has received positive feedback as the new station location would position Red Line riders closer to homes, schools and recreational opportunities and farther away from the industrial land uses, truck traffic, and the MWRD treatment plant. CTA welcomes additional input on the 130th station location change in upcoming community meetings.

Environmental Review Process Updates

Environmental Review Process

Draft Environmental Impact Statement (EIS)

- Completed in 2016

Supplemental Environmental Assessment (EA)

- Began in April 2020 to study new south location of the 130th station
- Completing additional data collection and environmental analysis
- Designing concepts and preliminary plans
- Assessing potential impacts and required mitigation measures

Public Hearing to present Supplemental EA

- Anticipated Fall 2021
- 30-day comment period

Final Environmental Impact Statement (EIS) and Record of Decision (ROD)

Environmental Review Process Updates

Traffic and Access

Noise and Vibration

Visual and Aesthetics

Community Resources

Environmental studies will determine the potential impacts and facilitate consideration of measures to mitigate those impacts

Noise and Vibration

- Preliminary studies in the Draft Environmental Impact Statement (EIS)
- Detailed analysis and field measurements in the Final EIS
- Designed to reduce and mitigate noise through:
  - Noise barriers
  - Closed deck structure
  - Continuously welded rail

Transit-Supportive Development Plan

RED AHEAD

Red Line Extension

Transit-Supportive Development

- Transit-Supportive Development creates a vision for economic development as integral to the development of the new transit infrastructure.

What is *equitable* Transit-Oriented Development

- Ensures that vibrant, prosperous, healthy, and resilient community that result from access to high quality transit may be enjoyed by all residents including those in historically underinvested communities.

Transit-Supportive Development Plan

The Plan will identify opportunities to encourage:

- Economic development
- Continued affordability
- Private sector investment
- Multimodal connectivity and bicycle/pedestrian access
- Support application for federal funding for the transit project
- Collaboration with City of Chicago agencies (Planning and Development, Housing, Transportation, and others)

Transit-Supportive Development Plan

The planning process will include significant and continuous stakeholder engagement and public outreach in partnership with Department of Planning and Development

CTA Red Line Extension Virtual Station Meetings

The CTA is hosting a series of virtual public meetings to discuss project progress and YOUR VISION for the area around the four proposed stations for the Red Line Extension (RLE) project. Your input as a community member will help determine the needs and priorities for future development around each station area.

130th Street | Wednesday, January 27 (6:00 p.m. – 7:30 p.m.)
111th Street | Tuesday, February 2 (6:00 p.m. – 7:30 p.m.)
103rd Street | Tuesday, February 9 (6:00 p.m. – 7:30 p.m.)
Michigan Avenue | Tuesday, February 16 (6:00 p.m. – 7:30 p.m.)

Due to COVID-19 restrictions, these meetings will be conducted virtually via Zoom and broadcasted on Facebook Live.

Registration is required to attend these meetings.
Please register at: transitchicago.com/RLE/engage.

Attendees will receive information to join via Zoom or telephone.
If you require assistance to register, call us at 1-888-968-7282 at least three [3] days before the meeting you plan to attend.

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt.

Presentation audio in Spanish, American Sign Language interpretation and captioning will be available at each meeting for those joining online through Zoom only.

A recording will be posted online after each meeting at transitchicago.com/RLE/whats-new.

For questions about the RLE project, please contact the project team at RedExtension@transitchicago.com.

CTA WANTS TO HEAR YOU!

Share your ideas to inform the Red Line Extension Transit-Supportive Development Plan for a chance to win a **$50 Visa gift card**! Multiple prizes are available for those who participate by February 7, 2021. Visit transitchicago.com/RLE/engage to earn up to three entries in the sweepstakes by creating an account and completing any of the following activities:

1. Fill out the survey (+1 entry)
2. Place a pin on the map (+1 entry)
3. Add a post to the ideas wall (+1 entry)

*Terms and conditions apply. Visit **tiny.cc/RLE-promotion** for more information.*

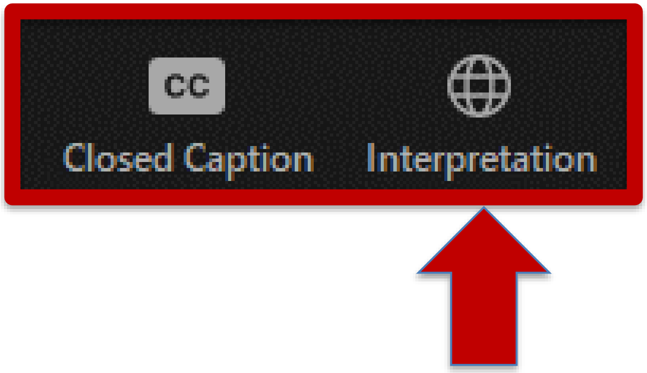
- Break Out Session
- Regroup and Next Steps

This meeting will be recorded and available online after the series of meetings at ***transitchicago.com/RLE*** *and* ***Facebook.com/CTARedExt***

To turn on captioning, click the icon in the Zoom toolbar:



Audio de la presentación disponible en español

1. Busque el icono de interpretación en la barra de webinar de Zoom. Le mostramos el icono en esta diapositiva para ayudar a reconocerlo.
2. Haga clic en el icono y seleccione "Spanish" para escuchar al intérprete en la reunión.

Para escuchar al intérprete en español usted debe ingresar a la reunión a través del webinar de Zoom, no a través de Facebook o por teléfono.

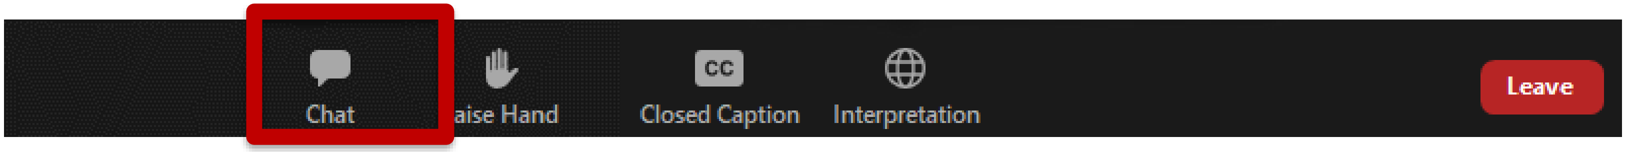
How to Ask a Question

Over Email:

- RedExtension@transitchicago.com

If Joining by Zoom, use chat:

- At the bottom of the window, click chat.
- When you click on chat, a window will appear where you can type a comments and questions and see others' questions/comments. A project team member will be recording questions comments and questions in the chat.



Questions left on Facebook will NOT be responded to directly. CTA will view them but if you want an official response, please use the project email or chat function.

Answers will be posted to transitchicago.com/RLE/whats-new following the series of Station Meetings.

CTA Red Line Extension Virtual Station Meetings

The CTA is hosting a series of virtual public meetings to discuss project progress and YOUR VISION for the area around the four proposed stations for the Red Line Extension (RLE) project. Your input as a community member will help determine the needs and priorities for future development around each station area.

130th Street | Wednesday, January 27 (6:00 p.m. – 7:30 p.m.)
111th Street | Tuesday, February 2 (6:00 p.m. – 7:30 p.m.)
103rd Street | Tuesday, February 9 (6:00 p.m. – 7:30 p.m.)
Michigan Avenue | Tuesday, February 16 (6:00 p.m. – 7:30 p.m.)

Due to COVID-19 restrictions, these meetings will be conducted virtually via Zoom and broadcasted on Facebook Live.

Registration is required to attend these meetings.
Please register at: transitchicago.com/RLE/engage.

Attendees will receive information to join via Zoom or telephone.
If you require assistance to register, call us at 1-888-968-7282 at least three [3] days before the meeting you plan to attend.

Each meeting will be broadcasted simultaneously on Facebook Live at facebook.com/CTARedExt.

Presentation audio in Spanish, American Sign Language interpretation and captioning will be available at each meeting for those joining online through Zoom only.

A recording will be posted online after each meeting at **transitchicago.com/RLE/whats-new**.

For questions about the RLE project, please contact the project team at **RedExtension@transitchicago.com**.

CTA WANTS TO HEAR FROM YOU!

Share your ideas to inform the Red Line Extension Transit-Supportive Development Plan for a chance to win a **$50 Visa gift card**! Multiple prizes are available for those who participate by February 7, 2021. Visit transitchicago.com/RLE/engage to earn up to three entries in the sweepstakes by creating an account and completing any of the following activities:

1. Fill out the survey (+1 entry)
2. Place a pin on the map (+1 entry)
3. Add a post to the ideas wall (+1 entry)

Favorite Station

What is your favorite CTA Station,

and what about that station do you like the most?

Please type your response in the chat box.

Jackson – Red Line

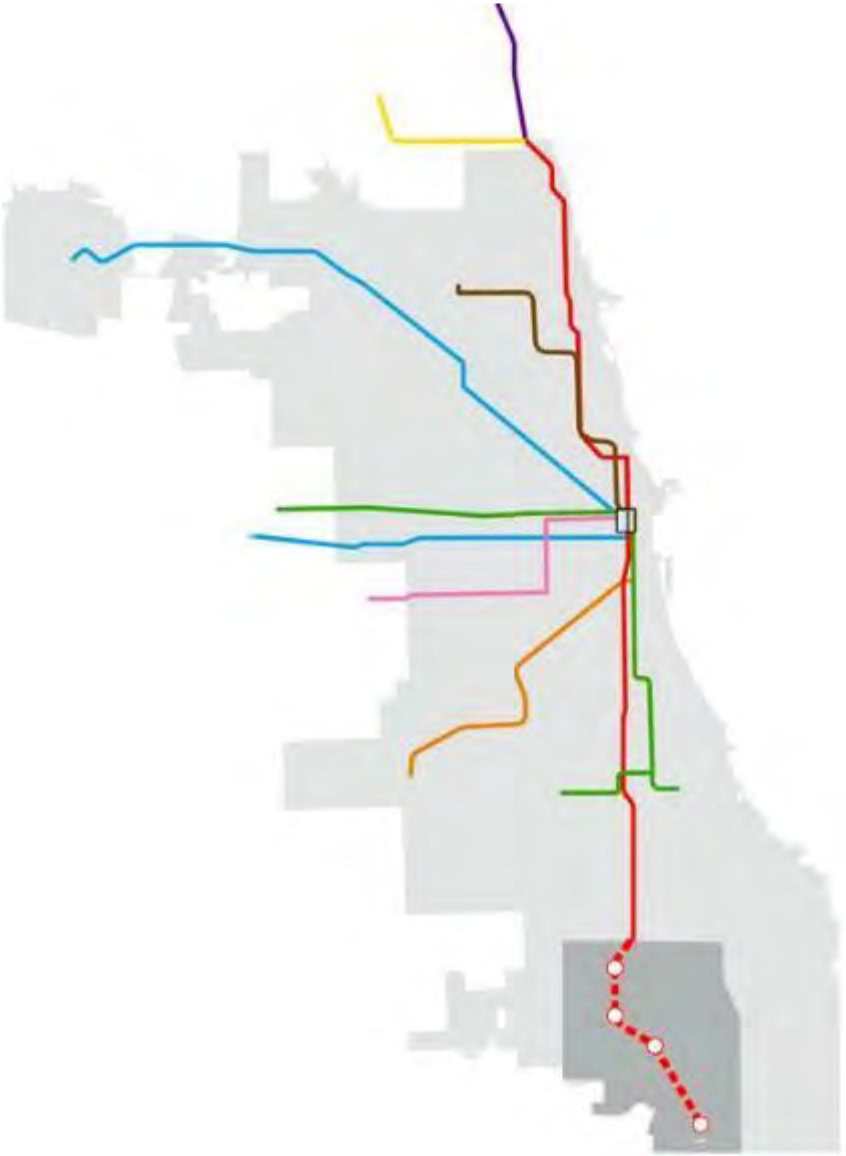
Morgan Station – Pink/Green Line

Project Benefits

Equity by providing affordable rapid transit to historically underserved communities and improving mobility for transit-dependent residents and people with disabilities.

Connectivity and access to the entire city via the CTA network.

Conceptual rendering of what a Red Line Extension elevated station could look like



Graphic of CTA's existing rail network along with four new proposed stations

Project Benefits

Makayla's COFFEE HOUSE
TRANSIT-ORIENTED DEVELOPMENT (TOD)
CONCEPTUAL RENDERING

Conceptual renderings of what the new elevated station could look like

Economic opportunity through connections to jobs, educational opportunities, housing and other services, as well as economic development on the City's Far South Side.

Frequent rail service will reduce commute times.

Sustainable transportation that helps contribute to improved air quality, reduces greenhouse gas emissions, and saves energy.

Fall 2020 Newsletter

Guiding Future Development Along the Red Line Extension Through the Transit-Supportive Development Plan

The CTA is beginning development of a Transit-Supportive Development (TSD) Plan, in partnership with the Department of Planning & Development (DPD). The TSD Plan will incorporate the community's vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. The TSD plan will utilize an equitable Transit-Oriented Development (eTOD) planning approach. eTOD planning seeks to promote development without the displacement of existing residents and achieve community-focused benefits such as affordable housing, local economic development, and environmental sustainability. It can be a driver for more vibrant, prosperous, and resilient neighborhoods that put people of color and lower- and moderate-income residents at the center. A vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

December Public Virtual Community Meetings

Join us for a virtual community meeting on **Tuesday, December 8 (6-7:30 p.m.) or Wednesday, December 9 (1:30-3 p.m.)**
We'll be sharing updates on the project and discussing ways you can get involved in 2021, including future community meetings that discuss the TSD Plan.

Find out more about this meeting and how to join by visiting **Transitchicago.com/RLE/whats-new**

The firm Solomon Cordwell Buenz is leading the plan and they have brought together a strong and diverse team, including experienced planning and architectural firms and multiple Disadvantaged Business Enterprises (DBEs).

To learn more about the TSD plan, visit **Transitchicago.com/RLE/TSD**

RLE Progresses on Environmental Studies and Preliminary Engineering

The CTA continues to advance environmental studies and prepare preliminary engineering documents to complete the Final Environmental Impact Statement (EIS). Since announcing the project's Preferred Alignment, an opportunity has presented itself to potentially relocate the proposed 130th station from the north side of the street – near the Metropolitan Water Reclamation District (MWRD) – to the south side of 130th Street adjacent to Altgeld Gardens.

As a result, a Supplemental Environmental Assessment is underway that will focus on investigating the impacts of this potential change to the project. Studies are now being completed on noise and vibration, traffic flow and access, and other topics. The CTA has already discussed this change with several groups representing residents in the immediate area and has received positive feedback as the new station location would position Red Line riders closer to homes, schools and recreational opportunities and farther away from the industrial land uses, truck traffic, and the MWRD treatment plant. CTA welcomes additional input on the 130th station location change in upcoming community meetings.

Transit-Supportive Development

- Transit-Supportive Development creates a vision for economic development as integral to the development of the new transit infrastructure.

What is *equitable* Transit-Oriented Development

- Ensures that vibrant, prosperous, healthy, and resilient community that result from access to high quality transit may be enjoyed by all residents including those in historically underinvested communities.

Transit-Supportive Development Plan

Project Overview

Red Line Extension

- 5.6-mile extension
- Four new stations:
  - 103rd Street (near Eggleston)
  - 111th Street (near Eggleston)
  - Michigan Avenue (near 116th Street), and
  - 130th Street
- Park & Ride and bus connections at each new station
- Elevated tracks from 95th Street to 119th Street, then tracks run along the ground from 119th Street to 130th Street

Favorite Station

What is your favorite CTA Station,

and what about that station do you like the most?

Please type your response in the chat box.

Jackson – Red Line

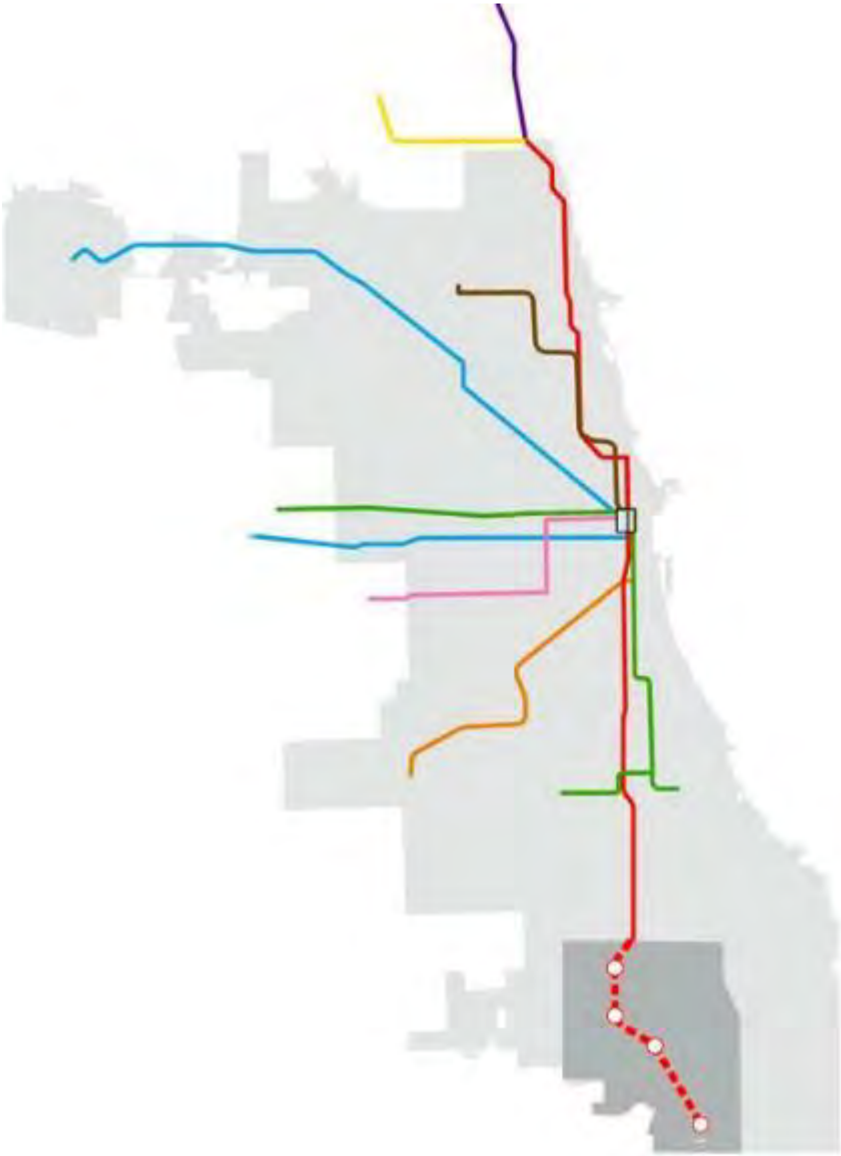
Morgan Station – Pink/Green Line

Project Benefits

Equity by providing affordable rapid transit to historically underserved communities and improving mobility for transit-dependent residents and people with disabilities.

Connectivity and access to the entire city via the CTA network.

Conceptual rendering of what a Red Line Extension elevated station could look like



Graphic of CTA's existing rail network along with four new proposed stations

Project Benefits

Makayla's COFFEE HOUSE
TRANSIT-ORIENTED DEVELOPMENT (TOD)
CONCEPTUAL RENDERING

Conceptual renderings of what the new elevated station could look like

Economic opportunity through connections to jobs, educational opportunities, housing and other services, as well as economic development on the City's Far South Side.

Frequent rail service will reduce commute times.

Sustainable transportation that helps contribute to improved air quality, reduces greenhouse gas emissions, and saves energy.

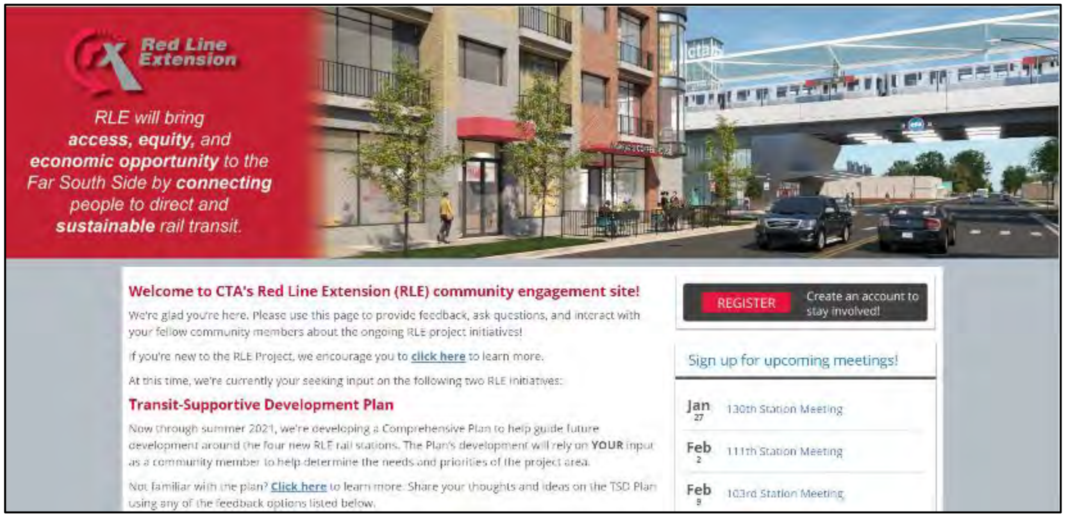
RED AHEAD

Red Line Extension



Red Line Extension

RLE will bring **access, equity,** and **economic opportunity** to the Far South Side by **connecting** people to direct and **sustainable** rail transit.

Welcome to CTA's Red Line Extension (RLE) community engagement site!

We're glad you're here. Please use this page to provide feedback, ask questions, and interact with your fellow community members about the ongoing RLE project initiatives!

If you're new to the RLE Project, we encourage you to click here to learn more.

At this time, we're currently your seeking input on the following two RLE initiatives:

Transit-Supportive Development Plan

Now through summer 2021, we're developing a Comprehensive Plan to help guide future development around the four new RLE rail stations. The Plan's development will rely on **YOUR** input as a community member to help determine the needs and priorities of the project area.

Not familiar with the plan? Click here to learn more. Share your thoughts and ideas on the TSD Plan using any of the feedback options listed below.

Guiding Future Development Along the Red Line Extension Through the Transit-Supportive Development Plan

The CTA is beginning development of a Transit-Supportive Development (TSD) Plan, in partnership with the Department of Planning & Development (DPD). The TSD Plan will incorporate the community's vision for future development along the RLE corridor. It will also identify methods and resources needed to enable mixed-use development and enhance economic vitality, multimodal connectivity and the pedestrian environment. The TSD plan will utilize an equitable Transit-Oriented Development (eTOD) planning approach. eTOD planning seeks to promote development without the displacement of existing residents and achieve community-focused benefits such as affordable housing, local economic development, and environmental sustainability. It can be a driver for more vibrant, prosperous, and resilient neighborhoods that put people of color and lower- and moderate-income residents at the center. A vital part of this plan will be a community engagement and ownership process that incorporates and appreciates the vision of residents and stakeholders from the surrounding neighborhoods throughout the development of the plan.

The firm Solomon Cordwell Buenz is leading the plan and they have brought together a strong and diverse team, including experienced planning and architectural firms and multiple Disadvantaged Business Enterprises (DBEs).

To learn more about the TSD plan, visit **Transitchicago.com/RLE/TSD**

December Public Virtual Community Meetings

Join us for a virtual community meeting on **Tuesday, December 8 (6-7:30 p.m.) or Wednesday, December 9 (1:30-3 p.m.)**
We'll be sharing updates on the project and discussing ways you can get involved in 2021, including future community meetings that discuss the TSD Plan.

Find out more about this meeting and how to join by visiting **Transitchicago.com/RLE/whats-new**

RLE Progresses on Environmental Studies and Preliminary Engineering

The CTA continues to advance environmental studies and prepare preliminary engineering documents to complete the Final Environmental Impact Statement (EIS). Since announcing the project's Preferred Alignment, an opportunity has presented itself to potentially relocate the proposed 130th station from the north side of the street – near the Metropolitan Water Reclamation District (MWRD) – to the south side of 130th Street adjacent to Altgeld Gardens.

As a result, a Supplemental Environmental Assessment is underway that will focus on investigating the impacts of this potential change to the project. Studies are now being completed on noise and vibration, traffic flow and access, and other topics. The CTA has already discussed this change with several groups representing residents in the immediate area and has received positive feedback as the new station location would position Red Line riders closer to homes, schools and recreational opportunities and farther away from the industrial land uses, truck traffic, and the MWRD treatment plant. CTA welcomes additional input on the 130th station location change in upcoming community meetings.

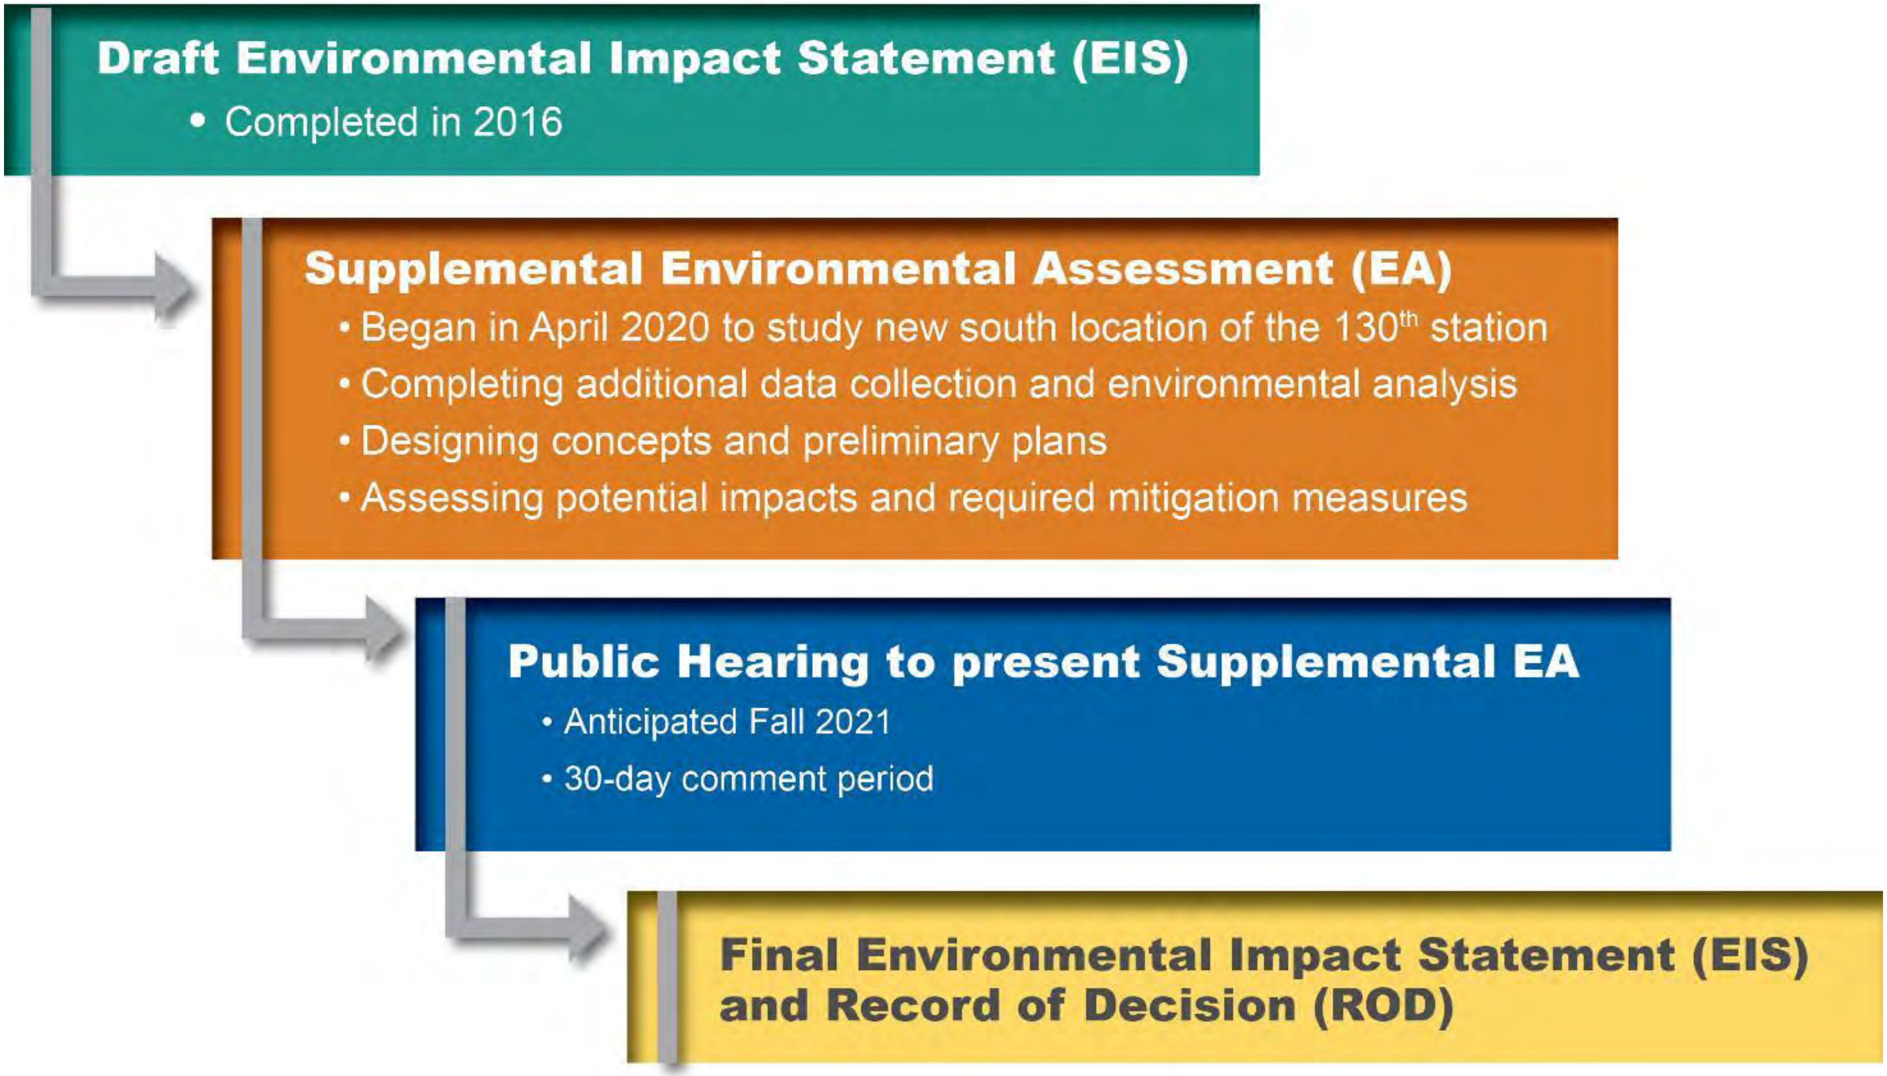
Environmental Review Process Updates

Environmental Review Process



Draft Environmental Impact Statement (EIS)

- Completed in 2016

Supplemental Environmental Assessment (EA)

- Began in April 2020 to study new south location of the 130th station
- Completing additional data collection and environmental analysis
- Designing concepts and preliminary plans
- Assessing potential impacts and required mitigation measures

Public Hearing to present Supplemental EA

- Anticipated Fall 2021
- 30-day comment period

Final Environmental Impact Statement (EIS) and Record of Decision (ROD)

Environmental Review Process Updates

Traffic and Access

Noise and Vibration

Historic and Cultural Resources

Visual and Aesthetics

Environmental studies will determine the potential impacts and facilitate consideration of measures to mitigate those impacts

Noise and Vibration

- Preliminary studies in the Draft Environmental Impact Statement (EIS)
- Detailed analysis and field measurements in the Final EIS
- Designed to reduce and mitigate noise through:
  - Noise barriers
  - Closed deck structure
  - Continuously welded rail

Transit-Supportive Development Plan

RED AHEAD

Red Line Extension

Transit-Supportive Development

- Transit-Supportive Development creates a vision for economic development as integral to the development of the new transit infrastructure.

What is *equitable* Transit-Oriented Development

- Ensures that vibrant, prosperous, healthy, and resilient community that result from access to high quality transit may be enjoyed by all residents including those in historically underinvested communities.

Transit-Supportive Development Plan

RED AHEAD Red Line Extension

The Plan will identify opportunities to encourage:

- Economic development
- Continued affordability
- Private sector investment
- Multimodal connectivity and bicycle/pedestrian access
- Support application for federal funding for the transit project
- Collaboration with City of Chicago agencies (Planning and Development, Housing, Transportation, and others)

cta
